#### Fund results

#### Past results are not a guarantee of future results.

Fund results are shown after fees and expenses and are calculated as the increase or decrease in net asset value over the relevant period. Results based on month-end NAV and on the assumption that any distributions are reinvested. See glossary for details.

#### Strategy results

Results prior to Capital Group New Perspective Fund (AU) (CGNPAU)'s launch on 20 November 2015 are derived from the American Funds New Perspective Fund (AF NPF) in A\$ from 31 March 1973. CGNPAU and AF NPF are managed by the same team of managers and have the same investment strategy and risk profile. From 1 December 2023, CGNPAU's underlying portfolio, Capital Group New Perspective Fund (LUX), applies ESG and norms-based screens and a carbon target, which do not apply to AF NPF.

Strategy results are after fees and expenses.

## Assessing portfolio carbon emissions

- The Weighted Average Carbon Intensity is the metric we use to report the fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the index, as well as understand the attribution of emission results.

<b>Metric</b>	Weighted average carbon intensity (tons CO <sub>2</sub> e/US\$m revenue) <sup>5</sup>
<b>Description</b>	Measures a portfolio's exposure to carbon-intensive companies
<b>Calculation methodology</b>	Sum product of the portfolio weights and the companies' carbon intensity

**Data is based on Capital Group New Perspective Fund (LUX), in which Capital Group New Perspective Fund (AU) is invested.**

Sources: Capital Group, MSCI

Norms-based analysis determines whether an issuer complies with the universal principles in the United Nations Global Compact (UNGC).

<sup>1</sup> Companies that have any ties to cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons and/or non-detectable fragments.

<sup>2</sup> These exclusions cover companies involved in the intentional production of nuclear missiles and warheads: i) Companies that produce essential components developed or significantly modified for exclusive use in nuclear weapons. This includes the components of missile systems deployed only for carrying a nuclear warhead. ii) Prime contractors leading a country's nuclear missile program and the development of the entire missile, including those collaborating with government agencies to equip them with nuclear warheads. iii) Companies involved in the production, storage, processing or enrichment of fissile materials used for nuclear weapons.

<sup>3</sup> Index: MSCI ACWI

<sup>4</sup> Carbon footprint calculation is based on Scope 1 and 2 emissions. Scope 1: direct emissions from the company's facilities. Scope 2: indirect emissions linked to the company's energy consumption.

<sup>5</sup> Carbon dioxide equivalent (CO<sub>2</sub>e) is the number of metric tons of CO<sub>2</sub> emissions with the same global warming potential as one metric ton of another greenhouse gas.

**Asset class**

A group of financial instruments which have similar financial characteristics and behave similarly in the market place. Examples include fixed income, equity and multi-asset.

**Derivative**

A financial contract the value of which is linked to an underlying asset or index. Common underlying instruments include bonds, commodities, currencies, interest rates, market indexes, and stocks.

**Dividend**

A sum of money paid regularly by a company to its shareholders out of its profits (or reserves).

**Effective duration**

Effective duration provides a measure of interest-rate sensitivity. The longer duration is, the more sensitive to shifts in interest rates.

**Emerging market**

A country or region with a developing economy, often experiencing growth and industrialisation.

**EMD**

Emerging market debt (EMD) is a term used to describe bonds issued by countries with developing economies as well as by corporations within those nations.

**Equity**

Shares of ownership in a company.

**Fixed income securities**

A debt instrument issued by a government, corporate or other entity.

**Fund**

A financial vehicle made up of a pool of money collected from many investors to invest in securities such as stocks and bonds.

**Futures**

Financial contracts under which an agreed price for an asset must be transacted at a certain time regardless of the asset's current market value.

**Hedging**

A method of reducing unnecessary or unintended risk. An example is currency hedging.

**High yield bond**

A bond with a lower credit rating than an investment grade bond. High yield bonds typically offer a higher rate of interest because of a greater risk of default.

**Index**

An index represents a particular market or segment of it, and is a tool used to describe the market and compare returns on specific investments.

**International Securities Identification Number (ISIN) Code**

A code that uniquely identifies a specific securities issue.

**Liquidity**

The degree to which an asset or security can be quickly converted into cash without a significant concession in price.

**Net asset value (NAV)**

The month-end NAV is an additional, information-only NAV of the fund. It is calculated on the last week-day of the month, using the same methodology as market indices, so investors can compare a fund with relevant benchmarks.

**Operating currency**

The operating currency of a mutual fund refers to the currency in which the fund's net asset value (NAV) is calculated.

**Securitized**

Financial securities that are created by securitising individual loans (debt).

**Standard deviation**

Standard deviation is calculated after fees and is a measure of how much an investment's returns can vary from its average return.

**Total return**

The overall actual rate of return of an investment over a given evaluation period.

**Turnover**

Turnover is calculated over the last 12 months as the lesser of monthly purchases and sales divided by the average net assets.

**Yield to worst**

The lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.

**Risk factors you should consider before investing:**

- **This material is not intended to provide investment advice or be considered a personal recommendation.**
- **The value of investments and income from them can go down as well as up and you may lose some or all of your initial investment.**
- **Past results are not a guarantee of future results.**
- **If the currency in which you invest strengthens against the currency in which the underlying investments of the fund are made, the value of your investment will decrease. Currency hedging seeks to limit this, but there is no guarantee that hedging will be totally successful.**
- **The Product Disclosure Statement (PDS) set out risks, which, depending on the fund, may include risks associated with investing in fixed income, derivatives, emerging markets and/or high-yield securities; emerging markets are volatile and may suffer from liquidity problems.**
