

Capital Group Multi-Sector Income Fund (LUX)

Fund information

Fund launch date: 29 November 2022

Share class launch date: 29 November 2022

Objective:

The fund seeks to provide a high level of current income. Its secondary investment objective is capital appreciation. The fund invests generally in corporate high yield bonds, corporate investment grade bonds, emerging market bonds and mortgage and asset backed securities; the proportion held within each of these sectors will vary over time. The fund may opportunistically invest in other sectors, including US government debt, municipal debt and non-corporate credit, in response to market conditions. The fund also aims to manage a carbon footprint for its investments in corporate issuers that is lower than the index, and evaluates and applies ESG and norms-based screening to implement a negative screening policy relating to investments in corporate and sovereign issuers.

Fund size: €2.467 million

ISIN: LU2530432702

Fund type: UCITS

Base currency: USD

Current index: 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg Non-Agency CMBS Ex AAA Index and 2% Bloomberg ABS Ex AAA Index. Visit capitalgroup.com for the fund's index history.

Higher risk

This risk indicator is based on the assumption that you hold the product for 5 years. Please refer to Glossary for more information.

Fund ratings

Overall rating among 386 USD Flexible Bond funds as at 31 May 2026. Morningstar Medalist rating™ as at 30 April 2026.

Risks and other key information

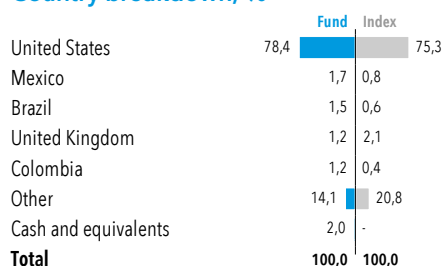

The value of investments and income from them can go down as well as up and you may lose some or all of your initial investment.

If the currency in which you invest strengthens against the currency in which the underlying investments of the fund are made, the value of your investment will decrease. Risks may be associated with investing in fixed income, emerging markets and/or high-yield securities; emerging markets are volatile and may suffer from liquidity problems. Some funds may invest in financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. There are additional ABS/MBS, Bonds, Counterparty, Derivative instruments, Emerging markets, High yield bonds, Liquidity, Operational and Sustainability risks associated with this fund.**

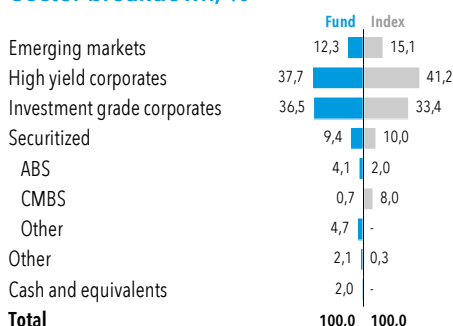

The information in relation to the index is provided for context and illustration only. The fund is actively managed. It is not managed in reference to a benchmark. **Please refer to the back of this document for a glossary of terms and additional information, including fund risks.

Capital Group Multi-Sector Income Fund (LUX)

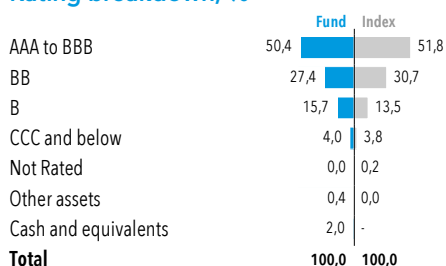

Country breakdown, %

Sector breakdown, %

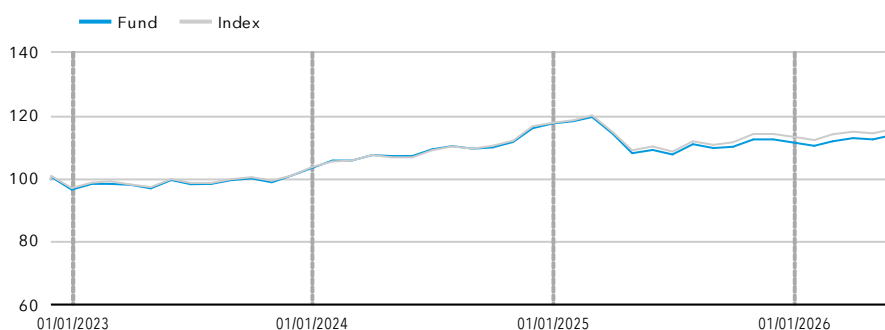

Rating breakdown, %

Rating refers to the higher of S&P, Moody's and Fitch for the highest weighted issue.

The value of a hypothetical 100 EUR investment

Fund results are shown after fees and expenses and are calculated as the increase or decrease in net asset value of the fund over the relevant period. Past results are not a guarantee of future results. Performance is shown for the past 5 years or since inception for funds launched within the period.

Capital Group Multi-Sector Income Fund (LUX)

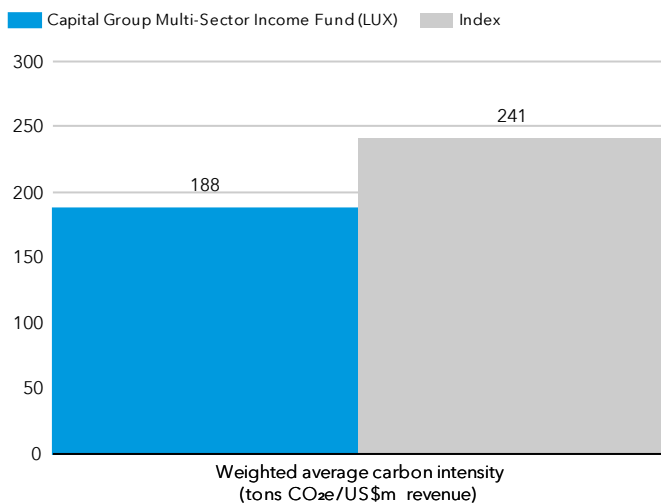

ESG and norms-based screens

The fund excludes investment in the following:

Norms-based	<ul style="list-style-type: none"> Companies that violate UN Global Compact principles
Weapons	<ul style="list-style-type: none"> Companies with any ties to controversial weapons¹ Companies involved in the intentional production of nuclear weapons²
Tobacco	<ul style="list-style-type: none"> Companies with >5% revenue from the production of tobacco
Fossil fuels	<ul style="list-style-type: none"> Companies with >10% revenue from the production and / or distribution of thermal coal Companies with >10% revenue from the extraction of oil sands Companies with >10% revenue from the production of Arctic oil
Various criteria	<ul style="list-style-type: none"> Sovereigns that score below Capital Group's ESG Sovereign thresholds

The fund will also maintain a carbon footprint that is **below index level** (for eligible securities)³

Emissions analysis⁴

The fund is currently 22% lower than the index.

Data coverage

Data coverage for the fund is 70%

Data provider

Capital Group uses data and calculation methodology provided by MSCI. Data may not be available for all portfolio holdings.

For more information: <https://www.msci.com/notice-and-disclaimer>

Assessing portfolio carbon emissions

- The Weighted Average Carbon Intensity is the metric we use to report the fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the index, as well as understand the attribution of emission results.
- At this stage, climate impact assessment includes corporates only. Sovereign bonds and cash are not in scope of the assessment.

Metric	Weighted average carbon intensity (tons CO ₂ e/US\$m revenue) ⁵
Description	Measures a portfolio's exposure to carbon-intensive companies
Calculation methodology	Sum product of the portfolio weights and the companies' carbon intensity

Investors should take into account all the characteristics and objectives of the fund as described in its prospectus. Information on sustainability-related aspects of the fund can be found on our website's Fund Centre page.

Sources: Capital Group, MSCI

Norms-based analysis determines whether an issuer complies with the universal principles in the United Nations Global Compact (UNGC).

¹ Companies that have any ties to cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons and/or non-detectable fragments.

² These exclusions cover companies involved in the intentional production of nuclear missiles and warheads: i) Companies that produce essential components developed or significantly modified for exclusive use in nuclear weapons. This includes the components of missile systems deployed only for carrying a nuclear warhead. ii) Prime contractors leading a country's nuclear missile program and the development of the entire missile, including those collaborating with government agencies to equip them with nuclear warheads. iii) Companies involved in the production, storage, processing or enrichment of fissile materials used for nuclear weapons.

³ For securities for which this can be measured, currently defined as corporate bonds. Index refers to 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg Non-Agency CMBS Ex AAA Index and 2% Bloomberg ABS Ex AAA Index.

⁴ Carbon footprint calculation is based on Scope 1 and 2 emissions. Scope 1: direct emissions from the company's facilities. Scope 2: indirect emissions linked to the company's energy consumption.

⁵ Carbon dioxide equivalent (CO₂e) is the number of metric tons of CO₂ emissions with the same global warming potential as one metric ton of another greenhouse gas.

For France: Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this fund presents disproportionate communication on the consideration of non-financial criteria in its investment policy.

Aligned companies – their core business is currently majority-aligned to the UN SDGs.

Asset class – A group of financial instruments which have similar financial characteristics and behave similarly in the market place. Examples include fixed income, equity and multi-asset.

Balanced – Funds investing in a flexible mix of equities and fixed income securities.

Base currency – The base currency of a mutual fund refers to the currency in which the fund's net asset value (NAV) is calculated.

Bloomberg code – Issued by Bloomberg, this is a code that uniquely identifies a specific securities issue.

Composite – A single group of discretionary portfolios that collectively represent a particular investment strategy or objective.

Derivatives – A derivative is a contract between two or more parties whose value is based on an agreed-upon underlying financial asset (like a security) or set of assets (like an index). Common underlying instruments include bonds, commodities, currencies, interest rates, market indexes, and stocks.

Dividend – A sum of money paid regularly by a company to its shareholders out of its profits (or reserves).

Dividend yield – Dividend yield represents the ratio of dividends paid over the last 12 months to the net asset value as of the last month end. However, an annualised dividend yield is calculated on the basis of the most recent dividend payment when, in the last 12 months, i) a share class has been launched for the first time or ii) a share class changed its dividend payment frequency or iii) the dividend payment frequency was modified as a result of a corporate event (for instance a special dividend distribution or a closure and relaunch of the share class).

Effective duration – Effective duration provides a measure of interest-rate sensitivity. The longer duration is, the more sensitive to shifts in interest rates.

Emerging market – An emerging market economy is the economy of a developing nation that is becoming more engaged with global markets as it grows.

EMD – Emerging market debt (EMD) is a term used to describe bonds issued by countries with developing economies as well as by corporations within those nations.

Equity – Shares of ownership in a company.

Fixed income funds – Funds investing primarily in fixed income securities.

Fixed income securities – A debt instrument issued by a government, corporate or other entity.

Fund – A financial vehicle made up of a pool of money collected from many investors to invest in securities such as stocks and bonds.

Futures – Financial contracts under which an agreed price for an asset must be transacted at a certain time regardless of the asset's current market value.

Growth funds – Equity funds focused on long-term capital appreciation.

Growth and income funds – Equity funds focused on generating long-term returns from a combination of capital appreciation and dividend income.

Hedging – A method of reducing unnecessary or unintended risk, in this case particularly as it pertains to currency.

High yield – A high yield bond is one with a lower credit rating than an investment grade bond. High yield bonds typically offer a higher rate of interest because of a greater risk of default.

Index – An index represents a particular market or segment of it, and is a tool used to describe the market and compare returns on specific investments.

International Securities Identification Number (ISIN) Code – A code that uniquely identifies a specific securities issue.

Key Investor Information Document (KIID) / Key Information Document (KID) – Document that provides key information about investment funds.

Liquidity – Liquidity describes the degree to which an asset or security can be quickly converted into cash without a significant concession in price.

Multi-asset income – Funds aiming to provide current and/or growing income by investing in a flexible mix of equities and fixed income securities.

Net asset value (NAV) – The month-end NAV is an additional, information-only NAV of the fund. It is calculated on the last week-day of the month, using the same methodology as used by indices, to enable investors to carry out comparisons with relevant benchmarks. No dealing activity can be based on such net asset value per share.

PRIIPs – Packaged retail investment and insurance-based products make up a broad category of financial assets provided to consumers in the European Union.

Risk Indicator – The risk indicator is a guide to the level of risk of this product compared to other products.

Securitized – Financial securities that are created by securitising individual loans (debt).

SEDOL – Stock Exchange Daily Official List

Sustainable Finance Disclosure Regulation (SFDR) – A European regulation that lays down harmonized rules for financial market participants on transparency with regard to the integration of sustainability risks and the provision of sustainability-related information for financial products.

Share class – Each Capital Group fund has different share classes, such as B and Z. Each share class will have different levels of minimum investment, fees and expenses, and returns will differ.

“Acc” are accumulating share classes.

“Inc” are dividend-distributing share classes (either net dividend, “d” or gross dividend “gd”).

“d” are dividend distributing share classes (net dividends).

“gd” are dividend-distributing classes (gross dividends).

“gdh” are dividend-distributing hedged classes (gross dividends).

“gdm” are dividend-distributing with a monthly frequency (gross dividends).

Standard deviation – Standard deviation is calculated after fees and is a measure of how much an investment's returns can vary from its average return.

Total expense ratio (TER) – A measure of the total costs associated with running the fund, including marketing and distribution costs.

Total return – The overall actual rate of return of an investment over a given evaluation period.

Transitioning companies – those who are transitioning their business to higher positive alignment to the UN SDGs over the long term, with material near- to medium-term change expected.

Turnover – Turnover is calculated over the last 12 months as the lesser of monthly purchases and sales divided by the average net assets.

UCITS – Undertakings for Collective Investment in Transferable Securities (UCITS) is a regulatory framework that allows for the sale of cross-Europe mutual funds.

UN Global Compact – Conceived by the United Nations, a call to companies to align standards and operations with universal principles on human rights, labour, environment and anti-corruption.

UN Sustainable Development Goals (SDGs) – A collection of 17 interlinked objectives adopted by the United Nations in 2015 designed as a universal call to action to end poverty, protect the planet, and ensure that by 2030 all people enjoy peace and prosperity.

Yield – The income returned on an investment, such as the interest or dividends received from holding an asset. The yield is usually expressed as an annual percentage rate based on the investment's cost, current market.

Yield to worst – The lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.

Fund risks

Fund	Key risks
Capital Group Multi-Sector Income Fund (LUX)	1, 3, 5, 6, 7, 9, 10, 11, 13
<ol style="list-style-type: none">1. ABS/MBS risk: The fund may invest in mortgage- or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.2. Bond Connect risk: Investments in Chinese onshore bonds traded on CIBM via Bond Connect are subject to various risks associated with clearing and settlement, as well as liquidity, regulatory and counterparty risks.3. Bonds risk: The value of bonds can change as a result of interest rate changes – typically when interest rates rise, bond values fall. Funds investing in bonds are exposed to credit risk. A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.4. China IBM risk: The fund may investment on the China Interbank Bond Market. This market can be volatile and subject to liquidity constraints due to low trading volumes. As a result, the price of debt securities traded on this market can fluctuate significantly, spreads may be large, and realisation costs may be significant.5. Counterparty risk: Other financial institutions provide services to the fund such as safekeeping of assets, or may serve as a counterparty to financial contracts such as derivatives. There is a risk the counterparty will not meet their obligations.6. Derivative instruments risk: Derivatives are financial instruments deriving their value from an underlying asset and may be used to hedge existing exposures or to gain economic exposure. A derivative instrument may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.7. Emerging markets risk: Investments in emerging markets are generally more sensitive to risk events such as changes in the economic, political, fiscal and legal environment.8. Equities risk: The prices of equity securities may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund, overall market changes, local, regional or global political, social or economic instability and currency fluctuations.9. High yield bonds risk: Lower rated or unrated debt securities, including high yield bonds, may, as a result, be subject to liquidity, volatility, default and counterparty risk.10. Liquidity risk: In stressed market conditions, certain securities held by the fund may not be able to be sold at full value, or at all. This could cause the fund to defer or suspend redemptions of its shares, meaning investors may not have immediate access to their investment.11. Operational risk: The risk of potential loss resulting from inadequate or failed internal processes, people and systems or from external events.12. Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect risk: This fund may invest in securities traded and cleared on these two programs, they are subject to risks associated with the legal and technical framework of Stock Connect and/or may involve clearing and settlement, regulatory and counterparty risks.13. Sustainability risk: Environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment of the fund.
