

22 June 2026

IMPORTANT NOTE:

THIS NOTICE IS IMPORTANT AND REQUIRES YOUR IMMEDIATE ATTENTION. IF IN DOUBT, PLEASE SEEK PROFESSIONAL ADVICE. Capital International Management Company Sàrl ("**Management Company**") accepts responsibility for the information contained in this Notice as being accurate at the date hereof.

Capitalised terms used herein not otherwise defined have the meaning ascribed to those terms in Capital International Fund's ("**Company**") Hong Kong offering documents of the Company (comprising the Luxembourg Prospectus, the Hong Kong Covering Document and Product Key Facts Statement of each fund) ("**Hong Kong Offering Documents**").

Liquidation Notice on your investment

Liquidation of Capital Group European Opportunities (LUX) (the "Sub-Fund") in Hong Kong

Dear Hong Kong Shareholders,

We are writing to inform you that the Sub-Fund in which you own shares is scheduled for liquidation on or around 23 July 2026 (the "**Effective Date**"). **No action is required, although you may wish to take one of the optional actions described below in section "IV. Options available for Hong Kong Shareholders" of Schedule A.**

The latest versions of the Hong Kong Offering Documents, the Company's Articles of Incorporation ("**Articles**") and (where applicable) the latest annual and semi-annual reports of the Company are available, free of charge, on the Company's Hong Kong website <https://www.capitalgroup.com/hk/en>¹. Hard copies will also be available upon request from Capital International, Inc. (the "**Hong Kong Representative**") at 2601, One International Finance Centre, 1 Harbour View Street, Central, Hong Kong.

If you have questions after reading this notice, feel free to contact your financial adviser or the Hong Kong Representative (by telephone at (852) 2842 1029).

If you are acting as an intermediary for investors in the Sub-Fund, you must inform the ultimate beneficial owners of the shares in the Sub-Fund of the information outlined in this notice as soon as possible.

Sincere best wishes,

The Board of Directors

¹ This website has not been reviewed by the Hong Kong Securities and Futures Commission.

Schedule A

I. Reason for liquidation

The Sub-Fund was launched in February 2021 and as at 5 May 2026, its net asset value was (including the Russian Security (as defined below), which is currently valued at zero) approximately EUR 42,892,983, which have been primarily sourced by Capital Group entities.

Managing the Sub-Fund in an economically efficient manner is proving challenging due to low assets and limited potential for future growth. As a result, the Board of Directors of the Company (the “**Board**”) has determined that liquidating the Sub-Fund and returning the liquidation proceeds is in the best interests of investors.

This decision is based on Article 26 of the Articles and the provisions outlined in the Hong Kong Offering Documents, which permit the Board to close down a fund as a matter of economic rationalization.

The Management Company confirms that the liquidation process as disclosed in this notice is in compliance with the relevant provisions in the Hong Kong Offering Documents and Articles.

With effect from the date of this notice, the Sub-Fund is no longer allowed to be marketed to the public in Hong Kong and shall not accept subscriptions or switches from new investors.

II. Immaterial illiquid holdings

The Sub-Fund’s portfolio currently holds 1 Russian asset that is illiquid due to European sanctions regime applicable to it, specifically Council Regulation (EU) No 833/2014 of July 31, 2014. This regulation imposes restrictive measures in response to Russia’s actions in Ukraine (the “**Russian Security**”). As at 10 March 2022, the Russian Security was valued at USD 44,784.61, which was the latest valuation available for the Russian Security prior to the suspension of valuation, at the time representing 0.1% of the Sub-Fund’s net asset value. As a result of the above, the Russian Security was subsequently valued at zero on 11 March 2022, and is still currently valued at zero.

The valuation of the Russian Security at zero value was made in accordance with, amongst others, Article 22 of the Articles and the provisions under the section “Net Asset Value” of the Luxembourg Prospectus and “Calculation of Net Asset Value” of the Hong Kong Covering Document with due care, skill and diligence and in good faith in consultation with the Depositary which the Board considers to be the fair value of the Russian Security.

III. Timeline and process for the liquidation of the Sub-Fund

To help ensure an orderly and efficient liquidation process, the Sub-Fund may begin liquidating holdings approximately 5 Business Days prior to the Effective Date in the best interest of the Shareholders. As a result, the Sub-Fund’s portfolio may deviate from its investment objective and policy, as specified in the Hong Kong Offering Documents, including the relevant UCITS regulations, during this period.

Given the ongoing geopolitical situation regarding Russia, the Management Company does not expect that the orderly

transaction and valuation of the Russian Security can resume on or before the Effective Date. Where the orderly transaction and valuation of the Russian Security remains impracticable after the Effective Date, the Russian Security will continue to be held in custody by the Depositary under the current custodial arrangement of the Sub-Fund. The Russian Security will remain in the Fund's custody until it can be liquidated, at which point the Shareholder will receive the proportionate net liquidation proceeds as described in the following paragraph from the Russian Security. Alternatively, the Shareholder will be informed of any changes to the arrangement with respect of the treatment of the Russian Security by the Board.

If the Russian Security is sold at a value higher than zero after the Effective Date, any net proceeds from the sale of the Russian Security (after deducting the associated costs of distribution, and taxes, etc.) will be distributed to Shareholders, as soon as reasonably practicable, in any case within one calendar month of the liquidation of the Russian Security, who remain invested in the Sub-Fund on the Effective Date, being the beneficial owners of the Russian Security, in proportion to their respective holding of shares in the Sub-Fund as of the Effective Date. **Accordingly, if a Hong Kong Shareholder redeems or switches their holdings in the Sub-Fund prior to the Dealing Deadline, they will not receive any of the proceeds (if any) relating to the realization of the Russian Security after the Effective Date.** The Management Company will determine if such distribution will be made in one single payment or in tranches based on the best interests of the Shareholders who are entitled to the distribution, taking into consideration matters such as the timing of the disposal of the Russian Security, the amount of sales proceeds and any associated costs of distribution. For the avoidance of doubt, the transaction costs associated with the disposal of the Russian Security will be borne by the Management Company, and the Management Fee and Annual Administration Charge will be waived after the Effective Date. Please note that where such proceeds are not enough to cover the relevant costs, no distribution will be made and any residual amounts will be retained by the Company. **Updates by way of notice regarding the status of the Russian Security will not be issued to Shareholders on a regular basis. However, in the event that the orderly valuation and transaction of the Russian Security resumes and further distribution(s) will be made, Shareholders who are entitled to the distribution will be informed accordingly.**

The Management Company considers that the above arrangement for handling the Russian Security will facilitate the liquidation of the Sub-Fund and will be in the best interests of Shareholders. The Depositary agrees with the liquidation of the Sub-Fund and the above arrangement in relation to the Russian Security. Both the Depositary and the Administrative Manager are ready to and will support the liquidation of the Sub-Fund and the above arrangement in relation to the Russian Security. **Should it become possible to dispose of the Russian Security before the Effective Date, the Management Company will consider if any revision to the approach of the proposed liquidation is required, taking into consideration the best interests of the Shareholders.**

The Sub-Fund will remain to be supervised by its home regulator, the Commission de Surveillance du Secteur Financier, after the Effective Date until the completion of the liquidation of the Russian Security and distribution of the remaining proceeds to investors (if any).

IV. Options available for Hong Kong Shareholders

(a) Redemption or switching of existing holdings in the Sub-Fund

If Hong Kong Shareholders do not wish to continue with their investments in the Sub-Fund, they may redeem their shares in the Sub-Fund and/or switch their shares in the Sub-Fund to another SFC authorised fund² of the Company as per the provisions of the Hong Kong Offering Documents, on or before the Dealing Deadline without redemption charges and switching fee (as the case may be). Please note that while the Management Company will not impose any switching fees on a switching instruction, the bank or financial adviser or the intermediary through which the Hong Kong Shareholder subscribed into the Sub-Fund may charge a fee of up to 5.25% of the amount to be invested in the new shares (as stated in the Hong Kong Offering Documents) at their discretion. The Hong Kong Shareholder may want to review these changes with their tax adviser and their financial adviser or local representative. Note that redeeming or switching shares could have tax consequences.

² SFC authorisation is not a recommendation or endorsement of the Company or the sub-funds nor does it guarantee the commercial merits of a sub-fund or its performance. It does not mean a sub-fund is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors

No redemption or switching requests from Hong Kong Shareholders will be accepted after the Dealing Deadline.

(b) Take no action and receive liquidation proceeds automatically

Hong Kong Shareholders who have not exercised their right to redeem or switch their shares in the Sub-Fund by the Dealing Deadline will have their shares automatically redeemed free of any redemption fee on the Effective Date, at the net asset value per share calculated as at the close of business on the Effective Date. The Management Company will send the liquidation proceeds on or around 28 July 2026 to the address of record on the Hong Kong Shareholder's account, in any case, within one calendar month of the Effective Date and, in respect of the liquidation proceeds of the Russian Security, subject to this notice, as and when there can be orderly transaction and valuation of the Russian Security.

Any liquidation proceeds that cannot be distributed and/or any unclaimed proceeds upon liquidation will be deposited with the "Caisse de Consignation" in Luxembourg. If not claimed, under Luxembourg law, such proceeds shall be forfeited after 30 years after being deposited with the "Caisse de Consignation".

V. Costs of liquidation

The Management Company will bear the costs of the expenses incurred in the liquidation and subsequent withdrawal of authorization of the Sub-Fund from the SFC, including but not limited to legal and regulatory charges as well as any transaction costs relating to the liquidation of the Russian Security. However, any transaction costs relating to the liquidation of assets other than the Russian Security will be borne by the Sub-Fund. These transaction costs are normal trading costs and are unknown as at the date of this notice as such costs will be calculated with reference to the market conditions and the Sub-Fund's portfolio at the appropriate time, but are expected to be non-material (with reference to the existing net asset value of the Sub-Fund). There are no unamortized preliminary expenses associated with the Sub-Fund.

As noted above, the Management Fee and Annual Administration Charge will be waived after the Effective Date.

VI. Tax implications

For so long as they are authorised by the SFC, the Company and the Sub-Fund will not expect to be subject to Hong Kong tax in respect of any of their authorised activities.

No tax will be payable by Shareholders in Hong Kong in respect of dividends or other distributions of the Sub-Fund or in respect of any capital gains arising on a liquidation, sale, redemption or other disposal of shares, except that Hong Kong profits tax may arise where such transactions form part of a trade, profession or business carried on in Hong Kong.

Shareholders should seek independent advice on the taxation and other consequences of the changes affecting their investment.

IMPORTANT INFORMATION FOR HONG KONG INVESTORS

This Hong Kong Covering Document must be read in conjunction with the Prospectus of Capital International Fund (the “**Company**”) dated June 2026 (the “**Prospectus**”) and the Product Key Facts Statements (“**KFS**”) of the Funds (as defined below). Investors should refer to the Prospectus for full details relating to the Company, an investment company with variable capital (société d'investissement à capital variable) organised under the laws of the Grand Duchy of Luxembourg on 8 October 1992. The Prospectus, this Hong Kong Covering Document and the product key facts statements together form the offering document (the “**Hong Kong Offering Document**” or “**HKOD**”) of the Company and the Funds. The purpose of this Hong Kong Covering Document is to set out information relating to the Company and the Funds which is particular to the offering of the shares of the Funds (the “**Shares**”) to investors in Hong Kong.

Capitalised terms used in this Hong Kong Covering Document shall, unless otherwise defined or re-defined herein or unless the context otherwise requires, have the meanings ascribed to them in the Prospectus.

Important – if you are in any doubt about the contents of the HKOD, you should seek independent professional financial advice.

WARNING: In relation to the sub-funds as set out in the Prospectus, only the Company and the following sub-funds (each a “Fund”) are authorised by the Securities and Futures Commission of Hong Kong (the “SFC”) pursuant to Section 104 of the Securities and Futures Ordinance (Cap 571, Laws of Hong Kong) (the “SFO”), and hence may be offered to the public of Hong Kong:

Capital Group European Core Equity Fund (LUX)
Capital Group Global Allocation Fund (LUX)
Capital Group New Perspective Fund (LUX)
Capital Group Global Equity Fund (LUX)
Capital Group Japan Equity Fund (LUX)
Capital Group World Dividend Growers (LUX)
Capital Group Global High Income Opportunities (LUX)

Capital Group Multi-Sector Income Fund (LUX)

Please note that the Prospectus is a global offering document and therefore also contains information of the following sub-fund(s) which are not authorised by the SFC:

Capital Group Emerging Markets Equity Fund (LUX)
Capital Group Global Screened Allocation Fund (LUX)
Capital Group Global Total Return Bond Fund (LUX)
Capital Group Global New Perspective Fund (LUX)

No offer shall be made to the public of Hong Kong in respect of the above unauthorised sub-funds. The issue of the HKOD was authorised by the SFC only in relation to the offer of the above SFC-authorised sub-funds to the public of Hong Kong.

Intermediaries should take note of this restriction.

SFC authorisation is not a recommendation or endorsement of the Company or the Funds nor does it guarantee the commercial merits of a Fund or its performance. It does not mean a Fund is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

The Directors of the Company accept full responsibility for the accuracy of the information contained in this document as being accurate at the date of publication. Neither the delivery of this document nor the offer or issue of Shares relating to a Fund shall under any circumstance constitute a representation that the information in this document is correct as of any time subsequent to such date. The offering document may be updated from time to time. Prospective investors should ensure that they have reviewed the latest version of the offering document before making an investment decision. The Directors of the Company confirm, having made all reasonable enquiries, that to the best of their knowledge and belief there are no other facts the omission of which would make any statement in this document misleading.

The Funds are offered solely on the basis of the information in the Hong Kong Offering Document and the accounts, interim reports and annual reports of the Company. Any information not in the Hong Kong Offering Document given by any distributor, sub-distributor, salesman or other person should be regarded as unauthorised and accordingly must not be relied upon.

CLASSES OF SHARES

Please refer to the section headed “Appendix – Funds and their Classes offered in Hong Kong” below for information regarding the Funds, their share classes offered to the Hong Kong public, their distribution policy and currency of denomination.

Investors should also refer to the sub-section “The Classes” under the section “The Funds and their Structure” in the Prospectus for further details on each Class and for information on any additional features which each Equivalent Class may have.

If the Management Company determines, in its discretion, that the applicant investor is not eligible for a selected Class, it may reject an investment request. If the Management Company determines, in its discretion acting in good faith and on reasonable grounds and subject to applicable law and regulations, that an existing investor is not eligible anymore in the Class it is invested in it may, in its discretion, switch the investor into the nearest similar available Class without seeking any pre-approval from the investor or redeem the investor.

INVESTMENT DELEGATION

The Management Company may, from time to time, appoint the Investment Advisers/Sub-Advisers set out in the sub-section “The Investment Advisers and Sub-Adviser of the Company” under the section “Capital International Fund – General and Corporate Information” in the Prospectus in respect of each of the Funds, without prior notice.

INVESTMENT OBJECTIVES AND POLICIES

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant Fund Information Sheet in Annex 2 of the Prospectus.

Financial Derivative Instruments

The net derivative exposure of each of the SFC-authorised Fund, except for Capital Group Global Intermediate Bond Fund (LUX) and Capital Group Global Bond Fund (LUX), may be up to 50% of the relevant Fund's net asset value.

For Capital Group Global Intermediate Bond Fund (LUX), the net derivative exposure may be more than 50% but up to 100% of the Fund's net asset value.

For Capital Group Global Bond Fund (LUX), the net derivative exposure may be more than 100% of the Fund's net asset value.

General

Unless otherwise specified in the particulars relating to each Fund in the relevant Fund Information Sheet in Annex 2 of the Prospectus and/or in this Hong Kong Covering Document, a Fund may invest in any country, in equity securities issued by companies of any market size, of any industry or sector (as the case may be), and in fixed income securities issued or guaranteed by companies registered in a particular region or with significant operations in such region in such proportions as the Management Company or Investment Adviser deems appropriate.

Credit ratings

The Investment Adviser maintains internal policies and procedures in assessing the credit risk of securities or instruments invested by a Fund. External ratings are only one of the factors taken into consideration in assessing the credit quality of an instrument. The Management Company does not rely mechanistically on external ratings.

Fund details

In addition to the specific investment objective and policies of each Fund as provided in the relevant Fund Information Sheet in Annex 2 of the Prospectus, further clarificatory information is given below:

Capital Group European Core Equity Fund (LUX)

The Fund normally invests in shares of companies in any developed country in Europe. The Fund mainly (i.e. at least 80% of its net asset value) invests in listed equities of companies based in developed European countries. The Fund is managed on a stock-by-stock basis.

"Developed European countries", for the purposes of the Fund, refer to countries in Europe that are not considered Emerging Market, including but not limited to the developed markets countries in the MSCI Europe Index.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the MSCI Europe Index. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the MSCI Europe Index to monitor the investment's carbon emission. Should the WACI of the Fund not be lower than the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, the Fund's Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group Global Allocation Fund (LUX)

The Fund invests primarily in listed equities and Investment Grade Bonds (including money market instruments) of companies and governments, as well as other fixed income securities including mortgage and asset backed securities. Portfolio investments are usually admitted to an official listing or dealt in on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public), and can be denominated in various currencies. Such investments in other regulated markets may include unlisted equity and debt securities, such as corporate unlisted equities and debt securities issued by a sovereign. Aside from listed equities and Investment Grade Bonds, the Fund may also invest in High Yield Bonds.

The Fund may invest not more than 30% of its net asset value in debt securities which are unrated (an “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s) and deemed below investment grade by the Investment Adviser or rated below investment grade (including High Yield Bonds), and not more than 2% of its net asset value in distressed securities at the time of purchase. The Fund may invest not more than 15% of its net asset value in mortgage and asset backed securities (including asset backed commercial paper), and not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund may invest up to 5% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund may invest more than 10% and up to 30% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Egypt and Greece (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Adviser whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

In respect of the Fund’s investments in debt securities, in order to determine whether an unrated debt security is of a quality equivalent to the debt securities which the Fund is permitted to invest in, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate not only an issuer’s ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer’s ability to repay.

“Distressed securities”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

For the equity portion of the Fund, the Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the MSCI AC World Index. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the MSCI AC World index to monitor the investment’s carbon emission. Should the WACI of the equity portion of the Fund not be lower than the level of the Fund’s selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund’s WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG

framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The companies the Fund invest in must have good governance practices.

Capital Group New Perspective Fund (LUX), Capital Group New Economy Fund (LUX), Capital Group American Balanced Fund (LUX), Capital Group Euro Bond Fund (LUX), Capital Group Global Corporate Bond Fund (LUX), Capital Group US Corporate Bond Fund (LUX), Capital Group Multi-Sector Income Fund (LUX), Capital Group Investment Company of America (LUX), Capital Group European Core Equity Fund (LUX)

The Funds commit to maintain at least 10% (5% for Capital Group Euro Bond Fund (LUX) and Capital Group Multi-Sector Income Fund (LUX)) in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives.

The companies the Funds invest in must have good governance practices.

Capital Group New Perspective Fund (LUX)

The Fund primarily invests (at least 50% and up to 100% of its net asset value) in global equities that are admitted to an official listing or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted equity securities, such as corporate unlisted equities. The Fund may invest in securities of issuers from any country.

The Fund may invest up to 5% of its net asset value in non-convertible debt securities which are (i) rated Baa1 or below and BBB+ or below by NRSROs designated by the Investment Adviser; or (ii) unrated but determined by the Investment Adviser to be of equivalent quality, and where rating agencies differ, securities will be considered to have received the highest of these ratings. In order to determine whether an unrated debt security is of a quality equivalent to the debt securities which the Fund is permitted to invest in, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay. For the purposes of the Fund, NRSROs designated by the Investment Adviser are Standard & Poor's, Fitch and Moody's.

The Fund may also invest not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

The Fund aims to manage a carbon footprint (weighted average carbon intensity, "**WACI**") for its investments in corporate issuers that is generally at least 30% lower than the MSCI ACWI index. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the MSCI ACWI index to monitor the investment's carbon emission. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is 30% below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies Environment, Social and Governance ("**ESG**") and norms-based screening to implement exclusions for corporate issuers, with respect to certain sectors such as weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation

in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group Global Equity Fund (LUX)

The Fund seeks to achieve long-term capital growth through investment primarily (at least 50% and up to 100% of its net asset value) in listed equities, researched and selected on a world-wide basis.

The Fund normally invests in shares of companies in any country. It is managed on a stock-by-stock basis and focuses on investing in companies on a worldwide basis with long-term growth potential. Unlisted equity securities, such as corporate unlisted equities, may also be purchased.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group Japan Equity Fund (LUX)

The Fund seeks to achieve long-term capital growth through investment primarily (at least 50% and up to 100% of its net asset value) in listed equities of issuers domiciled and/or having their principal place of business in Japan.

The Fund is managed on a stock-by-stock basis and focuses on investing in companies with long-term growth potential. Unlisted equity securities, such as corporate unlisted equities, may also be purchased.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group World Dividend Growers (LUX)

The Fund seeks to provide long term total returns by investing primarily (at least 50% and up to 100% of its net asset value) in listed equity securities of companies worldwide that the Investment Adviser believes have the potential to provide combinations of dividend growth and current yield over the long term. Unlisted equity securities, such as corporate unlisted equities, may also be purchased. The Fund may invest in shares of companies from any country.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group Global High Income Opportunities (LUX)

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in bonds, particularly emerging market bonds and corporate High Yield Bonds from around the world, denominated in USD and various national currencies (including emerging market currencies).

The Fund may invest in securities of issuers from any country. Securities will normally be (a) listed on official stock exchanges or (b) traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted fixed income securities which are traded over-the-counter. The Fund may also invest up to 20% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund may also invest in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s), which will not exceed 5% of the net assets of the Fund.

The Fund is not subject to any limitation on the portion of its net asset value that may be invested in debt securities which are unrated and which the Investment Advisers deem to be below investment grade or rated below investment grade (including High Yield Bonds), except that it may only invest up to 10% of its net asset value in distressed securities at the time of purchase. The Fund may invest up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Greece and Cyprus (please note that the ratings

of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

In respect of the Fund's investments in debt securities, in order to determine whether an unrated debt security is of a quality equivalent to the debt securities which the Fund is permitted to invest in, the Investment Advisers will look at the creditworthiness of the issuer of such unrated debt security. An "unrated" security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor's, Fitch or Moody's. The Investment Advisers will evaluate not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay.

"Distressed securities", for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor's or equivalent.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the 50% Bloomberg US Corp HY 2% Issuer Capped Total Return, 20% JPM EMBI Global Total Return, 20% JPM GBI-EM Global Diversified Total Return, 10% JPM CEMBI Broad Diversified Total Return indexes and which will only apply to equities and corporate bonds. It will not apply to sovereign issuers. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the 50% Bloomberg US Corp HY 2% Issuer Capped Total Return, 20% JPM EMBI Global Total Return, 20% JPM GBI-EM Global Diversified Total Return, 10% JPM CEMBI Broad Diversified Total Return indexes to monitor the investment's carbon emission. Should the WACI of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, the Fund's Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The companies the Fund invest in must have good governance practices.

Capital Group Global Bond Fund (LUX)

The Fund invests worldwide primarily (at least 50% and up to 100% of its net asset value) in Investment Grade Bonds of governmental, supranational and corporate issuers and in other fixed income securities including mortgage and asset backed securities, denominated in various currencies. These are usually listed or traded in other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted fixed income securities which are traded over-the-counter. The Fund may invest in securities of issuers from any country.

The Fund may invest not more than 40% of its net asset value in mortgage and asset backed securities. The types of mortgaged-backed securities in which the Fund may invest are commercial mortgage backed securities (CMBS), collateralised mortgage obligations (CMO), residential mortgage backed securities (RMBS) and to be announced securities (TBA) contracts.

The Fund may also invest up to 20% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund may also invest not more than 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority), however, the

Fund does not invest in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority), which is, at the time of purchase, rated below investment grade. Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

In respect of the Fund's investments in debt securities, in order to determine whether an unrated debt security is of a quality equivalent to the debt securities which the Fund is permitted to invest in, the Investment Advisers will look at the creditworthiness of the issuer of such unrated debt security. An "unrated" security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor's, Fitch or Moody's. The Investment Advisers will evaluate not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay.

For the purposes of the Fund, "TBA" contracts are forward contracts on agency mortgage pass-through securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. The particular securities (i.e., specified mortgage pools) to be delivered or received are not identified at the trade date, but are "to be announced" on the notification date which is two days before the settlement date. However, securities to be delivered must meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted "Good-Delivery Guidelines" which are promulgated by and maintained by Securities Industry and Financial Markets Association (SIFMA). The purpose of the Good-Delivery Guidelines is to standardize various trading and settlement related issues to enhance and maintain the liquidity of the TBA market. TBAs settle once each month based on a calendar published by the SIFMA.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

FDI permitted are interest rate swaps, credit default swap indices, credit default swaps, total return swaps, forward contracts, foreign exchange options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1 of the Prospectus. FDI may be used in order to, inter alia, adjust the credit exposure and/or interest rate exposure through the use of options and future contracts; adjust the interest rate exposure through the use of interest rate swaps; adjust the credit exposure through the use of credit default swaps and total return swaps; and/or adjust the currency exposure through the use of foreign exchange forwards.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The companies the Fund invest in must have good governance practices.

Capital Group Euro Bond Fund (LUX)

The Fund seeks to maximise total return through a combination of income and capital gains, with a view towards preservation of capital. Preservation of capital is not guaranteed.

The Fund may invest in securities of issuers from any country, but seeks to invest at least two thirds of its total net assets in securities of issuers located in countries that are a part of the European Economic and Monetary Union (EMU) (for example, France and Germany). These are usually listed or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include fixed income securities which are traded over-the-counter. The Fund will not invest in bonds of a credit rating lower than B- by Standard & Poor's and/or Fitch, and/or B3 by Moody's, or unrated bonds deemed to be of equivalent standing by the Investment Advisers.

The Fund seeks to invest at least 80% of its net asset value in Investment Grade Bonds. The Fund may also invest not more than 20% of its net asset value in mortgage and asset backed securities (including asset backed commercial paper), credit-linked notes and similar instruments of a credit rating no lower than investment grade provided that the issuer is either located in a member state of the Organisation for

Economic Co-operation and Development (OECD) or an European Economic Area country and/or the assets are admitted to trading on or included in a regulated market.

The Fund may invest up to 35% of its total net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Cyprus and Greece (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

In respect of the Fund's investments in debt securities, in order to determine whether an unrated debt security is of a quality equivalent to the debt securities which the Fund is permitted to invest in, the Investment Advisers will look at the creditworthiness of the issuer of such unrated debt security. An "unrated" security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor's, Fitch or Moody's. The Investment Advisers will evaluate not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group Investment Company of America (LUX)

The Fund's investment objectives are to achieve long-term growth of capital and income.

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in common stocks, most of which have a history of paying dividends. The Fund invests in common stocks that are admitted to an official listing or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted equity securities, such as corporate unlisted equities. The issuers of securities in which the Fund invests will primarily (at least 50% and up to 100% of its net asset value) be issuers domiciled within the United States.

The Fund may invest up to 15% of its net asset value, at the time of purchase, in securities of issuers domiciled in any country outside the United States. In determining the domicile of an issuer, the Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

The Fund's equity investments are generally limited to securities of companies that are included on its eligible list. In addition, the Fund may invest up to 5% of its assets, at the time of purchase, in securities of companies that are not included on its eligible list. Securities are added to, or deleted from, the eligible list based upon a number of factors, such as the Fund's investment objectives and policies, whether a company is deemed to be an established company of sufficient quality and a company's dividend payment prospects. Although the Fund focuses on investments in medium to larger capitalization companies, the Fund's investments are not limited to a particular capitalization size. In the selection of common stocks and other securities for investment, potential for capital appreciation and future dividends are given more weight than current yield.

The Fund may also invest in debt securities. The Fund's investments in straight debt securities (i.e., not convertible into equity) will generally consist of investment grade securities. The Fund may, however, invest up to 5% of its total net asset value in debt securities rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined to be of equivalent quality by the Investment Adviser. If rating agencies differ, securities will be considered to have received the highest of these ratings. In order to determine whether an unrated debt security is of equivalent quality, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate

not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay.

The Fund may invest up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority), i.e. the United States of America. Such investments are based on the professional judgement of the Investment Adviser whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

The Fund may also invest not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The asset allocation of the Fund will change according to the Investment Adviser's views of fundamental economic and market conditions and investment trends across the globe, taking into consideration factors such as liquidity, costs, timing of execution, relative attractiveness of individual securities and issuers available in the market. For the avoidance of doubt, the Fund will primarily invest in common stocks.

An "unrated" security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor's, Fitch or Moody's.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the S&P 500 NR USD. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the S&P 500 NR USD to monitor the investment's carbon emission. Should the WACI of the Fund not be lower than the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, the Fund's Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group New World Fund (LUX)

The Fund's investment objective is long-term capital appreciation.

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in common stocks of companies that are admitted to an official listing or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public) with significant exposure to countries with developing economies and/or markets. Many of these countries may be referred to as emerging countries or emerging markets. Such investments in other regulated markets may include unlisted equity securities, such as corporate unlisted equities. The reference to "New World" in the Fund's name refers to developing economies and/or markets, such as Brazil, the Philippines, and South Africa. The Fund may invest up to 3% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund may also invest up to 50% of its net asset value in debt securities, including lower rated securities, of issuers primarily based in countries with developing economies and/or markets, or of issuers that the Investment Adviser determines have a significant portion of their assets or revenues attributable to developing countries. If rating agencies differ, securities will be considered to have received the highest of these ratings.

Included within the 50% limit described in the preceding paragraph, the Fund may invest up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is lower rated, i.e. Argentina and Pakistan (please note that the

ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Adviser whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes. The Fund may also invest not more than 5% of its net assets in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s), and not more than 3% of its net asset value in distressed securities at the time of purchase.

The Fund will generally invest at least 35% of its net asset value in equity and debt securities of issuers based primarily in qualified countries that have developing economies and/or markets, such as Brazil, the Philippines, and South Africa. In determining whether a country is qualified as a country that has a developing economy and/or market, the Investment Adviser will consider such factors as the country's per capita gross domestic product, the percentage of the country's economy that is industrialized, market capital as a percentage of gross domestic product, the overall regulatory environment, the presence of government regulation limiting or banning foreign ownership, and restrictions on repatriation of initial capital, dividends, interest and/or capital gains. The Investment Adviser will maintain a list of qualified countries and securities in which the Fund may invest. Qualified developing countries in which the Fund may invest in is also available on the Manager's website. The Fund may also, to a limited extent, invest in securities of issuers based in non-qualified developing countries.

The Fund may invest its assets in equity securities of any company, regardless of where it is based (including developed countries), if the Investment Adviser determines that a significant portion of its assets or revenues is attributable to developing countries.

The asset allocation of the Fund will change according to the Investment Adviser's views of fundamental economic and market conditions and investment trends across the globe, taking into consideration factors such as liquidity, costs, timing of execution, relative attractiveness of individual securities and issuers available in the market.

For the purposes of the Fund,

- (1) "lower rated" refers to a credit rating of Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined to be of equivalent quality. In order to determine whether an unrated debt security is of equivalent quality, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay.
- (2) an "unrated" security refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor's, Fitch or Moody's.
- (3) "distressed securities" refers to a security with a credit rating lower than CCC- by Standard & Poor's or equivalent.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group Global Intermediate Bond Fund (LUX)

The Fund seeks to preserve capital and provide income consistent with prudent investment management. The Fund aims to hold high-quality (i.e. Investment Grade) global bonds in a portfolio with an average maturity of between three and seven years. Preservation of capital is not guaranteed.

The Fund invests worldwide primarily (at least 50% and up to 100% of its net asset value) in bonds of governmental, supranational and corporate issuers and in other fixed income securities including mortgaged-backed securities and asset-backed securities, denominated in various currencies. The Fund may invest in securities of issuers from any country. These are usually listed or traded in other regulated markets. Such investments in regulated markets may include unlisted fixed income securities which are traded over-the-counter.

The Fund will only invest in high-quality (i.e. Investment Grade) global bonds and other fixed income securities at the time of purchase. If a security fails to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser), such security

must be sold within six months from its downgrading, taking into account the interests of the Fund's shareholders.

Notwithstanding the second paragraph above, the Fund may invest not more than 40% of its net asset value in mortgage- and asset-backed securities. The types of mortgaged-backed securities in which the Fund may invest are commercial mortgage backed securities (CMBS), collateralised mortgage obligations (CMO), residential mortgage backed securities (RMBS) and to be announced securities (TBA) contracts.

The Fund may also invest up to 20% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund may also invest up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) from any country (such as Germany, Japan, and Australia). Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

For the purposes of the Fund, "TBA" contracts are forward contracts on agency mortgage pass-through securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. The particular securities (i.e., specified mortgage pools) to be delivered or received are not identified at the trade date, but are "to be announced" on the notification date which is two days before the settlement date. However, securities to be delivered must meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted "Good-Delivery Guidelines" which are promulgated by and maintained by Securities Industry and Financial Markets Association (SIFMA). The purpose of the Good-Delivery Guidelines is to standardize various trading and settlement related issues to enhance and maintain the liquidity of the TBA market. TBAs settle once each month based on a calendar published by the SIFMA.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

Financial derivative instruments ("FDI") permitted are interest rate swaps, credit default swap indices, credit default swaps, forward contracts, foreign exchange options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1 of the Prospectus. FDI may be used in order to, *inter alia*, adjust the credit exposure and/or interest rate exposure through the use of options, warrants and future contracts; adjust the interest rate exposure through the use of interest rate swaps; adjust the credit exposure through the use of credit default swaps and total return swaps; and/or adjust the currency exposure through the use of foreign exchange forwards.

Capital Group US Corporate Bond Fund (LUX)

The Fund seeks to provide, over the long term, a high level of total return largely comprised of current income consistent with capital preservation and prudent risk management. Preservation of capital is not guaranteed.

The Fund invests primarily in USD-denominated corporate Investment Grade Bonds. The Fund seeks to invest at least 80% of its total net assets in corporate bonds. Investment in bonds will be limited to Investment Grade Bonds. All securities held by the Fund will be denominated in USD. The Fund may invest in securities of issuers from any country. These are usually listed or traded on other Regulated Markets. Such investments in Regulated Markets may include unlisted securities and other fixed-income securities (such as government securities) which are traded over-the-counter.

The Fund will only invest in Investment Grade Bonds at the time of purchase. If an Investment Grade Bond fails to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser), such bond must be sold within six months from its downgrading, taking into account the interests of the Fund's shareholders.

The Fund may invest in mortgage- and asset-backed securities, credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 10% of the net asset value of the Fund and provided that the issuer is either located in a member state of the OECD or an European Economic Area country and/or the assets are admitted to trading on or included in a regulated market.

The Fund may invest up to 35% of its total net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) from any country such as the United

States. Such investments are based on the professional judgement of the Investment Adviser and/or the Investment Sub-Adviser (together, the "Investment Advisers") whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Bloomberg U.S. Corporate Investment Grade index. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the Bloomberg U.S. Corporate Investment Grade index to monitor the investment's carbon emission. Should the WACI of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group AMCAP Fund (LUX) (A US equity fund with a focus on long term growth.)

The Fund seeks to provide long-term growth of capital.

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in equity securities of U.S. domiciled companies that have solid long-term growth records and the potential for good future growth. The Fund's investments in equity securities will be those that are admitted to an official listing or dealt in on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted equity securities, such as corporate unlisted equities.

The Fund may invest up to 10% of its net asset value in equity and other securities (for example, debt securities) of issuers domiciled outside the United States. In determining the domicile of an issuer, the Investment Adviser will consider whether an issuer or security is located in or is economically tied to a particular country and the determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account additional factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

The Fund may also invest not more than 5% of its net assets in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group US High Yield Fund (LUX)

The Fund seeks to provide, over the long term, a high level of total return largely comprised of current income. The secondary investment objective of the Fund is capital appreciation.

The Fund invests primarily in USD-denominated corporate High Yield Bonds. The Fund may invest in securities of issuers from any country. Securities will normally be listed or traded on other Regulated Markets. Such investments in Regulated Markets may include unlisted securities and other fixed-income securities which are traded over-the-counter.

The Fund seeks to invest at least 75% of its total net assets in USD-denominated corporate High Yield Bonds. The overall portfolio exposure to the USD currency will generally be at least equal to 90% of the value of the net assets of the Fund.

The Fund may invest up to 10% of its net asset value in each of (i) emerging markets corporate bonds, (ii) mortgage- and asset-backed securities, and (iii) equity securities and debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund may also invest up to 10% of its net asset value in distressed securities at the time of purchase.

The Fund may invest up to 35% of its total net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) from any country such as the United States. Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

“Distressed securities”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Bloomberg US Corporate High Yield 2% Issuer Capped Total Return index and which will only apply to equities and corporate bonds. It will not apply to sovereign issuers. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the Bloomberg US Corporate High Yield 2% Issuer Capped Total Return index to monitor the investment’s carbon emission. Should the WACI of the Fund not be lower than the level of the Fund’s selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund’s WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer’s participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The companies the Fund invest in must have good governance practices.

Capital Group Global Corporate Bond Fund (LUX)

The Fund seeks to provide, over the long term, a high level of total return consistent with capital preservation and prudent risk management. Preservation of capital is not guaranteed.

The Fund invests worldwide primarily in corporate Investment Grade Bonds. Unlisted securities and other fixed-income securities, including government securities, may also be purchased. These are usually listed or traded on other Regulated Markets. Such investments in other Regulated Markets may include unlisted securities which are traded over-the-counter.

The Fund seeks to invest at least 80% of its total net assets in corporate Bonds. Investment in Bonds will be limited to Investment Grade Bonds. Such bonds will be Investment Grade at the time of purchase. If an Investment Grade Bond fails to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser), such bond must be sold within three months from its downgrading, taking into account the interests of the Fund’s shareholders.

The Fund may invest in mortgage- and asset-backed securities (including asset backed commercial paper), credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 10% of the net asset value of the Fund and provided that the issuer is either located in a member state of the OECD or an European Economic Area country and/or the assets are admitted to trading on or included in a regulated market.

The Fund may invest up to 35% of its total net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority), i.e. US treasuries (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Adviser and/or the Investment Sub-Adviser (together, the "Investment Advisers") whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Bloomberg Global Aggregate Corporate Total Return Index hedged to USD. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the Bloomberg Global Aggregate Corporate Total Return Index hedged to USD to monitor the investment's carbon emission. Should the WACI of the Fund not be lower than the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser also evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group Capital Income Builder (LUX)

The Fund's primary objectives are to provide a level of current income that exceeds the average yield on U.S. stocks generally and to provide a growing stream of income over the years, expressed in USD. In determining the average yield of U.S. stocks, the Investment Manager will consider large cap companies listed in the U.S. The Fund's secondary objective is to provide growth of capital.

The Fund will generally invest at least 90% of its net asset value in a broad range of income-producing securities, including common stocks and bonds. The Fund will invest primarily (at least 50% and up to 100% of its net asset value) in equity securities. The Fund's investments in equity securities will be those that are admitted to an official listing or dealt in on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted equity securities, such as corporate unlisted equities. In addition, the Fund may invest in bonds and other debt securities of any maturity or duration, including securities issued and guaranteed by the U.S. government, securities issued by federal agencies and instrumentalities and securities backed by mortgages or other assets.

The Fund may invest up to 100% in securities of issuers domiciled in the United States, and may invest up to 50% of its net asset value in securities of issuers domiciled outside of the United States. In determining the domicile of an issuer, the Investment Adviser will consider whether an issuer or security is located in or is economically tied to a particular country and the determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account additional factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

The Fund may invest up to 35% of its total net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) from any country such as the United States. Such investments are based on the professional judgement of the Investment Adviser whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

The Fund may invest up to 20% of its net asset value in mortgage- and asset-backed securities, and up to 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible

bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund may invest up to 5% of its net asset value in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser, or unrated but determined by the Investment Adviser to be of equivalent quality. If rating agencies differ, securities will be considered to have received the highest of these ratings.

The Fund may also invest up to 5% of its net asset value in distressed securities at the time of purchase.

An “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s. In order to determine whether an unrated debt security is of equivalent quality, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate not only an issuer’s ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer’s ability to repay.

“Distressed securities”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

Capital Group Emerging Markets Debt Fund (LUX)

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in government and corporate bonds, denominated in various currencies, of issuers in the following eligible investment countries: emerging markets, countries rated Ba or lower or BB or lower by an internationally recognised credit rating agency (such as Standard & Poor’s, Fitch or Moody’s) and countries that are on an International Monetary Fund (“IMF”) program, have outstanding liabilities to the IMF, or have exited an IMF program no more than 5 years earlier. The securities which the Fund invests in are usually listed or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted fixed income securities which are traded over-the-counter.

An “Emerging Market” is defined as a country that, in the opinion of the Investment Advisers, is generally considered to be a developing country by the international financial community. Certain factors will be considered in determining whether a country is a developing country, such as whether the country is generally considered to be a developing country by the international financial community, the overall regulatory environment, limitations or bans on foreign ownership, and foreign currency restrictions.

The Fund may invest up to 10% of its net asset value in securities of issuers which are not emerging markets issuers. Notwithstanding this 10% limit, the Fund may invest in debt instruments from issuers such as US Treasury or other sovereign issuers that, in the opinion of the Investment Adviser, are of equivalent or higher quality, without being considered as securities of issuers from countries other than eligible investment countries (i.e. such investments will be considered as an investment in cash or cash equivalents, and will not be added to the 10% limit of investment in securities of issuers which are not emerging markets issuers).

The Fund may invest up to 20% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund may invest in asset-backed securities/mortgage-backed securities which will not exceed 10% of the net assets of the Fund. The Fund may invest not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund is not subject to any limitation on the portion of its net asset value that may be invested in debt securities which are unrated or rated below investment grade, except that it may only invest up to 10% of its net asset value in distressed securities at the time of purchase. The Fund may also invest more than 10% and up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Cyprus and Greece (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant

sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

An “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s.

“Investment grade”, for the purposes of the Fund, refers to a credit rating equal to or better than BBB- by Standard & Poor’s or Fitch, or Baa3 by Moody’s.

“Distressed security”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

The Fund does not enter into securities lending, repo, reverse repo or other similar over-the-counter (OTC) transactions.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer’s participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group Emerging Markets Local Currency Debt Fund (LUX)

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in Investment Grade and High Yield Bonds (both sovereigns and corporates), denominated in local currencies, of issuers in the following eligible investment countries: emerging markets, countries rated Ba or lower or BB or lower by an internationally recognised credit rating agency (such as Standard & Poor’s, Fitch or Moody’s), and countries that are on an IMF program, have outstanding liabilities to the IMF, or have exited an IMF program no more than 5 years earlier. The securities which the Fund invests in are usually listed or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted fixed income securities which are traded over-the-counter.

An “Emerging Market” is defined as a country that, in the opinion of the Investment Advisers, is generally considered to be a developing country by the international financial community. Certain factors will be considered in determining whether a country is a developing country, such as whether the country is generally considered to be a developing country by the international financial community, the overall regulatory environment, limitations or bans on foreign ownership, and foreign currency restrictions.

In general, the Fund will seek to have not more than 20% of its net asset value invested in bonds and hybrid securities (i.e. securities that combine both debt and equity characteristics, such as convertible bonds and convertible preferred shares) denominated in USD and other non-emerging markets local currencies. The Fund may invest up to 20% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect. The Fund may invest not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund may invest up to 10% of its net asset value in securities of issuers which are not emerging markets issuers. Notwithstanding this 10% limit, the Fund may invest in debt instruments from issuers such as US Treasury or other sovereign issuers that, in the opinion of the Investment Adviser, are of equivalent or higher quality, without being considered as securities of issuers from countries other than eligible investment countries (i.e. such investments will be considered as an investment in cash or cash equivalents, and will not be added to the 10% limit of investment in securities of issuers which are not emerging markets issuers).

The Fund is not subject to any limitation on the portion of its net asset value that may be invested in debt securities which are unrated or rated below investment grade, except that it may only invest up to 10% of its net asset value in distressed securities at the time of purchase. The Fund may also invest up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Cyprus and Greece (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are

based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

An “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s.

“Investment grade”, for the purposes of the Fund, refers to a credit rating equal to or better than BBB- by Standard & Poor’s or Fitch, or Baa3 by Moody’s.

“Distressed security”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer’s participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The companies the Fund invest in must have good governance practices.

Capital Group Emerging Markets Total Opportunities (LUX)

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in Investment Grade and High Yield Bonds (both corporates and sovereigns), equity, hybrid securities (i.e. securities that combine both debt and equity characteristics, such as convertible bonds and convertible preferred shares) and short-term instruments (such as treasury bills and certificate of deposits) of issuers in the following eligible investment countries: emerging markets, countries rated Ba or lower or BB or lower by an internationally recognised credit rating agency (such as Standard & Poor’s, Fitch or Moody’s), and countries that are on an IMF program, have outstanding liabilities to the IMF, or have exited an IMF program no more than 5 years earlier. The securities which the Fund invests in are usually listed or traded on other regulated markets worldwide (which include unlisted markets that are operating regularly, recognised and open to public). Such investments in other regulated markets may include unlisted equity, hybrid and bonds which are traded over-the-counter. Preservation of capital is not guaranteed.

An “Emerging Market” is defined as a country that, in the opinion of the Investment Advisers, is generally considered to be a developing country by the international financial community. Certain factors will be considered in determining whether a country is a developing country, such as whether the country is generally considered to be a developing country by the international financial community, the overall regulatory environment, limitations or bans on foreign ownership, and foreign currency restrictions.

The Fund may invest up to 100% of its net asset value in each of equities, hybrid securities and bonds. The asset allocation of the Fund will change according to the Investment Adviser and/or the Investment Sub-Adviser’s views of fundamental economic and market conditions and investment trends across the globe, taking into consideration factors such as liquidity, costs, timing of execution, relative attractiveness of individual securities and issuers available in the market.

The Fund may invest up to 10% of its net asset value in securities of issuers which are not emerging markets issuers. Notwithstanding this 10% limit, the Fund may invest in debt instruments from issuers such as US Treasury or other sovereign issuers that, in the opinion of the Investment Adviser, are of equivalent or higher quality, without being considered as securities of issuers from countries other than eligible investment countries (i.e. such investments will be considered as an investment in cash or cash equivalents, and will not be added to the 10% limit of investment in securities of issuers which are not emerging markets issuers).

The Fund may invest up to 10% of its net asset value in mortgage- and asset-backed securities, up to 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s), and up to 20% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect.

The Fund is not subject to any limitation on the portion of its net asset value that may be invested in debt securities which are unrated or rated below investment grade, except that it may only invest up to 10% of its net asset value in distressed securities at the time of purchase. The Fund may also invest more than 10% and up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Cyprus and Greece (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Advisers whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

An “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s.

“Investment grade”, for the purposes of the Fund, refers to a credit rating equal to or better than BBB- by Standard & Poor’s or Fitch, or Baa3 by Moody’s.

“Distressed security”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group World Growth and Income (LUX)

The Fund seeks to provide long-term growth of capital while providing current income. The Fund invests primarily in common stocks of companies located around the world, many of which have the potential to pay dividends.

The Fund invests primarily (at least 50% and up to 100% of its net asset value) in equity securities that are admitted to an official listing worldwide. There are no geographical restrictions or limitations in the Fund’s investments and the Fund may invest in securities of issuers from any country, including those of emerging market countries.

The Fund may invest:

- (A) up to 10% of its net asset value in non-convertible debt securities which are (i) rated Baa1 or below and BBB+ or below by NRSROs designated by the Investment Adviser; or (ii) unrated but determined by the Investment Adviser to be of equivalent quality; and
- (B) up to 5% of its net asset value in non-convertible debt securities which are (i) rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser; or (ii) unrated but determined by the Investment Adviser to be of equivalent quality, and

where rating agencies differ, securities will be considered to have received the highest of these ratings. In order to determine whether an unrated debt security is of equivalent quality, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate not only an issuer’s ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer’s ability to repay.

The Fund may invest not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund may also invest up to 3% of its net asset value in bonds issued and traded in the China Interbank Bond Market either directly or via Bond Connect. The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

Capital Group New Economy Fund (LUX)

The investment objective of the Fund is long-term growth of capital. The Fund seeks to achieve its objective by investing in securities of companies that can benefit from innovation, exploit new technologies or provide products and services that meet the demands of an evolving global economy.

In pursuing its investment objective, the Fund invests primarily (at least 50% and up to 100% of its net asset value) in common stocks that the Investment Adviser believes have the potential for growth. The Fund also invests in common stocks with the potential to pay dividends.

The Fund may invest in securities of issuers from any country, provided that the Fund may only invest up to 50% of its net asset value in securities of issuers domiciled outside the United States, including those based in developing countries (i.e. emerging markets). In determining the domicile of an issuer, the Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

The Fund may invest up to 10% of its net asset value in nonconvertible debt securities rated Baa1 or below and BBB+ or below by NRSROs designated by the Investment Adviser or unrated but determined to be of equivalent quality by the Investment Adviser. If rating agencies differ, securities will be considered to have received the highest of these ratings. In order to determine whether an unrated debt security is of equivalent quality, the Investment Adviser will look at the creditworthiness of the issuer of such unrated debt security. The Investment Adviser will evaluate not only an issuer's ability to repay their debt, but will also determine whether the pricing of such debt appropriately reflects the issuer's ability to repay.

The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI ACWI index. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the MSCI ACWI index to monitor the investment's carbon emission. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is 30% below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

Capital Group Asian Horizon Fund (LUX)

The investment objective of the Fund is to provide long-term growth of capital. The Fund invests primarily in equities of issuers domiciled in Asian countries other than Japan. The Fund seeks to invest generally at least two-thirds of its assets in equities of issuers domiciled in Asian countries, including but not limited to the PRC, but other than Japan.

In determining the domicile of an issuer, the Investment Adviser will consider whether an issuer or security is located in or is economically tied to a particular country and the determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account additional factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

The Fund will invest at least 80% of its assets in equities.

The Fund may also invest up to 15% of its assets in equities of issuers domiciled in Japan or outside of other Asian countries, provided that the Investment Adviser determines that a significant portion of those issuers'

assets or revenues are attributable to Asian countries other than Japan or provided that the Investment Adviser believes that current or future exposure to Asian countries other than Japan represents a significant part of those issuers' growth opportunities.

The Fund is not subject to any limitation on the portion of its assets that may be invested in any one country in Asia (excluding Japan) and may at times result in higher concentration in certain geographical area(s), for example the PRC.

The Fund may invest up to 5% of its assets in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

Capital Group European Opportunities (LUX)

The investment objective of the Fund is to provide long-term growth of capital. The Fund invests primarily in equities of issuers domiciled in Europe. At least 75% of the Fund's assets should be invested in equities of issuers domiciled in a member state of the European Union, in a European Economic Area country, in the United Kingdom or Switzerland. In determining the domicile of an issuer, the Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

Up to 10% of the Fund's assets may be invested in securities of issuers domiciled in non-Eligible Investment Countries (e.g. outside of Europe).

The Fund may invest in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s), which will not exceed 5% of the net assets of the Fund.

The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

Capital Group American Balanced Fund (LUX)

The Fund seeks the balanced accomplishment of three objectives: conservation of capital, current income and long-term growth of capital and income. The Fund invests primarily (i.e. at least 50% and up to 100% of its net asset value) in a broad range of securities of issuers domiciled in the United States of America, including common stocks and Investment Grade Bonds.

In general, the Fund will seek to invest at least 50% of its net asset value in equities and at least 25% of its net asset value in debt securities (including money market instruments) of corporations and governments generally rated Baa3 or better or BBB- or better by NRSROs designated by the Investment Adviser, or in unrated securities (and unrated security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor's, Fitch or Moody's) determined by the Investment Adviser to be of equivalent quality. The Fund may also invest up to 20% of its net asset value in securities of issuers domiciled outside of the United States of America which may include up to 5% of its net asset value in emerging markets. In determining the domicile of an issuer, the Fund's Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure.

The Fund may also invest in the China Interbank Bond Market up to 5% of the net asset value of the Fund, either directly or via Bond Connect.

The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

For the equity portion of the Fund, the Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than S&P 500 index (net dividends reinvested). While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using the S&P 500 index (net dividends reinvested) to monitor the investment's carbon emission. Should the WACI of the equity

portion of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund's WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The companies the Fund invest in must have good governance practices.

Capital Group Future Generations Global Opportunities Fund (LUX), Capital Group Future Generations Global Balanced Fund (LUX) and Capital Group Future Generations Global Corporate Bond Fund (LUX)

The Funds seek to invest in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with the United Nations Sustainable Development Goals ("**SDGs**"). In addition to SDG alignment, each company aligns to any single or combination of sustainable investment themes ("**Themes**") focused on global social and environmental challenges as identified by the Investment Advisers. Such Themes map to the SDGs, which provide a blueprint to achieve sustainable development across economic, social and environmental aspects:

- (i) **Health & wellbeing.** *Promotes healthy lives and well-being;*
- (ii) **Energy transition.** *Ensures access to affordable, reliable and sustainable energy;*
- (iii) **Sustainable cities & communities.** *Supports urbanisation in an inclusive, sustainable way;*
- (iv) **Responsible consumption & production.** *Supports the transition to a circular and sustainable economy;*
- (v) **Education & information access.** *Ensures inclusive, quality education and information access;*
- (vi) **Financial inclusion.** *Increases access and affordability of financial services and marketplaces;*
and
- (vii) **Clean water and sanitation.** *Ensures availability and sustainable management of water and sanitation.*

The above Themes may change over time based on the Investment Advisers' research and/or views.

Eligibility of companies

To identify eligible companies that are considered to be majority "aligned" with or "transitioning" towards higher alignment with the SDGs, the Investment Advisers perform an assessment that relies on bottom-up proprietary research. This eligibility assessment is underpinned by the Investment Advisers' sector-level "Characteristics" (which assess whether products and services within a sector contribute positively to the SDGs) and "Standards" (which examine how products and services are produced, the management of material ESG risks, the quality of corporate governance practices and any adverse environmental or social impacts). The Investment Advisers typically use revenue to assess business alignment, however in some instances other metrics may be more relevant (e.g. energy production mix for utilities). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDGs.

The Investment Advisers also assess the risks of misalignment to the SDGs. If these risks are deemed material, the company may not be deemed eligible.

- (i) "Aligned" companies ("**Aligned Companies**") are typically those companies which generate at least 50% of its revenue from products or services that are aligned with the Funds' Themes as set out above. It is believed that Aligned Companies can have significant positive impact on environmental and social goals. Some are naturally aligned through their products and services and can have

significant positive impact given their size, scale and market presence, while others are successful industry disruptors and innovators whose business activities focus on solving unmet needs or addressing under-served populations.

- (ii) “Transitioning” companies (“**Transitioning Companies**”) are those that the Investment Advisers believes are actively transitioning their business to higher positive SDG alignment over the long-term, with material near-to-medium term change expected. Transitioning Companies may have low current business alignment today but may be making significant investments into innovative solutions that could be transformational or seeking to make meaningful changes that increase positive alignment to the SDGs and will likely have a growing contribution to global sustainable development. For Transitioning Companies in particular, specific targets, development pathways and timeline to reach intended transition are also considered.

If a company is determined to be “aligned” or “transitioning” and invested into by the Fund, but subsequently determined to fail to meet the “aligned” or “transitioning” requirements thereafter the company would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Advisers identify relevant key performance indicators (KPIs) and targets to monitor progress and alignment to the SDGs. These will vary depending on the sector, the relevant Theme(s) and company. A company’s eligibility is monitored on an ongoing basis and there is a more formal “refresh” of impact thesis that occurs broadly annually. For transitioning companies in particular, KPIs may include aligned revenue, as well as other transition metrics.

Capital Group Future Generations Global Opportunities Fund (LUX)

In seeking to achieve its investment objective, at least 70% of the Fund’s investments align with environmental and/or social characteristics.

The Fund commits to maintain at least 60% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of the Themes as mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives.

In addition, the Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy¹ relating to the Fund’s investments on corporate issuers at the time of purchase. The Investment Adviser relies on third-party providers who identify a company’s participation in, or the revenue which they derive from, activities that are inconsistent with these screens. As part of this, the Investment Adviser excludes companies violating the United Nations Global Compact (UNGC) principles as well as certain companies that are involved in business activities including weapons, tobacco and fossil fuels.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

Capital Group Future Generations Global Balanced Fund (LUX)

The Fund seeks long-term growth of capital and conservation of principal through investing in equities and bonds issued by companies worldwide, which in the Investment Adviser’s opinion contribute positively to environmental and social objectives through their current or future products and/or services. The Fund also invests in other fixed-income securities, including government bonds, which meet the Investment Adviser’s proprietary eligibility criteria. In seeking to achieve its investment objective, at least 70% of the Fund’s investments in equities and bonds align with environmental and/or social characteristics.

The Fund commits to maintain at least 40% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of the Themes as

¹ Accessed via <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf> (this website has not been reviewed by the SFC).

mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives.

In addition, the Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy² relating to the Fund's investments on corporate issuers at the time of purchase. As part of this, the Fund's Investment Adviser excludes companies violating the UNGC principles as well as certain companies that are involved in business activities including weapons, tobacco and fossil fuels.

Eligibility of government bonds

Eligibility of government bonds is primarily assessed through the Investment Adviser's proprietary sovereign ESG framework (the "**Framework**"), which covers a range of ESG indicators to evaluate how well a country manages its ESG risk, for example indicators related to climate change vulnerability, dimensions of human development and various measures of governance.

The Framework draws on raw scores from three data sources:

- 1) Environmental: The Notre Dame Global Adaptation Initiative Climate Vulnerability Index;
- 2) Social: UN Human Development Index; and
- 3) Governance: World Bank's Worldwide Governance Indicators.

The Investment Adviser standardises the raw scores and assigns weightings to each of the Environmental, Social and Governance inputs to calculate overall ESG scores for a sovereign on both an absolute and a gross national income-adjusted ("**GNI-adjusted**") basis, where data is available. To be eligible for investment, governments must fulfil the following criteria: 1) score above pre-determined thresholds for their ESG scores on an absolute and GNI-adjusted basis; 2) score above pre-determined governance score thresholds on an absolute and GNI-adjusted basis; and 3) fulfil certain human rights criteria as specified by the Investment Adviser. Government-related issuers determined to be outliers in terms of low scores are excluded from the Fund's investment universe.

In addition, the Investment Adviser applies ESG exclusions to implement a negative screening policy³ to the Fund's investments in governments at the time of purchase.

Bonds issued by government-related issuers are assessed based on 1) the eligibility of the related sovereign referencing the methodology used in assessing the eligibility of government bonds and 2) the alignment of the government-related issuers' primary activities to the SDGs. If the issuer has corporate like primary activity, the SDG alignment is assessed against the Investment Advisers eligibility process for companies as described above. If the issuer has non-corporate like primary activity, its primary activity is assessed against certain pre-defined categories which are deemed to be aligned to the SDGs, or on a case-by-case basis. Examples of such pre-defined categories include Development Finance Institutions (Institutions providing capital for economic development projects) and Housing Related (Institutions contributing to the provision of affordable housing).

In general, the Fund will seek to invest at least 45% of its net asset value in equities and at least 25% of its net asset value in Investment Grade Bonds issued by corporates, sovereigns and supranational issuers (including money market instruments). However, the Fund is not expected to invest more than 10% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) that is rated below investment grade. In the event of split ratings among internationally recognised credit agencies, the highest credit rating accredited to the relevant sovereign issuer shall be deemed the reference credit rating for this purpose.

The Fund may invest in mortgage- and asset-backed securities which will not exceed 15% of the net asset value of the Fund. In addition, the Fund may invest not more than 5% of its net asset value in debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s), and up to 2% of its net asset value in distressed securities.

The Fund does not enter into repo, reverse repo or other similar OTC transactions.

³ Accessed via <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf> (this website has not been reviewed by the SFC).

An “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s.

“Investment grade”, for the purposes of the Fund, refers to a credit rating equal to or better than BBB- by Standard & Poor’s or Fitch, or Baa3 by Moody’s.

“Distressed security”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

Capital Group Future Generations Global Corporate Bond Fund (LUX)

In seeking to achieve its investment objective, at least 70% of the Fund’s investments align with environmental and/or social characteristics.

The Fund commits to maintain at least 60% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of the Themes as mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives.

In addition, the Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy⁴ relating to the Fund’s investments on corporate issuers at the time of purchase. The Investment Adviser relies on third-party providers who identify a company’s participation in or the revenue which they derive from activities that are inconsistent with these screens. As part of this, the Investment Adviser excludes companies violating the UNGC principles as well as certain companies that are involved in business activities including weapons, tobacco and fossil fuels.

The Fund will seek to invest at least 80% of its net asset value in corporate bonds, which will be limited to bonds that are Investment Grade. In case of split-rated Bonds, the highest credit rating of S&P, Moody’s or Fitch will apply. If a security fails to maintain an Investment Grade rating from at least one rating agency, including Standard & Poor’s, Fitch or Moody’s (or which are no longer deemed Investment Grade by the Investment Adviser), such security must be sold within three months, taking into account the interests of Shareholders.

The Fund does not enter into repo, reverse repo or other similar over-the-counter (OTC) transactions.

“Investment grade”, for the purposes of the Fund, refers to a credit rating equal to or better than BBB- by Standard & Poor’s or Fitch, or Baa3 by Moody’s.

An “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s.

Capital Group Multi-Sector Income Fund (LUX)

The Fund’s investment objective is to provide a high level of current income. The Fund’s secondary investment objective is capital appreciation.

The Fund invests generally in corporate High Yield Bonds, corporate Investment Grade Bonds, Emerging Market Bonds and mortgage and asset backed securities. The Fund may opportunistically invest in other sectors, including, but not limited to, U.S. government debt, municipal debt and non-corporate credit, in response to market conditions. The Fund may invest up to 30% of its net asset value in Emerging Markets Bonds.

An “Emerging Market” is defined as a country that, in the opinion of the Investment Adviser, is generally considered to be a developing country by the international financial community. Certain factors will be considered in determining whether a country is a developing country, such as whether the country is generally considered to be a developing country by the international financial community, the overall regulatory environment, limitations or bans on foreign ownership, and foreign currency restrictions.

The Fund invests at least 80% of its net asset value in bonds and other debt instruments, securities with equity and fixed income characteristics (such as bonds with warrants attached, convertible bonds, and other types of hybrid securities (such as contingent convertible bonds) and certain preferred securities (including convertible preferred shares)) (certain securities with equity and fixed income characteristics will be subject to an overall 10% limit as described below), cash equivalents, mortgage and asset backed securities, and

⁴ Accessed via <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf> (this website has not been reviewed by the SFC).

other fixed income obligations of banks, corporations and governmental authorities. It is expected such investments will primarily be denominated in USD.

The Fund may invest up to 80% of its net asset value in High Yield Bonds rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality (an “unrated” security, for the purposes of the Fund, refers to a security where neither it nor its issuer has been assigned any credit rating by Standard & Poor’s, Fitch or Moody’s). The Fund may invest up to 10% of its net asset value in distressed securities at the time of purchase.

The Fund may invest more than 10% and up to 35% of its net asset value in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) which is rated below investment grade, i.e. Egypt and Greece (please note that the ratings of sovereign issuers may change from time to time and the aforementioned sovereigns are named only for reference and are subject to change as their ratings change). Such investments are based on the professional judgement of the Investment Adviser whose reasons for investment may include a favourable/positive outlook on the relevant sovereign issuer, potential for ratings upgrade and expected changes in the value of such investments due to the ratings changes.

The Fund may invest in mortgage- and asset-backed securities which will not exceed 20% of the net asset value of the Fund.

The Fund may invest in Equity, perpetual bonds and debt instruments with loss-absorption features, such as contingent convertible bonds, including certain types of additional Tier 1 and Tier 2 capital bonds, which are subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of triggers event(s), which will not exceed 10% of the net asset value of the Fund.

The Fund may invest in the China Interbank Bond Market up to 10% of the net asset value of the Fund, either directly or via Bond Connect.

The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg Non-Agency CMBS Ex AAA Index, 2% Bloomberg ABS Ex AAA Index. While this Fund is actively managed and without any reference or constraints to a reference index, the Fund is using 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg Non-Agency CMBS Ex AAA Index, 2% Bloomberg ABS Ex AAA Index to monitor the investment’s carbon emission. Should the WACI of the Fund not be lower than the level of the Fund’s selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund’s WACI back to a level that is below the WACI of the aforementioned index in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The Investment Adviser evaluates and applies ESG and norms-based screening to implement negative screens at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer’s participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on <https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>.

The Fund does not enter into securities lending, repo, reverse repo or other similar OTC transactions.

“Distressed securities”, for the purposes of the Fund, refers to a security with a credit rating lower than CCC- by Standard & Poor’s or equivalent.

“Investment grade”, for the purposes of the Fund, refers to a credit rating equal to or better than BBB- by Standard & Poor’s or Fitch, or Baa3 by Moody’s.

SHANGHAI-HONG KONG STOCK CONNECT AND SHENZHEN-HONG KONG STOCK CONNECT

The Stock Connect is a securities trading and clearing linked programme developed by the Stock Exchange of Hong Kong Limited (the “SEHK”), the SSE, the SZSE and the China Securities Depository and Clearing

Co., Ltd. (the “**CSDCC**”), which provides mutual stock market access between mainland China and Hong Kong. It comprises the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

Each of the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect comprises a northbound trading link (the “**Northbound Trading Link**”) for investment in PRC shares (“**Northbound Trading**”) and a southbound trading link (the “**Southbound Trading Link**”) for investment in Hong Kong shares (“**Southbound Trading**”). Under the Northbound Trading Link, Hong Kong and overseas investors (including the Sub-Fund), through their Hong Kong brokers who are eligible participants of the Stock Connect and securities trading service companies (in Shanghai and in Qianhai Shenzhen respectively) established by the SEHK, may trade eligible securities listed on the SSE or the SZSE by routing orders to the SSE or SZSE (as the case may be).

Eligible securities

Initially, Hong Kong and overseas investors are only able to trade certain securities listed on the SSE market (the “**SSE Securities**”) and the SZSE market (the “**SZSE Securities**”). SSE Securities include (i) all the constituent stocks of the SSE A Share Index that fulfil all of the relevant criteria at any half-yearly review, monthly review or DVR Stock⁵ review, as the case may be, and (ii) SSE-listed A-Shares that are not accepted for Northbound trading by virtue of (i) but which have corresponding H-shares accepted for listing and trading on the SEHK, provided that:

- a) they are not traded on SSE in currencies other than RMB; and
- b) they are not under “risk alert” (including shares of “ST companies” and “*ST companies”, and shares subject to the delisting process or the listing of which has been suspended).

Investors eligible to trade shares that are listed on the STAR Board of SSE under Northbound trading are limited to institutional professional investors as defined in the relevant Hong Kong rules and regulations.

SZSE Securities include (i) SZSE-listed A-Shares that are constituent stocks of the SZSE Composite Index and fulfil all of the relevant criteria at any half-yearly review, monthly review or DVR Stock review, as the case may be, and (ii) SZSE-listed A-shares that are not accepted for Northbound trading by virtue of (i) but which have corresponding H shares accepted for listing and trading on SEHK, provided that:

- a) they are not traded on SZSE in currencies other than RMB; and
- b) they are not under “risk alert” (including shares of “ST companies” and “*ST companies”, and shares subject to the delisting process or the listing of which has been suspended).

At the initial stage of Shenzhen-Hong Kong Stock Connect, securities listed on the ChiNext Board of SZSE under Northbound Trading Link will be limited to institutional professional investors. Subject to resolution of related regulatory issues, other investors may subsequently be allowed to trade such securities.

In addition, Hong Kong and overseas investors are able to trade eligible SSE-listed and SZSE-listed exchange traded funds (“**ETFs**”) that satisfy the relevant criteria at a regular review and are accepted as eligible ETFs for Northbound trading in Stock Connect. Regular reviews will be performed to determine the eligible ETFs for Northbound trading every six months.

It is expected that the list of eligible securities will be subject to review in future.

Trading day

Investors (including the Sub-Fund) can only trade on the other market on days where both markets are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connect is subject to a daily quota (“**Daily Quota**”) for each of Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, which is separate for Northbound and Southbound Trading. The same Northbound Daily Quota will be shared among A Shares and ETFs that are included for Northbound trading in Shanghai-Hong Kong Stock Connect. The Daily Quota limits the maximum net buy value of cross-boundary trades under the Stock Connect each day. The quotas do not belong to the Sub-Fund and are utilised on a first-come-first-serve basis. The SEHK monitors the quota and publishes the

⁵ A stock with Differentiated Voting Rights.

remaining balance of the Northbound Trading Daily Quota at scheduled times on the Hong Kong Exchanges and Clearing Limited's website. The Daily Quota may change in future. The Manager will not notify investors in case of a change of quota.

Settlement and custody

The Hong Kong Securities Clearing Company Limited (the "**HKSCC**") is responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors. SSE Securities or SZSE Securities acquired by an investor through Northbound Trading is maintained with such investor's broker's or custodian's stock account with the Central Clearing and Settlement System ("**CCASS**") operated by HKSCC.

Corporate actions and shareholders' meetings

Notwithstanding the fact that HKSCC does not claim proprietary interests in the SSE Securities or SZSE Securities held in its omnibus stock account in the CSDCC, the CSDCC as the share registrar for SSE Securities and SZSE Securities will still treat the HKSCC as one of the shareholders when it handles corporate actions in respect of such SSE Securities or SZSE Securities. The HKSCC monitors the corporate actions affecting SSE Securities or SZSE Securities and keeps the relevant CCASS participants informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

Currency

Hong Kong and overseas investors (including the Sub-Fund) can trade and settle SSE Securities and SZSE Securities in RMB only.

Trading fees and taxes

In addition to paying trading fees and stamp duties in connection with the trading of the relevant securities, the Sub-Fund may be subject to certain other fees and taxes concerned with income arising from transfers of stocks or ETFs which are yet to be determined by the relevant authorities.

Coverage of Investor Compensation Fund

Any investments in SSE Securities or SZSE Securities done by the Sub-Fund through Northbound Trading under the Stock Connect will not be covered by Hong Kong's Investor Compensation Fund for defaults occurring before 1 January 2020. For defaults occurring on or after 1 January 2020, the Investor Compensation Fund also covers eligible investors' losses in relation to SSE Securities or SZSE Securities traded on the Shanghai Stock Exchange or the Shenzhen Stock Exchange and in respect of which an order for sale or purchase is permitted to be routed through Northbound Trading under the Stock Connect arrangement.

Hong Kong's Investor Compensation Fund is established to pay compensation to eligible investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Examples of default are insolvency, in bankruptcy or winding up, breach of trust, defalcation, fraud, or misfeasance.

On the other hand, according to the Measures for the Administration of Securities Investor Protection Fund, the functions of China Securities Investor Protection Fund ("**CSIPF**") include "indemnifying creditors as required by China's relevant policies in case a securities company is subjected to compulsory regulatory measures including dissolution, closure, bankruptcy and administrative takeover by the CSRC and custodian operation" or "other functions approved by the State Council". However, since Northbound Trading is carried out through securities brokers in Hong Kong and not PRC brokers, the CSIPF also does not extend to protect defaults experienced on Northbound Trading.

Foreign shareholding restrictions

Pursuant to relevant rules and regulations, foreign investors holding China A-Shares (whether acquired through QFI or Stock Connect) are subject to the following shareholding restrictions:

- the shareholding of any single foreign investor in a China A-Share listed company must not exceed 10% of such company's total issued shares; and
- the aggregate shareholding of all foreign investors in a China A-Share listed company must not exceed 30% of such company's total issued shares.

When aggregate foreign shareholding of an individual China A-Share listed company exceeds the 30% threshold, the foreign investors concerned will be requested to sell the relevant China A-Shares on a last-in-first-out basis within 5 trading days. If the 30% threshold is exceeded due to trading via Stock Connect, the SEHK will identify the exchange participant(s) concerned and require a force-sell. As a result, it is possible that the Sub-Fund may be required to unwind its positions where it has invested in a China A-Share listed company in respect of which the aggregate foreign shareholding threshold has been exceeded.

The SSE, SZSE and the SEHK (as the case may be) will issue warnings as the aggregate foreign shareholding of an SSE Security or SZSE Security approaches 30%. Northbound Trading buy orders will be suspended once the aggregate foreign shareholding reaches 28% and will resume when it drops back to 26%. Northbound Trading sell orders will not be affected.

When foreign investors carry out strategic investments in China A-Share listed companies in accordance with the relevant rules, the shareholding of such strategic investments is not capped by the above-mentioned percentages.

Further information about the Stock Connect is available at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en.

CHINA INTERBANK BOND MARKET

China Interbank Bond Market ("**CIBM**") is the over-the-counter market for bonds issued and traded in mainland China. A scheme was launched in 2016 to open up CIBM to eligible foreign institutional investors to access onshore bonds directly ("**CIBM Initiative**"). Under this scheme, foreign institutions can trade bonds directly through onshore settlement agents (i.e. banks) in mainland China. There are no specific quota limits imposed on the foreign institutional investor.

Participation in the CIBM Initiative by foreign institutional investors (such as a Fund) is governed by rules and regulations as promulgated by the Mainland Chinese authorities, i.e., the People's Bank of China ("**PBOC**") and the State Administration of Foreign Exchange ("**SAFE**"). Such rules and regulations may be amended from time to time and include (but are not limited to):

- (i) the "Announcement (2016) No 3" issued by the PBOC (中國人民銀行公告[2016]第3號) on 24 February 2016;
- (ii) the "Implementation Rules for Filing by Foreign Institutional Investors for Investment in Interbank Bond Markets" (境外機構投資者投資銀行間債券市場備案管理實施細則) issued by the Shanghai Head Office of PBOC on 27 May 2016;
- (iii) the "Circular concerning the Foreign Institutional Investors' Investment in Interbank bond market in relation to foreign currency control" (國家外匯管理局關於境外機構投資者投資銀行間債券市場有關外匯管理問題的通知) issued by SAFE on 27 May 2016; and
- (iv) any other applicable regulations promulgated by the relevant authorities.

Under the prevailing regulations in mainland China, foreign institutional investors who wish to invest directly in the CIBM may do so via an onshore settlement agent, who will be responsible for making the relevant filings and account opening with the relevant authorities. There is no quota limitation but filing with the Shanghai Head Office of PBOC in respect of an investor's anticipated investment size has to be made.

In terms of fund remittance and repatriation, foreign investors (such as a Fund) may remit investment principal in RMB or foreign currency into Mainland China for investing in the CIBM. An investor will need to remit investment principal matching at least 50% of its anticipated investment size within nine months after the completion of filing with the Shanghai Head Office of PBOC, or else an updated filing will need to be made through the onshore settlement agent. Where a Fund repatriates funds out of mainland China, the ratio of RMB to foreign currency ("**Currency Ratio**") should generally match the original Currency Ratio when the investment principal was remitted into Mainland China, with a maximum permissible deviation of 10%.

RISK FACTORS

The nature of a Fund's investments involves certain risks and uncertainties, including those inherent in any investment. There can be no assurance that the investment objective of a Fund will be achieved. Before investing in the Company, potential investors should consider the risks involved. Please refer to the section "Risk Warnings" in the Prospectus and, in respect of each Fund, the "Specific Risks" as set out in the relevant Fund Information Sheet in Annex 2 of the Prospectus.

A Fund's investment portfolio may fall in value due to any of the risk factors set out in the offering document and therefore an investor may suffer losses. There is no guarantee of the repayment of principal.

Investors should consult their independent professional or financial advisors before making any investment in a Fund.

Concentration risk

A Fund which focuses on investing in a single sector, geographical area or country is highly specialised. Although the Fund's investment portfolio may be diversified in terms of the underlying investments, the relevant Fund is likely to be more volatile than a broad-based fund, such as a global equity fund, and they may be more susceptible to fluctuations in value resulting from adverse conditions in the sectors or countries in which the Fund invests.

Where a Fund's portfolio is concentrated in a particular geographical area, the value of such Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant markets.

Further risks relating to emerging markets / developing economies

The Funds may invest in securities from emerging markets / developing economies which may involve increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility. In particular, settlement systems in emerging markets are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the Fund may be in jeopardy. The prices of securities traded in such markets may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the fund may incur significant trading costs.

The Funds' investments may be concentrated in securities from emerging markets / developing economies. The value of the Funds may be more volatile than that of a fund having a more diverse portfolio of investments, and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory events affecting emerging markets.

High market volatility and potential settlement difficulties in the equity markets of emerging markets / developing economies may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may adversely affect the value of the Funds.

Securities exchanges in emerging markets / developing economies typically have the right to suspend or limit trading in any security traded on the relevant exchange. The government or the regulators may also implement policies that may affect the financial markets. All these may have a negative impact on the Funds.

Further risks relating to Equities

Equity market risk: A Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

Risk of investing in small capitalisation / mid capitalisation companies: Typically, stocks of small capitalisation / mid capitalisation trade less frequently and in smaller volumes and may be subject to more abrupt or erratic price movements than stocks of larger companies. The securities of small capitalisation / mid capitalisation

companies may also be more sensitive to market changes and adverse economic developments than securities in large companies. As such, this may adversely impact the Fund and/or the interests of investors.

Risks associated with high volatility of equity markets: High market volatility and potential settlement difficulties in the equity markets of some countries may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may adversely affect the value of the Funds.

Risks associated with securities exchanges of equity markets: Some securities exchanges may have the right to suspend or limit trading in any security traded on the relevant exchanges. Governments or regulators may also implement policies that may affect the relevant financial markets. All these may have a negative impact on the Funds.

Asset-backed securities (including mortgage-backed securities) risk

Some Funds will invest in asset-backed securities (including mortgage-backed securities and asset-backed commercial paper), as specified in the relevant Fund Information Sheet in Annex 2 of the Prospectus. Asset-backed securities are a type of securitised or structured debt instruments (collectively, “**structured debt instruments**”), which provide exposure to underlying assets and the risk/return profile is determined by the cash flows derived from such assets. Some of such instruments involve multiple instruments and cash flow profiles such that it is not possible to predict with certainty the outcome from all market scenarios. Also, the price of such an investment could be contingent on, or highly sensitive to, changes in the underlying components of the structured debt instrument. Issuers of asset-backed securities may also have limited ability to enforce the security interest in the underlying assets in the event of default. The underlying assets can take many forms including, but not limited to, credit card receivables, residential mortgages, corporate loans, manufactured housing loans or any type of receivables from a company or structured vehicle that has regular cash flows from its customers. Such instruments are also exposed to the risk that the payment obligations relating to the underlying assets are not met.

Some structured debt securities have embedded call options exercisable by the issuer which creates prepayment risk (the risk of unexpected early return of principal on the security), while other features may create extension risk (the risk that the security’s tenure is unexpectedly extended due to lower repayment levels). Some structured debt instruments may employ leverage which can cause the price of the instruments to be more volatile than if they had not employed leverage. In addition, structured debt instruments may be highly illiquid, which in turn renders them prone to substantial price volatility.

As such, these instruments may be subject to greater credit, liquidity and interest rate risks compared to other debt securities, and all of these factors may adversely impact the returns of the securities.

Further risks relating to debt securities which are unrated, rated below investment grade or High Yield Bonds

Bonds and other debt securities which are unrated securities, rated below investment grade or High Yield Bonds are generally subject to lower liquidity, higher volatility and greater risk of loss of principal and interest than high-rated debt securities.

Downgrading risk: The credit rating of a debt instrument or its issuer may subsequently be downgraded. In the event of such downgrading, the value of the Fund holding the instrument may be adversely affected. The Investment Adviser(s) may or may not be able to dispose of the debt instruments that are being downgraded at favourable prices or at all.

Credit ratings risk: The ratings of fixed-income securities by Standard & Poor’s, Fitch or Moody’s are a generally accepted barometer of credit risk. They are, however, subject to certain limitations from an investor’s standpoint and do not guarantee the creditworthiness of the security and/or the issuer at all times. The rating on an issuer or a security is heavily weighted by past performance and does not necessarily reflect probable future conditions. There is frequently a lag between the time the rating is assigned and the time it is updated. In addition, there may be varying degrees of difference in credit risk of securities within each rating category. In the event of a down-grading of the credit rating of a security or an issuer relating to a security, the value of a Fund investing in such security may be adversely affected.

Further risks relating to sovereign debt

Investment in debt obligations issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, such government issuers may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. Government issuers may default on their sovereign debt. Holders of sovereign debt, including the relevant Fund, may be requested to participate in the rescheduling of such debt and to extend further loans to the government issuers. The above circumstances may adversely affect Net Asset Value of the relevant Fund.

Risks of investing in hybrid securities

Hybrid securities are securities that combine both debt and equity characteristics. Hybrid securities include convertible bonds (which are hybrids between debt and equity and permit holders to convert shares into the company issuing the bond at a specified future date) and convertible preferred shares. Convertible bonds will be exposed to equity movements and greater volatility than straight bond investments. Investments in such convertible bonds are subject to the same type of interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable straight bond investments. Convertible preferred shares may be less liquid than common shares and the value of such securities may also be affected by prevailing interest rates and the credit quality of the issuer.

Risks relating to investment in instruments with loss-absorption features

The Funds may invest in instruments issued by financial institutions which, subject to relevant rules, may be used to resolve a financial institution at risk of default. Some of such instruments are subject to loss-absorption features.

Debt instruments with loss-absorption features, such as contingent convertible bonds, are subject to greater risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of a pre-defined trigger events (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.

In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.

Where a Fund may invest in contingent convertible bonds, it may also be exposed to risks relating to contingent convertible bonds. Contingent convertible bonds are highly complex and are of high risk. Upon the occurrence of the trigger events, contingent convertible bonds may be converted into shares of the issuer (potentially at a discounted price).

Risks relating to Stock Connect

Quota limitations: Stock Connect is subject to Daily Quota. In particular, once the remaining balance of the Northbound Daily Quota drops to zero or the Northbound Daily Quota is exceeded during the opening call session, new buy orders will be rejected (though investors will be allowed to sell their cross-boundary securities regardless of the quota balance). A Fund's ability to invest in the eligible securities through Stock Connect may be affected.

Suspension risk: It is contemplated that the SEHK, the SSE and the SZSE would reserve the right to suspend Northbound and/or Southbound trading if necessary for ensuring an orderly and fair market and that risks are managed prudently. Consent from the relevant regulator would be sought before a suspension is triggered. Where a suspension in the Northbound trading is effected, a Fund's ability to access the PRC market through Stock Connect will be adversely affected.

Operational risk: Stock Connect provides a relatively new channel for investors from Hong Kong and overseas to access the PRC's stock market directly. Market participants are able to participate in this programme subject to meeting certain information technology capability, risk management and other requirements as may be

specified by the relevant exchange and/or clearing house. Market participants may need to address issues arising from these differences (as well as the fact that the securities regime and legal systems of the PRC and Hong Kong differ significantly) on an on-going basis.

Further, the “connectivity” in Stock Connect requires routing of orders across the border. There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading in both markets through the programme could be disrupted and a Fund’s ability to access the PRC market will be adversely affected.

Restrictions on selling imposed by front-end monitoring: PRC regulations require there to be sufficient shares in an investor’s securities account before such investor sells any share on the SSE or SZSE, otherwise the sell order will be rejected by the SSE or SZSE. The HKEx will carry out pre-trade checking on SSE Securities and/or SZSE Securities sell orders of its participants (i.e. brokers) to ensure there is no over-selling. This means that investors must transfer SSE Securities and/or SZSE Securities to the accounts of its brokers before the market opens on the day of selling (the “trading day”). If an investor fails to meet this deadline, it will not be able to sell such SSE Securities and/or SZSE Securities on the relevant trading day. Because of this requirement, investors may not be able to dispose of holdings of SSE Securities in a timely manner. PRC regulations may impose certain other restrictions on selling and buying which results in a Fund not being able to dispose of holdings of China A-Shares in a timely manner. This also raises concerns as to counterparty risks as securities may need to be kept by brokers overnight.

To facilitate investors whose SSE Securities and/or SZSE Securities are maintained with custodians to sell their SSE Securities and/or SZSE Securities without having to pre-deliver the SSE Securities and/or SZSE Securities from their custodians to their executing brokers, the HKEx introduced an enhanced pre-trade checking model in March 2015, under which an investor may request its custodian to open a Special Segregated Account (SPSA) in the Central Clearing And Settlement System to maintain its holdings in SSE Securities and/or SZSE Securities. An investor only needs to transfer SSE Securities and/or SZSE Securities from its SPSA to its designated broker’s account after execution and not before placing the sell order. This enhanced model is novel and initial market reaction is varied. If a Fund is unable to utilise this model, it would have to deliver SSE Securities and/or SZSE Securities to brokers before the trading day and the above risks may still apply.

Risks associated with ChiNext market and/or the Science and Technology Innovation Board (the “STAR Board”)

Higher fluctuation on stock prices and liquidity risk: Listed companies on ChiNext market and/or STAR Board are usually of emerging nature with smaller operating scale. Listed companies on ChiNext market and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board.

Over-valuation risk: Stocks listed on ChiNext and/or STAR Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.

Differences in regulation: The rules and regulations regarding companies listed on the ChiNext market and STAR Board are less stringent in terms of profitability and share capital than those in the main boards.

Delisting risk: It may be more common and faster for companies listed on ChiNext market and/or STAR Board to delist. ChiNext market and STAR Board have stricter criteria for delisting compared to the main boards. This may have an adverse impact on a Fund if the companies that it invests in are delisted.

Concentration risk: STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the relevant Fund to higher concentration risk.

Investments in the ChiNext market and/or STAR Board may result in significant losses for the Fund and its investor.

Further risks relating to China Interbank Bond Market

Although there is no quota limitation regarding investment via the CIBM Initiative, a Fund is required to make further filings with the PBOC if it wishes to increase its anticipated investment size. There is no guarantee the PBOC will accept such further filings. In the event any further filings for an increase in the anticipated investment size are not accepted by the PBOC, the relevant Fund's ability to invest in the CIBM will be limited and the performance of the Fund may be unfavourably affected as a result.

Investing in the China Interbank Bond Market is also subject to certain restrictions imposed by the PRC authorities on fund remittance and repatriation which may potentially affect the Fund's performance and liquidity. Any non-compliance with or failure to meet the fund remittance and repatriation requirements may result in regulatory sanctions which in turn may have an adverse impact on the portion of the Fund's investment via the China Interbank Bond Market Initiative. Further, there is no assurance that the fund remittance and repatriation requirements in relation to investment in China Interbank Bond Market will not be changed as a result of change in government policies or foreign exchange control policies. The Fund may incur loss in the event such change in the fund remittance and repatriation requirements in relation to investment in China Interbank Bond Market occurs.

Since the relevant filings and account opening for investment in the China Interbank Bond Market via the China Interbank Bond Market Initiative have to be carried out via an onshore settlement agent, the Fund is subject to the risks of default or errors on the part of the onshore settlement agent. The Fund may also incur losses due to the acts or omissions of the onshore settlement agent in the process of settling any transactions. As a result, the Net Asset Value of the Fund may be adversely affected.

Cash deposited in the cash account of the Fund with the relevant onshore settlement agent will not be segregated. In the event of the bankruptcy or liquidation of the onshore settlement agent, the Fund will not have any proprietary rights to the cash deposited in such cash account and may face difficulty and/or encounter delays in recovering such assets, or may not be able to recover it in full or at all, in which case the Fund will suffer losses.

In addition, investors should note that there is uncertainty as to the PRC tax arrangement for investments via the CIBM Initiative. By investing in PRC debt securities issued by PRC tax resident enterprises, irrespective of whether such securities are issued or distributed onshore or offshore, a Fund may be at risk of being subject to PRC taxes. There is a possibility that the current tax laws, rules, regulations and practice in the PRC and/or the current interpretation or understanding thereof may change in the future and such change(s) may have retrospective effect. A Fund could become subject to additional taxation that is not anticipated as at the date hereof or when the relevant investments are made, valued or disposed of. Any of those changes may reduce the income from, and/or the value of, the relevant investments in the Fund.

Eurozone risk

As a result of the crisis of confidence in the markets, brought about by the worsening fiscal conditions and concerns on sovereign debt of certain Eurozone countries, which has caused bond yield spreads (the cost of borrowing in the debt capital markets) and credit default spreads (the cost of purchasing credit protection) to increase, certain countries in the EU have had to accept "bailouts" from banks and lines of credit from supra-governmental agencies such as the International Monetary Fund and the recently created European Financial Service Facility. The European Central Bank has also been intervening to purchase Eurozone debt in an attempt to stabilise markets and reduce borrowing costs. In December 2011, leaders of the countries in the Eurozone, as well as the leaders of certain other countries in the EU, met in Brussels and agreed a "fiscal compact" which includes a commitment to a new fiscal rule, to be introduced into the legal systems of the relevant countries, as well as acceleration of the entry into force of the European Stability Mechanism treaty.

Economic and financial difficulties in certain countries within the Eurozone may continue, worsen or spread within and outside the Eurozone and that measures and reforms taken by the relevant governments and/or

authorities may not be efficient or may subsequently result in other unintentional consequences. Further, notwithstanding the measures described above, and future measures which may be introduced, it is possible that a country may leave the Eurozone and return to a national currency, and as a result may leave the EU and/or that the Euro, the European single currency, will cease to exist in its current form and/or lose its legal status in one or more countries in which it currently has such status. Such potential events may have a negative impact on the Funds which are denominated in Euro or which invest in instruments predominantly tied to Europe. Such Funds may also be subject to higher volatility, liquidity, currency and default risks.

Valuation risk

Valuation of the Funds' investments may involve uncertainties and judgemental determinations. If such valuations are incorrect, this may affect the Net Asset Value calculation of the Funds.

Liquidity risk

Some securities, primarily unlisted securities and/or those traded in over-the-counter markets (for example, unlisted securities), may be subject to lower liquidity. The prices of such securities may be subject to higher fluctuation or may be difficult to determine compared with securities listed on a recognised stock exchange. During times of market turmoil, there have been, and may be, no buyers or sellers for securities in entire asset classes. Bid and offer spreads may be large and a Fund investing in such securities may incur significant trading costs.

Liquidity risk for Capital Group Future Generations Global Opportunities Fund (LUX), Capital Group Future Generations Global Balanced Fund (LUX) and Capital Group Future Generations Global Corporate Bond Fund (LUX)

Certain securities, such as unlisted securities and/or some securities traded in over-the-counter markets, may be deemed less liquid if they cannot be readily sold without significantly impacting their value, or may become difficult or impossible to sell, particularly during times of market turmoil. Liquidity may be impacted by the lack of an active market for a security, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such security. Market prices for less liquid securities may be volatile or difficult to determine, and reduced liquidity may have an adverse impact on the market price of such securities. During times of market turmoil, there have been, and may be, no buyers or sellers for securities in entire asset classes. Additionally, the sale of less liquid securities may involve substantial delays (including delays in settlement) and additional costs and the Fund may have more difficulty to sell such securities when necessary to meet its liquidity needs, or try to limit losses, or may be forced to sell at a loss.

Operational risk

Some Funds may invest in markets where settlement systems are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the relevant Fund may be in jeopardy.

Risks relating to securities lending transactions

Securities lending transactions may involve the risk that the loaned securities may not be returned by the counterparty in a timely manner or at all, which would interfere with the relevant Fund's ability to vote proxies or settle transactions, and/or the risk of a loss of rights in collateral if a borrower or the securities lending agent defaults (for example, if the counterparty or the securities lending agent defaults due to insolvency and the insolvency proceedings results in an unfavourable outcome). The value of the collateral may also fall below the value of the securities lent out.

Counterparty risk

Other financial institutions provide services to the Funds such as safekeeping of assets or may serve as counterparties to financial contracts such as derivatives. There is a risk a counterparty will not meet its obligations and/or default.

Custody risks

Assets of a Fund are safe kept by the Depositary and Shareholders are exposed to the risk of the Depositary not being able to fully meet its obligation to reconstitute in a short time frame all of the assets of a Fund in the case of bankruptcy of the Depositary.

Further, securities of the Funds will normally be identified in the Depositary's books as belonging to the Funds and segregated from other assets of the Depositary which mitigates but does not exclude the risk of non-restitution in case of bankruptcy. However, no such segregation applies to cash which increases the risk of non-restitution of cash in case of bankruptcy.

Where sub-custodians are appointed, Shareholders are exposed to the risk of bankruptcy of the sub-custodians in the same manner as that of the bankruptcy of the Depositary.

Where Funds may invest in markets which custodial and/or settlement systems are not fully developed, such Funds may be exposed to additional risks. In extreme circumstances such as the retroactive application of legislation and fraud or improper registration of title, the Sub-Fund may even be unable to recover all of its assets. The costs borne by a Sub-Fund in investing and holding investments in such markets will be generally higher than in organised securities markets.

Currency risk

The underlying investments of the Funds may be denominated in currencies other than their base currency. Certain Classes may also have a reference currency which is different from most of the investments of the relevant Fund's portfolio. In this regard, there is a currency exchange risk involved as a result of fluctuations in exchange rates between the base currency and such other currencies, which may affect the value of such Funds.

Funds which invest in emerging market securities may also be denominated in currencies which are subject to governmental controls and restriction. Such currencies may not be freely convertible and may be subject to controls on remittance and currency exchange, and may therefore be subject to higher risk compared to other non-restricted currencies.

RMB currency and conversion risk

Certain Classes may be denominated in RMB. A Fund may also have exposure to investments which are denominated in RMB. RMB is currently not a freely convertible currency and is subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government. Such government policies and restrictions are subject to change, and there can be no assurance that the RMB exchange rate will not fluctuate widely against the base currency of the Fund or any other foreign currency in the future. Non-RMB based investors are exposed to foreign exchange risk and there is no guarantee that the value of RMB against the investors' base currencies (for example USD) will not depreciate. Any depreciation of RMB could adversely affect the value of an investor's investments in the Fund. Although offshore RMB ("CNH") and onshore RMB ("CNY") are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

Non-RMB based investors in share classes denominated in RMB may have to convert USD or other currency(ies) into RMB when investing in share classes denominated in RMB and subsequently convert the RMB redemption proceeds and/or dividend payment (if any) back to USD or such other currency(ies). Investors will incur currency conversion costs and you may suffer losses depending on the exchange rate movements of RMB relative to USD or such other currencies.

Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

Risks associated with Hedged Equivalent Classes

Each Hedged Equivalent Class is equivalent to another Class of the relevant Fund, other than with respect to currency hedging. Hedged Equivalent Classes seek to limit exposure of their Shareholders to currencies

other than the currency referred to in the relevant Class's designation; a systematic passive currency-hedging overlay will be performed by JPMorgan Chase Bank, N.A. (appointed as a passive currency-hedging overlay manager) on a significant part of the assets of the relevant Fund attributable to these Classes. The actual passive currency-hedging overlay methodology will vary from Class to Class, as described in the relevant Fund Information Sheet in Annex 2 of the Prospectus. In the case of a net asset flow to or from such a Class or fluctuation in the Net Asset Value of the Class, the passive currency-hedging overlay may not, or not immediately, be adjusted, unless the flow or fluctuation is significant. Passive currency-hedging overlay will not completely eliminate the exposure to currency movements, and proxy hedging may, for instance, be used when the underlying currency is not liquid or is closely linked to another currency. Shareholders of Hedged Equivalent Classes should note that returns of Hedged Equivalent Classes may be significantly different over time than those of unhedged Classes and that passive currency-hedging overlay may limit their ability to benefit from the currency diversification undertaken within the portfolio. Hedging at a Fund level will preclude investors from benefitting from appreciation of other currencies against the base currency of the relevant Fund. The costs of passive currency-hedging overlay and gains/losses from hedging transactions are borne by the relevant Hedged Equivalent Class(es).

Derivative instruments risk

In addition to the risk titled "Derivative Instruments" in the Prospectus, derivative instruments are also subject to over-the-counter transaction risk. Any leveraging effect can result in a loss significantly greater than the amount invested in the derivative by the Fund. Exposure to derivatives may lead to a high risk of significant loss by the Fund.

High leverage risk

A Fund may have a net leverage exposure of over 100% of the net asset value of the Fund. This will further magnify any potential negative impact of any change in the value of the underlying asset on the Fund and also increase the volatility of the Fund's price and may lead to significant losses.

Dividend risk

Where a Fund invests in securities which may pay dividends, there is no assurance that dividends will be declared and paid in respect of such underlying investments held by a Fund. The rates of dividend payment in respect of such securities may be affected by factors beyond the control of the Management Company.

Risks relating to payment of dividends out of or effectively out of capital

Certain Funds may offer Classes that may pay dividend out of gross investment income (i.e. investment income net of withholding taxes but gross of expenses) while all or part of the fees and expenses are charged to/paid out of the capital of the Fund, resulting in an increase in distributable income for the payment of dividends, which is effectively a payment out of the capital of the Fund.

Payment of dividends out of or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from capital gains attributable to that original investment. Any distributions involving payment of dividends out of or effectively out of capital may result in an immediate reduction in the Net Asset Value per Share of the relevant class.

The distribution amount and Net Asset Value of a Hedged Equivalent Class may be adversely affected by differences in the interest rates of the reference currency of the Hedged Equivalent Class and the Fund's Base Currency, which may result in an increase in the amount of distribution that is paid out of or effectively out of capital and hence a greater erosion of capital than other non-hedged share classes. The distribution for a Hedged Equivalent Class is based on the net investment income attributable to that class.

The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Hong Kong Representative on request and on the Management Company's website <https://www.capitalgroup.com/hk/en>.

The Company may amend a Fund's dividend policy with respect to the distribution out of capital (or effectively out of capital) of the Fund subject to the SFC's prior approval and by giving not less than one month's prior notice to the affected Shareholders.

Risk relating to Dividend-distribution Equivalent Classes with fixed dividend policy

Investments in the Dividend-distribution Equivalent Classes with fixed dividend policy are not an alternative to a savings account or fixed-interest paying investment. The percentage of distributions paid by the Dividend-distribution Equivalent Classes with fixed dividend policy is unrelated to expected or past income or returns of these Classes or the relevant Fund. The distribution can thus be higher or lower than the income and return that were effectively realised and may exceed the gross investment income of these Classes of the relevant Fund. The payment of a fixed dividend amount and/or fixed annual dividend yield implies that any payment in excess of the net investment income may include capital gains and/or payments out of capital which may result in the reduction of invested capital over time. However, the Management Company may, in exceptional circumstances (e.g. change in market conditions, yield declines), and, after taking into account various factors (including but not limited to changes in risk analysis, net asset value per share of the relevant share class of the Fund, prevailing market conditions, the Management Company's expectation on future market and economic conditions, income generation as well as the Fund's capacity to sustain dividend distributions over the long term (in particular in respect of fyd2 class)) change the fixed dividend amount and/or the fixed annual dividend yield. Thus, it may not be possible to maintain the fixed amount or fixed yield of the distribution payment indefinitely and it may be reduced or suspended. Dividend-distribution Equivalent Classes with fixed dividend policy will continue to distribute in periods that the relevant Fund has negative returns or is making losses, which further reduces the Net Asset Value of the relevant Dividend-distribution Equivalent Classes with fixed dividend policy. In extreme circumstances, investors may not be able to get back the original investment amount.

In exceptional circumstances, such as heightened market volatility or a material drawdown in Net Asset Value, the Management Company's Board of Directors may consider an interim adjustment to the fixed dividend amount and/or fixed annual dividend yield to ensure alignment with the relevant Fund's long-term objective.

Investors should note that a positive distribution yield does not imply a positive return. Also, Dividend-distribution Equivalent Classes with fixed dividend policy do not distribute a fixed amount, and the constant percentage of distribution results in higher absolute distributions when the Net Asset Value of the relevant Dividend-distribution Equivalent Classes with fixed dividend policy is high, and lower absolute distributions when the Net Asset Value of the relevant Dividend-distribution Equivalent Classes with fixed percentage dividend policy is low.

PRC tax risk

There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized via Stock Connect on the Fund's investments in the PRC (which may have retrospective effect). Any increased tax liabilities on the Fund may adversely affect the Fund's value.

Currently, capital gains from the disposal of China A-Shares (including those on the China-Hong Kong Stock Connect Programmes) are subject to a temporary tax exemption effective from 17 November 2014 in respect of Shanghai-Hong Kong Stock Connect and 5 December 2016 in respect of Shenzhen-Hong Kong Stock Connect.

Having consulted a professional and independent tax adviser, the Management Company will not make any tax provision on behalf of the Fund for gross realised or unrealised capital gains derived from the trading of China A-Shares via Stock Connect.

If actual tax is collected by the State Taxation Administration of the PRC and a Fund is required to make payments reflecting tax liabilities for which no provision has been made, the Net Asset Value of the Fund may be adversely affected, as the Fund will ultimately have to bear the full amount of tax liabilities. In this case, the tax liabilities will only impact Shares in issue at the relevant time, and the then existing Shareholders and subsequent Shareholders will be disadvantaged as such Shareholders will bear, through the relevant Fund, a disproportionately higher amount of tax liabilities as compared to that borne at the time of investment in the Fund.

Further risks relating to FATCA

The provisions of the FATCA were enacted on 18 March 2010 as part of the HIRE Act and became part of the US Internal Revenue Code. They include provisions under which foreign financial institutions ("**FFIs**") may be required to report directly to the Internal Revenue Service ("**IRS**") certain information about accounts held by US persons for the purposes of FATCA or other foreign entities subject to FATCA and to collect additional identification information for this purpose. Financial institutions that do not enter into an agreement with the IRS and comply with the FATCA regime could be subject to 30% withholding tax on any payment of US source income as well as on the gross proceeds deriving from the sale of securities generating US income made to such financial institution.

Pursuant to FATCA, and in order to avoid a U.S. withholding tax being imposed on U.S. source income and proceeds of disposition received by a Fund (which tax, if imposed, may adversely impact a Fund and its investors), each Fund is a Reporting Luxembourg Foreign Financial Institution (FFI) under FATCA and the equivalent Luxembourg domestic FATCA law following the signing of an Inter-Governmental Agreement ("IGA") with the US Treasury ("Luxembourg IGA") together with a memorandum of understanding in respect thereof. The Luxembourg IGA was ratified in Luxembourg by the Law of 24 July 2015 (published on 29 July 2015 ("FATCA Law")). The Company has obtained a Global Intermediary Identification Number ("GIIN").

The Management Company will take all actions necessary to ensure that the Funds comply with this status, including, but not limited to, fulfilling the reporting and/or withholding obligations. In this context, upon subscription, Shareholders are required to provide identity, residency and citizenship information.

On an annual basis, Shareholders who meet the criteria of a Reportable Person⁶ under FATCA will be reported by the Funds to the Luxembourg tax authorities, and subsequently to the U.S. tax authorities ("IRS") together with related financial information.

The information subject to reporting is exhaustively set out in Annex I of the Luxembourg IGA. Shareholders that are distributors or financial intermediaries will be required, as FFI, to provide evidence of their FATCA compliant status (Participating FFI, Deemed Compliant FFI or exempt). Any Shareholder that fails to comply with the Company's information or documentation requests may become subject to FATCA reporting as a deemed Specified U.S. Person, and, in addition to its reporting obligations, the relevant Fund may have to withhold the 30% tax on the payments processed to the Shareholder's account. In addition, the Company may redeem securities held by the Shareholder or on account of the Shareholder. In the event that the Management Company exercises its discretion to withhold tax on payments to, or redeem securities held by, a Shareholder who is considered a "recalcitrant account" or "non-participating FFI", the Management Company will do so acting in good faith and on reasonable grounds and subject to applicable laws and regulations.

As a result of these regulations, the Company, the Management Company and the Administrative Manager may be obliged to collect and transmit Shareholders' personal information and information in respect to their investments into the Company, together with some financial account information to relevant tax authorities as appropriate.

Although the Management Company will attempt to satisfy any obligations imposed on the Funds to maintain their FATCA compliant status and avoid the imposition of FATCA withholding tax, no assurance can be given that the Funds will always be able to fully satisfy these obligations. If the Funds become subject to withholding tax as a result of the FATCA regime, the value of Shares held by Shareholders may suffer material losses.

All prospective investors should consult with their own tax advisers regarding the possible implications of FATCA on them and on their investment in a Fund.

⁶ A Reportable Person is an individual (or entity) that is tax resident in a reportable jurisdiction under the laws of that jurisdiction. The account holder will normally be the Reportable Person; however, under FATCA this includes (i) Shareholders qualifying as specified US Persons and (ii) controlling persons of Shareholders qualifying as passive non-financial foreign entities which are themselves US Persons. Dual resident individuals may rely on the tiebreaker rules contained in tax conventions (if applicable) to solve cases of double residence for purposes of determining their residence for tax purposes.

Risks associated with sustainable investments

Subjective judgment in investment selection: In pursuing a Fund's investment objective, the Investment Adviser considers certain environmental and social goals in the eligibility assessment process, which involves analysis of a company or issuer's alignment to the SDGs. Such assessment by the Investment Adviser is subjective in nature and therefore it is possible that the Investment Adviser may have a different interpretation of what is aligned to the SDGs and its Themes compared to another adviser. This may lead to a Fund investing in certain opportunities or foregoing investment opportunities when it might otherwise be advantageous to do so and/or selling securities when it might be disadvantaged to do so.

Concentration risk: Certain Funds follow a sustainable investment approach, which may cause them to be overweight and/or underweight in certain sectors and thus perform differently than funds that have a similar objective but which do not incorporate sustainable investment criteria when selecting securities. The use of specific criteria mapped to SDGs may also result in a Fund being concentrated in certain companies and its value may be more volatile than that of a fund having a more diverse portfolio of investments.

Exclusion risk: The use of exclusions may affect a Fund's investment performance and, as such, the Fund may perform differently compared to similar funds that do not use such criteria. ESG and norms-based exclusion criteria used in a Fund's investment strategy may result in the Fund foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, and/or selling securities due to their environmental and social characteristics when it might be disadvantageous to do so. As such, the application of exclusion criteria may restrict the ability of a Fund to acquire or dispose of its investments at a price and time that it wishes to do so, and may therefore result in a loss to the Fund.

Reliance on corporate data or third-party information: When assessing a potential investment based on a Fund's sustainable investment criteria, the Investment Adviser is dependent upon information and data from the security issuer and/or third-parties (which may include providers for research, reports, exclusions, ratings and/or analysis such as index providers and consultants). Such information or data may be incomplete, inaccurate or inconsistent. As a result, there is a risk that the Investment Adviser may make an assessment of a security or issuers based on incorrect information.

Lack of standardised definitions: Incorporating ESG-related considerations within the investment process is often qualitative and subjective by nature. ESG considerations may vary depending on sectors, Themes, asset classes and investment philosophy. Evaluation methodologies and the way in which different funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the environmental and social characteristics of investments within ESG funds. The lack of a standardised definition and the lack of a global standardised system regarding what activities qualify as sustainable may also affect the Investment Adviser's ability to measure and assess a company's contribution to environment and social goals. In addition, the lack of common or harmonised definitions and labels regarding ESG and sustainable investment criteria may result in the risk of incorrectly or subjectively assessing a security or issuer.

Change in nature of investments: The alignment of a security can change over time and may no longer meet the Fund's focus on alignment with the SDGs after its initial investments. The Investment Adviser may have to sell such security held by a Fund at a disadvantageous price. This may lead to a fall in the value of the Fund.

Risks associated with Transitioning Companies: There is no universal definition or assessment to determine what Transitioning Companies amounts to and the rate at which higher positive alignment is to be made. The determination of which companies are considered to be "transitioning" depends on the assessment and judgment of the Investment Adviser. Companies which are deemed to be Transitioning Companies may need longer for their increasing positive alignment to the SDGs to be realised. The Investment Adviser may need to dispose such investments at a disadvantageous price which may lead to a fall in the value of the Fund. There can be no guarantee that the Investment Adviser will correctly assess the companies' trend of alignment with the SDGs over the longer term.

MANAGEMENT AND ADMINISTRATION OF THE COMPANY

Information on the management and administration of the company is set out in the section "Capital International Fund – General and Corporate Information" in the Prospectus.

Management Company

The Management Company is established as a société anonyme with the name Capital International Management Company Sàrl. References to Capital International Management Company refer to the same entity.

Investment Adviser

References to Capital Research & Management Company in the Prospectus refer to Capital Research and Management Company. These two names refer to the same entity.

Hong Kong Representative

The Hong Kong Representative is Capital International, Inc., a company incorporated in the United States of America and which is registered as a non-Hong Kong company with the Companies Registry in Hong Kong.

The Hong Kong Representative acts as the representative of the Company in Hong Kong and is authorised pursuant to the Hong Kong Representative Agreement entered into with the Company to carry out the duties of a representative as set out in Chapter 9 of the SFC's Code on Unit Trusts and Mutual Funds (the "**UT Code**") when needed.

The office of the Hong Kong Representative is located at 2601 One International Finance Centre, 1 Harbour View Street, Central, Hong Kong, with phone number (852) 2842 1029 and fax number (852) 2810 6788.

Enquiries and Complaints

Hong Kong investors may contact the Hong Kong Representative if they have any enquiries in respect of the Company or the Funds. Depending on the subject matter of the complaints or enquiries, these will be dealt with either by the Hong Kong Representative directly, or referred to the Management Company or the relevant parties for further handling. The Hong Kong Representative will, on a best effort basis, revert and address the investor's complaints and enquiries as soon as practicable.

Legal Adviser as to Hong Kong law

Deacons
5/F, Alexandra House
18 Chater Road, Central
Hong Kong

ACCOUNT OPENING

Investors must open an account with the Company prior to first investing. Account Opening Forms must be used for this purpose and are available from an authorised Distributor upon request. A list of authorised Distributors in Hong Kong is available from the Hong Kong Representative.

Investors should refer to the section "Account Opening" in the Prospectus for further details.

DEALING IN SHARES

Investors should refer to the sections "Issue of Shares", "Redemption of Shares", "Transfer of Shares" and "Switches Between Funds or Classes" in the Prospectus.

The last Offering Price and Net Asset Value of each Class of each Fund will be published on the Management Company's website <https://www.capitalgroup.com/hk/en>. The Net Asset Value is available at the registered

office of the Company in Luxembourg on the Business Day following the relevant Valuation Date and is also usually available online at <https://www.capitalgroup.com/hk/en>.

Subscription procedures

In respect of each Fund, the minimum initial investment and subsequent holding amounts are set out in the relevant Management Fee and Minimum Investment Amount Information Sheet in Annex 2⁷ of the Prospectus. There is no minimum subsequent investment amount requirement in respect of any Fund. Investors should note, however, that Distributors and other intermediaries may apply different investment minima.

Applications to subscribe for Shares may be made to the Administrative Manager on each Valuation Date of the relevant Fund (as set out in the relevant Fund Information Sheet in Annex 2 of the Prospectus), using a Transaction Request Form. Transaction Request Forms must be received by the Administrative Manager by the Cut-Off Time (i.e. 1:00 p.m. Luxembourg time on the relevant Valuation Date).

Transaction Request Forms may be sent through a Distributor, or directly to the Administrative Manager. For applications that are sent through a Distributor in Hong Kong, investors should note that such Distributor may have a different dealing cut-off time.

Investors are reminded that if they choose to send the orders or other documents by facsimile, they bear the risk of the orders and other documents not being received. None of the Company, the Management Company, the Administrative Manager or any relevant parties will be responsible for any loss resulting from non-receipt of any application sent by facsimile.

Unless otherwise agreed by the Management Company, applications can only be processed by the Administrative Manager on a Valuation Date (and the issuance of Shares will be based on the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described in the sub-section headed "Swing pricing adjustment" under the section "Net Asset Value" in the Prospectus, determined on such Valuation Date) where an order is received and all relevant subscription requirements as set out in the Prospectus are satisfied by the Cut-Off Time in Luxembourg on such Valuation Date.

Payment of subscription amounts may be made either by telegraphic transfer to the relevant account as set out in the Transaction Request Form. Payment by telegraphic transfer may involve certain bank charges, the net amount of which will be invested in the relevant Fund.

No money should be paid to any intermediary in Hong Kong who is not licensed or registered to carry on Type 1 regulated activity under Part V of the SFO.

Investors should refer to the sub-section headed "Standard Subscription Procedures" and "Contractual Settlement" under the section "Issue of Shares" in the Prospectus for further details.

Shares to be issued to Hong Kong investors will be issued in registered form only and the Register of shareholders is conclusive evidence of the ownership of such Shares. No certificates in respect of those Shares will be issued. Shareholders should therefore be aware of the importance of ensuring that the Administrative Manager is informed of any change to their registered details.

Each of the Management Company, the Administrative Manager and any Distributor has the right to refuse any application and the monies in respect of such application will be returned to the applicants at their own risk, without interest. Investors should refer to the sub-section headed "Rejection Privilege" under the section "Issue of Shares" in the Prospectus for further details.

⁷ Unless a lower amount is approved by the Management Company's Board of Directors or results from market action. Different investment minima may apply if Shares are purchased with the assistance of a Distributor, as further detailed under the section "Distributors and other Intermediaries" in the Prospectus.

Redemption and switching procedures

Redemption or switching requests may be made to the Administrative Manager on each Valuation Date of the relevant Fund (as set out in the relevant Fund Information Sheet in Annex 2 of the Prospectus), using a Transaction Request Form. Transaction Request Forms must be received by the Administrative Manager by the Cut-Off Time (i.e. 1:00 p.m. Luxembourg time on the relevant Valuation Date) or the relevant pre-notification date for any switch of shares with a value greater than the amount specified in the relevant Fund Information Sheet in Annex 2 of the Prospectus.

Transaction Request Forms may be sent through a Distributor, or directly to the Administrative Manager. For requests that are sent through a Distributor in Hong Kong, investors should note that such Distributor may have a different dealing cut-off time.

Investors are reminded that if they choose to send the orders or other documents by facsimile, they bear the risk of the orders and other documents not being received. None of the Company, the Management Company, the Administrative Manager or any relevant parties will be responsible for any loss resulting from non-receipt of any application sent by facsimile.

Unless otherwise agreed by the Management Company, redemption or switching requests can only be processed by the Administrative Manager on a Valuation Date (and Shares will be redeemed at the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described in the sub-section headed "Swing pricing adjustment" under the section "Net Asset Value" in the Prospectus, determined on such Valuation Date) where a valid Transaction Request Form is received by the Cut-Off Time in Luxembourg on such Valuation Date.

In the case of redemption of Shares, redemption proceeds are normally paid to the redeeming shareholders at their risk by electronic bank transfer (less the costs of effecting such transfer) to the account designated for this purpose (including all necessary details as specified in the Transaction Request Form) by the redeeming Shareholder in his redemption request. Payment will normally be made no later than the third Week Day after the Valuation Date on which the relevant Shares were redeemed or (i) if payments in the relevant currency cannot settle on such date, on the next Week Day on which the payment can settle, or (ii) if the final transaction amount, when placing an order in number of Shares, cannot be confirmed in due course, on the Week Day following this confirmation. In any event, payment will be made no later than within one calendar month of the Administrative Manager's receipt of a valid written redemption request, unless the market(s) in which a substantial portion of investments is made is subject to legal or regulatory requirements (such as foreign currency controls), thus rendering the payment of the redemption money within one calendar month not practicable; in such case, the extended time frame for the payment of redemption money shall reflect the additional time needed in light of the specific circumstances in the relevant market(s).

Payment will be made in the Payment Currency used for the Shareholder's original subscription, which is equivalent to the reference currency of the relevant Class which was subscribed for, unless the redeeming Shareholder elects to receive the redemption amount in a different available Payment Currency of an active Class and Equivalent Class which can be found online on the Management Company's website at <https://www.capitalgroup.com/hk/en>, in which case the amount will be converted by the Administrative Manager into such currency at such Shareholder's expense and risk.

Investors should refer to the sections "Redemption of Shares" and "Switches Between Funds or Classes" in the Prospectus for further details.

Redemption Deferral and waiver of 10.8 of the UT Code

The Company will not be bound to redeem on any dealing day or in any period of four consecutive dealing days, more than 10% of the total number of Shares in issue of any Fund, respectively, on such dealing day or at the commencement of such period. (For this purpose, a switch of Shares of a given Fund into Shares of another Fund (see section "Switches Between Funds or Classes" in the Prospectus) will be treated as a redemption from the former and a subscription into the latter.) In this event, the limitation will apply pro rata so that all redemption applications to be processed on a dealing day to which such limitation applies will be processed in the same proportion. However, the Funds will continue to satisfy the requirements under 6.13 and 6.14 of the UT Code and redemptions may be deferred for not more than five consecutive dealing days

after the date of receipt of a valid redemption request before the relevant cut-off time, subject to a suspension of determination of Net Asset Value as referred to in the Prospectus. In the case of deferral of redemptions, the relevant Shares will be redeemed at the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under the section “Swing pricing adjustment” in the Prospectus, determined as of the dealing day on which the redemption, or the relevant portion thereof, is effected.

For the avoidance of doubt, the redemption deferral mechanism could be triggered on a dealing day when redemption requests on such dealing day, in aggregate, represent more than (and not equal to) 10% of the total number of Shares in issue of a Fund. Once triggered, the redemption deferral mechanism would apply on the dealing day (day T) which the relevant Fund decides to invoke such mechanism and for the period of four dealing days following such day. As such, investors who submit redemption requests on T and the four consecutive dealing days following day T may be affected. As mentioned above, redemption requests cannot be deferred for more than five consecutive dealing days. If the redemption deferral mechanism is triggered, the five day count applies to the redemption date (i.e. date of receipt of a valid redemption request before the relevant cut off time). Payment of redemption proceeds will typically be made no later than the fourth Week Day after the dealing day on which the relevant Shares were redeemed (subject to certain exceptions as set out in the section “Redemption and switching procedures” above).

The following timeline provides an illustrative example of how the redemption deferral mechanism will be applied:

Day	Status of redemption request
T	Investors submit a valid redemption request, which in aggregate represent more than (and not equal to) 10% of the total number of Shares in issue of a Fund. The Management Company considers whether to invoke the redemption deferral mechanism.
T (by end of day, Luxembourg time)	The Management Company invokes the redemption deferral mechanism to protect the interests of the shareholders. Investors are informed that the mechanism has been triggered.
Between day T and T+4	The limitation will apply pro rata so that all redemption applications to be processed on a Valuation Date to which such limitation applies will be processed in the same proportion. The deferred portion of any redemption requests will generally be processed in priority vis à vis subsequent redemption request in case of new deferral on a particular Valuation Date.
T+4	The last day on which deferred redemptions submitted on T must be accepted by the relevant Fund
T+8	The settlement date for investors whose redemption requests have been accepted on T+4

The power to defer redemptions is only exercised by the Company in very exceptional market conditions (such as during a financial crisis or stock market crash) taking into the account of the relevant Fund and its investors. If redemption(s) are deferred, the Management Company will inform the Shareholder(s) concerned, who will have the right to withdraw their redemption request, or the portion thereof that was deferred, by notifying the Management Company at the latest on the Business Day following such notification, before the Cut-Off Time. Priority of execution will be given to the Shareholder(s) whose redemption(s) have

been deferred over redemption applications received subsequently in order to ensure fair allocation to the Shareholders concerned.

The redemption deferral arrangement serves as a liquidity risk management tool and will only be invoked if the Management Company considers it to be in the best interests of the shareholders of the Funds. As mentioned above, the Management Company will exercise its power to defer redemptions only in very exceptional market conditions (such as during a financial crisis or if there is a stock market crash). In such circumstances, the relevant Funds may not be able to liquidate its assets in a timely manner or at favourable prices in order to meet large scale redemption requests. The structure and/or liquidity of the relevant Fund may therefore be affected (for example if the Funds are required to realise the more liquid investments in order to raise cash to meet redemption requests, whilst retaining the less liquid investments which cannot be easily sold). The redemption deferral mechanism can therefore enable the Management Company to better manage the liquidity of the Funds and to ensure that existing Shareholders' interests are protected. The Management Company believes that the redemption deferral mechanism as described above is in the best interest of Shareholders of the Funds.

For the purposes of this section, the term "dealing day" shall have the same meaning as "Valuation Date" as defined in the Prospectus.

Compulsory Redemption

The Company may compulsorily redeem part or all of the holding of a Shareholder in the event that the circumstances set out under the sub-section "Compulsory Redemption" under the section "Redemption of Shares" in the Prospectus occurs, or if the Management Company exercises its discretion to redeem an investor which it determines is not eligible anymore in the Class it is invested, as described under the section "The Classes" of the Prospectus. In exercising such discretion to compulsorily redeem, the Company shall do so acting in good faith and on reasonable grounds and subject to applicable law and regulations. Investors should refer to the section "Redemption of Shares" in the Prospectus for further details.

Transfer of Shares

Shares may be transferred by an instrument in writing in common form signed by (or, in the case of a body corporate, signed on behalf of or sealed by) the transferor and the transferee and delivered by fax or hard copy.

CALCULATION OF NET ASSET VALUE

If a price representative of a security's fair value is not readily available from the pricing sources described in the sub-section "Calculation Principles" under the section "Net Asset Value" of the Prospectus, or if the accuracy of a Portfolio's valuation, as established pursuant to the calculation principles, is materially affected by events that occur prior to the Net Asset Value being calculated, the relevant security or securities will be valued at the fair value, as determined by the Manager under the direction of the Board of Directors of the Company with due care, skill and diligence and in good faith in consultation with the Depositary.

SUSPENSION OF NET ASSET VALUE CALCULATIONS

As described in the section headed "Suspension of Determination of Net Asset Value and of Issue, Switch and Redemption of Shares" in the Prospectus, the Company may suspend the determination of the Net Asset Value of any or all Fund(s) or Class(es) and suspend the issue, switch and redemption of Shares of such Fund(s) or Class(es) in certain circumstances.

The Management Company or the Hong Kong Representative will immediately notify the SFC if dealing in Shares ceases or is suspended. The fact that dealing is suspended will be published immediately following

such decision and at least once a month during the period of suspension on the Management Company's website <https://www.capitalgroup.com/hk/en>.

FEES AND EXPENSES

An investment in a Fund will be subject to the fees and charges set out in the section "Charges, Expenses and Fees" of the Prospectus, which contains cross references to specific information set out in each Fund's Fund Information Sheet and the Management Fee and Minimum Investment Amount Information Sheet in Annex 2 of the Prospectus. Expenses arising out of any advertising or promotional activities in connection with the Company or the Funds will not be paid from the property of the Funds for as long as they are authorised in Hong Kong.

Notice of increase in fees and charges

Any increase in the rates of fees and charges payable by a Fund from the current levels specified in the Prospectus will be subject to the SFC's prior approval and not less than one month's advanced notice to Shareholders.

For the avoidance of doubt, the Management Fee and Annual Administration Charge in respect of each Fund as specified in Annex 2 of the Prospectus and the KFS of each Fund are the current maximum rates. Any increase in such fees will be subject to the SFC's prior approval and not less than one month's advanced notice to Shareholders.

Soft Commission and Cash Rebates

None of the Management Company, the Investment Advisers or any of their Connected Persons may retain cash or other rebates from a broker or dealer in consideration of directing transactions in a Fund's assets to such broker or dealer. None of the Management Company, the Investment Advisers or any of their Connected Persons receive or retains soft dollars.

Where a Fund invests in another collective investment scheme, none of the Management Company, the Investment Advisers nor any person acting on behalf of the scheme or the Management Company may obtain a rebate on any fees or charges levied by the underlying collective investment scheme (or its management company), or any quantifiable monetary benefits in connection with investments in any underlying collective investment scheme.

TRANSACTION WITH CONNECTED PERSONS

For the purposes of this section, "Connected Person", in relation to a company, means:

- (a) any person or company beneficially owning, directly or indirectly, 20% or more of the ordinary share capital of that company or able to exercise directly or indirectly, 20% or more of the total votes in that company; or
- (b) any person or company controlled by a person who or which meets one or both of the descriptions given in (a); or
- (c) any member of the group of which that company forms part; or
- (d) any director or officer of that company or of any of its connected persons as defined in (a), (b) or (c).

Cash forming part of the property of any Fund may be placed as deposits with the Depositary or with any Connected Person of the Depositary (being an institution licensed to accept deposits), and such cash deposit shall be maintained in a manner that is in the best interests of the Shareholders, having regard to the prevailing commercial rate for deposits of a similar type, size and term negotiated at arm's length in accordance with ordinary and normal course of business.

Money can be borrowed from the Depositary or any of its Connected Persons (being a bank) so long as that bank charges interest at no higher rate, and any fee for arranging or terminating the loan is of no greater

amount than is in accordance with its normal banking practice, the commercial rate for a loan of the size and nature of the loan in question negotiated at arm's length.

Any transactions between the Company and the Management Company, the Investment Advisers, the Directors or any of their Connected Persons as principal may only be made with the prior written consent of the Depositary.

All transactions carried out by or on behalf of the Company must be at arm's length, executed on the best available terms and in the best interests of the Shareholders.

In transacting with brokers or dealers connected to the Management Company, the Investment Advisers or the Directors, the Depositary or any of their Connected Persons, the following must be complied with:

- such transactions are on arm's length terms;
- such brokers or dealers are selected with due care and they must be suitably qualified in the circumstances;
- transaction execution is consistent with applicable best execution standards;
- the fee or commission paid to any such broker or dealer in respect of a transaction must not be greater than that which is payable at the prevailing market rate for a transaction of that size and nature;
- the Management Company or its delegate will monitor such transactions to ensure compliance with its obligations; and
- the nature of such transactions and the total commissions and other quantifiable benefits received by such brokers or dealers (if any) are disclosed in the Company's annual report.

REPORTS AND ACCOUNTS

Annual Report and Semi-Annual Report

The Company's financial year end is on 31 December of each year. Audited accounts and unaudited semi-annual accounts will be available within four months of the end of each financial year-end and two months of the end of the semi-financial year-end respectively. Once these reports are made available, registered Shareholders will be notified of the means of accessing such reports within the relevant timeframe. Hard copies of these financial reports may also be inspected free of charge or obtained for a reasonable fee from the Hong Kong Representative during normal Hong Kong business hours. Soft copies may also be downloaded from the Management Company's website <https://www.capitalgroup.com/hk/en>.

Investors should note that only the English version of the annual report and the semi-annual report of the Company will be available.

Websites

The offering document, circulars, notices, announcements, financial reports and the last Offering Price and Net Asset Value of the Funds are available on the Management Company's website <https://www.capitalgroup.com/hk/en>.

The websites that are cited or referred to in the Prospectus, this document and the KFS including <https://www.capitalgroup.com/hk/en> have not been reviewed by the SFC and may contain information of funds not authorised by the SFC.

Documents Available for Inspection

For so long as the Company and the Funds remain authorised by the SFC, a copy of each of the following documents in relation to the Company and the Funds may be inspected, free of charge, during normal business hours at the offices of the Hong Kong Representative:

- (a) the Articles of Incorporation of the Company;
- (b) the Prospectus, the Hong Kong Covering Document and the KFS in respect of each Fund;
- (c) the Management Company Agreement;
- (d) the Investment Advisory Agreements;
- (e) the Sub-Investment Advisory Agreement;
- (f) the Custody Agreement;
- (g) the Paying Agency Agreement;
- (h) the Administration Agreement;
- (i) the Hong Kong Representative Agreement; and
- (j) the latest annual report and accounts and semi-annual report of the Company.

Shareholders or prospective investors may also purchase copies of the above documents on payment of the reasonable costs associated with the making and forwarding of such copies.

RISK MANAGEMENT PROCESS

The Management Company has put in place a comprehensive risk management policy which enables it to identify and manage at all times, the material risks, including the risk arising from the use of FDI, that the Company and the Funds are exposed to.

The independent risk management team is responsible for the implementation of the risk management policy of the Company, including measuring, monitoring and managing investments in FDI and other investment risks relevant to the Company and the Funds in accordance with the Company's risk management policy. The independent risk management team developed a set of internal risk limits appropriate for each Fund, which reflect the Funds' risk appetite and investment objectives and policies and therefore the FDI exposure permitted when seeking to achieve these goals.

The Funds may use FDI to the extent permitted by the CSSF and as set forth in the Annex 1 of the Prospectus and the relevant Fund Information Sheet in Annex 2 of the Prospectus. The calculations on the FDI exposure will be performed on a daily basis and overseen by the independent risk management team.

There are two main risk measurement approaches in relation to a Fund's global FDI exposure: (a) Commitment Approach and (b) VaR Methodology, as specified for each Fund in the relevant Fund Information Sheet in Annex 2 of the Prospectus. Please refer to Annex 1 of the Prospectus for more details on the above risk measurement approaches.

Information regarding the risk management policy is available from the Hong Kong Representative upon request.

LIQUIDITY RISK MANAGEMENT

Qualitative and quantitative assessments of liquidity risks at a portfolio and security level are performed to ensure that investment portfolios are appropriately liquid to process Shareholders' redemption requests. In this context, Funds are reviewed individually with respect to liquidity risks regularly. In addition, any concentration of Shareholders in the Funds are regularly reviewed to assess their potential impact on anticipated financial obligations of the Funds. The Management Company's assessment of liquidity risks within Funds includes (but is not limited to) consideration of the investment strategy, the dealing frequency, the underlying assets' liquidity (and their valuation) and the type of investors.

Further details on the liquidity risk management tools which may be used to manage liquidity risks can be found in the main part of the Prospectus under the "Net Asset Value" and "Redemption of Shares" sections. Investors should also refer to the sections "Redemptions Deferral", "Redemption in Kind", "Swing pricing adjustment" and "Suspension of Determination of Net Asset Value and of Issue, Switch and Redemption of Shares" in the Prospectus for the tools which may be used to manage liquidity risks.

TAXATION

Investors should consult their professional advisers on the consequences to them of subscribing, holding, redeeming, transferring or selling Shares under the relevant laws of the jurisdictions to which they are subject,

including the tax consequences and any exchange control requirements. These consequences, including the availability of, and the value of, tax relief to investors will vary with the law and practice of the investors' country of citizenship, residence, domicile or incorporation and their personal circumstances. The following statements regarding taxation are based on advice received by the Management Company regarding the law and practice in force in Hong Kong at the date of this document. Investors should be aware that levels and bases of taxation are subject to change and that the value of any relief from taxation depends upon the individual circumstances of the taxpayer.

For so long as they are authorised by the SFC, the Company and the Funds will not expect to be subject to Hong Kong tax in respect of any of their authorised activities.

No tax will be payable by Shareholders in Hong Kong in respect of dividends or other distributions of a Fund or in respect of any capital gains arising on a sale, redemption or other disposal of Shares, except that Hong Kong profits tax may arise where such transactions form part of a trade, profession or business carried on in Hong Kong.

LIQUIDATION AND DISSOLUTION

Upon liquidation of the Company, a Fund or a Class in accordance with the Articles of Incorporation and as disclosed under section "Liquidation and Dissolution" in the Prospectus, any unclaimed proceeds upon liquidation will be deposited with the "Caisse de Consignation" in Luxembourg. If not claimed, under Luxembourg law, such proceeds shall be forfeited after 30 years after being deposited with the "Caisse de Consignation".

Appendix – Funds and their Classes offered in Hong Kong

In respect of each Fund, the following Classes may be offered to Hong Kong investors. Classes which are not mentioned below are not available to Hong Kong investors.

Classes available to Hong Kong investors	Distribution policy	Distribution Type*	Available currencies	Hedging policy**
Class A4, A7, A9, A11, A13, A15 and equivalent	Accumulation	N/A	CHF EUR GBP JPY USD RMB or any other freely convertible currency	Unhedged Currency hedged (in respect of Classes marked with "h")
Class B and equivalent				
Class BL and equivalent				
Class C and equivalent^				
Class L and equivalent				
Class P and equivalent				
Class S and equivalent				
Class Z and equivalent				
Class ZL and equivalent				
Class A4, A7, A9, A11, A13, A15 and equivalent	Distribution	The dividend may generally represent: • (in respect of Classes marked with "d") all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes; • (in respect of Classes marked with "gd") a substantial part of the gross investment income (i.e., investment income net of withholding taxes but gross of expenses) of such Classes; • (in respect of Classes marked with "ad") all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes; • (in respect of Classes marked with "fd" #) the dividend will generally be fixed and may exceed the gross investment income (i.e., investment income net of withholding taxes but gross of expenses) of such Classes; • (in respect of Classes marked with "m") it is intended that these Classes will distribute dividends monthly; • (in respect of Classes marked with "fyd" #) the dividend will be calculated based on a fixed percentage of the Net Asset Value per Share, resulting in a variable	CHF EUR GBP JPY USD RMB or any other freely convertible currency	Unhedged Currency hedged (in respect of Classes marked with "h")
Class B and equivalent				
Class BL and equivalent				
Class C and equivalent^				
Class L and equivalent				
Class P and equivalent				
Class S and equivalent				
Class Z and equivalent				
Class ZL and equivalent				

		dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes; • (in respect of Classes marked with “fyd2”#) the dividend will be calculated based on a fixed percentage of the Net Asset Value per Share, resulting in a variable dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes; or • (in respect of Classes marked with “fdx”#) the dividend will generally be fixed based on a pre-determined annual percentage of the Net Asset Value per Share and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes.		
--	--	---	--	--

* Please refer to the section “Dividend Policy” and “Risks Related to Share Classes” in the Prospectus for more details.

** Please refer to the section “The Classes” and “Risks Related to Share Classes” in the Prospectus for more details.

Classes with a fixed dividend policy will distribute the dividends based on a fixed amount or based on a fixed percentage of the Net Asset Value per Share. This may result in Classes with fixed dividend policy either paying out both income and capital in dividend payments, or not substantially distributing all the investment income which a Class has earned. **The details of dividends (including, as the case may be, the basis for determining the fixed dividend amount, the calculation basis of dividend per share and the fixed percentage dividend yield as at the date of the relevant KFS) of the Classes with fixed dividend policy is set out in the KFS of the relevant Fund.** The fixed amount of dividend and/or the fixed target annual yield may be changed during the course of a 12-month period at the discretion of the Management Company in exceptional circumstances (e.g. change in market conditions, yield declines), and if the Management Company, after taking into account various factors, including but not limited to changes in risk analysis, net asset value per share of the relevant share class of the Fund, prevailing market conditions, the Management Company’s expectation on future market and economic conditions as well as income generation, determines it appropriate to change the fixed amount of dividend and/or the fixed target annual yield (as the case may be). In addition to the foregoing, in respect of fyd2 classes, the fixed percentage dividend yield may also be changed at the discretion of the Management Company taking into account the Fund’s capacity to sustain dividend distributions over the long term, having regard to capital. The fixed dividend amount and/or fixed target annual dividend yield (as the case may be) may also change from period to period. Shareholders will be given at least one month’s prior notice of a change of fixed dividend amount and/or fixed target annual dividend yield (as the case may be).

@ In respect of fyd2 class, the Company or the Management Company may, at their sole discretion, decide to close the subscriptions and switches in (but not redemptions or switches out of) Classes marked with fyd2 for a limited or unlimited period of time, if it is necessary to protect Shareholders of other classes of the same Fund.

^ Class C Shares and Shares of Equivalent Classes are available only to Institutional Investors which are Capital Group Investors, subject to conditions established from time to time by Capital Group, including the entering into of a separate agreement with respect to management fee and/or other fund expenses, which are not deducted from these Shares’ Net Asset Value.

The table above shows the possible combinations of Class features. Investors should note that not all of the above Classes may be offered to Hong Kong investors in respect of a Fund at any particular date. Classes which are available in each Fund may be found on the Management Company’s website at <https://www.capitalgroup.com/hk/en> and/or the Product Key Facts Statements of the relevant Fund.

Capital International Fund

Capital International Fund is a Luxembourg-based SICAV, governed under the Luxembourg law of 17 December 2010 on collective investment undertakings as amended and managed by Capital International Management Company Sàrl, a Luxembourg-based management company, affiliate of Capital Group.

Capital Group, a private firm, is one of the largest and oldest investment management organisations. Capital Group offers equity, fixed-income and multi-asset investment solutions mainly through separately managed accounts and investment funds. Capital Group's investment philosophy focuses on long term investing using high-conviction portfolios, rigorous research and individual accountability.

The Funds are actively managed and without any constraint concerning the composition of the portfolio of the Fund, within the limits of the relevant specific investment objective and policy. Any information in relation to an index provided in the Prospectus, KID/KIID and marketing materials is provided for the purposes of monitoring carbon emissions and risk management, as well as for context and illustration, as applicable. The Company has full discretion over the composition of the Funds' portfolios, subject to the relevant investment objectives and policies (as defined in the relevant Fund Information Sheet in Annex 2) which do not provide for index-tracking objectives.

The Investment Adviser uses a system of multiple in-house portfolio managers in managing the Fund's assets, which enables individual investment professionals to act on their highest convictions, while limiting the risk associated with isolated decision-making. Each portfolio is divided into portions that are managed independently by in-house investment professionals with diverse backgrounds, experiences and investment approaches. The Fund relies on the professional judgment of the Investment Adviser to make decisions about the Fund's portfolio investments. The basic investment philosophy of the Investment Adviser is to seek to invest in attractively valued companies that, in its opinion, represent good, long-term investment opportunities. The Investment Adviser believes that an important way to accomplish this is through fundamental analysis, which may include meeting with company executives and employees, suppliers, customers and competitors. Securities may be sold when the Investment Adviser believes that they no longer represent relatively attractive investment opportunities.

Warnings

Shares are offered on the basis of the information and representations contained in this Prospectus and the documents specified in this Prospectus and no other information or representation relating to them is authorised. Where legally required, this Prospectus must be accompanied by the relevant Key Investor Information Documents, and the Company's most recent annual report, and semi-annual report if more recent than the annual report; these form part of this Prospectus and can be obtained, free of charge, from the registered office of the Company.

This Prospectus does not constitute an offer or solicitation (i) by anyone in any jurisdiction in which it is illegal, (ii) where the person making an offer or solicitation is not qualified to do so, or (iii) to anyone to whom it is illegal to make an offer or solicitation. Please also see "Registration" below.

It is the responsibility of prospective purchasers of Shares to inform themselves as to, and to observe, the legal requirements, exchange control regulations and applicable taxes to which they are subject (see also any addendum accompanying this Prospectus with additional information for investors in relevant jurisdictions).

The Company, as an umbrella fund, comprises different Funds, each with a different investment objective and risk profile. Investment in the Company may not be suitable for all investors. Prospective purchasers of Shares who are individuals are encouraged to invest with the assistance of a Distributor (of which the Company will provide details upon request), who will be responsible for the assessment of the suitability and/or the appropriateness of such investment (see also "Distributors and other Intermediaries"). Investments in the Company are subject to market and other risks such as counterparty and liquidity risks. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. Past results are no indication of future results and investors may get back less than they originally invested.

As further detailed under "Restrictions on Ownership", the Company may restrict or prevent the ownership of Shares by any person, firm or corporate body including, but without limitation, any US Person and any US citizen. Shares may not be transferred except in compliance with all applicable securities laws. In addition, the Company may require the redemption of Shares by any person. The Company has not been and will not be registered under the United States Investment Company Act of 1940, as amended.

The Company draws the investors' attention to the fact that any investor will only be able to fully exercise his investor rights directly against the Company, notably the right to participate in general shareholders' meetings, if the investor is registered himself/herself and in his/her own name in the shareholders' register of the Company. In cases where an investor invests in the Company through an intermediary investing into the Company in its own name but on behalf of the investor, it may not always be possible for the investor to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

Registration

Each available Class is registered for public or limited offering of its Shares in various jurisdictions, a list of which may be obtained from the Company upon request.

Information on countries where the Funds are available can be found online at capitalgroup.com/international.

Definitions and References

In this Prospectus and any Annexes, the following capitalised terms will have the following meaning unless the context requires otherwise:

Account Opening Form	the form to be used for the purpose of opening an account with the Company
Administrative Manager	the party acting as the Company's domiciliary agent, corporate agent, registrar and transfer agent, i.e. J. P. Morgan SE, Luxembourg Branch of European Bank & Business Centre, 6, route de Trèves, L-2633 Senningerberg, Luxembourg
ADR	American Depository Receipt
Affiliate	any entity which is (i) directly or indirectly owned, (ii) managed or (iii) controlled by Capital Group
Bond	any transferable fixed-income security (which may include fixed-income securities convertible into equity and/or having attached warrants, as well as green bonds and perpetual bonds)
Business Day	a day on which banks are generally open for business in Luxembourg (excluding 24 December in each year)
Capital Group	The Capital Group Companies, Inc. of 333 South Hope Street, Los Angeles, California 90071, USA
Capital Group Investor	an investor who has been approved as a shareholder of the Company by the Management Company, subject to conditions established from time to time by Capital Group
CIF	Capital International Fund
CII	Capital International, Inc., 333 South Hope Street, 55th Floor, Los Angeles, CA 90071, USA
CISA	Capital International Sàrl of 3, place des Bergues, CH-1201 Geneva, Switzerland
Class	each class of Shares
CNH	Chinese Offshore Renminbi, accessible outside the PRC. The government of the PRC introduced this currency in July 2010 to encourage trade and investment with entities outside the PRC. The value of Offshore Renminbi (CNH) and Onshore Renminbi (CNY) may be different.
CNY	Chinese Onshore Renminbi accessible within the PRC
Company	Capital International Fund
Conducting Officer	a conducting officer of the Management Company pursuant to Article 102 (1) of the Law
CRMC	Capital Research and Management Company of 333 South Hope Street, Los Angeles, California 90071, USA
CSSF	Commission de Surveillance du Secteur Financier
Custodian	J. P. Morgan SE, Luxembourg Branch of European Bank & Business Centre, 6, route de Trèves, L-2633 Senningerberg, Luxembourg
Cut-Off Time	As defined in the relevant Fund Information Sheet in Annex 2 (unless the Management Company accepts another cut-off time)
Depository	J. P. Morgan SE, Luxembourg Branch of European Bank & Business Centre, 6, route de Trèves, L-2633 Senningerberg, Luxembourg
Distributor	an Intermediary that has entered into a business relationship with the Company or the Management Company whereby it has undertaken (i) to promote and distribute Shares or an investment product that invests in Shares or, in any similar manner, serve as an intermediary between the Company or the Management Company and investors, and (ii) to provide services to investors in relation to their investment in Shares
Dividend-distributing Equivalent Class	a Class, the characteristics and features of which are equivalent to those of another Class, except as specifically described under "The Classes" in respect of dividend distribution
Dividend-distributing Hedged Equivalent Class	a Class, the characteristics and features of which are equivalent to those of another Class, except as specifically described under "The Classes" in respect of dividend distribution and currency hedging
Eligible Investment Country	the countries in which the assets of the relevant Fund would normally be invested, as defined in the relevant Fund Information Sheet in Annex 2
Eligible Assets	assets in which the Portfolio of each Fund will exclusively invest, as specified in Annex 1 and in the relevant Fund Information Sheet in Annex 2
Emerging Market	a country that, in the opinion of the Investment Advisers, is generally considered to be a developing country by the international financial community
Equity or Equities	any transferable equity and equity-related securities (including fixed income securities convertible into equity or having attached warrants, warrants, ADRs, GDRs and preferred shares, all of which are considered equivalent to the underlying equity, as the case may be, for all intents and purposes)
Equivalent Class	a Class, the characteristics and features of which are equivalent to those of another Class, except as specifically described otherwise under "The Classes" in connection with the relevant Equivalent Class
Fund	each compartment of the Company
Fund of Funds	A Fund of Funds which invests in other Funds and/or in other UCIs directly or indirectly managed by the Investment Advisers or managed by an entity to which the Investment Advisers are related by virtue of (i) common management, (ii) common control, or (iii) a direct or indirect interest of more than 10 percent of share capital or voting rights. The Fund of Funds may invest in other UCIs managed by third party investment advisers and also, from time to time, directly in fixed-income and Equity securities.
GDR	Global Depository Receipt

Hedged Equivalent Class	a Class, the characteristics and features of which are equivalent to those of another Class, except as specifically described under "The Classes" in respect of currency hedging
High Yield Bond	a Bond with a credit rating equal to or lower than BB+ by Standard & Poor's or Fitch, or Ba1 by Moody's, or an un-rated Bond deemed to be of equivalent standing by the Investment Adviser. In the case of a split-rated security, the lowest rating will apply, unless otherwise specified in the relevant Fund Information Sheet in Annex 2
Initial Offer Period	The period during which a Class is initially on offer, as may be specified in the relevant Fund Information Sheet in Annex 2
Institutional Investor	an investor meeting the requirements to qualify as an institutional investor for the purposes of Article 174 of the Luxembourg law of 17 December 2010 on undertakings for collective investment and by the administrative practice of the CSSF and the Luxembourg Administration de l'enregistrement et des domaines
Intermediary	a person or entity that promotes and distributes Shares or an investment product that invests in Shares, or in any other similar manner serves as an intermediary between the Company or the Management Company and investors
Investment Adviser	the investment adviser and the sub-adviser of the relevant Fund, as defined in the relevant Fund Information Sheet in Annex 2
Investment Grade Bond	a Bond with a credit rating equal to or better than BBB- by Standard & Poor's or Fitch, or Baa3 by Moody's, or an un-rated Bond deemed to be of equivalent standing by the Investment Adviser. In the case of a split-rated security, the highest rating will apply, unless otherwise specified in the relevant Fund Information Sheet in Annex 2
JP Morgan	J. P. Morgan SE, Luxembourg Branch, European Bank & Business Centre, 6, route de Trèves, L-2633 Senningerberg, Luxembourg
Key Information Document (or KID)	the key information document under Regulation (EU) 1286/2014. This document is available on capitalgroup.com/international .
Key Investor Information Document (or KIID)	the key investor information document under Regulation (EU) 583/2010. This document is available on capitalgroup.com/international
Launch Date	the date as of which Shares are first issued by a Fund
Law	the Luxembourg law of 17 December 2010 on collective investment undertakings, as may be amended
Management Company	Capital International Management Company Sàrl, of 37A, avenue John F. Kennedy, L-1855 Luxembourg
Management Fee	the management fee paid by the Company to the Management Company, expressed as a percentage of total net assets in the relevant Class
Member State	member State of the European Union
Nationally Recognised Statistical Rating Organisation (NRSRO)	an NRSRO is an organisation that issues ratings that assess the creditworthiness of an obligor itself or with regard to specific securities or money market instruments, has been in existence as a credit rating agency for at least three years, and meets certain other criteria, as defined in Section 3(a)(62) of the Securities Exchange Act of 1934, as amended.
Net Asset Value	the net asset value per Share, calculated in accordance with the Calculation Principles provided for under "Net Asset Value"
OECD	Organisation for Economic Co-operation and Development
Offering Price	the offering price per Share
Official Listing	official listing on a stock exchange, which is regulated, operating regularly, recognised and open to the public within the meaning of Article 41(1) of the Law
OTC	over-the-counter
OTC Derivative	financial derivative instrument dealt in the OTC derivative markets
Paying Agent	J. P. Morgan SE, Luxembourg Branch of European Bank & Business Centre, 6, route de Trèves, L-2633 Senningerberg, Luxembourg
Payment Currency	a currency in which subscription monies may generally be paid and in which an official Net Asset Value of each Fund is available. The list of available Payment Currencies in each active Class and Equivalent Class can be found online on the Management Company's webpage at capitalgroup.com/international
Portfolio	the portfolio of the relevant Fund
PRC	the People's Republic of China
Redemption Pre-notification Date	for redemption requests above the amount specified in the relevant Fund Information Sheet in Annex 2, three Week Days before the relevant Valuation Date
Redemption Charge	A charge applied upon redemption or switch out of Shares within a specified period, as may be specified in the relevant Fund Information Sheet in Annex 2
Regulated Market	a market that is regulated, operating regularly, recognised and open to the public. In the case of Bonds, Regulated Markets include (i) the Over-the-Counter-Markets of the NASDAQ System, (ii) the Over-the-Counter Market of the members of the International Capital Market Association, (iii) the US NASD-regulated Over-the-Counter Bond Market and (iv) any similarly operating Regulated Market on which Bonds including Eurobonds and similar off-shore Bonds are customarily dealt in
RMB	Renminbi, the official currency of the PRC; is generally used to denote the Chinese currency traded in the Onshore Renminbi (CNY) and the Offshore Renminbi (CNH) markets.
SFDR	Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector, as amended
Share	a share of the Company

Shareholder	the owner of Share(s)
SICAV	open-ended investment company ("Société d'Investissement à Capital Variable")
Subscription Pre-notification Date	for subscription requests above the amount specified in the relevant Fund Information Sheet in Annex 2, three Week Days before the relevant Valuation Date
Taxonomy Regulation	Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088.
Transaction Request Form	the form to be used for transacting in Shares
UCI	Undertaking for Collective Investment within the meaning of Article 41 (1) e) of the Law
UCITS	Undertaking for Collective Investment in Transferable Securities authorised according to the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investments in transferable securities, as may be amended
Underlying Funds	Funds of the Company in which a Fund of Funds invests as defined in the relevant Fund Information Sheet in Annex 2
USA or US	the United States of America
US Person	a "US Person" as defined in Regulation S under the United States Securities Act of 1933, as amended, which includes any resident of the United States, or any corporation, partnership or other entity created or organised under the laws of the United States (including any estate of any such person created or organised in the United States)
Valuation Date	the date as of which the assets of a given Fund are valued, as defined in the relevant Fund Information Sheet in Annex 2
WACI	Weighted Average Carbon Intensity (CO ₂ e/US\$m revenue. Carbon dioxide equivalent (CO ₂ e) is the number of metric tons of CO ₂ emissions with the same global warming potential as one metric ton of another greenhouse gas)
Week Day	any calendar day other than a Saturday or a Sunday

Unless otherwise specified, all references to time are to Luxembourg time.

The Funds and their Structure

The Company is incorporated in Luxembourg as a SICAV under Part I of the Law, as described in more detail under "Capital International Fund – General and Corporate Information".

The Funds

The Company has adopted a multiple-compartment (or "umbrella") structure to provide investors with a choice of investment portfolios within the same investment vehicle. A separate Portfolio is maintained for each Fund and is invested in accordance with the investment objective applicable to the relevant Fund, and the assets of one Fund may only be used to cover the liabilities of such Fund. Each Fund may be differentiated by its specific investment objective and policy or other specific features, as described within the relevant Fund Information Sheet in Annex 2.

The Classes

Shares of each Fund may be divided into Class A4 Shares, Class A7 Shares, Class A9 Shares, Class A11 Shares, Class A13 Shares, Class A15 Shares, Class B Shares, Class BL Shares, Class C Shares, Class Y Shares, Class N Shares, Class P Shares, Class S Shares, Class U1 Shares, Class Z Shares, Class ZL Shares and Class L Shares. In addition, some Classes of some Funds may be further broken down into Equivalent Classes, with particular features as described below. Classes will be activated by the Management Company. Active Classes available in each Fund and corresponding KIDs/KIIDs may be found on the Management Company's webpage at capitalgroup.com/international.

Each Class is primarily designed for certain categories of investors as described below.

Each Class and Equivalent Class may be available in the following currencies: CHF, EUR, GBP, JPY and USD or any other freely convertible currency. Each Class and Equivalent Class may also be available in RMB. The list of available Payment Currencies in each active Class and Equivalent Class can be found online on the Management Company's webpage at capitalgroup.com/international.

Classes	Description
Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, and Equivalent Classes	Class A4, Class A7, Class A9, Class A11 Shares, Class A13 Shares, Class A15 Shares and Shares of Equivalent Classes are available only to Institutional Investors, and/or Capital Group Investors subject to conditions established from time to time by Capital Group. Eligibility for Class A4, Class A7, Class A9, Class A11, Class A13, Class A15 and Equivalent Classes is subject, in each Fund, to an initial investment and minimum amount to be held at any time by Institutional Investors, as specified in the relevant Fund Information Sheet in Annex 2 ¹ .
Class C and Equivalent Classes	Class C Shares and Shares of Equivalent Classes are available only to Institutional Investors which are Capital Group Investors, subject to conditions established from time to time by Capital Group, including the entering into of a separate agreement with respect to management fee, the Annual Administration Charge and/or other fund expenses, which are not deducted from these Shares' Net Asset Value.
Class Y and Equivalent Classes	Class Y Shares and Shares of Equivalent Classes are available only to Capital Group Investors, subject to conditions established from time to time by Capital Group, including the entering into of a separate agreement with respect to management fee, the Annual Administration Charge and/or other fund expenses, which are not deducted from these Shares' Net Asset Value.

¹ Unless a lower amount is approved by the Management Company's Board of Directors or results from market action. Different investment minima may apply if Shares are purchased with the assistance of a Distributor, as further detailed under "Distributors and other Intermediaries".

Class B and Equivalent Classes	Class B Shares and Shares of Equivalent Classes are available for individual investors investing either with the assistance of Distributors or directly. No initial investment and minimum amount is required to invest in Class B Shares and Shares of Equivalent Classes. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class B and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.
Class BL and Equivalent Classes	Class BL Shares and Shares of Equivalent Classes are available for individual investors investing with the assistance of Distributors which are subject to the minimum initial investment and amount held at any time as defined in the relevant Fund Information Sheet in Annex 2, as well as a separate agreement. Class BL Shares and Shares of Equivalent Classes are also available to Capital Group Investors subject to conditions established from time to time by Capital Group. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class BL and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.
Class U1 and Equivalent Classes	Class U1 Shares and Shares of Equivalent Classes are available for individual investors investing with the assistance of Distributors subject to conditions established from time to time by Capital Group including, but not limited to, the entering into of a separate agreement. Class U1 Shares and Shares of Equivalent Classes are only offered and available for subscription during the Initial Offer Period, as specified in the relevant Fund Information Sheet in Annex 2, determined at the sole discretion of the Management Company. After the Initial Offer Period, subscriptions will no longer be accepted unless otherwise decided by the Management Company. Class U1 Shares and Shares of Equivalent Classes are only available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company. A Redemption Charge applies if Class U1 Shares and Shares of Equivalent Classes are redeemed or if investors switch to another Class or Fund within a specified period, as detailed in the relevant Fund Information Sheet in Annex 2. At the end of this period, Shares are automatically switched free of charge into another Class as specified in the relevant Fund Information Sheet in Annex 2. This switch occurs on or around the end of the period specified in the relevant Fund Information Sheet in Annex 2 (a switch from one Class to another is deemed a sale for this purpose). Following the switch, Shareholders hold Shares of the receiving Class and are subject to the rights and obligations associated with the receiving Class. Additional information can be found in the relevant Fund Information Sheet in Annex 2.
Class N and Equivalent Classes	Class N Shares and Shares of Equivalent Classes are available for individual investors investing with the assistance of Distributors. No initial investment and minimum amount is required to invest in Class N Shares and Shares of Equivalent Classes.
Class Z and Equivalent Classes	Class Z Shares and Shares of Equivalent Classes are available to Distributors who are directly compensated by investors through separate fee arrangements, and are not allowed to accept and keep trail commissions, either due to regulatory restrictions such as EC Directive 2014/65/EC as amended (commonly referred to as "MiFID II") or similar laws and regulations or on the basis of contractual arrangements. No initial investment and minimum amount is required to invest in Class Z Shares and Shares of Equivalent Classes. Class Z Shares and Shares of Equivalent Classes are also available to Capital Group Investors subject to conditions established from time to time by Capital Group. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class Z and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.
Class P and Equivalent Classes	Class P Shares and Shares of Equivalent Classes are available to Distributors who are directly compensated by investors through separate fee arrangements, and are not allowed to accept and keep trail commissions, either due to regulatory restrictions such as EC Directive 2014/65/EC as amended (commonly referred to as "MiFID II") or similar laws and regulations or on the basis of contractual arrangements. Eligibility for Class P Shares and Shares of Equivalent Classes is subject, in each Fund, to an initial investment and minimum amount to be held at any time by the Distributor, of USD 100 million, as specified in the relevant Fund Information Sheet in Annex 2 ¹ . Class P Shares and Shares of Equivalent Classes are also available to Capital Group Investors subject to conditions established from time to time by Capital Group. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class P and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.
Class S and Equivalent Classes	Class S Shares and Shares of Equivalent Classes are available to Distributors who are (i) directly compensated by the investors through separate fee arrangements, and are not allowed to accept and keep trail commissions, either due to regulatory restrictions such as EC Directive 2014/65/EC as amended (commonly referred to as "MiFID II") or similar laws and regulations or on the basis of contractual arrangements, and (ii) Capital Group Investors, subject to conditions established from time to time by Capital Group including, but not limited to, the entering into of a separate agreement. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class S and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.
Class ZL and Equivalent Classes	Class ZL Shares and Shares of Equivalent Classes are available to Distributors who are directly compensated by the investors through separate fee arrangements, and are not allowed to accept and keep trail commissions, either due to regulatory restrictions such as EC Directive 2014/65/EC as amended (commonly referred to as "MiFID II") or similar

	laws and regulations or on the basis of contractual arrangements. Eligibility for Class ZL Shares and Shares of Equivalent Classes is subject, in each Fund, to an initial investment and minimum amount to be held at any time by the Distributor, of USD 500 million, as specified in the relevant Fund Information Sheet in Annex 2 ² . Class ZL Shares and Shares of Equivalent Classes are also available to Capital Group Investors subject to conditions established from time to time by Capital Group. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class ZL and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.
Class L and Equivalent Classes	Class L Shares and Shares of Equivalent Classes are available to Distributors who are (i) directly compensated by the investors through separate fee arrangements, and are not allowed to accept and keep trail commissions, either due to regulatory restrictions such as EC Directive 2014/65/EC as amended (commonly referred to as "MiFID II") or similar laws and regulations or on the basis of contractual arrangements, (ii) Distributors who have entered into a separate agreement with the Management Company and have a significant investment in the relevant Fund as determined by the Management Company and (iii) Capital Group Investors, subject to conditions established from time to time by Capital Group including, but not limited to, the entering into of a separate agreement. A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries in the case of Class L and Equivalent Classes, or by the Management Company, from any amount to be invested in Shares (a switch from one Fund to another is deemed a sale for this purpose). Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.

Additional features of the Equivalent Classes

Feature	Description
Dividend-distributing Equivalent Classes	It is intended that these Classes will distribute dividends (see "Dividend Policy" for details). All such Classes are equivalent to one of the above Classes, other than with respect to dividend distribution. These are marked by a "d", "ad", "fd", "fdx", "fyd", "fyd2" or "gd", depending on the applicable dividend methodology (see "Dividend Policy" for details).
Hedged Equivalent Classes	All such Classes are equivalent to one of the above Classes, other than with respect to currency hedging. These Classes seek to limit exposure of their Shareholders to currencies other than the currency referred to in the relevant Class's designation; a systematic passive currency-hedging overlay will be performed by JPMorgan Chase Bank, N.A. on a significant part of the assets of the relevant Fund attributable to these Classes. Over-hedged or under-hedged positions may arise unintentionally due to specific factors such as the net flows or fluctuations in the net asset value of the Class, however, over-hedged positions will not exceed 105% of the net asset value of the relevant Hedged Equivalent Class and under-hedged positions will not fall below 95% of the portion of the net asset value of the Hedged Equivalent Class which is to be hedged. The hedged positions will be kept under review to ensure that under-hedged positions do not fall below the level set out above and are not carried forward from month to month and that over-hedged positions materially in excess of 100% will not be carried forward from month to month. The actual passive currency-hedging overlay methodology will vary from Class to Class, as described in the relevant Fund Information Sheet in Annex 2. Passive currency-hedging overlay will not completely eliminate the exposure to currency movements, and proxy hedging may, for instance, be used when the underlying currency is not liquid or is closely linked to another currency. The costs of passive currency-hedging overlay and gains/losses from hedging transactions are borne by the relevant Hedged Equivalent Class(es). Investors should be aware that any currency hedging process may not give a precise hedge. Furthermore, there is no guarantee that the hedging will be totally successful. Investors in the currency Hedged Share Classes may have exposure to currencies other than the currency of their Share Class. Shareholders of Hedged Equivalent Classes should note that returns of Hedged Equivalent Classes may be significantly different over time than those of unhedged Classes and that passive currency-hedging overlay may limit their ability to benefit from the currency diversification undertaken within the portfolio. Please also refer to the section "Risks Related to Share Classes" for more information. These are marked by a "h" and a reference to the currency being hedged into. An up-to-date list of Classes with a contagion risk can be obtained from the Management Company upon request.
Dividend-distributing Hedged Equivalent Classes	These Classes combine the features of Dividend-distributing Equivalent Classes and Hedged Equivalent Classes. All such Classes are equivalent to one of the above Classes, other than with respect to dividend distribution and currency hedging. These are marked by a "dh", "adh", "fdh", "fydh", "fyd2h" or "gdh" and a reference to the currency being hedged into.

The Management Company may ask the applicant investor and/or the Distributor or other Intermediary, as the case may be, to supply any relevant eligibility information (Please refer to "Restrictions on Ownership"). In considering the qualification of a subscriber or a transferee as an Institutional Investor, the Management Company will have due regard to any guidelines or recommendations issued by Luxembourg authorities. Institutional Investors subscribing for Shares of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class C, Class Y or corresponding Equivalent Classes in their own name, but on behalf of a third party, must certify to the Management Company that the subscription is made on behalf of an Institutional Investor and the Management Company may require, at its sole discretion, evidence that the beneficial owner of the Shares is an Institutional Investor.

² Unless a lower amount is approved by the Management Company's Board of Directors or results from market action. Different investment minima may apply if Shares are purchased with the assistance of a Distributor, as further detailed under "Distributors and other Intermediaries".

If the Management Company determines, in its discretion, that the applicant investor is not eligible for the selected Class, it may reject the investment request. If the Management Company determines, in its discretion, that an existing investor is not eligible anymore in the Class it is invested in it may, in its discretion, switch the investor into the nearest similar available Class without seeking any pre-approval from the investor or redeem the investor.

Prospective investors are invited to ascertain with the Administrative Manager that a Class is active before making their subscription; processing of subscription applications in a Class that is not yet active may be delayed and Shares will be issued at the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment", of the Valuation Date on which the Class is effectively launched.

In any such case, or where the Company has had to switch Shares into a Class that was not the Class originally invested in, it will inform the investor promptly. It will be the investor's responsibility to apply for a conversion of his holding back into the Class originally invested in if he later again becomes eligible for such Class.

The Company reserves the right to de-register in Taiwan at any time if, in the opinion of the Investment Adviser, it is likely that such Investment Adviser's investment conviction will lead the Company to, in the near future, exceed any then applicable Taiwanese limit on investing in Mainland China securities.

Dividend Policy

Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes

Principle and amount: The Board of Directors of the Company intends to recommend that dividends be distributed to Shareholders of all Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes.

Dividend-distributing policies:

Dividend designation	Dividend policy
d	The dividend will generally represent all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, net investment income.
gd	The dividend will generally represent a substantial part of the gross investment income (i.e., investment income net of withholding taxes but gross of expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, gross investment income. The payment of dividends out of gross investment income implies that all or part of the fees and expenses are charged to capital (i.e. accumulated capital gains or initial investment).
ad	This Class is available only to Capital Group investors, subject to conditions established from time to time by Capital Group. The dividend will generally represent all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, net income.
fd	The dividend will generally be fixed and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The payment of a fixed dividend implies that any payment in excess of the net investment income may include capital gains, as well as partially be paid out of capital. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. Please refer to the section "Risks related to Classes" for more information.
fdx	The dividend will generally be fixed based on a pre-determined annual percentage of Net Asset Value per Share and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of these Classes. The payment of a fixed dividend implies that any payment in excess of the net investment income may include capital gains, as well as partially be paid out of capital. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. Please refer to the section "Risks related to Classes" for more information. These Classes will only be available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company.
fyd	The dividend will be calculated based on a fixed annual dividend yield applied as a percentage of the Net Asset Value per Share, resulting in a variable dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The payment of a dividend calculated in this manner implies that any payment in excess of the net investment income may include capital gains and/or payments out of capital which may result in the reduction of invested capital over time. The fixed percentage applied to the Net Asset Value per Share is intended to achieve a predictable annual dividend yield. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Share Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. The fixed annual dividend yield may be changed at the discretion of the Management Company taking into consideration exceptional circumstances. Please refer to the section "Risks related to Classes" for more information. Classes marked with a "fyd" are only available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company.
fyd2	The dividend will be calculated based on a fixed annual dividend yield applied as a percentage of the Net Asset Value per Share, resulting in a variable dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The fixed percentage applied to the Net Asset Value per Share is intended to achieve a predictable annual dividend yield that is anticipated to be higher than Classes marked with a "fyd". The payment of a dividend calculated in this manner implies that any payment in excess of the net investment income may include capital gains and/or payments out of capital which may result in the reduction of invested capital over time. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Class, and may at times exceed the increase in the Net Asset

	Value per Share deriving from the net income from realised and/or unrealised gains of the Class. The fixed annual dividend yield may be changed at the discretion of the Management Company, taking into account prevailing market conditions and other factors, including exceptional circumstances, as well as the Fund's capacity to sustain dividend distributions over the long term, having regard to capital. Please refer to the section "Risks Related to Classes" for more information. The Company or the Management Company may also, at their sole discretion, decide to close the subscriptions and switches in (but not redemptions or switches out of) Classes marked with fyd2 for a limited or unlimited period of time, if it is necessary to protect Shareholders of other Classes of the same Fund. Please refer to the section "Rejection Privilege" for more information. Share Classes marked with a "fyd2" are only available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company.
--	---

Dividend distribution frequency:

Monthly and bi-monthly dividend-distributing Classes carry a suffix indicating their intended distribution frequency. Classes marked by a "m" are intended to distribute monthly, while those marked by a "b" are intended to distribute every two months.

Frequency designation	Distribution frequency
m	It is intended that these Classes will distribute dividends monthly. These are marked by a "m", i.e. "dm", "gdm", "adm", "fdm", "fdxm", "fydm" or "fyd2m" depending on the applicable dividend methodology (see "Dividend Policy" above for details) or "dmh", "gdmh", "admh", "fdmh", "fdxmh", "fydmh" or "fyd2mh" for Dividend-distributing Hedged Equivalent Classes.
b	It is intended that these Classes will distribute dividends bi-monthly, i.e. every two months. These are marked by a "b", i.e. "db", "gdb", "adb", "fdb", "fdb", "fydb" or "fyd2b" depending on the applicable dividend methodology (see "Dividend Policy" above for details) or "dbh", "gdbh", "adbh", "fdbh", "fdbh", "fydbh" or "fyd2bh" for Dividend-distributing Hedged Equivalent Classes. These Classes may be launched at the discretion of the Management Company and may be made available only to certain distributors or categories of investors, as determined by the Management Company.

Payment:

Shareholders can elect in writing to have their dividends either reinvested in Shares or paid to them. In the absence of instruction from a Shareholder, the Administrative Manager will automatically reinvest any dividends in Shares promptly upon payment of the dividend. If the Shareholder elects to have dividends paid, the relevant amount will be paid at no charge by bank transfer in the relevant Payment Currency to the bank account designated for this purpose (with all necessary details as specified in the Account Opening Form) by the Shareholder. Upon dividends paid to a Shareholder having been returned to the Company for the second consecutive year, the Administrative Manager will reinvest in Shares the amounts so returned, as well as the amount of any subsequent dividend paid to the same Shareholder until otherwise instructed.

Non-dividend distributing Equivalent Classes and corresponding Hedged Equivalent Classes

It is not at present intended that dividends be distributed to Shareholders of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class B, Class BL, Class C, Class L, Class N, Class P, Class S, Class Y, Class Z, Class ZL, and corresponding Hedged Equivalent Classes in any Fund.

The Shares

Shares are available in registered form only. Fractions of Shares may be issued. Each whole Share or fraction of a Share is entitled to participate equally, within its Fund and within its Class, in the profits of, and distributions by, the Company and in its assets on liquidation. Otherwise, all Shares have the same rights and privileges, except as described under "The Classes", "Dividend Policy" and "Expenses". Each whole Share is entitled to one vote at all meetings of Shareholders; fractions of Shares will not entitle the holder to vote. The Shares are fully paid and have no preferential or pre-emptive rights.

Investment Objectives and Policies

The objective of the Company is to seek to achieve the objective of each Fund as described within the relevant Fund Information Sheet in Annex 2 for the benefit of its Shareholders. The assets of each Fund are invested with a long-term perspective in accordance with the objective of the relevant Fund, subject to the investment restrictions described in Annex 1 and in the Fund Information Sheet of the relevant Fund in Annex 2.

Information relating to historical investment results of each Class will be found in the KIDs/KIIDs.

Sustainability-related Disclosures

Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector, as amended (the "SFDR"), governs the transparency requirements regarding the integration of sustainability risks into investment decisions, the consideration of adverse sustainability impacts and the disclosure of Environment, Social and Governance ("ESG") and sustainability-related information. Pursuant to SFDR, the Management Company is required to disclose the manner in which sustainability risks are integrated into the investment decision and the results of the assessment of the likely impacts of sustainability risks on the returns of each Fund.

Sustainability risks ("Sustainability Risks") refer to ESG events or conditions that, if they occur, could cause an actual or a potential material negative impact on the value of the investments of a Fund. Sustainability Risks are linked to environmental-related events resulting from climate change (also known as physical risks) or to the society's response to environmental change (also known as transition risks), which may result in losses that could affect the investments of a Fund. Social conditions (e.g., oversight, remuneration, labour relations, investment in human capital, accident prevention, changing customer behaviour, products quality and safety, selling practices) or governance shortcomings (e.g., recurrent significant breach of international agreements, bribery issues, etc.) may also translate into Sustainability Risks. Sustainability Risks are identified, managed and monitored through the Management Company's risk management process and throughout the investment process, using proprietary investment frameworks, engagement and monitoring processes.

Please refer to the section titled "Risk Warnings" of this Prospectus and to the Management Company's ESG Policy for further details on the Sustainability Risks. The Management Company and Investment Advisers' integration of Sustainability Risks in the investment decision-making process is reflected in the Management Company's ESG Policy, which may be obtained from [https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/esg/files/esg-policy-statement\(en\).pdf](https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/esg/files/esg-policy-statement(en).pdf).

When managing any of its Funds, the Management Company and/or the Investment Advisers consider Sustainability Risks alongside financial and economic indicators in its investment research and analysis, as well as other risks. The assessment process is consistent across the Funds and enables the Management Company and/or the Investment Advisers to identify and manage structural and emerging Sustainability Risks.

ESG Investment Frameworks and Monitoring Process

With regards to the investment frameworks, Capital Group's equity and fixed income investment analysts have developed more than 30 sector-specific, proprietary ESG investment frameworks for companies. These frameworks help our investment professionals identify and assess the most relevant and material long-term ESG issues that could affect investments of a Fund. We have a standalone framework for sovereigns that has been built in-house.

Where data is available, Capital Group's equity, corporate bond and sovereign bond holdings are monitored for elevated Sustainability Risks. Corporate and sovereign holdings are reviewed against third-party data from a range of providers to identify Sustainability Risks and violations of international norms. Low-rated companies and countries are flagged for review by Capital Group's investment professionals. During this process material risks that are identified and that are not mitigated by the issuer are escalated for additional review and monitoring. The next action to take is identified, and options may include additional company engagement, regular monitoring and divestment.

Engagement and Stewardship

Engaging with companies on ESG issues, including those identified via the monitoring and framework process, is also an important part. Engagement generally involves meetings between investment professionals and company management to understand how issuers are managing material Sustainability Risks and opportunities. This provides insights which combined with data, give us a better understanding of how Sustainability Risks could impact the current or future value of an investment. In addition, voting on proxies is also an integral part of our engagement and investment process.

Integration

The output of this process is used as an additional non-binding input in Capital Group's forward-looking assessment alongside financial and economic considerations. Capital Group's integration of Sustainability Risks in the investment decision-making process is reflected in Capital Group's ESG Policy. For certain Funds as detailed in relevant Fund Information Sheet in Annex 2, additional binding investment criteria are applied.

The Investment Advisers take Sustainability Risks into account in their investment decision making process to the extent that they represent a potential or actual material risk to maximising the long-term risk-adjusted returns of the Funds. The assessment of the likely impact of Sustainability Risks on the Fund's return will depend on the investment policy and the type of securities held in its portfolio. Capital Group's integration of Sustainability Risks are embedded and relevant across the investment process for the Funds.

In addition to the above and as described within the relevant Fund Information Sheet in Annex 2 and in the Fund's pre-contractual information in Annex 4, some Funds are subject to the requirements of Article 8 of the SFDR. These Funds integrate Sustainability Risks in the investment decision-making process and consider environmental or social characteristics, or a combination of those characteristics as part of their investments within the meaning of Article 8 of the SFDR. Only these Funds consider certain principal adverse impacts as disclosed in the relevant Fund Information Sheet in Annex 2 on sustainability factors as part of the sustainability indicators used to measure the attainment of each of the environmental or social characteristics, or a combination of those characteristics, promoted by those Funds. As at the date of this Prospectus, the other Funds do not consider principal adverse impacts on sustainability factors because they are not appropriate for the investment policies and/or distribution channels of these Funds. The situation may however be reviewed going forward.

Information about the environmental or social characteristics of Funds classified as Article 8 of the SFDR is available in the relevant Fund Information Sheet in Annex 2 and in the Fund's pre-contractual information in Annex 4.

Taxonomy Regulation

Unless otherwise described in the Fund Information Sheet in Annex 2 and in the Fund's pre-contractual information in Annex 4, the investments underlying the Funds do not take into account the EU criteria for environmentally sustainable economic activities for the purpose of the Taxonomy Regulation. Funds that promote environmental or social characteristics within the meaning of Article 8 of the SFDR, as described within the relevant Fund Information Sheet in Annex 2 and within the Fund's pre-contractual information in Annex 4, do not commit to make investments in activities aligned with the Taxonomy Regulation. It is however not excluded that such Funds may invest in underlying investments that contribute to environmental objectives as per the Taxonomy Regulation.

Risk Warnings

General Investment Risk

The Company, as an umbrella fund, comprises different Funds, each with a different investment objective and risk profile. Investments in all Funds are subject to market and other risks such as counterparty and liquidity risks. Past results are no indication of future results and investors may get back less than they originally invested. There can be no guarantee that the investment objectives will be realised. This and other risks should be considered carefully by prospective investors. The Company seeks, as far as is feasible, to reduce these risks by careful management of its assets. However, there can be no assurance that these efforts will be successful.

Specific Risks

The list of risks indicated below is not exhaustive, and any investments are subject to any risks related to international investment generally.

Equities

Some Funds will invest in Equities. The prices of Equity securities may decline in response to certain events, including but not limited to those directly affecting the companies whose securities are owned by the relevant Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency fluctuations.

Bonds

Some Funds will invest in Bonds, which includes green bonds and perpetual bonds. The market values of Bonds generally vary inversely with the level of interest rates – when interest rates rise, their values will tend to decline and vice versa. The magnitude of these changes generally will be greater the longer the remaining maturity of the security.

Funds investing in Bonds will be exposed to credit risk. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that the issuer experiences financial or economic difficulties, this may affect the value of, and/or any amounts paid on, the relevant securities. Borrowers that are in bankruptcy or restructuring may never pay off their indebtedness, or they may pay only a small fraction of the amount owed. Direct indebtedness of countries, particularly Emerging Markets, also involves a risk that the governmental entities responsible for the repayment of the debt may be unable, or unwilling, to pay interest and repay principal when due. Securities ratings by credit rating agencies are a generally recognised barometer of credit risk; however, an issuer's rating is heavily weighted by past developments and does not necessarily reflect probable future conditions. There is frequently a lag between the time the rating is assigned and the time it is updated; and there may be varying degrees of difference in credit risk of securities within each rating category. While Investment Grade Bonds usually have a higher capacity to pay interest and repay principal than lower-rated securities, there are no assurances that losses will not occur with respect to these investments.

High Yield Bonds

Some Funds will invest in High Yield Bonds. These Bonds typically are subject to greater market fluctuations and to greater risk of loss of income and principal due to default by the issuer than are higher-rated Bonds. Lower-rated Bonds' values tend to reflect short-term corporate, economic and market developments and investor perceptions of the issuer's credit quality to a greater extent than lower-yielding higher-rated Bonds. In addition, it may be more difficult to dispose of, or to determine the value of, High Yield Bonds. Bonds rated BB+ or Ba1 or lower are described by the ratings agencies as "predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions."

Distressed securities

Some Funds may invest in distressed securities (which we define as having a credit rating lower than CCC- by Standard & Poor's or equivalent) at the time of purchase. Such securities may be regarded as predominantly speculative with respect to the issuer's capacity to pay interest and principal or meet other obligations contained in an indenture or credit agreement. These Funds may also invest in debt securities on which the issuer is not currently making interest payments (defaulted debt securities). Distressed and defaulted debt securities may be unsecured and/or subordinated to other outstanding liabilities of the issuer. Whilst holders of distressed or defaulted securities may benefit from certain legal protections applicable to such securities, these protections may be outweighed by other legal or economic risks. Therefore, a Fund may lose its entire investment, may receive cash or securities (including equity securities) with a value less than its original investment and/or may be required to accept payment over an extended period of time. Efforts to maximize the value of these securities may involve additional cost for the relevant Fund. It may also be more difficult to dispose of, and to determine the value of, distressed and defaulted securities as compared to higher rated debt securities.

Notwithstanding the above paragraph, if a security satisfies the Fund's credit rating criteria at the time of purchase and subsequently is downgraded to a rating which would result in the security being classified as a "distressed security", the Fund will not be required to dispose of such security. If such a downgrade occurs, the Investment Adviser(s) will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective.

Sovereign Debt

Some Funds will invest in sovereign debt and thus may be exposed to credit risk of the relevant governmental issuers. The said Funds could lose money if such issuers default and there may not be any bankruptcy proceedings by which said Funds could enforce their rights in whole or in part.

European Monetary Union (EMU)

Some Funds will invest in countries that are members of the EMU. While some of these countries will retain relatively high credit ratings, there is a risk that one or several countries exit the Eurozone or a country within the Eurozone may default, leading to the break-up of the Eurozone. Such crisis may have significant negative impact on said Funds (such as default or downgrading of the security issued by a sovereign issuer and higher volatility, liquidity and foreign exchange risk associated with investments in European securities).

The performance of said Fund could deteriorate should there be any adverse credit events in the European region (e.g. downgrade of the sovereign credit rating of a European country or a default or bankruptcy of a European country and/or a sovereign issuer).

Emerging Markets

Some Funds will invest in Emerging Markets securities. Investing in Emerging Markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, Emerging Markets tend to have less developed political, economic and legal systems than those in developed countries. Accordingly, the governments of these countries may be less stable and more likely to intervene in the market economy, for example, by imposing capital controls, nationalizing a company or industry, placing restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or imposing punitive taxes that could adversely affect the prices of securities. Information regarding issuers in developing countries may be limited, incomplete or inaccurate, and such issuers may not be subject to regulatory, accounting, auditing, and financial reporting and recordkeeping standards comparable to those to which issuers in developed countries are subject. The Fund's rights with respect to its investments in Emerging Markets, if any, will generally be governed by local law, which may make it difficult or impossible for the Funds to pursue legal remedies or to obtain and enforce judgements in local courts. In addition, the economies of these countries may be dependent on relatively few industries, may have limited access to capital and may be more susceptible to changes in local and global trade conditions and downturns in the world economy. Securities markets in these countries can also be relatively small and have substantially lower trading volumes. As a result, securities issued in these countries may be more volatile and less liquid, and may be more difficult to value, than securities issued in countries with more developed economies and/or markets. Additionally, there may be increased settlement risks for transactions in local securities. Less certainty with respect to security valuations may lead to additional challenges and risks in calculating the Funds' Net Asset Value.

Additionally, Emerging Markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by banks, agents and depositories that are less established than those in developed countries.

Furthermore, in jurisdictions where direct foreign investment is limited or prohibited (such as the PRC, Emerging Markets), the Fund may invest in operating companies based in such jurisdictions through vehicles called Variable Interest Entities (hereinafter "VIE"). A VIE structure is an offshore intermediary entity that, based on contractual agreements, seeks to replicate the rights and obligations of direct equity ownership in such operating business. Because the contractual arrangements do not in fact bestow the Fund with actual equity ownership in the operating company, VIE structures may limit the Fund's rights as an investor and create significant additional risks. For example, local government authorities may determine that such structures do not comply with applicable laws and regulations, including those relating to restrictions on foreign ownership. In such event, the intermediary entity and/or the operating business may be subject to penalties, revocation of business and operating licenses or forfeiture of foreign ownership interests, and the Fund's economic interests in the underlying operating business and its rights as an investor may not be recognized, resulting in a loss to the Fund and its Shareholders. In addition, exerting control through contractual arrangements may be less effective than direct equity ownership, and a company may incur substantial costs to enforce the terms of such arrangements, including those relating to the allocation of assets among the entities. VIE structures may also be disregarded for tax purposes by local tax authorities, resulting in increased tax liabilities, and the Fund's control over – and distributions due from – such structures may be jeopardized if the individuals who hold the equity interest in VIE structures breach the terms of the agreements. While VIE structures may be widely used to accommodate limits on foreign ownership in certain jurisdictions, there is no assurance that they will be recognized and/or upheld by local regulatory authorities or that disputes regarding the same will be resolved consistently. There is a risk that this could have severe adverse impacts on the value of the investments in VIE structures.

Certain risk factors related to Emerging Markets

Currency fluctuations

Certain Emerging Markets' currencies have experienced and in the future may experience significant declines against major convertible currencies. Further, the Fund may lose money due to losses and other expenses incurred in converting various currencies to purchase and sell securities, as well as from currency restrictions, exchange control regulation, governmental restrictions that limit or otherwise delay the Fund's ability to convert or repatriate currencies and currency devaluations.

Government regulation

Certain Emerging Markets lack uniform accounting, auditing and financial reporting and disclosure standards, may have often less governmental supervision of financial markets than in developed countries, and may not in many cases honor legal rights or protections enjoyed by investors in developed countries. Certain governments may be more unstable and present greater risks of nationalization or restrictions on foreign ownership of local companies. Repatriation of investment income, capital and the proceeds of sales by foreign investors may require governmental registration and/or approval in some Emerging Markets. While the relevant Fund will only invest in markets where these restrictions are considered acceptable by the Investment Adviser(s), a country could impose new or additional repatriation restrictions after the Fund's investment. If this happened, the Fund's response might include, among other things, applying to the appropriate authorities for a waiver of the restrictions or engaging in transactions in other markets designed to offset the risks of decline in that country. Such restrictions will be considered in relation to the Fund's liquidity needs and other factors. Further, some attractive equity securities may not be available to the Fund if foreign investors already hold the maximum amount legally permissible.

While government involvement in the private sector varies in degree among Emerging Markets, such involvement may in some cases include government ownership of companies in certain sectors, wage and price controls or imposition of trade barriers and other protectionist measures. With respect to any Emerging Markets, there is no guarantee that some future economic or political crisis will not lead to price controls, forced mergers of companies, expropriation, or creation of government monopolies to the possible detriment of the Fund's investments.

Fluctuations in inflation rates

Rapid fluctuations in inflation rates may have negative impacts on the economies and securities markets of certain Emerging Markets countries.

Less developed securities markets

Emerging Markets may have in general less well-developed and regulated securities markets and exchanges. These markets have lower trading volumes than the securities markets of more developed countries and may be unable to respond effectively to increases in trading volume. Consequently, these markets may be substantially less liquid than those of more developed countries, and the securities of issuers located in these markets may have limited marketability. These factors may make prompt liquidation of substantial portfolio holdings difficult or impossible at times.

Settlement risks

Settlement systems in Emerging Markets are generally less well organized than those of developed markets. Supervisory authorities may also be unable to apply standards comparable to those in developed markets. Thus, there may be risks that settlement may be delayed and that cash or securities belonging to the Fund may be in jeopardy because of failures of or defects in the systems. In particular, market practice may require that payment be made before receipt of the security being purchased or that delivery of a security be made before payment is received. In such cases, default by a broker or bank (the "counterparty") through whom the transaction is effected might cause the Fund to suffer a loss. The Fund will seek, where possible, to use counterparties whose financial status is such that this risk is reduced. However, there can be no certainty that the Fund will be successful in eliminating this risk, particularly as counterparties operating in Emerging Markets frequently lack the standing or financial resources of those in developed countries. There may also be a danger that, because of uncertainties in the operation of settlement systems in individual markets, competing claims may arise with respect to securities held by or to be transferred to the Fund.

Limited market information

The Company may encounter problems assessing investment opportunities in certain Emerging Markets in light of limitations on available information and different accounting, auditing and financial reporting standards. In such circumstances, the Fund's Investment Adviser(s) will seek alternative sources of information, and to the extent the Investment Adviser(s) is not satisfied with the sufficiency of the information obtained with respect to a particular market or security, the Fund will not invest in such market or security.

Taxation

Taxation of dividends, interest and capital gains received by the Fund varies among Emerging Markets and, in some cases, is comparatively high. In addition, Emerging Markets typically have often less well-defined tax laws and procedures and such laws may permit retroactive taxation so that the Fund could become subject in the future to local tax liability that it had not reasonably anticipated in conducting its investment activities or valuing its assets.

Litigation

The Company and its Shareholders may encounter substantial difficulties in obtaining and enforcing judgments against individuals residing and companies domiciled in certain Emerging Markets.

Fraudulent securities

Shares purchased by the Fund may subsequently be found to be fraudulent or counterfeit, resulting in a loss to the Fund.

People's Republic of China

Investors should note that the risks of investing in the PRC also apply. Investments in the PRC are currently subject to certain additional risks, particularly regarding the ability to deal in securities in the PRC. As a result, the Company may choose to gain exposure to PRC securities indirectly and may be unable to gain full exposure to the PRC markets. The PRC is one of the world's largest global emerging markets. Investing in the securities markets in the PRC is subject to the risks of investing in Emerging Markets generally as well as to specific risks relating to the PRC market.

The economy in the PRC, which has been in a state of transition from a planned economy to a more market orientated economy, differs from the economies of most developed countries and investing in the PRC may be subject to greater risk of loss than investments in developed markets. Any political changes, social instability and adverse diplomatic developments which may take place in, or in relation to, the PRC could result in significant fluctuation in the price of Chinese securities and a negative impact on investments in the PRC market. Given the short history of the PRC system of commercial laws, the PRC regulatory and legal framework may not be as well developed as those of developed countries. As the PRC legal system develops, no assurance can be given that changes in such laws and regulations, their interpretation or their enforcement will not have a material adverse effect on the Company's onshore investments. Chinese accounting standards and practices may deviate significantly from international accounting standards. The settlement and clearing systems of the PRC securities markets may not be well tested and may be subject to increased risks of error or inefficiency. There are risks and uncertainties associated with the current PRC tax laws, regulations and practice on any Fund's investments in the PRC. Any increased tax liabilities on the Fund may adversely affect the Fund's value.

The RMB, the lawful currency of the PRC, is not currently a freely convertible currency and is subject to exchange control imposed by the PRC government. Such control of currency conversion and movements in the RMB exchange rates may adversely affect the operations and financial results of companies in the PRC.

Insofar as the Company may invest in the PRC, it will be subject to the risk of the PRC government's imposition of restrictions on the repatriation of funds or other assets out of the country, limiting the ability of the Company to satisfy payments to investors. This may impact the liquidity of the relevant Fund and its ability to meet redemption requests upon demand.

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect

Some Funds may invest via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively "Stock Connects"), as specified in the relevant Fund Information Sheet in Annex 2. The Shanghai-Hong Kong Stock Connect is a securities trading and clearing linked program developed by Stock Exchange of Hong Kong Limited (the "SEHK"), Shanghai Stock Exchange ("SSE") and China Securities Depository and Clearing Corporation Limited ("ChinaClear") and the Shenzhen-Hong Kong Stock Connect is a securities trading and clearing linked program developed by SEHK, Shenzhen Stock Exchange ("SZSE") and ChinaClear, both aiming to achieve mutual stock market access between the PRC and Hong Kong. Hong Kong Securities Clearing Company Limited (HKSCC), a wholly-owned subsidiary of SEHK, and ChinaClear will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by their respective market participants and/or investors.

The Shanghai-Hong Kong Stock Connect comprises a Northbound Shanghai Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shanghai Trading Link, Hong Kong and overseas investors, through their Hong Kong brokers and a securities trading service company established by the SEHK, may be able to trade eligible securities, such as China A Shares listed on the SSE by routing orders to SSE. Under the Southbound Hong Kong Trading Link under Shanghai-Hong Kong Stock Connect, investors in the PRC will be able to trade certain securities listed on the SEHK. Under a joint announcement issued by the SFC and China Securities Regulatory Commission ("CSRC") on 10 November 2014 the Shanghai-Hong Kong Stock Connect commenced trading on 17 November 2014.

The Shenzhen-Hong Kong Stock Connect comprises a Northbound Shenzhen Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shenzhen Trading Link, Hong Kong and overseas investors, through their Hong Kong brokers and a securities trading service company established by SEHK, may be able to trade eligible securities listed on the SZSE by routing orders to SZSE. Under the Southbound Hong Kong Trading Link under Shenzhen-Hong Kong Stock Connect investors in the PRC will be able to trade certain securities listed on the SEHK. The Shenzhen -Hong Kong Stock Connect was launched in December 2016.

The trading is subject to rules and regulations issued from time to time. Trading under the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are both subject to a daily quota ("Daily Quota"). Northbound Shanghai Trading Link and Southbound Hong Kong Trading Link under the Shanghai-Hong Kong Stock Connect as well as Northbound Shenzhen Trading Link and Southbound Hong Kong Trading Link under the Shenzhen-Hong Kong Stock Connect will be subject to a separate set of Daily Quota. The Daily Quota limits the maximum net buy value of cross-boundary trades under the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect each day.

Investments in securities traded and cleared on the Stock Connects are subject to various risks, as described in detail below:

Quota Limitations

The Stock Connects are subject to Daily Quota. The quotas do not belong to the Funds and are utilised on a first-come-first-serve basis. Therefore, once the Daily Quota is exceeded, buy orders will be rejected (although investors will be permitted to sell their cross-boundary securities regardless of the quota balance). Therefore, quota limitations may restrict the relevant Fund's ability to invest in the eligible securities through the Stock Connects on a timely basis, and the Fund may not be able to effectively pursue its investment strategy.

The SEHK monitors the quota and published the remaining balance of the northbound trading Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change in future. The Management Company will not notify investors in case of a change of quota.

Legal / Beneficial Ownership

The SSE and SZSE securities are held by the Depositary/ sub-custodian in accounts in the Hong Kong Central Clearing and Settlement System ("CCASS") maintained by the HKSCC as central securities depositary in Hong Kong. HKSCC in turn holds the SSE and SZSE securities, as the nominee holder, through an omnibus securities account in its name registered with ChinaClear for each of the Stock Connects. The precise nature and rights of the Fund as the beneficial owner of the SSE and SZSE securities through HKSCC as nominee is not well defined under PRC law. There is lack of a clear definition of, and distinction between, "legal ownership" and "beneficial ownership" under PRC law and there have been few cases involving a nominee account structure in the PRC courts. Therefore the exact nature and methods of enforcement of the rights and interests of the Stock Connect Funds under PRC law is uncertain. Because of this uncertainty, in the unlikely event that HKSCC becomes subject to winding up proceedings in Hong Kong it is not clear if the SSE and SZSE securities will be regarded as held for the beneficial ownership of the Fund or as part of the general assets of HKSCC available for general distribution to its creditors.

Clearing and Settlement Risk

HKSCC and ChinaClear have established the clearing links and each has become a participant of the other to facilitate clearing and settlement of cross-boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

As the national central counterparty of the PRC's securities market, ChinaClear operates a comprehensive network of clearing, settlement and stock holding infrastructure. ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. The chances of ChinaClear default are considered to be remote. In the remote event of a ChinaClear default, HKSCC's liabilities in SSE and SZSE securities under its market contracts with clearing participants will be limited to assisting clearing participants in pursuing their claims against ChinaClear. HKSCC should in good faith, seek recovery of the outstanding securities and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In that event, the relevant Fund may suffer delay in the recovery process or may not fully recover its losses from ChinaClear.

Suspension Risk

Each of the SEHK, SSE and SZSE reserves the right to suspend trading if necessary for ensuring an orderly and fair market and that risks are managed prudently. Consent from the relevant regulator would be sought before a suspension is triggered. Where a suspension is effected, the relevant Fund's ability to access the PRC market will be adversely affected.

Differences in Trading Day

The Stock Connects only operate on, and therefore investors (including the Funds) can only trade on, days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open and banking services are available in both markets on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the PRC market but the Stock Connect Funds cannot carry out any trading via the Stock Connects. The Fund may be subject to a risk of price fluctuations in the relevant securities during the time when any of the Stock Connects is not trading as a result.

Operational Risk

The Stock Connects are premised on the functioning of the operational systems of the relevant market participants. Market participants are permitted to participate in this program subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchange and/or clearing house.

The securities regimes and legal systems of the two markets differ significantly and market participants may need to address issues arising from the differences on an on-going basis. There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading in both markets through the program could be disrupted. The relevant Fund's ability to access the PRC market (and hence to pursue its investment strategy) may be adversely affected.

Regulatory Risk

The Stock Connects are a novel concept. The current regulations are untested and there is no certainty as to how they will be applied. In addition, the current regulations are subject to change which may have potential retrospective effects and there can be no assurance that the Stock Connects will not be abolished. New regulations may be issued from time to time by the regulators / stock exchanges in the PRC and Hong Kong in connection with operations, legal enforcement and cross-border trades under the Stock Connect. The relevant Fund may be adversely affected as a result of such changes.

Recalling of Eligible Securities

When a security is recalled from the scope of eligible securities for trading via the Stock Connects, the security can only be sold but is restricted from being bought. This may affect the investment portfolio or strategies of the relevant Fund, for example, if the Investment Adviser wishes to purchase a security which is recalled from the scope of eligible securities.

Disclosure Requirements

Under Stock Connect, trading in SSE and SZSE Securities is subject to market rules and disclosure requirements in the PRC stock market. Any changes in laws, regulations and policies of the China A-Shares market or rules in relation to Stock Connect may affect share prices. The Fund is subject to restrictions on trading (including restriction on retention of proceeds) in China A-Shares as a result of its interest in the China A-Shares. The Investment Adviser is solely responsible for compliance with all notifications, reports and relevant requirements in connection with its interests in China A-Shares. Under current PRC rules, once an investor holds more than 5% of the shares of a company listed on the SSE or SZSE, the investor is required to disclose its interest within three working days and during which it cannot trade the shares of that company. The investor is also required to disclose any change in its shareholding and comply with related trading restrictions in accordance with PRC rules.

Investor Compensation

Investment in SSE and SZSE securities via the Stock Connects is conducted through brokers, and is subject to the risks of default by such brokers' in their obligations. Prior to 1 January 2020, the Hong Kong's Investor Compensation Fund, which has been established to pay compensation to eligible investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong, did not cover investments through northbound trading links under the Stock Connect. With effect from 1 January 2020, the Hong Kong Investor Compensation Fund was expanded to cover trading on northbound trading links and covers losses suffered by eligible investors resulting from defaults by relevant brokers in their obligations. Examples of default are insolvency, in bankruptcy or winding up, breach of trust, defalcation, fraud or misfeasance.

According to the Measures for the Administration of Securities Investor Protection Fund, the functions of China Securities Investor Protection Fund ("CSIPF") include "indemnifying creditors as required by China's relevant policies in case a securities company is subjected to compulsory regulatory measures including dissolution, closure, bankruptcy and administrative takeover by the CSRC and custodian operation" or "other functions approved by the State Council". However, since Northbound Trading is carried out through securities brokers in Hong Kong and not PRC brokers, the CSIPF also does not extend to protect defaults experienced on Northbound Trading.

Conversion Risk

Investors, including the relevant Funds, can trade and settle SSE Securities and SZSE Securities in RMB only.

The Fund, whose base currency is not RMB, may also be exposed to currency risk due to the need for the conversion into RMB for investments in SSE and SZSE Securities via the Stock Connects. During any such conversion, the relevant Fund may also incur currency conversion costs. The currency exchange rate may be subject to fluctuation and where RMB has depreciated, the relevant Fund may incur a loss when it converts the sale proceeds of SSE and SZSE Securities into its base currency.

Trading Costs

In addition to paying trading fees and stamp duties in connection with Stock Connects' trading of SSE securities and/or SZSE securities, the relevant Funds carrying out trading via Stock Connects may be subject to certain other fees which are yet to be determined by the relevant authorities and should also take note of any new portfolio fees, dividend tax and taxes concerned with income arising from transfers of securities which would be determined by the relevant authorities.

Taxation

Under the PRC Enterprise Income Tax Law ("EITL"), dividends paid by PRC companies are subject to 10% tax. Capital gains from the disposal of PRC securities would normally be subject to 10% tax as well. However, currently capital gains from the disposal of China A-Shares (including those on the China-Hong Kong Stock Connect Programmes) are subject to a temporary exemption effective from 17 November 2014.

With the uncertainty over whether and how certain income and capital gains on PRC securities are to be taxed, coupled with the possibility of the laws, regulations and practice in the PRC changing with retrospective effect, any accrual for taxation made by the Management Company may not meet final PRC tax liabilities. Consequently, investors may be advantaged or disadvantaged depending upon the final outcome of such changes when they subscribed and/or redeemed their Units in/from the Funds.

Further information about the Stock Connect is available online at the website: https://www.hkex.com.hk/mutual-market/stock-connect?sc_lang=en

China Interbank Bond Market

Some Funds may invest on the China Interbank Bond Market.

Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. The relevant Fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the relevant Fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

To the extent that a Fund transacts in the China Interbank Bond Market, the Fund may also be exposed to risks associated with settlement procedures and default of counterparties. The counterparty which has entered into a transaction with the Fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value.

Since the relevant filings and account opening for investment in the China Interbank Bond Market have to be carried out via an onshore settlement agent, the relevant Fund is subject to the risks of default or errors on the part of the onshore settlement agent.

The China Interbank Bond Market is also subject to regulatory risks. The relevant rules and regulations on investment in the China Interbank Bond Market are subject to change which may have potential retrospective effect. In the event that the relevant Chinese authorities suspend account opening or trading on the China Interbank Bond Market, the Funds' ability to invest in the China Interbank Bond Market will be limited and, after exhausting other trading alternatives, the relevant Fund may suffer substantial losses as a result.

Reforms or changes in macro-economic policies, such as the monetary and tax policies might affect interest rates. Consequently, the price and the yield of the bonds held in a portfolio would/could also be affected.

Bond Connect

Some Funds may invest via the Bond Connect.

Bond Connect is the historic opening up of China's Interbank Bond Market (CIBM) to global investors through the China-Hong Kong mutual access program. The program allows foreign and Mainland China investors the ability to trade in each other's bond market through a connection between the Mainland and Hong Kong based financial infrastructure institutions.

Bond Connect aims to enhance the efficiency and flexibility of investing in the China Interbank Bond Market. This is accomplished by easing the access requirements to enter the market, the use of the Hong Kong trading infrastructure to connect to China Foreign Exchange Trading System (CFETS) and Bond Settlement Agent, all which are required to invest in the CIBM directly.

Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the CIBM may result in prices of certain debt securities traded on such market fluctuating significantly. The relevant Fund investing in such market is therefore subject to liquidity and volatility risks.

The bid and offer spreads of the prices of such securities may be large, and the relevant Fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

Asset Segregation

Under Bond Connect, assets are distinctly segregated into three levels across the onshore and offshore central depositories (CSD). It is mandatory for investors using Bond Connect to hold their bonds in a segregated account at the offshore depository in the name of the end investor.

Bond purchased through Bond Connect will be held onshore with the China Central Depository Clearing Co. Ltd (CCDC) in the name of the Hong Kong Monetary Authority (HKMA). Investors will be the beneficial owners of the bonds via a segregated account structure in the Central Money Market Unit (CMU) in Hong Kong.

Clearing and Settlement Risk

CMU and CCDC have established the clearing links and each has become a participant of the other to facilitate clearing and settlement of cross-boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

As the national central counterparty of the PRC's securities market, CCDC operates a comprehensive network of clearing, settlement and bond holding infrastructure. CCDC has established a risk management framework and measures that are approved and supervised by the People's Bank of China (PBoC). The chances of CCDC default are considered to be remote. In the remote event of a CCDC default, CMUs liabilities in Bond Connect bonds under its market contracts with clearing participants will be limited to assisting clearing participants in pursuing their claims against CCDC. CMU should in good faith, seek recovery of the outstanding bonds and monies from CCDC through available legal channels or through CCDC's liquidation. In that event, the relevant Fund may suffer delay in the recovery process or may not fully recover its losses from CCDC.

Trading Link

Participants to Bond Connect register with Tradeweb, the Bond Connect offshore electronic trading platform which links directly into CFETS. This platform will allow trading with designated onshore Bond Connect market makers using the Request for Quotation (RFQ) protocol.

The designated bond connect market makers provide tradable prices through CFETS. The quote will include the full amount with the clean price, yield to maturity and effective period for the response. The market makers can decline to respond to the RFQ and can decline, amend or withdraw the quote as long as it hasn't been accepted by the potential buyer. Upon acceptance of the quote by the potential buyer, all other quotes automatically become invalid. CFETS will then generate a trade confirmation on which the market maker, buyers, CFETS and depository will use to process the settlement.

Transaction Flow for Settlement Process and Link

Settlement is effected via the settlement link between the CMU in Hong Kong and the Mainland China central depository, the CCDC.

For delivery versus payment transactions:

- Settlement instruction must be matched and affirmed in the CCDC system by 10:00 HKT. Securities are earmarked for the transaction and blocked by the CCDC system.
- The Mainland China trading counterparty (the buyer) pays the settlement cash proceeds to CMU by 13:00 HKT.
- After 17:00 HKT upon confirmation from CMU that funds have been received, CCDC will deliver the securities to the Mainland China bond dealers. This triggers CMU to transfer the settlement cash proceeds to the sub-custodian for further credit to, the Global Custodian's account.

Regulatory Risk

The Bond Connect is a novel concept. The current regulations are untested and there is no certainty as to how they will be applied. In addition, the current regulations are subject to change which may have potential retrospective effects and there can be no assurance that the Bond Connect will not be abolished. New regulations may be issued from time to time by the regulators in the PRC and Hong Kong in connection with operations, legal enforcement and cross-border trades under the Bond Connect. The relevant Fund may be adversely affected as a result of such changes.

Reforms or changes in macro-economic policies, such as the monetary and tax policies might affect interest rates. Consequently, the price and the yield of the bonds held in a portfolio would/could also be affected.

Conversion Risk

The Fund, whose base currency is not RMB, may also be exposed to currency risk due to the need for the conversion into RMB for investments in CIBM bonds via the Bond Connect. During any such conversion, the relevant Fund may also incur currency conversion costs. The currency exchange rate may be subject to fluctuation and where RMB has depreciated, the relevant Fund may incur a loss when it converts the sale proceeds of CIBM bonds into its base currency.

Taxation

Under current tax laws, coupon interest on government bonds is exempt. Capital gains from the disposal of PRC bonds would normally be subject to 10% tax however, currently the State Administration of Taxation (SAT) has not confirmed the collection process for CGT and therefore it is not currently collected.

With the uncertainty over whether and how certain income and capital gains on PRC securities are to be taxed, coupled with the possibility of the laws, regulations and practice in the PRC changing with retrospective effect, any accrual for taxation made by the Management Company may not meet final PRC tax liabilities. Consequently, investors may be advantaged or disadvantaged depending upon the final outcome of such changes when they subscribed and/or redeemed their Units in/from the Funds.

Further information about the Bond Connect is available online at the website: <http://www.chinabondconnect.com/en/index.htm>

Currency Risk

The investments of some Funds may be denominated in currencies other than their Base Currency. In this regard, there is a currency exchange risk involved as a result of fluctuations in exchange rates between the Base Currency and such other currencies, which may affect the value of said Funds.

In addition, in certain countries, these Funds might also be exposed to risks associated with exchange control or currency instability, which could impact the ability to freely repatriate funds invested.

RMB

Renminbi, the official currency of the PRC, is used to denote the Chinese currency traded in the Onshore Renminbi (CNY) and the Offshore Renminbi (CNH) markets. CNY which is traded in the PRC is not freely convertible and is subject to exchange controls and certain requirements by the government of the PRC. CNH which is traded outside the PRC is freely tradable. Whilst CNH is traded freely outside the PRC, the RMB spot, forward foreign exchange contracts and related instruments reflect the structural complexities of this evolving market. Accordingly, Classes denominated in RMB may be exposed to greater foreign exchange risks. Shareholders should be aware of the fact that the RMB is subject to a managed floating exchange rate based on market supply and demand with reference to a basket of currencies.

Russia

Investments in Russia are subject to certain risks inherent to the country's legal and regulatory framework, especially with regards to ownership and custody of securities. Also, potential sanctions imposed on Russia may adversely affect the value and liquidity of Russian securities, of the Russian currency, of the credit rating of Russia and of the ability of the Funds to invest/disinvest in/from Russian markets and/or Russian securities.

OTC Markets

Some Funds will invest in securities that are actively traded in an OTC market. Trading on such markets may involve higher risks than trading on official stock exchanges due to, in particular, lower market liquidity as well as lower investor protection in applicable regulations and available information. In determining whether to approve markets for investment, the Investment Advisers will take into account, among other things, market liquidity, investor information and government regulations, including tax and foreign exchange repatriation rules.

Derivative Instruments

Derivatives instruments may expose a Fund to certain additional risks relative to traditional securities such as credit risks of the counterparty, imperfect correlation between derivatives prices of related assets, rates or indices, potential loss of more money than the actual cost of the investment, potential for leverage, increased volatility and reduced liquidity and risk of mispricing or improper valuation. Derivative instruments are subject to additional risks, including operational risk and legal risk. The use of derivatives also entails further operational risks, including the risk of errors in the execution, confirmation and settlement of transactions.

Swaps

Some Funds may enter into swaps, which are two-party contracts where the parties agree to exchange the returns earned or realized from one or more underlying assets or rates of return.

Swaps can be traded on a swap execution facility (SEF) and cleared through a central clearinghouse (cleared), traded over-the-counter (OTC) and cleared, or traded bilaterally and not cleared. For example, standardized interest rate swaps and credit default swap indices are traded on SEFs and cleared. Other forms of swaps, such as total return swaps, are typically entered into on a bilateral basis. Because clearing interposes a central clearinghouse as the ultimate counterparty to each participant's swap, and margin is required to be exchanged under the rules of the clearinghouse, central clearing is intended to decrease (but not eliminate) counterparty risk relative to uncleared bilateral swaps. To the extent the fund enters into bilaterally negotiated swap transactions, the Funds will enter into swaps only with counterparties that meet certain credit standards and subject to agreed collateralization procedures; however, if the counterparty's creditworthiness deteriorates rapidly and the counterparty defaults on its obligations under the swap agreement or declares bankruptcy, the Fund may lose any amount it expected to receive from the counterparty. In addition, bilateral swaps are subject to certain regulatory margin requirements that mandate the posting and collection of minimum margin amounts, which may result in the Fund and its counterparties posting higher margin amounts for bilateral swaps than would otherwise be the case.

Counterparties to derivative transactions, including TRS transactions, will be counterparties approved by Capital Group, including the Funds' Investment Advisers. While there are no predetermined legal status or geographical criteria applied in the selection of the counterparties, these criteria are typically taken into account in the selection process. The counterparties do not have discretionary power over the composition or management of the portfolio of the relevant Fund.

Specific types of swaps in which the Fund may invest are, in particular but not limited to:

Total Return Swaps

Some Funds may use Total Return Swaps ("TRS") as defined under Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012. A TRS is a contract in which one party agrees to make periodic payments to the other party based on the change in market value of the assets underlying the contract, in exchange for periodic payments based on a fixed or variable interest rate or the total return from other underlying assets. The assets underlying the contract may be a single security, a basket of securities or a securities index. TRS can be funded or unfunded. An unfunded swap means a swap where no upfront payment is made by the total return receiver at inception. A funded swap means a swap where the total return receiver pays an upfront amount in return for the total return of the reference asset and can therefore be costlier due to the upfront payment requirement. The TRS used by the Funds will typically be unfunded.

TRS will be used to gain exposure to a market or security without owning or taking physical custody of such security or investing directly in such market. The Investment Adviser will use TRS alongside other derivative instruments in order to ensure efficient implementation of investment ideas, while respecting the investment universe of the Fund.

Hence, TRS will be traded in accordance with the investment objective and specific investment guidelines and restrictions as set out in the relevant Fund Information Sheet in Annex 2. The assets underlying the TRS, including any securities indices, will also comply with such specific investment guidelines and restrictions.

TRS will be used on a continuous basis, however the extent of exposure to TRS may vary depending on e.g. market conditions and best interest of Shareholders. Unless otherwise specified in the relevant Fund Information Sheet in Annex 2, no more than 10% of the net assets of a Fund will be used for TRS. The Fund's level of exposure to TRS is generally expected to be less than 5% of the assets of a Fund. All revenues arising from TRS will be returned to the relevant Fund.

Like other swaps, the use of TRS involves certain risks, including if the underlying assets do not perform as anticipated. There is no guarantee that entering into a TRS will deliver returns in excess of the interest costs involved and, accordingly, the Fund's performance may be lower than would have been achieved by investing directly in the underlying assets. The underlying assets and investment strategies to which exposure will be gained through TRS are those allowed as per the relevant Fund Information Sheet in Annex 2. In addition, TRS are subject, among others, to counterparty, operational, liquidity, custody, legal and market conditions risks, which are described further in this section. Please read also refer to Annex 1 for more details on the management of collateral, the eligible collateral, the reinvestment of collateral and the collateral policy.

Credit Default Swaps and Indices

Some Funds may invest in credit default swaps ("CDS") or in credit default swap indices, including the credit default swap index ("CDX") and iTraxx indices (collectively "CDXs"), in order to assume exposure to a single or diversified portfolio of credits or to hedge against existing credit risks. CDXs are based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds.

CDS allows the transfer of default risk. This allows investors to effectively buy insurance on a Bond they hold (hedging the investment) in the expectation that the credit will decline in quality. Conversely, where the investment view is that the payments due to decline in credit quality will be less than the coupon payments, protection will be sold by means of entering into a credit default swap. One party — the protection buyer — is obligated to pay the other party — the protection seller — a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligation(s), the protection seller must pay the protection buyer the loss on those credits. Conversely, if no credit events were to occur with respect to any of the underlying reference obligation(s), the protection buyer would not recover any of the periodic payment. The Fund may enter into a CDS transaction as either protection buyer or protection seller.

If the Fund is a protection buyer, it would pay the counterparty a periodic stream of payments over the term of the contract and would not recover any of those payments if no credit events were to occur with respect to any of the underlying reference obligation(s). However, if a credit event did occur, the Fund, as a protection buyer, would have the right to deliver the referenced debt obligation(s) or a specified amount of cash, depending on the terms of the applicable agreement, and to receive the par value of such debt obligation(s) from the counterparty protection seller. As a protection seller, the Fund would receive fixed payments throughout the term of the contract if no credit events were to occur with respect to any of the underlying reference obligation(s). If a credit event were to occur, however, the value of any deliverable obligation received by the Fund, coupled with the periodic payments may be less than the full notional value that the Fund, as a protection seller, pays to the counterparty protection buyer, effectively resulting in a loss of value to the Fund. The use of CDS, like all other swap agreements, is subject to certain risks, including the risk that the Fund's counterparty will default on its obligation(s). If such a default were to occur, any contractual remedies that the Fund might have may be subject to applicable bankruptcy laws, which could delay or limit the Fund's recovery. Thus, if the Fund's counterparty to a CDS transaction defaults on its obligation to make payments thereunder, the Fund may lose such payments altogether or collect only a portion thereof, which collection could involve substantial costs or delays. Additionally, when the Fund invests in CDXs as a protection seller, the Fund will be indirectly exposed to the creditworthiness of issuers of the underlying reference obligations in the index. If the Investment Adviser to the Fund does not correctly evaluate the creditworthiness of issuers of the underlying instruments on which the CDXs are based, the investment could result in losses to the Fund.

Interest Rate Swaps

Some Funds may enter into interest rate swaps, to seek to manage the interest rate sensitivity of the Fund by increasing or decreasing the duration of the Fund or a portion of the Fund's portfolio. An interest rate swap is an agreement between two parties to exchange or swap payments based on changes in an interest rate or rates. Typically, one interest rate is fixed and the other is variable based on a designated floating short-term interest rate, prime rate or other benchmark. It is also possible for both sides of the agreement to be linked to designated floating rates. These agreements are known as basis swaps. Interest rate swaps generally do not involve the delivery of securities or other principal amounts. Rather, cash payments are exchanged by the parties based on the application of the designated interest rates to a notional amount, which is the predetermined dollar principal of the trade upon which payment obligations are computed. Accordingly, the Fund's current obligation or right under the swap agreement is generally equal to the net amount to be paid or received under the swap agreement based on the relative value of the position held by each party.

Forwards

Some Funds may invest in currency forward contracts to seek to manage the Fund's currency exposures. A forward is a contract whereby two parties agree to exchange the underlying asset at a predetermined point in time in the future at a fixed price. The buyer agrees today to buy a certain asset in the future and the seller agrees to deliver that asset at that point in time. Forward contracts, unlike futures contracts, are not traded on exchanges and are not standardised; rather banks and dealers act as principals in these markets, negotiating each transaction on an individual basis. Forward trading is substantially unregulated; there is no limitation on daily price movements. Disruptions can occur in any market traded by the Funds due to unusually high trading volume, political intervention or other factors. In respect of such trading, the relevant Fund is subject to the risk of counterparty failure or the inability or refusal by a counterparty to perform with respect to such contracts.

Options

Some Funds may invest in options, such as options on futures and foreign exchange options ("FX options"). An option is a contract that gives the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the reference instrument underlying the option (or the cash value of the instrument underlying the option) at a specified exercise price. The writer of an option on a security has the obligation, upon exercise of the option, to cash settle or deliver the underlying currency or instrument upon payment of the exercise price (in the case of a call) or to cash settle or take delivery of the underlying currency or instrument and pay the exercise price (in the case of a put).

Options prices can diverge from the prices of their underlying instruments for a number of reasons. Options prices are affected by such factors as current and anticipated short-term interest rates, changes in the volatility of the underlying instrument, and the time remaining until expiration of the contract, which may not affect security prices in the same way. Imperfect correlation may also result from differing levels of demand in the options markets and the markets for the underlying instruments, from structural differences in how options and underlying instruments are traded, or from imposition of daily price fluctuation limits or trading halts.

Futures and options on futures

Some Funds may invest in futures, including but not limited to index futures, to seek to manage the Fund's sensitivity to interest rates or for cash management purposes. Futures contracts and options of futures contracts are standardized exchange-traded agreements to buy or sell a specific quantity of an underlying asset, rate or index at an agreed-upon price at a stipulated future date. An option on a futures contract gives the holder of the option the right to buy or sell a position in a futures contract from or to the writer of the option, at a specified price on or before the specified expiration date. In addition to the risks generally associated with investing in derivative instruments, futures contracts and options of futures contracts are subject to the creditworthiness of the clearing organisations, exchanges and futures commission merchants with which the Fund transacts. Additionally,

although futures require only a small initial investment in the form of a deposit of initial margin, the amount of a potential loss on a futures contract or on an option on futures contract could greatly exceed the initial amount invested. While futures contracts and options on futures contracts are generally liquid instruments, under certain market conditions futures may be deemed to be illiquid. For example, the Fund may be temporarily prohibited from closing out its position in a futures contract if intraday price change limits or limits on trading volume imposed by the applicable futures exchange are triggered. If the Fund is unable to close out a position on a futures contract or options on futures contracts, the Fund would remain subject to the risk of adverse price movements until the fund is able to close out the futures position. The ability of the Fund to successfully utilize futures contracts or options on futures contracts may depend in part upon the ability of the Fund's Investment Adviser to accurately forecast interest rates and other economic factors and to assess and predict the impact of such economic factors on the futures in which the Fund invests. If the Investment Adviser incorrectly forecasts economic developments or incorrectly predicts the impact of such developments on the futures in which it invests, the Fund could be exposed to the risk of loss. See also the heading "Options" above for a general description of investment techniques and risks relating to options.

Contingent Convertible Bonds

Some Funds may invest in contingent convertible bonds, as specified in the relevant Fund Information Sheet in Annex 2. Under the terms of a contingent convertible bond, certain triggering events, including events under the control of the management of the contingent convertible bond's issuer, could cause the permanent write-down to zero of principal investment and/or accrued interest, or a conversion to equity. Investment in contingent convertible bonds may entail the following risks (non-exhaustive list):

Capital structure inversion risk: contrary to classical capital hierarchy, contingent convertible bonds' investors may suffer a loss of capital when equity holders do not.

Trigger level risk: trigger levels differ and determine exposure to conversion risk depending on the distance of the capital ratio to the trigger level. It might be difficult for the Investment Advisers of the relevant Fund to anticipate the triggering events that would require the debt to convert into equity.

Conversion risk: it might be difficult for the Investment Advisers of the relevant Fund to assess how the securities will behave upon conversion. In case of conversion into equity, the Investment Advisers might be forced to sell these new equity shares because the investment objective of the relevant Fund does not allow equity in its portfolio. This forced sale may itself lead to liquidity issue for these shares.

Coupon cancellation: for some contingent convertible bonds, coupon payments are entirely discretionary and may be cancelled by the issuer at any point, for any reason and for any length of time.

Call extension risk: some contingent convertible bonds are issued as perpetual instruments, callable at pre-determined levels only with the approval of the competent authority.

Industry concentration risk: investment in contingent convertible bonds may lead to an increased industry concentration risk as such securities are currently issued by banking institutions.

Yield/valuation risk: contingent convertible bonds often offer an attractive yield which may be viewed as reflecting the greater risk and complexity of these instruments.

Liquidity risk: in certain circumstances finding a ready buyer for contingent convertible bonds may be difficult and the Fund may have to accept a significant discount to the expected value of the bond in order to sell it.

Unknown risk: the structure of contingent convertible bonds is innovative yet untested.

Equity Linked Notes

Some Funds will invest in equity linked notes. The price of an equity linked note is derived from the value of the underlying linked securities. The level and type of risk involved in the purchase of an equity linked note by such Funds is potentially higher than the risk involved in the purchase of the underlying security. Equity linked notes are also dependent on the individual credit of the issuer of the note, which will generally be a trust or other special purpose vehicle or finance subsidiary established by a major financial institution for the limited purpose of issuing the note. Like other structured products, equity linked notes are frequently secured by collateral consisting of a combination of debt or related equity securities to which payments under the notes are linked. If so secured, the Funds would look to this underlying collateral for satisfaction of claims in the event that the issuer of an equity linked note defaulted under the terms of the note.

Equity linked notes are often privately placed and may not be rated, in which case the Funds will be more dependent on the ability to evaluate the creditworthiness of the issuer, the underlying security, any collateral features of the note, and the potential for loss due to market and other factors. Ratings of issuers of equity linked notes refer only to the creditworthiness of the issuer and strength of related collateral arrangements or other credit supports, and do not take into account, or attempt to rate, any potential risks of the underlying equity securities. Depending on the law of the jurisdiction in which an issuer is organized and the note is issued, in the event of default, the Funds may incur additional expenses in seeking recovery under an equity linked note, and may have less legal recourse in attempting to do so.

As with any investment, the Funds can lose the entire amount it has invested in an equity linked note. The secondary market for equity linked notes may be limited. The lack of a liquid secondary market may have an adverse effect on the ability of the Funds to accurately value the equity linked notes in their portfolios, and may make disposal of such securities more difficult for such Funds.

Depository Receipts

Some Funds will invest in depository receipts such as ADRs and GDRs. Depository Receipts are securities that represent shares trading outside the market in which the depository receipts are traded. Accordingly, while the depository receipts may be traded on recognised exchanges or regulated markets, the underlying shares may be subject to further risks such as political, inflationary, exchange rate or custody risk.

Mortgage- and Asset-Backed Securities

Some Funds may invest in mortgage- and asset-backed securities. Mortgage-related securities, such as mortgage-backed securities ("MBS"), and other asset-backed securities ("ABS"), include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as consumer loans or receivables. While such securities are subject to the risks associated with investments in debt instruments generally (for example, credit extension and interest rate risks), they are also subject to other and different risks. Mortgage-backed and other asset-backed securities are subject to changes in the payment patterns of borrowers of the underlying debt which can result in prepayment and extension risks. Prepayment risk exists when interest rates fall and borrowers are more likely to refinance or prepay their debt before its stated maturity. This may result in the Fund having to reinvest the proceeds in lower yielding securities, effectively reducing the Fund's income. Conversely, extension risk exists when interest

rates rise and borrowers repay their debt more slowly than expected, the time in which the mortgage-backed and other asset-backed securities are paid off could be extended, reducing the Fund's cash available for reinvestment in higher yielding securities.

In addition, MBS issued by private entities are structured similarly to those issued by government agencies. However, these securities and the underlying mortgages are not guaranteed by any government agencies and the underlying mortgages are not subject to the same underwriting requirements. These securities generally are structured with one or more types of credit enhancements such as insurance or letters of credit issued by private companies. Borrowers on the underlying mortgages are usually permitted to prepay their underlying mortgages. Prepayments can alter the effective maturity of the MBS. Delinquencies, losses or defaults by borrowers can adversely affect the prices and volatility of these securities. Such delinquencies and losses can be exacerbated by real estate risks like declining or flattening housing and property values. This, along with other outside pressures, such as bankruptcies and financial difficulties experienced by mortgage loan originators, decreased investor demand for mortgage loans and mortgage-related securities and increased investor demand for yield, can adversely affect the value and liquidity of MBS. These securities may be less liquid and/or more difficult to value than other securities.

With regard to ABS, these securities are backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans or participations in pools of leases. Credit support for these securities may be based on the underlying assets and/or provided through credit enhancements by a third party. The values of these securities are sensitive to changes in the credit quality of the underlying collateral, the credit strength of the credit enhancement, changes in interest rates and at times the financial condition of the issuer. These securities may be less liquid and/or more difficult to value than other securities.

Specific types of ABS in which the Fund may invest are, in particular but not limited to,

Collateralised Debt Obligations ("CDO")

A CDO is a securitisation that pools together cash flow-generating assets including bonds, mortgages, loans and other assets. CDOs are packaged in different classes representing different types of debt and credit risk. Each class has a different maturity and risk associated with it. Senior noteholders have structural protections in the form of subordination in addition to other features such as overcollateralisation, interest coverage tests and turbo amortisation triggers.

Collateralised Loan Obligations ("CLO")

A CLO is a securitisation backed by senior secured leveraged loans and in limited instances, high-yield bonds and second-lien loan collateral. CLOs are different from many other securitisations in that they are actively managed funds in which a portfolio manager actively trades the underlying assets, within prescribed constraints. CLO notes benefit from various structural protections including credit enhancement and minimum overcollateralisation and interest coverage tests.

Specific types of MBS in which the Fund may invest are, in particular but not limited to,

Commercial Mortgage Backed Securities ("CMBS")

CMBS are a type of mortgage-backed security secured by mortgages on commercial properties. The underlying loans that get securitised into CMBS include loans for properties such as office buildings, shopping malls, hotels, apartment complexes and industrial warehouses. CMBS notes benefit from both structural credit and prepayment protections including credit enhancement and defeasance/lockout provisions. Loan modifications or defaults of underlying mortgage loans may result in unscheduled prepayment risk to the most senior bonds in structure or potential interest shortfalls. Recoveries of defaulted loans will determine realized collateral losses that impact the most junior securities in the structure first.

Collateralised Mortgage Obligations ("CMO")

CMOs are backed by a pool of mortgages or mortgage loans, which are divided into two or more separate bond issues. CMOs issued by U.S. government agencies are backed by agency mortgages, while privately issued CMOs may be backed by either government agency mortgages or private mortgages. Payments of principal and interest are passed through to each bond issue at varying schedules resulting in bonds with different coupons, effective maturities and sensitivities to interest rates. Some CMOs may be structured in a way that when interest rates change, the impact of changing prepayment rates on the effective maturities of certain issues of these securities is magnified.

Residential Mortgage Backed Securities ("RMBS")

RMBS are a type of security whose cash flows come from residential debt such as mortgages, home-equity loans and subprime mortgages. In many cases the underlying loans may be guaranteed by one of the government or government-sponsored agencies (such as Fannie Mae, Freddie Mac or Ginnie Mae). Holders of RMBS receive interest and principal payments that come from the holders of the residential debt.

To Be Announced Securities ("TBA") Contracts

TBA contracts are forward contracts on agency mortgage pass-through securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. The particular securities (i.e., specified mortgage pools) to be delivered or received are not identified at the trade date, but are "to be announced" on the notification date which is two days before the settlement date. However, securities to be delivered must meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted "good delivery" standards. TBAs settle once each month based on a calendar published by the Securities Industry and Financial Markets Association.

Securities Lending Transactions

Some Funds may enter into securities lending transactions as specified in Annex 1 and in the relevant Fund Information Sheet in Annex 2. Entering into securities lending transactions exposes the relevant Fund to, among others, operational, custody, counterparty and liquidity risks, as further described below. The loaned securities may not be returned by the counterparty in a timely manner or at all, which would interfere with the Fund's ability to vote proxies or settle transactions. Plus, there is also the risk of a loss of rights in the collateral if the counterparty or the securities lending agent defaults. Please also refer to Annex 1 for more details on the management of collateral, the eligible collateral, the reinvestment on collateral and the collateral policy.

Additionally, the Fund may lose money from the reinvestment of collateral received in the context of a securities lending transaction in investments that decline in value, default or do not perform as expected. The relevant Fund will enter into securities lending transactions only with counterparties deemed by the Investment Adviser(s) of the Fund to be in good standing and when, in the Investment Adviser(s)' judgment, the income earned would justify the risks. In case of cash collateral reinvestment, all risks associated with a normal investment will apply.

Operational Risk

The Company or any of its Funds may be exposed to operational risks, being the risk that internal processes, including those of the service providers mentioned in this Prospectus, may fail, resulting in delays or losses. Operational risks include but are not limited to processes related to the safekeeping of assets, their valuation and execution of transactions.

Counterparty Risk

The Fund conducts transactions with counterparties, which puts the Fund at risk should a counterparty fail to meet its contractual obligations in a transaction due to insolvency, bankruptcy or other causes. This may entail the Fund to delayed delivery and have an adverse impact on the performance of the Fund. In the case of default of the counterparty, the amount, nature and timing of recovery may be uncertain.

Custody Risk

The Company's assets are held in custody by the Depositary, which exposes the Company to custodian risk. This means that the Company is exposed to the risk of loss of assets placed in custody as a result of insolvency, negligence or fraudulent trading by the Depositary.

Legal Risk

There is a risk that agreements and derivatives techniques are terminated due, for instance, to bankruptcy, supervening illegality or change in tax or accounting laws. In such circumstances, the Fund may be required to cover any losses incurred.

Furthermore, certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may be governed by Luxembourg law, in certain circumstances (for example insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.

Conflict of Interest Risk

Conflict of interest may arise when a stakeholder may disadvantage one party over another when holding multiple interests. Conflict of interest may concern but are not limited to the Depositary obligations and securities lending transactions. Conflicts of interest may disadvantage the Fund or induce legal issues. In the event of any potential conflict of interest which may arise during the normal course of business, the relevant stakeholders will at all times have regard to their obligations.

Market Conditions

The value of, and the income generated by, the securities in which a Fund invests may decline, sometimes rapidly or unpredictably, due to factors affecting certain issuers, particular industries or sectors, or the overall markets. Rapid or unexpected changes in market conditions could cause the Fund to liquidate its holdings at inopportune times or at a loss or depressed value. The value of a particular holding may decrease due to developments related to that issuer, but also due to general market conditions, including real or perceived economic developments such as changes in interest rates, credit quality, inflation, or currency rates, or generally adverse investor sentiment. The value of a holding may also decline due to factors that negatively affect a particular industry or sector, such as labor shortages, increased production costs, or competitive conditions.

Global economies and financial markets are highly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Furthermore, local, regional and global events such as war, acts of terrorism, cybersecurity events, social unrest, natural disasters, the spread of infectious illness or other public health threats as well as other circumstances in one country or region, including actions taken by governmental or quasi-governmental authorities in response to any of the foregoing, could also adversely impact issuers, markets and economies, including in ways that cannot necessarily be foreseen. Furthermore, sanctions may be issued on target states, entities, organisations or individuals. Funds could be negatively impacted if the value of a portfolio holding were harmed by such conditions or events.

Significant market disruptions, such as those caused by pandemics, natural or environmental disasters, war, acts of terrorism, or other events, can adversely affect local and global markets and normal market operations. Market disruptions may exacerbate political, social, and economic risks. Additionally, market disruptions may result in increased market volatility; regulatory trading halts; closure of domestic or foreign exchanges, markets, or governments; or market participants operating pursuant to business continuity plans for indeterminate periods of time. Such events can be highly disruptive to economies and markets and significantly impact individual companies, sectors, industries, markets, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of a Fund's investments and operation of a Fund. These events could disrupt businesses that are integral to a Fund's operations or impair the ability of employees of fund service providers to perform essential tasks on behalf of a Fund.

Governmental and quasi-governmental authorities may take a number of actions designed to support local and global economies and the financial markets in response to economic disruptions. Such actions may include a variety of significant fiscal and monetary policy changes, including, for example, direct capital infusions into companies, new monetary programs and significantly lower interest rates. These actions may result in significant expansion of the level of public debt and deficits and may also result in greater market risk. Additionally, an unexpected or quick reversal of these policies, or the ineffectiveness of these policies, could negatively impact overall investor sentiment and further increase volatility in securities markets.

Inflation/Deflation risk

The Funds may be subject to inflation and deflation risk. Inflation risk is the risk that the present value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the present value of the Funds' assets can decline. Deflation risk is the risk that prices throughout the economy decline over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Funds' assets.

Cybersecurity risks

With the increased use of technologies such as the Internet to conduct business, the Company has become potentially more susceptible to operational and information security risks through breaches in cybersecurity. In general, a breach in cybersecurity can result from either a deliberate attack or an unintentional event. Cybersecurity breaches may involve, among other things, "ransomware" attacks, injection of computer viruses or malicious software code, or the use of vulnerabilities in code to gain unauthorized access to digital information systems, networks or devices that are used directly or indirectly by the fund or its service providers through "hacking" or other means. Cybersecurity risks also include the risk of losses of service resulting from external attacks that do not require unauthorized access to the Company's, the Management Company's and the Investment Advisers'

and Sub-Advisers' respective systems, networks or devices. For example, denial-of-service attacks on the Investment Advisers and Sub-Advisers' or an Affiliate's website could effectively render the Company's network services unavailable to Shareholders and other intended end-users. Any such cybersecurity breaches or losses of service may, among other things, cause the Company to lose proprietary information, suffer data corruption or lose operational capacity, or may result in the misappropriation, unauthorized release or other misuse of the fund's assets or sensitive information (including shareholder personal information or other confidential information), the inability of Shareholders to transact business, or the destruction of the Company's physical infrastructure, equipment or operating systems. These, in turn, could cause the Company and/or the Management Company to violate applicable privacy and other laws and incur or suffer regulatory penalties, reputational damage, additional costs (including compliance costs) associated with corrective measures and/or financial loss. While the Company, the Management Company and its Investment Advisers and Sub-Adviser have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, there are inherent limitations in such plans and systems due in part to the ever-changing nature of technology and cybersecurity attack tactics, and there is a possibility that certain risks have not been adequately identified or prepared for. In addition, cybersecurity failures by or breaches of the Company's, the Management Company's and the Investment Advisers' and Sub-Advisers' third-party service providers (including, but not limited to, the Company's Investment Advisers and Sub-Adviser, Depositary and Custodian, Administrative Manager and Paying Agent) may disrupt the business operations of the service providers and of the Company, the Management Company and Investment Advisers and Sub-Advisers, potentially resulting in financial losses, the inability of Shareholders to transact business with the Company and of the Company, the Management Company and Investment Advisers and Sub-Advisers to process transactions, the inability of the fund to calculate its net asset value, violations of applicable privacy and other laws, rules and regulations, regulatory fines, penalties, reputational damage, reimbursement or other compensatory costs and/or additional compliance costs associated with implementation of any corrective measures. The Company and its Shareholders could be negatively impacted as a result of any such cybersecurity breaches, and there can be no assurance that the Company will not suffer losses relating to cybersecurity attacks or other informational security breaches affecting the Company's, the Management Company's and Investment Advisers' and Sub-Advisers' third-party service providers in the future, particularly as the Company cannot control any cybersecurity plans or systems implemented by such service providers. Cybersecurity risks may also impact issuers of securities in which the Company invests, which may cause the Company's investments in such issuers to lose value.

Liquidity Risk

Some Fund holdings may be deemed to be less liquid because they cannot be readily sold without significantly impacting the value of the holdings, or may become difficult or impossible to sell, particularly during times of market turmoil. Liquidity may be impacted by the lack of an active market for a holding, legal or contractual restrictions on resale, or the reduced number and capacity of market participants to make a market in such holding. Market prices for less liquid holdings may be volatile or difficult to determine, and reduced liquidity may have an adverse impact on the market price of such holdings. During times of market turmoil, there have been, and may be, no buyers or sellers for securities in entire asset classes. Additionally, the sale of less liquid holdings may involve substantial delays (including delays in settlement) and additional costs and the Fund may have more difficulty to sell such holdings when necessary to meet its liquidity needs, or try to limit losses, or may be forced to sell at a loss.

Risks Related to Classes

Risks related to distribution policies, including distributions out of capital

Dividend-distributing Classes identified with the suffixes "gd", "fd", "fdx", "fyd" and "fyd2" follow a dividend policy under which distributions of dividends may be made out of net income, realised gains, unrealised gains, or capital of the relevant Class. Any distribution, in excess of net income of the relevant Class, will be limited to the capital of the relevant Class and will result in a corresponding reduction of the Net Asset Value per Share of such Class.

Distributions that include an element of capital may represent a distribution of part of the investor's original investment and/or realised/unrealised gains and reduce the potential for long-term capital growth. During periods of negative performance, distributions will normally continue to be paid, which may cause the value of the investment to decline more rapidly than if no distributions were made. A positive distribution yield does not imply a positive total return.

The payment of dividends out of capital may have different tax implications than dividends paid out of income and may be tax-inefficient in certain countries. Investors are recommended to seek appropriate tax advice.

Risks related to Hedged and Hedged Equivalent Classes

The risk of capital erosion may be greater in the Hedged Equivalent Classes than in unhedged Classes, as hedging costs and differences in interest rates between currencies may directly impact the Net Asset Value per Share of such Classes. Where a Fund offers multiple Classes with different hedging arrangements, the gains, losses and expenses arising from currency hedging transactions are intended to be attributed to, and borne by, the relevant Hedged Equivalent Class. However, as there is no segregation of liabilities between Classes of the same Fund, there is a risk that, in certain circumstances, currency hedging transactions entered into in respect of one Hedged Equivalent Class may generate liabilities that are not fully segregated.

Risks related to fixed distribution payments

It may not be possible to maintain the fixed rate or fixed yield of the distribution payment indefinitely and these may be reduced or suspended. Distributions are not guaranteed. If any are made, there is no guarantee as to their timing, amount or yield. Investors should not expect distributions to be correlated with income, gains, or positive performance of the relevant Fund(s). Please also refer to the section "Rejection Privilege" for information on the possibility for the Company or the Management Company to close subscriptions or switches into certain Fund(s) or Class(es).

Sustainability Risks

Sustainability Risks identified by Capital Group are taken into account in the investment decision making process as described under the section "Sustainability-related Disclosures" of the Prospectus. Sustainability Risks will have different levels of severity and magnitude depending on regional or sectoral specificities. Below we detail the areas which, in aggregate, represent the most substantial areas of sustainability risk for the Funds. Funds may be adversely affected as a result of the below mentioned risks. More information on Sustainability Risks as described in the ESG Policy may be obtained from [https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/esg/files/esg-policy-statement\(en\).pdf](https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/esg/files/esg-policy-statement(en).pdf).

Climate Change

Most climate related risks come from transition risk as policymakers accelerate action to limit global warming to two degrees. As a result, some assets may become stranded in the face of regulation such as carbon taxes or pricing which changes the economics of their business. As the risks and opportunities from climate change materialise, lifecycle emissions from products are also of increased importance, which will create second order impacts in other sectors. The energy transition will trigger innovation and new consumer preferences which will impact still more sectors. Depending on their operational footprint, increased exposure to physical climate risks such as extreme weather events create a more volatile operating backdrop for companies and put countries growth under pressure.

Data Security and Data Reliance

As the use of vast amounts of data becomes the norm and privacy and security issues become more frequent, ensuring the protection and responsible use of data has become critically important. Vulnerability to data theft or leakage could have a significant impact on consumer trust and result in a loss of market share.

In addition, the Investment Adviser may be reliant on third-party data vendors or a combination of third-party data and Capital Group's proprietary research and analysis. Third party data vendors may not provide complete coverage of issuers that we might invest in, vendors may evaluate issuers inconsistently when assessing a particular issuer characteristic, and the scope of vendor coverage and the criteria that vendors use for inclusion or exclusion change over time. Issuers themselves may also publish or provide incorrect or inconsistent sustainability-related data that we and others may rely on. The Investment Adviser's systems and disclosure might lag behind or not keep up to date with vendor practices or updated issuer data. The associated repercussions, combined with heightened regulatory scrutiny of these risks, could lead to regulatory fines and reputational risks.

Governance

Governance shortcomings in board composition, independence, ethical standards or shareholder rights protection could lead to unanticipated losses. A lack of accountability, transparency or robust controls may result in non-compliance fines. Executive compensation can also create misaligned incentives and lead to operational and regulatory risk. Strong governance is also important at a sovereign level.

Human Capital

Companies with inadequate policies or unfit culture may face immediate short term operational and reputational risks. A company may lose its license to operate or may incur financial fines due to workplace controversies, poor safety records or labour law violations.

The Investment Advisers consider collective bargaining, culture and employee sentiment, diversity, workforce composition, employee turnover and compensation. A lack of investment and education in a workforce at a company or sovereign level poses a potential risk. The Investment Advisers also place heightened focus on human rights violations at a company and sovereign level.

Supply Chains

Inadequate oversight, extensive outsourcing and poor supply chain standards may expose companies to risks. Sourcing natural resources and other products from regions with a history of corruption, low regulatory standards, modern slavery or political instability could lead to reputational and regulatory risks. Evolving customer preferences may also demand more sustainable sourcing which could lead to higher procurement costs.

Lobbying & Business Ethics

Unethical and illegal business practices can pose significant regulatory and financial risks. Inadequate anti-corruption, tax, lobbying and bribery policies and controls could result in adverse consequences for both corporate and sovereign issuers. These risks may be more prominent based on geography.

Exposure to Historic Controversies

Historic controversies, if not adequately addressed by the companies, can be a source of risk. As a result, the Investment Advisers monitor all Fund holdings against several 3rd party data sources to identify exposure to these, with a particular focus on capturing risks from human rights controversies, issues relating to severe environmental degradation or poor labour practices.

Other and Emerging Sustainability Risks

In addition to the above risks, from the perspective of products and consumer, consumer safety and product quality are monitored alongside product affordability in relevant sectors. In certain sectors and sovereigns, contribution or inaction regarding social health and nutrition can also trigger regulatory considerations. Operational and reputational risks for industries with high water consumptions, especially when operating in water scarce regions are also monitored. Similarly, the direct and indirect impact of manufactured products, including pollutants and toxic waste, on local communities, ecosystems and biodiversity can lead to reputational and regulation risks for any misconduct. As such ESG considerations continue to be integrated in financial services, companies with heightened Sustainability Risk may face financing challenges.

We also recognise that additional Sustainability Risks exist at a sovereign level given physical risks such as water shortages, exposure to extreme weather events, the quality of agriculture and biodiversity, and the quality of infrastructure.

As well as the Sustainability Risks that we identify in our bottom-up framework, the Investment Advisers use a range of third-party data sources to systematically screen portfolios for Sustainability Risks and identify emerging risks.

The Investment Advisers engage with companies to ensure that Sustainability Risks are being appropriately addressed.

Charges, Expenses and Fees

This section describes the charges, expenses and fees that Shareholders, Funds and Classes bear on their investment and how they work. The Management Company is entitled to receive charges, fees and expenses from the Company for the services provided, as follows:

- the Management Fee (as defined below) for managing each Fund; and
- the Annual Administration Charge (as defined below), which covers the charges and expenses paid by the Management Company in relation to the operation and administration of the Funds.

Each Fund or Class, as applicable, may bear other charges, fees and expenses, as further described below under section "Other Charges, Fees and Expenses borne by the Funds or the Classes".

Charges, Expenses and Fees paid by the Company to the Management Company

Management Fee: The Company pays the Management Fee at the annual rate, for each Class of each Fund, as specified in the relevant Fund Information Sheet in Annex 2. The Management Fee is a fixed fee, except for Class S and Equivalent, where the rate disclosed in the relevant Fund Information Sheet in Annex 2 is a maximum rate.

The Management Fee is used to compensate the Management Company, which can in turn use it to compensate the Investment Advisers for their investment advisory services and the Distributors and other Intermediaries, as applicable, for services to investors or similar services in relation to investments made with their assistance.

Several Classes with different Management Fee rates are available. A number of factors determine the eligibility of Shareholders, Distributors and other Intermediaries for particular Classes and the level of payments that the Management Company can make. These factors include the assets held by the Shareholder, the Distributor or other Intermediary or by investors who are its clients, as well as the overall relationship with the Capital Group. It is the responsibility of Distributors and other Intermediaries to select the most suitable Class(es) for their clients, considering the markets in which they promote the Shares and the type of services they provide to their clients.

Individuals investing with the assistance of Distributors or other Intermediaries are encouraged to review the Class(es) in which they may invest, considering the nature and objective of their investments, since the level of Management Fee may have a material impact on the return of their investments.

The Investment Advisers, the Distributors and other Intermediaries may retrocede part or all of the received fee. The Management Fee is calculated and accrued, on the basis of the net assets of the relevant Class of the relevant Fund, and payable monthly in arrears. The Management Fee is exclusive of VAT, which will be charged in addition, where applicable. For certain Classes, the Management Fee will be charged separately to investors having entered into a separate agreement with the Management Company.

In order to avoid double-charging the Company, when a Fund, including a Fund of Funds, invests in other UCITS (including other Funds) or other UCIs directly or indirectly managed by the Investment Advisers or managed by an entity to which the Investment Advisers are related by virtue of (i) common management, (ii) common control, or (iii) a direct or indirect interest of more than 10 percent of share capital or voting rights, no investment management or advisory fee will be perceived. When a Fund, including a Fund of Funds, invests a substantial part of its assets in such Funds or other UCIs, the maximum proportion of investment management or advisory fee will be indicated in the Company's annual report. In addition, the Company will not be charged any subscription or redemption fees by these UCITS or UCIs (including other Funds).

For the avoidance of doubt, when a Fund, including a Fund of Funds, invests in other UCITS or UCIs which are not directly or indirectly managed by the Investment Advisers or by an entity to which the Investment Advisers are related as described above, investment management or advisory fee will be paid to these other UCITS or UCIs. Subscription or redemption fees to the units of these UCITS or other UCIs might apply. These fees will be included into the costs of buying and selling units of such UCITS or other UCIs, distinct from the Management Fee as described under "Other expenses" below.

Annual Administration Charge: The Company pays an Annual Administration Charge to the Management Company. The Annual Administration Charge is used by the Management Company to pay certain charges and expenses incurred in relation to the operation and administration of the Company and the Funds. The Annual Administration Charge is a fixed-rate charge accrued on a daily basis by reference to the Net Asset Value and is payable monthly in arrears to the Management Company. The Annual Administration Charge is charged first against income. In the event the actual costs incurred by the Funds exceed the level of the Annual Administration Charge applicable to a Class, the Management Company will bear the excess. The effective Annual Administration Charge is accrued at each Valuation Date and is disclosed in the KIID ongoing charges figure and the KID ongoing costs figure.

The maximum charge applicable to each Class is disclosed in the Fund Information Sheet in Annex 2. For certain Classes, the Annual Administration Charge will be charged separately to investors having entered into a separate agreement with the Management Company. The Management Company may, at its sole discretion, waive all or part of the Annual Administration Charge for some Funds or Classes for an indefinite period. Such policy, if any, may be changed or withdrawn at any time by the Management Company's sole discretion.

The effective level of the Annual Administration Charge per Fund and Class is defined considering different criteria such as, but not limited to, the costs charged to the Class and the variation of costs linked to a change of the Net Asset Value in respect of the Class that might be due to market effects and/or dealing in Shares. The effective levels of the Annual Administration Charge will be reviewed by the Management Company on an annual basis and under exceptional circumstances to ensure that the charge remains fair to Shareholders and that they do not bear any undue costs. Where the actual cost incurred by the Funds falls below the Annual Administration Charge for that Fund (as fixed by the Management Company), the Management Company shall be entitled to retain any excess amount above actual costs incurred by the relevant Fund. The effective level of the Annual Administration Charge for each Fund and Class is disclosed in the semi-annual and annual reports of the Company.

The Annual Administration Charge includes costs related, but not limited, to:

- depositary and custody fees;
- paying agency;
- domiciliary agency;
- corporate agency;
- registrar and transfer agent;
- legal publications, prospectuses, financial reports and other documents made available to Shareholders;
- governmental charges;
- legal, auditing and quality controlling fees;
- registration, publication, translation, local advice, coordination, representation and other similar costs relating to the registration of Shares in foreign jurisdictions;
- reporting expenses (including in particular tax advisor fees for shareholder tax reporting in various jurisdictions);

- communication costs;
- reasonable investor servicing expenses;
- payments related to placing certain Funds on platforms that support wider distribution of the Shares of the relevant Funds and/or facilitate investments in the relevant Funds, exchanges or markets, and any other platforms facilitating investment in the Funds;
- Fund accounting and administrative service expenses, and generally any other expenses arising from its administration, operations or costs incurred in connection with its representation;
- VAT, where applicable, in relation to each of the charges and expenses noted above;
- other relevant charges that may occur from time to time.

Charges relating to the creation of any new Fund or Class may be written off against the assets of the relevant Fund or Class over a period not exceeding five years and in such amounts in each year as determined on a fair basis.

Other Charges, Fees and Expenses borne by the Funds or the Classes

In addition to the Management Fee and Annual Administration Charge, Funds or Classes, where applicable, may bear additional charges and expenses, which include but are not limited to:

- brokerage fees and commissions;
- expenses for operating Hedged Equivalent Classes;
- transaction costs associated with buying and selling Fund assets, including interest, taxes, governmental duties, charges and levies;
- Luxembourg *taxe d'abonnement*;
- compensation of directors of the Company (unless they have declined such compensation, which all those employed by an Affiliate have done) and their reasonable out-of-pocket expenses;
- other transaction-related costs and expenses;
- extraordinary expenses including, but not limited to, interest and full amount of any duty, levy and tax or similar charge imposed on a Fund, litigation expenses and any extraordinary expenses or other unforeseen charges.

Such additional charges and expenses are paid directly from the relevant Funds or Classes, as the case may be.

The Management Company (or any Affiliate) may, at its discretion, decide to bear part of the expenses of some Classes of some Funds so that the total expense ratio of the relevant Class(es) does not exceed certain thresholds. The corresponding amounts, if any, will be accrued daily within the relevant Classes, and disclosed in the Company's annual and semi-annual reports. Such policy, if any, may be changed or withdrawn at any time at the Management Company's or the Affiliate's sole discretion.

A Fund of Funds bears its own operational expenses which comes in addition to the expenses charged in the Underlying Fund investments. Accordingly, the prospective investors should note that the aggregate fees and costs are likely to exceed the fees and costs that would typically be incurred in respect of an investment that is not a Fund of Funds.

For the avoidance of doubt, the Company is not currently subject to any Luxembourg taxes on income or capital gains.

Charges Borne by the Investor

Sales Charge

A sales charge of up to 5.25% may be withheld by Distributors and other Intermediaries from any amount to be invested in all Classes with the exception of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class C, Class U1, Class Y and Class N. The Management Company can also withhold a sales charge of up to 5.25% from any amount to be invested in all Classes with the exception of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class C, Class U1, Class Y and Class N. Such sales charge may be waived in whole or in part at the discretion of the Distributors and other Intermediaries or of the Management Company.

A switch from one Fund to another is deemed a sale for this purpose.

Redemption Charge

The Redemption Charge, which is payable to the Management Company, is calculated based on the Net Asset Value per Share at the time of the redemption or switch of the relevant Shares on the applicable Valuation Date.

The applicable rates depend on the holding period of the Shares being redeemed/switched. The applicable rates and holding period are detailed in the relevant Fund Information Sheet in Annex 2. For further details on redemption and switching procedures, please refer to the section titled "Redemption of Shares" and "Switches between Funds or Classes".

If a Class is subject to a Redemption Charge, such charge will also apply in the event of a switch to another Class or Fund (except in the circumstance of a compulsory switch at the end of the period specified in the relevant Fund Information Sheet in Annex 2). The Management Company reserves the right, at its sole discretion, to reduce or waive the Redemption Charge, either in whole or in part.

At the date of this Prospectus, a Redemption Charge only applies to Class U1 Shares and Shares of Equivalent Classes, as further detailed in the relevant Fund Information Sheet in Annex 2.

Liquidity Risk Management

The Management Company has established, implemented and consistently applies a liquidity risk management framework which sets out the governance standards and requirements for the oversight of liquidity risk in relation to the Funds which will be reviewed by the Management Company periodically and as needed. The framework outlines the responsibilities for assessing, monitoring, and providing independent oversight of liquidity risks of the Funds and to ensure compliance with the internal liquidity parameters so that the Funds can meet their obligations arising from redemptions at the request of Shareholders.

The liquidity risk monitoring, management and oversight process is managed by the independent risk management function which has oversight of the entire risk management programme, is responsible for its performance and reports the outcome to senior management and relevant boards which act as a point of escalation.

Qualitative and quantitative assessments of liquidity risks at a portfolio and security level are performed to ensure that investment portfolios are appropriately liquid to process Shareholders' redemption requests. In this context, Funds are reviewed individually with respect to liquidity risks. In addition, any concentration of Shareholders in the Funds is regularly reviewed to assess their potential impact on anticipated financial obligations of the Funds. The Management Company's assessment of liquidity risks within Funds includes (but is not limited to) consideration of the investment strategy, the dealing frequency, the underlying assets' liquidity (and their valuation) and type of investors.

Net Asset Value

Frequency and Timing

The Net Asset Value of each Class of each Fund is calculated as of each Valuation Date, after the Cut-Off Time. In addition, a net asset value, for performance and fee calculation purposes only, is calculated on each Business Day which is not a Valuation Date, that falls on month-ends; no dealing activity can be based on such net asset value per Share.

The Net Asset Value is available at the registered office of the Company on the Business Day following the relevant Valuation Date and is also usually available online at capitalgroup.com/international.

Calculation Principles

The Net Asset Value will be provided in the Base Currency, as specified in the relevant Fund Information Sheet in Annex 2, and in each other Payment Currency.

The Net Asset Value of each Class of each Fund is calculated by dividing the value of the portion of the assets of the Company properly attributable to the relevant Class, less the value of the portion of the liabilities of the Company properly attributable to such Class, by the total number of Shares of such Class issued and outstanding as of the relevant Valuation Date.

The Net Asset Value will be rounded to four decimal places, except in JPY where it will be rounded to the unit.

In determining the Net Asset Value, the following principles are applied:

- (i) Except as otherwise provided in (vi) below, securities which are listed on an official stock exchange or traded on any other Regulated Market are valued at the last traded or otherwise available price at the time the Net Asset Value is calculated on the principal market on which they are traded, as published by such market or furnished by a pricing service approved by the Board of Directors; and other securities are valued at prices furnished by, or yield equivalents obtained from, one or more dealers or such pricing service.
- (ii) Securities issued by UCITS or UCIs will be valued at their last available net asset value on the relevant Valuation Date; they may be valued in accordance with item (i) above where such securities are listed.
- (iii) Money market instruments will be valued at nominal value plus any accrued interest or using an amortised cost method, provided that this method of valuation ensures that such assets will be valued at their fair value as determined in good faith pursuant to the procedure established by the Board of Directors of the Company.
- (iv) Swaps will be valued at the net present value of their cash flows.
- (v) The liquidating value of OTC Derivatives shall be determined based on information provided by pricing services approved by the Board of Directors of the Company.
- (vi) If a price representative of a security's fair value is not readily available from the pricing sources described under (i) through (v) above, or if the accuracy of a Portfolio's valuation, as established pursuant to (i) above, is materially affected by events that occur prior to the Net Asset Value being calculated, the relevant security or securities will be valued at the fair value, as determined by or under the direction of the Board of Directors of the Company. Use of such fair valuation procedures is intended to result in more representative Net Asset Values and to eliminate or substantially reduce potential arbitrage opportunities at the expense of Shareholders that might otherwise be available to short-term investors. In addition, the closing prices of equity securities that trade in markets outside US time zones may be adjusted to reflect significant events that occur after the close of local trading but before the Net Asset Value of each Share Class of the Fund is determined.

All Net Asset Value calculations will first be made in the relevant Fund's Base Currency. For this purpose, assets or liabilities expressed in currencies other than the Base Currency will be translated into the Base Currency at the prevailing market rate on the Valuation Date. The result of such calculations will be translated into each other Payment Currency at the prevailing market rate on the Valuation Date.

The process of calculation of the Net Asset Value of each Class of each Fund ensures that any transaction in Shares is effected at a Net Asset Value that cannot be known to the investor or Shareholder at the Cut-Off Time.

Swing pricing adjustment

A Fund may suffer dilution of the Net Asset Value as a result of large subscriptions, redemptions or switches.

Such dilution would arise from Shareholders buying or selling Shares at a Net Asset Value which would not accurately reflect the dealing and other costs incurred when securities are traded to accommodate cash inflows or outflows. In order to counter such dilution impact, the Company adopts a swing pricing mechanism as part of its valuation policy. However, this will not apply for investments in the Fund of Funds. In case a Fund of Funds investment or disinvestment triggers the swing pricing threshold in the relevant Underlying Fund, the corresponding costs would be charged through the swing pricing mechanism to the Fund of Funds.

If on any Valuation Date, the net aggregate amount of subscriptions or redemptions in Shares of a Fund exceeds a pre-determined threshold expressed as a percentage of the Net Asset Value of that Fund, the Net Asset Value may be adjusted upwards or downwards to reflect the costs attributable to the underlying trade in securities undertaken by the Investment advisers to accommodate inflows or outflows as the case may be. The swing pricing mechanism is applied on the net aggregate amount of subscriptions or redemptions in Shares of a Fund and does not address the specific circumstances of each individual investor transaction.

The Net Asset Value will be first calculated separately as per the "Calculation Principles" as described above. Any swing pricing adjustment to such Net Asset Value will be applied systematically and consistently based on predefined factors, except for the Fund of Funds as mentioned above.

The price adjustment may vary from Fund to Fund and will normally not exceed 3% of the original Net Asset Value. The Company may decide to (i) suspend the application of any swing pricing adjustment to the Net Asset Value of any particular Fund or (ii) increase this price adjustment limit, in exceptional circumstances such as pandemics, natural or environmental disasters, war, acts of terrorism, or other events leading to severe turmoil to protect the interests of Shareholders. Such price adjustment is available on the Management Company's webpage at capitalgroup.com/international concomitantly with the publication of the relevant Net Asset Value.

The Company, relying on the Management Company and its Conducting Officers' ongoing review, will reassess on a periodic basis the price adjustment factors to reflect an approximation of current dealing and other costs.

Suspension of Determination of Net Asset Value and of Issue, Switch and Redemption of Shares

The Company or, upon delegation of the Company, the Management Company, may suspend the determination of the Net Asset Value of any or all Fund(s) or Class(es) and suspend the issue, switch and redemption of Shares of such Fund(s) or Class(es) in the cases listed below:

- (a) any market(s) or stock exchange(s) on which a material part of the investments of the relevant Fund(s) are quoted, is/are closed, other than for official holidays, or when dealings are substantially restricted or suspended;
- (b) the disposal of the assets of the relevant Fund(s) or the determination of their value is not possible due to a local, regional or global crisis, a communications breakdown or similar circumstances;
- (c) the reliable determination of the value of the assets of the relevant Fund(s) is not possible, despite the use of fair valuation procedures as described under "Net Asset Value" above, due to exceptionally high levels of market volatility or similar circumstances;
- (d) as a result of exchange or other restrictions or difficulties affecting the transfer or remittance of funds, transactions are rendered impossible or impracticable, or when purchases and sales of assets cannot be effected at the normal rate of exchange;
- (e) a failure to do so might result in the relevant Fund(s) or Class(es) or the Company or Shareholders suffering any financial disadvantage which might not otherwise have been suffered;
- (f) in the case of the liquidation or merger of the Company, Fund(s) or Class(es);
- (g) following a decision to merge a Class, a Fund or the Company, if justified with a view to protecting the interest of Shareholders; or
- (h) in case a Fund is a Feeder (as defined under Annex 1 below) of another UCITS (or a sub-fund thereof), if the net asset value calculation of the Master (as defined under Annex 1 below) UCITS (or the sub-fund thereof) is suspended.

The suspension of any Fund or Class will have no effect on the calculation of the Net Asset Value, and the issue, switch and redemption of the Shares, of any other Fund or Class.

Investors who have applied for subscription and Shareholders who have requested switch or redemption of their Shares in the relevant Fund(s) or Class(es) will be promptly notified of any suspension and of the termination of the suspension. Subscription, redemption and switch requests may be withdrawn until termination of the suspension has been notified. In case of subscription, the subscription amount will be returned, without interest, as soon as practicable following the date of withdrawal, at the applicant's expense and risk.

Account Opening

Account Opening Procedure

Investors must open an account with the Company prior to first investing. Account Opening Forms must be used for this purpose, and are available from the Company, the Management Company, the Administrative Manager or Distributors upon request. Pursuant to the Luxembourg Law of 12 November 2004 (as amended) on the fight against money laundering and terrorist financing, any other applicable laws and regulations and the relevant circulars of the Luxembourg supervisory authority, obligations have been imposed on professionals of the financial sector to prevent the use of undertakings for collective investment such as the Company for money laundering and terrorist financing purposes. These provisions necessitate the Administrative Manager on behalf of the Management Company to comply with "Know Your Customer" ("KYC") obligations which require to know and ascertain the identity of each investor, as well as that of other persons related to this investor (such as any of this investor's beneficial owners or proxyholders), the source of the funds being invested in the Company, and, as the case may be, the source of wealth of the investor. The Administrative Manager on behalf of the Management Company must also take reasonable measures to verify each of these persons' identity so that it is satisfied that it knows who the investors' beneficial owners are and take reasonable measures to understand the ownership and control structure of the investors. The list of identification documents to be provided by each investor will be based on the AML/CTF and KYC requirements as provided in the applicable AML/CTF laws and regulations, including the CSSF's circulars and regulations as amended from time to time and based on the AML/CTF & KYC Guidelines agreed between the Management Company and the Administrative Manager. These requirements may be amended, from time to time (for example, upon the introduction of new Luxembourg laws or regulations).

Either prior to subscription or at any time thereafter, initially and on an ongoing basis, upon the Management Company's or the Administrative Manager's request or at one's own initiative (notably but not only immediately in case of beneficial ownership change), each investor and any other person related thereto (i) shall engage its best endeavours to proactively assist the Management Company or the Administrative Manager in fulfilling their AML/CTF/KYC obligations, and (ii) in particular shall provide all information and documents which are required by AML/CTF laws and regulations and/or which the Management Company or the Administrative Manager consider appropriate for performing their AML/CTF obligations, whilst ensuring at all times that each piece of information and each document provided to the Management Company or the Administrative Manager is and remains adequate, accurate and up-to-date.

An Account Opening Form is valid only when accompanied by a complete set of appropriate investor identification documents, the list of which will be provided to any investor by the Administrative Manager upon request, in the form and content prescribed by Luxembourg laws and regulations, including AML/CTF laws and regulations. The Management Company or the Administrative Manager may require investors to provide any document deemed necessary to effect such identification, including but not limited to an original duly completed and signed Account Opening Form. In case of delay or failure by an investor to provide the information or documents required, the application for subscription (or, if applicable, for redemption) will

not be accepted. Neither the Company nor the Management Company or the Administrative Manager have any liability for delays or failure to process deals as a result of the investor providing no or only incomplete documentation. However, the Management Company may, at its discretion, choose to open an investor account with the Company based on an Account Opening Form that is not accompanied by all required documentation, it being understood that proceeding this way should remain exceptional and justified as protecting the Fund's activities while in compliance with applicable Luxembourg laws. In such case, any missing documents must be received as soon as possible after the account opening and requests for transfers of Shares will not be acted upon, and subsequent requests for subscriptions, redemptions and switches will be acted upon but any payments due to the relevant Shareholder, including distributions and redemption proceeds, as applicable, will not be made available to the Shareholder, until the missing documentation has been provided. Before redemption proceeds are released, the Administrative Manager may require any further AML/CTF information and/or documentation, such as original documents or a certified true copy of original documents to comply with the Luxembourg laws and regulations. Investors may also be requested to provide additional or updated identification documents from time to time pursuant to ongoing investor due diligence requirements under applicable laws and regulations. More generally, in addition to relevant subscription or, as applicable, redemption orders being delayed or blocked, and any proceeds in relation thereto being retained by the Company, delay or failure to provide any required piece of AML/CTF information and documentation may result in criminal and non-criminal sanctions provided by AML/CTF laws and regulations.

Unless investors specify otherwise, the Management Company or the Administrative Manager will act upon received instructions which it believes to have been given in good faith.

Distributors and other Intermediaries may apply different account opening procedures to accounts opened with their assistance, as detailed under "Distributors and other Intermediaries". For the avoidance of doubt, it is confirmed that, in all cases, the Administrative Manager performs individual identification as per applicable laws, regulations, internal policies and guidelines on behalf of the Management Company. The Board of Directors of the Management Company and ultimately the Board of Directors of the Company retains responsibility for investor identification procedures.

As the case may be the Company or the Administrative Manager must or may transmit (possibly without prior notice to the investor concerned and/or other related person thereto) all or part of the AML/CTF/KYC information and documentation to certain third parties, including competent authorities.

In accordance with the Luxembourg law of 13 January 2019 establishing a register of beneficial owners (the "RBO Law"), Shareholders are informed that the Company must notably identify each of its beneficial owners (certain of whom may also be the beneficial owners of the investor itself), obtain and hold adequate, accurate and up-to-date information about all its beneficial owners, including the details of the beneficial interest they hold, as well as certain supporting documentation, and shall communicate certain information in their respect to the register of beneficial owners in Luxembourg. The relevant authorities as well as the general public can access the register and the relevant information of the beneficial owners of the Company, including the name, the full date and place of birth, the country of residence, nationality(ies), as well as the type and extent of the beneficial interests held in the Company. The RBO Law defines beneficial owners, through a cross-reference to relevant provisions of the AML Law, as any natural person(s) who ultimately owns or controls the investor or any natural person(s) on whose behalf a transaction or activity is being conducted. In particular, for corporate entities such as the Company, beneficial owners include (i) any natural person who, ultimately, owns or controls the Company by virtue of having directly or indirectly a sufficient percentage (i.e. more than 25%, or any lower threshold that may be determined by the Company or the Administrative Manager) of shares or voting rights or ownership interests in the Company, or controls the Company by other means, or (ii) if no natural person may be identified as per, or if there is any doubt that the person(s) identified are the actual beneficial owner(s), any natural person who holds the position of senior managing official of the Company. As at the date of last update of this Prospectus, the ownership of the Company is diversified, and no natural person owns or controls 25% plus one shares, voting rights or ownership interests or otherwise controls the Company through other means (directly or indirectly). Therefore, the members of the Board of Directors have been identified as beneficial owners of the Company (in their capacity as senior managing officials).

Personal Data

Personal Data provided or collected in connection with an investment in the Company will be processed by the Company and/or the Management Company, as joint data controllers (i.e. the "Controllers") and by the Investment Advisors, the Administrative Manager, the auditor, legal and financial advisers and other potential service providers of the Controllers and, any of the foregoing respective agents, delegates, affiliates, subcontractors and/or their successors and assigns, acting as processor on behalf of the Controllers (i.e. the "Processors"). In certain circumstances, the Processors may also process personal data of investors as controller, in particular for compliance with their legal obligations in accordance with laws and regulations applicable to them (such as anti-money laundering identification) and/or order of any competent jurisdiction, court, governmental, supervisory or regulatory bodies, including tax authorities.

By investing in the Company, the investors understand that the Controllers as well as, where relevant, its service providers such as Administrative Manager, including Transfer Agent, representatives or agents collect, retain, maintain, process and disclose confidential information and personal data in accordance with applicable laws and/or other regulations, including, but not limited to, the Regulation (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (the "General Data Protection Regulation", as well as any law or regulation relating to the protection of personal data applicable to them (together the "Data Protection Law")). The investors understand that the confidential information and personal data they are supplying will enable the Controllers as well as, where relevant, its service providers, such as Administrative Manager, including Transfer Agent/ UCI administrator, representatives or agents to administer the account of the investors and provide appropriate services to the investors. By investing in the Company, the investors (i) are being made aware of the transfer and disclosure of their information and personal data by the Controllers and/or the Administrative Manager, including Transfer Agent, to any affiliates or any entities within the J.P. Morgan Chase Bank N.A. group of companies, as well as to third party service providers, representatives, agents as well as the Capital Group Luxembourg funds and delegates located in Luxembourg or abroad and contracted from time to time by the Controllers and/or the Administrative Manager, including Transfer Agent, to administer the account of the investors and to provide appropriate services to the investors, the Company, or the Management Company, including ancillary services such as the provision of statistical information to the Management Company, and (ii) are being made aware that their information and personal data may be collected, held, processed and transferred in computing systems and gateways operated by the Controllers as well as, where relevant, its service providers, such as Administrative Manager, including Transfer Agent, representatives and agents and the Capital Group Luxembourg funds as well as transferred to a country that does not have equivalent data protection laws to those of the European Economic Area, where the same level of confidentiality and protection in relation to data protection and professional secrecy as currently in force in Luxembourg, may not be guaranteed.

In particular, the investors are informed that the Controllers as well as, where relevant, its service providers, such as Administrative Manager, including Transfer Agent, representatives and agents and the Capital Group Luxembourg funds may be required by applicable laws and/or other regulations to provide information about their account and/or their confidential information and personal data to public authorities (including supervisory, regulatory or governmental authorities) or courts in various jurisdictions, in particular those jurisdictions where (a) the Capital Group Luxembourg funds is or is being registered for public or limited offering of its shares, licensed or otherwise authorised to invest, (b) Shareholders are resident, domiciled or citizens or (c) service providers are located, hold or process their information and personal data.

The investors have the right to access, delete, to object and/ or request a restriction of processing or request a copy of the personal data held in relation to them, and to request that it be amended, updated or deleted as appropriate if incorrect. Any such request, including change of the investors' personal data, should be notified in writing to Capital Group Investor Services at, PO Box 167, 6C, route de Trèves, L-2633 Senningerberg,

Luxembourg. The investors further acknowledge that Capital Group Investor Services (as well as, where relevant, service providers, representatives or agents) may record all incoming and outgoing telephone calls.

Further information in relation to the above is available in our Privacy Policy which can be accessed on <https://www.capitalgroup.com/eacg/entry-page/shared/privacy.html>. The Privacy Policy explains the collection, use, sharing and otherwise processing of personal data in connection with investment in the Company or with investment and shareholder services, in accordance with applicable laws and regulations.

Issue of Shares

Shares are offered on each Valuation Date. Depending on Classes, the issuance of Shares is subject to certain conditions as detailed in "The Funds and their Structure". Furthermore, large subscriptions, redemptions or switches of Shares of one Fund into Shares of the same Class and Equivalent Classes in another Fund may, for a short time, impact the compliance of the Fund with its investment policy, its limits and/or its compliance with the General Investment Guidelines and Restrictions specified in Annex 1 until the subscription, redemption or switch amounts, as the case may be, have been invested or divested. The Fund will adopt as a priority objective the remedying of that situation, acting in the best interests of the Shareholders.

In case where an investor invests in the Company through an intermediary, (i) it may not always be possible for the investor to exercise certain shareholder rights directly against the Company and (ii) investors' rights to indemnification in the event of NAV errors/other errors as per Circular CSSF 24/856 and non-compliance with the investment rules applicable to a Fund may be impacted and only exercisable indirectly. Investors are advised to take advice on their rights.

Offering Price

The Offering Price on each Valuation Date is the corresponding Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment". Any applicable sales charge as described under "Expenses" may be added to such amount.

Standard Subscription Procedures

Unless otherwise provided in the subsequent sections:

- Payment of subscription amounts must be made in any available Payment Currency of an active Class and Equivalent Class which can be found online on the Management Company's webpage at capitalgroup.com/international. Shares will be issued in that same Payment Currency, unless specifically instructed otherwise by the investor, who may in this case incur currency exchange costs. Subscription amounts received in any convertible currency other than an available Payment Currency will generally be converted by the Administrative Manager before being invested in Shares, on behalf of the investor and at his expense and risk, into the relevant Fund Base Currency as specified in the relevant Fund Information Sheet in Annex 2. The subscription will then take place in the relevant Fund Base Currency as specified in the relevant Fund Information Sheet in Annex 2; contractual settlement (as described below) will not be available in such cases.
- Shares will be issued only after (i) the investor has opened an account with the Company (see "Account Opening" above), (ii) a completed and valid Transaction Request Form (available from the Company, the Management Company, the Administrative Manager or Distributors upon request) has been received not later than the Cut-Off Time on a Valuation Date (subject to the subsequent paragraph regarding subscriptions with a value greater than the amount specified in the relevant Fund Information Sheet in Annex 2), (iii) the full amount of cleared funds in an available Payment Currency of an active Class and Equivalent Class which can be found online on the Management Company's webpage at capitalgroup.com/international has been verified in the collection account by the Custodian through its standardised cash verification system, and (iv) the subscription has been accepted by the Management Company.
- For Funds that have a Subscription Pre-notification Date, in the event of a subscription on any Valuation Date for Shares with a value greater than the amount specified in the relevant Fund Information Sheet in Annex 2, Shares will only be issued after (i) the investor has opened an account with the Company (see "Account Opening" above), (ii) a completed and valid Transaction Request Form has been received not later than the Cut-Off Time on a Subscription Pre-notification Date, and (iii) the subscription has been accepted by the Management Company. The investor undertakes to procure payment no later than the relevant Valuation Date. The Management Company may, at its discretion, require that the payment of such large subscription be made in the Base Currency as specified in the relevant Fund Information Sheet in Annex 2 of the relevant Fund. The Management Company may, at its discretion, accept on any Valuation Date subscription for Shares with a value greater than the amount specified in the relevant Fund Information Sheet in Annex 2, even if received after the relevant Subscription Pre-notification Date and no later than the Cut-Off Time on that Valuation Date.
- Shares will be issued as of the Cut-Off Time on the Valuation Date on which the above requirements are fully met, at the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment" determined as of the corresponding Valuation Date.
- When the amount of funds received is less than the amount (or than the value of the number of Shares) specified in the Transaction Request Form, Shares will be issued for the lower amount, except if the Management Company has agreed to issue Shares to the investor before cleared funds were verified in the collection account, as described under "Contractual Settlement" below.
- A subscription request may not be withdrawn or amended by the investor after the Cut-Off Time of the relevant Valuation Date or Subscription Pre-notification Date (the Management Company may however, at its discretion, decide on an exceptional basis to accept subscription requests and/or to agree to withdraw or amend subscription requests after the Cut-Off Time of the relevant Subscription Pre-notification Date provided that (i) the request for such an exception has been submitted to the Management Company or the Administrative Manager before the Cut-Off Time of the relevant Valuation Date, (ii) the Management Company is satisfied that the request has been submitted in good faith, (iii) the Shareholder has no historical pattern of similar requests and (iv) the request is not part of trading activity that the Management Company has determined could involve actual or potential harm to the Company).

Contractual Settlement

Shares could be issued before cleared funds are verified in the collection account to an investor who, in such case, will be deemed to have agreed to provide the Management Company with adequate protection against the non-receipt of funds, as follows. By investing in this context, any such investor irrevocably:

- undertakes to procure payment in one of the available Payment Currencies (which the Management Company may, at its discretion, require to be in the relevant Fund's Base Currency as specified in the relevant Fund Information Sheet in Annex 2) no later than the third Week Day following the Valuation Date as of which the relevant Shares are issued, unless otherwise agreed in writing with the Company, or (i) if payments in the

relevant currency cannot settle on such date, on the next Week Day on which the payment can settle, or (ii) if the final transaction amount, when placing an order in number of Shares, cannot be confirmed in due course, on the Week Day following this confirmation;

- authorises and instructs the Management Company to, at its discretion, in the event that any Shares remain unpaid on or after, as described above, no later than the third Week Day following the Valuation Date as of which the relevant Shares are issued, unless otherwise agreed in writing with the Company, or (i) if payments in the relevant currency cannot settle on such date, on the next Week Day on which the payment can settle, or (ii) if the final transaction amount, when placing an order in number of Shares, cannot be confirmed in due course, on the Week Day following this confirmation, redeem any fully paid Shares that the Shareholder may already hold, and/or any of the unpaid Shares, and to use the proceeds of such redemption(s) to cover any amount remaining due to the Company with respect to the unpaid Shares plus any reasonable related costs (including, but not limited to, late-payment interest, foreign currency exchange costs, including those resulting from currency fluctuation); and
- acknowledges that such investor will remain liable to the Company for the payment of any unpaid subscription amount and other costs (as described above) not fully covered by such redemption proceeds.

Class Selection

If the Management Company determines that the investor is not eligible for the selected Class, the Management Company may reject the investor's subscription.

Subscriptions made with the assistance of Distributors and other Intermediaries

Distributors and other Intermediaries may apply different subscription procedures, including an earlier dealing cut-off time, to subscriptions for Shares made with their assistance, as detailed under "Distributors and other Intermediaries".

Initial Offer Period

In respect of Shares subject to an Initial Offer Period, subscriptions must be received by the Administrative Manager no later than the Cut-Off Time specified in the relevant Fund Information Sheet in Annex 2 on the close of the Initial Offer Period, in order for investors to benefit from the terms applicable during such period, unless otherwise agreed with the Management Company. If a subscription received after the Cut-Off Time is rejected, the subscription amount will be returned, without interest, as soon as practicable following the date of rejection, by banker's draft or electronic transfer, at the applicant's expense and risk. At the date of this Prospectus, an Initial Offer Period only applies to Class U1 Shares and Shares of Equivalent Classes, as further detailed in the relevant Fund Information Sheet in Annex 2.

Subscription in Kind

The Management Company may, at its discretion, allow an investor to settle its subscription by contributing securities acceptable to the Company, subject to the requirements of Luxembourg law, in particular, a valuation report by the Company's auditor confirming the value of the contributed assets. Only securities that are in compliance with the relevant Fund's investment policy and restrictions at the relevant time, as determined by the Management Company at its sole discretion, may be contributed. The costs of such contribution of securities will usually be borne by the investor; however, the Company may bear them provided it is satisfied that such costs are lower than the cost of investing the corresponding cash amount.

Subscriptions Deferral

If, on any Valuation Date, any Fund receives subscription(s) for Shares with a combined value of 5% or more of its total net assets, the Management Company will have the right to defer such subscription(s) in excess of 5% of its total net assets, pro rata to the outstanding subscription requests, until the next or subsequent Valuation Date(s). (For this purpose, a switch of Shares of a given Fund into Shares of another Fund (see "Switches Between Funds or Classes") will be treated as a redemption from the former and a subscription into the latter, the redemption being processed only when simultaneous subscription into the new Fund has become possible.) The investors concerned will be promptly informed of this decision and will have the right to withdraw their subscription request, or the portion thereof that was deferred, by notifying the Management Company at the latest on the Business Day following such notification before the Cut-Off Time. In the case of deferral of subscriptions, the relevant Shares will be issued at the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment" determined as of the Valuation Date corresponding to the Valuation Date on which the subscription, or the relevant portion thereof, is effected.

Rejection Privilege

The Company, the Management Company and Distributors reserve the right to reject any application for subscription at their discretion, without giving any reason. In particular, subscriptions that are part of trading activity that the Company, the Management Company or a Distributor have determined could involve actual or potential harm to the Company, as further detailed under "Protection Against Improper Trading Practices", may be rejected.

The Company or the Management Company may also, at their sole discretion, resolve to close the subscriptions or switches into (but not to redemptions or switches out of) certain Fund(s) or Share Class(es) marked with fyd2 for a limited or unlimited period of time, if the closure is necessary to protect Shareholders of the relevant Fund(s) or Share Class(es) marked with fyd2 or other Share Class(es) from adverse impacts. This may include, without limitation, situations where the Company or one or more Fund(s) has reached a size that could impair its/their ability to find suitable investments or when the fixed dividend distribution nature of one or several Class(es) would require so in order to protect Shareholders of other Classes of the same Fund from a potential risk of contagion.

Such decisions can be taken without notice to Shareholders. Where closure to subscriptions or switches in occur, the website capitalgroup.com/international will be amended to indicate the change in status of the relevant Fund(s) or Share Class(es). Investors should confirm with the Management Company or consult the website for the current status of their Fund(s) and or Share Class(es). If an application is rejected, the subscription amount will be returned, without interest, as soon as practicable following the date of rejection, by banker's draft or electronic transfer, at the applicant's expense and risk.

The Company or the Management Company (as appropriate) may, at their discretion, reopen subscriptions or switches into the affected Fund(s) or Share Class(es) on either a temporary or permanent basis, if it is in the best interests of the Fund(s) or Share Class(es) and its Shareholders.

Redemption of Shares

Standard Redemption Procedures

Shares will be redeemed by the Company at the relevant Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment" determined as of the Valuation Date on which a valid written request is received from a Shareholder not later than the Cut-Off Time (less any applicable improper trading redemption charge as described under "Expenses").

For Funds that have a Redemption Pre-notification Date, any redemption with a value greater than the amount specified in the relevant Fund Information Sheet in Annex 2, Shares will be redeemed by the Company at the relevant Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment" determined as of the relevant Valuation Date provided that a valid written request is received from a Shareholder on the relevant Redemption Pre-notification Date. The Management Company may, at its discretion, accept on any Valuation Date redemption for Shares with a value greater than the amount specified in the relevant Fund Information Sheet in Annex 2, even if received after the relevant Redemption Pre-notification Date and no later than the Cut-Off Time on that Valuation Date. The Management Company may however, at its discretion, decide to accept redemption requests and/or to agree to amend redemption requests after the Cut-Off Time of the relevant Redemption Pre-notification Date provided that (i) the new request has been notified to the Management Company or the Administrative Manager before the Cut-Off Time on the relevant Valuation date, (ii) the Management Company has determined that this request has been submitted in good faith, (iii) the Shareholder has no historical pattern of similar requests and (iv) this request is not part of trading activity that the Management Company has determined could involve actual or potential harm to the Company.

Transaction Request Forms must be used for this purpose; these are available from the Company, the Management Company, the Administrative Manager or Distributors upon request.

Provided that the Shareholder had provided the Management Company or the Administrative Manager with all required account opening documentation, as described under "Account Opening" above, except if otherwise provided herein, payment will normally be made:

- to the redeeming Shareholder only;
- in the Payment Currency used for the Shareholder's original subscription, unless the redeeming Shareholder elects to receive the redemption amount in a different available Payment Currency of an active Class and Equivalent Class which can be found online on the Management Company's webpage at capitalgroup.com/international, in which case the amount will be converted by the Administrative Manager into such currency at such Shareholder's expense and risk (although if, in its opinion, payment in any such currency is either not reasonably practical or prejudicial to the remaining Shareholders, the Company may in exceptional circumstances pay in any convertible currency of its choice);
- no later than the third Week Day after the Valuation Date on which the relevant Shares were redeemed or (i) if payments in the relevant currency cannot settle on such date, on the next Week Day on which the payment can settle, or (ii) if the final transaction amount, when placing an order in number of Shares, cannot be confirmed in due course, on the Week Day following this confirmation;
- by electronic bank transfer to the account designated for this purpose (including all necessary details as specified in the Transaction Request Form) by the redeeming Shareholder in his redemption request.

Redemptions made with the assistance of Distributors and other Intermediaries

Distributors and other Intermediaries may apply different redemption procedures, including an earlier dealing cut-off time, to redemptions of Shares made with their assistance, as detailed under "Distributors and other Intermediaries".

Redemptions Deferral

The Company will not be bound to redeem on any Valuation Date or in any period of four consecutive Valuation Dates, more than 10% of the total net assets of any Fund, respectively, on such Valuation Date or at the commencement of such period. (For this purpose, a switch of Shares of a given Fund into Shares of another Fund (see "Switches Between Funds or Classes") will be treated as a redemption from the former and a subscription into the latter.) In this event, the limitation will apply pro rata so that all redemption applications to be processed on a Valuation Date to which such limitation applies will be processed in the same proportion. However, redemptions may be deferred for not more than five consecutive Valuation Dates after the date of receipt of the redemption request, subject to a suspension of determination of Net Asset Value as referred to above. In the case of deferral of redemptions, the relevant Shares will be redeemed at the Net Asset Value, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment" determined as of the Valuation Date on which the redemption, or the relevant portion thereof, is effected. If redemption(s) are deferred, the Management Company will inform the Shareholder(s) concerned, who will have the right to withdraw their redemption request, or the portion thereof that was deferred, by notifying the Management Company at the latest on the Business Day following such notification, before the Cut-Off Time.

Compulsory Redemption

The Company may compulsorily redeem part or all of the holding of a Shareholder in the event that:

- a redemption results in the holding of the redeeming Shareholder falling below the applicable minimum. (For this purpose, a switch of Shares of a given Fund into Shares of another Fund (see "Switches Between Funds or Classes") will be treated as a redemption from the former and a subscription into the latter);
- a transfer of Shares on a secondary market results in such Shares being held in breach of any applicable requirements;
- the Company has issued Shares to an investor but the subscription remains unpaid on or after the subscription settlement date;
- ownership by the Shareholder is based on the provision of false information and/or results in a breach of any applicable requirements; or
- ownership by the Shareholder would adversely affect in any manner the Company or any Fund or Class or the Management Company or the Investment Advisers, in the Company's sole judgment, including as a result of FATCA (see "Taxation" section).

Redemption in Kind

The Company may, at its discretion and if the Shareholder requesting redemption so accepts, satisfy payment of the redemption price in kind by allocating to such Shareholder assets from the relevant Portfolio equal in value to the value of the Shares to be redeemed. The nature and type of such

assets will be determined at the Company's discretion with the assistance of the Management Company on a fair and reasonable basis and without prejudicing the interests of the other Shareholders. The costs of such allocation of securities will normally be borne by the redeeming Shareholder; however, the Company may bear them provided it is satisfied that such costs are lower than the cost of selling the relevant assets.

Value of the Shares Redeemed

The value of the Shares at the time of redemption may be more or less than the amount initially invested by the Shareholder, depending on the market value of the securities and other assets held by the relevant Fund at that time.

Transfer of Shares

A Shareholder may request the transfer of all or part of his Shares to another person by fax or hard copy. The transfer may only be processed provided the transferor and the transferee fulfil the same minimum holding, identification and other requirements as apply, respectively, to a redemption and a subscription of Shares of the relevant Class (see "Issue of Shares" and "Redemption of Shares" as well as "Restrictions on Ownership"). No sales or improper trading redemption charges (as described under "Expenses") will generally be levied in this context. Distributors and other Intermediaries may apply different transfer of Shares procedures.

Switches Between Funds or Classes

Application for the switch of Shares of one Fund into Shares of the same Class and Equivalent Classes in another Fund may be made on any day that is a Valuation Date for both Funds. Transaction Request Forms must be used for this purpose; these are available from the Company, the Management Company, the Administrative Manager or Distributors upon request. Shares for which valid switch instructions have been received not later than the Cut-Off Time on a Valuation Date or on the relevant Pre-notification Date for any switch of Shares with a value greater than the amount specified in the relevant Fund Information Sheet and accepted by the Management Company will be switched into Shares of the same Class of the other Fund as of that Valuation Date based on the Net Asset Values, potentially adjusted upwards or downwards as the case may be as described under "Swing pricing adjustment" of the relevant Funds (less any Redemption Charge, if applicable), determined as of the corresponding Valuation Date(s), in the Payment Currency of the existing holding.

For the avoidance of doubt, switches between Classes of Shares within the same Fund will not be subject to any pre-notification requirements even where such Fund has a Subscription and Redemption Pre-notification Data provided for in its Fund Information Sheet in Annex 2.

Distributors and other Intermediaries may apply different switch procedures, including an earlier dealing cut-off time, to switches between Funds made with their assistance, as detailed under "Distributors and other Intermediaries".

A switch will only be processed if the resulting holding(s) of Shares meet(s) the applicable minimum holding and other requirements. Switches of Shares of one Class of a Fund into Shares of another Class (of either the same or a different Fund) are not permitted unless the Shareholder meets all requirements applicable to investments in the Class into which he requests to switch and the Management Company accepts such a switch. The Management Company reserves the right to refuse to accept any switch application at its discretion, without giving any reason.

Switches from other Funds into Shares of Class U1 and Shares of Equivalent Classes may not be allowed, unless otherwise agreed with the Management Company.

Distributors and other Intermediaries

Individual investors are encouraged to invest with the assistance of a Distributor, of which the Management Company will provide details upon request.

Distributors and other Intermediaries may apply different procedures to accounts opened and transactions in Shares made with their assistance, including earlier dealing cut-off times or different settlement periods, from those provided for under "Account Opening", "Subscription of Shares", "Redemption of Shares" and "Switches between Funds or Classes". Each Distributor or other Intermediary will inform investors of the procedures relevant to them. Investors should note that they may be unable to open accounts or to transact in Shares on days on which the Distributor or other Intermediary is not open for business.

In addition, Distributors and other Intermediaries may apply different investment minima from those provided for under "The Funds and their Structure" to investments made with their assistance; each Distributor or other Intermediary will inform investors of the investment minimum applicable to them. The Management Company generally does not apply the subscription charge described under "Expenses", or applies it at a reduced rate, to investments made with the assistance of a Distributor or other Intermediary.

Distributors and other Intermediaries are solely responsible for these actions, and by investing on behalf of investors, undertake and represent, in particular, that they will at all times:

- comply with the terms of this Prospectus;
- assess the suitability and/or the appropriateness of such investment for prospective purchasers of Shares, and provide their clients with appropriate investment advice in relation to any investment in Shares, including the relevant KID/KIID and any specific information regarding the Fund and/or the Class in which the prospective purchaser will invest;
- verify the identity of investors and their beneficial owners investing in the Company by applying client identification procedures deemed by the Administrative Manager as equivalent to those required under Luxembourg laws and regulations and be properly and professionally organised to assume such duties;
- protect the Company against any breaches of the "Restrictions on Ownership";
- comply with all applicable laws, including, without limitation, local laws applying to the Distributors and other Intermediaries and to the provision of advertising or other promotion or sales material to the public in the relevant jurisdiction, as well as local fund registration requirements;
- protect the Company against improper trading practices, as detailed under "Protection Against Improper Trading Practices"; and

- to the full extent required by applicable law, disclose to their clients, and where required obtain their clients' consent on, the existence, nature and amount of their compensation, relinquish such compensation to such clients or, as applicable, refrain from accepting any distribution fee or other cash rebate unless expressly permitted under local laws and regulations.

Restrictions on Ownership

Ownership of Shares by any person, firm or corporate body including, but without limitation, any US Person and any US citizen may be restricted or prohibited (including, if relevant, by compulsorily redeeming Shares held). Shares may not be transferred except in compliance with all applicable securities laws. The Company may, subject to the above, sell to, accept to register the transfer of its Shares to, and allow continued ownership by, a US Person or a US citizen under certain very limited circumstances.

The Company will not accept to issue Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class C Shares, Class Y Shares or any Shares of their Equivalent Classes thereof, or give effect to any transfer of such Shares, to persons or companies who may not be considered Institutional Investors. The Company will, at its full discretion, refuse the issue or transfer of such Shares, if there is not sufficient evidence that the person or the company to which such Shares are sold or transferred is an Institutional Investor; in such a case, the Company will issue Shares to the subscriber or transferee in the nearest similar available Class, as detailed under "The Funds and their Structure".

Commodity Futures Trading Commission Disclosure

To the extent that the Company or any Fund trades swaps, futures, commodity options contracts and other instruments regulated by the U.S. Commodity Futures Trading Commission (the "CFTC"), such investments are not intended to comprise a significant portion of the Company's or any of the relevant Fund's total investments. The Management Company, the Board of Directors of the Company, and the Investment Advisers either qualify for exemptions from registration, or are otherwise excluded from, the requirements under the U.S. Commodity Exchanges Act, as amended (the "Commodity Exchange Act" or "CEA") and the regulations promulgated thereunder (the "CFTC Regulations").

The Management Company is the commodity pool operator ("CPO") of each Fund under the CEA, but it is not registered as such under the CEA. This is because CFTC Regulation 4.13(a)(3) exempts the Management Company from compliance with the requirements applicable to registered CPOs with respect to each Fund given that, among other required elements, each Fund is operated pursuant to the following criteria: (1) Shares are exempt from registration under the U.S. Securities Act of 1933, as amended (the "Securities Act"), and such Shares are offered and sold without marketing to the public in the United States, (2) each participant in each Fund is an "accredited investor" as defined in Rule 501 of Regulation D under the Securities Act or a "qualified eligible person" as defined in CFTC Regulation 4.7(a)(2)(viii)(A) (which includes "Non-United States persons" as defined under CFTC Regulation 4.7(a)(1)(iv)), and (3) at all times, each Fund will meet either of the de minimis tests set forth in such exemption with respect to its commodity interest positions, including positions in security futures products, whether entered into for bona fide hedging purposes or otherwise. Therefore, unlike a registered CPO, the Management Company, the Board of Directors of the Company and the Investment Advisers are not required to deliver a CFTC disclosure document or a certified annual report to the Company's investors.

Additionally, none of the Management Company, the Investment Adviser or the Sub-Advisor is registered as a commodity trading advisor ("CTA") under the CEA in reliance on exemptions from registration. As a result, Shareholders will not receive the disclosure document a registered CTA is ordinarily required to provide.

Protection Against Improper Trading Practices

Late Trading

In order to protect the Company against arbitrage opportunities, investors are not allowed to place transactions at a known Net Asset Value. Transaction instructions received on behalf of the Company after the Cut-Off Time will therefore not be given effect before the next Valuation Date.

Excessive Trading and Market Timing

The Company is a long-term investment vehicle, and intends to protect the interests of its long-term shareholders. Its Funds may not be used by investors to serve as vehicles for frequent and/or short-term trading, and it does not permit practices related to market timing. As prescribed by Luxembourg laws and regulations, the Management Company monitors investor transactions in order to prevent and/or detect excessive trading and market timing practices. Distributors and other Intermediaries undertake, by promoting the Shares, to take similar measures with respect to their clients and to refrain from submitting to the Funds transactions that would appear to involve such practices. Subscriptions or switches that are part of trading activity that the Management Company or a Distributor or other Intermediary have determined, in their discretion, could involve actual or potential harm to the Company, and/or from investors who the Management Company or a Distributor or other Intermediary suspects of using excessive trading or market timing practices, may be rejected. In addition, where short-term and/or excessively frequent trading patterns and/or market timing practices have been identified, the Management Company may take appropriate measures to protect the interests of the Shareholders.

Taxation

The Company

Under current law and practice, the Company is not liable to any Luxembourg income tax.

The Company is liable in Luxembourg to a tax, which is payable quarterly, of 0.05% per annum of the total net assets of each Fund and of each Class, provided that this tax is not applied to, and is not payable on, investments of the Company in other Luxembourg UCIs. However, a reduced tax rate of 0.01% in respect of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class C and Equivalent Classes thereof as provided by the Law in respect of Classes wholly held by Institutional Investors will be sought. It should be noted that there can be no guarantee that the benefit of such reduced rate will not be denied or that, once obtained, it will continue to be available in the future.

No stamp duty or other tax will be payable in Luxembourg on the issue of Shares. Under current law and practice, no capital gains tax is payable in Luxembourg on the realised or unrealised capital appreciation of the assets of the Company.

Dividends, interest and capital gains on the Funds' portfolio securities may be subject to withholding tax and capital gain tax imposed by the jurisdictions in which the securities are issued or held, and it is not expected to recover such taxes in full.

Shareholders

General

Under current law and practice, Shareholders (other than Shareholders domiciled, resident or having a permanent establishment in Luxembourg and certain former residents of Luxembourg) are not subject to any capital gains, income, inheritance or other taxes in Luxembourg, except as described below.

The Funds may qualify as US passive foreign investment companies (PFIC) for US tax purposes, which may have adverse tax consequences to US taxpayers. The Funds and their Investment advisers do not assess nor mitigate such tax consequences. Prospective investors should consult their own independent tax advisers.

It is the responsibility of prospective investors and Shareholders to inform themselves as to the tax and other consequences to them of buying, holding, selling (or otherwise transferring) or redeeming Shares under the laws of the State(s) in which they are or may be taxable, including any applicable information reporting obligations.

Each Shareholder should consult their own tax advisor, including but not limited to requirements under FATCA, CRS or DAC6, with respect to the Shareholders' own situation.

Foreign Account Tax Compliance Act (FATCA)

Pursuant to the U.S. Foreign Account Tax Compliance Act ("FATCA") of the US Hiring Incentives to Restore Employment ("HIRE") Act, and in order to avoid a U.S. withholding tax being imposed on U.S. source income and proceeds of disposition received by the Company, the Company is a Reporting Luxembourg Foreign Financial Institution (FFI) under FATCA and the equivalent Luxembourg domestic FATCA law following the signing of an Inter-Governmental Agreement ("IGA") with the US Treasury ("Luxembourg IGA") together with a memorandum of understanding in respect thereof. The Luxembourg IGA was ratified in Luxembourg by the Law of 24 July 2015 (published on 29 July 2015 ("FATCA Law"). The Company has obtained a Global Intermediary Identification Number ("GIIN") and will take all actions necessary to comply with this status, including, but not limited to, fulfilling the reporting and/or withholding obligations. In this context, upon subscription, Shareholders of the Company are required to provide identity, residency and citizenship information.

On an annual basis, Shareholders who meet the criteria of a Reportable Person³ under FATCA will be reported by the Company to the Luxembourg tax authorities, and subsequently to the U.S. tax authorities ("IRS") together with related financial information.

The information subject to reporting is exhaustively set out in Annex I of the Luxembourg IGA. Shareholders that are distributors or financial intermediaries will be required, as FFI, to provide evidence of their FATCA compliant status (Participating FFI, Deemed Compliant FFI or exempt). Any Shareholder that fails to comply with the Company's information or documentation requests may become subject to FATCA reporting as a deemed Specified U.S. Person, and, in addition to its reporting obligations, the Company may have to withhold the 30% tax on the payments processed to the Shareholder's account. In addition, the Company may redeem securities held by the Shareholder or on account of the Shareholder.

Common Reporting Standard ("CRS") on the Automatic Exchange of Financial Account Information Between Participating Jurisdictions

The Company, the Management Company and the Administrative Manager may be obliged to collect and transmit to relevant tax authorities Shareholders' financial account information as appropriate. Directive 2011/16/EU on Administrative Cooperation in direct taxation ("DAC 1") established all the necessary procedures and provides the structure for an exchange of information between tax authorities in the EU.

The European Union as well as the international community through the OECD, have developed sets of rules aiming at implementing automatic exchange of financial account information among participating jurisdictions.

On 29 October 2014, Luxembourg signed the OECD's multilateral agreement, which established an automatic exchange of tax information between the Luxembourg tax authorities and the competent counterparties of the different CRS partner jurisdictions. On 9 December 2014, the EU Council adopted the Directive 2014/107/EU ("DAC 2") amending DAC 1 and introducing the "Common Reporting Standard", hereafter "CRS".

The CRS and the DAC2 were implemented into Luxembourg law by the law of 18 December 2015 on the automatic exchange of financial account information in the field of taxation. CRS entered into force in Luxembourg as from 1 January 2016. As Luxembourg Reporting Financial Institution, the Company is required to comply with the relevant CRS due diligence and reporting requirements. In this context, upon subscription, Shareholders of the Company are required to provide identity, and tax residency information to the Company. On an annual basis, Shareholders who meet the criteria of a Reportable Person⁴ under CRS, will be reported by the Company to the Luxembourg tax authorities, and subsequently to the tax authorities where they are tax resident, together with related financial information.

Any Shareholder that fails to comply with the Company's information or documentation requests may be subject to disclosure to the Luxembourg tax authorities.

Automatic exchange of information in the field of taxation in relation to reportable cross-border arrangements (commonly referred to as "DAC 6")

On 25 May 2018, the EU Council adopted the Directive 2018/822 ("DAC 6") amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation. DAC 6 imposes a reporting obligation on parties involved in transactions (so called "Reportable Arrangements") with an EU cross-border element that may be associated with aggressive tax planning and that, among others, satisfy one or more "Hallmarks" provided for in DAC 6. DAC 6 has been implemented into Luxembourg law on 25 March 2020 (the "DAC 6 Law") and is applicable as of 1 July 2020.

The Company or the Management Company may have to make such reporting if they identify arrangements which fall in the scope of the DAC 6 Law and may thus have to collect and process certain information about Shareholders.

³ A Reportable Person is an individual (or entity) that is tax resident in a reportable jurisdiction under the laws of that jurisdiction. The account holder will normally be the Reportable Person; however, under FATCA this includes (i) Shareholders qualifying as specified US Persons and (ii) controlling persons of Shareholders qualifying as passive non-financial foreign entities which are themselves US Persons. Dual resident individuals may rely on the tiebreaker rules contained in tax conventions (if applicable) to solve cases of double residence for purposes of determining their residence for tax purposes.

⁴ A Reportable Person is an individual (or entity) that is tax resident in a reportable jurisdiction under the laws of that jurisdiction. The account holder will normally be the Reportable Person. Under CRS this includes controlling persons of Shareholders qualifying as passive non-financial entities which are themselves tax resident in a reportable jurisdiction. Dual resident individuals may rely on the tiebreaker rules contained in tax conventions (if applicable) to solve cases of double residence for purposes of determining their residence for tax purposes.

The reporting obligation rests in principle with professional advisors that have promoted the reportable arrangements and other service providers involved. However, in certain cases, the taxpayer itself can be subject to the reporting obligation. Shareholders, as taxpayers, may have a secondary liability to report in-scope arrangements.

As a result of these regulations, the Company, the Management Company and the Administrative Manager may be obliged to collect and transmit Shareholders' personal information and information in respect to their investments into the Company, together with some financial account information to relevant tax authorities, as appropriate.

Change of Circumstances

Shareholders must undertake to inform the Company of, and provide the Company with, all supporting documentary evidence of any changes related to the Shareholder's information after the occurrence of such changes within 30 days.

Liquidation and Dissolution

With the consent of Shareholders, the Company may be liquidated. This will be carried out in accordance with Luxembourg Company law and any monies not claimed will be deposited, pursuant to Article 146 of the Law at the "Caisse de Consignation" in Luxembourg. With the consent of Shareholders, the Company may further be liquidated with the provision that the liquidator will transfer all assets and liabilities of the Company to a UCITS against issue to existing Shareholders of the Company of shares or certificates of such UCITS proportional to their shareholding in the Company.

Liquidation of one Fund or one Class may be approved by the Board of Directors of the Company and/or by a resolution at a separate Fund or Class meeting of Shareholders of the Fund or Class concerned. Any monies not claimed will be deposited with the "Caisse de Consignation" in Luxembourg. One Fund or one Class may be liquidated by contributing into another Fund or Class or into another UCITS. If, after the closure of the liquidation of a Fund or one Class, unexpected payments which relate to that specific Fund or Class are received by the Company and the Board of Directors deems that, in consideration of the amounts concerned or, as the case may be, the time elapsed since the closure of the liquidation, it is not appropriate or operationally justified to revert to former shareholders, these amounts will be retained by the Company. Details with respect to the liquidation and merger procedures can be found in the Articles of Incorporation.

If the net assets of the Company fall below either of the following minima, the Board of Directors of the Company must submit the question of the dissolution of the Company to a general meeting of Shareholders (for which no quorum is prescribed) which must decide by the applicable proportion of the Shares represented at the meeting, as specified below:

- (a) (i) Minimum – two-thirds of the minimum capital (presently €1,250,000)
- (ii) Proportion of Shares – simple majority.
- (b) (i) Minimum – one quarter of the minimum capital
- (ii) Proportion of Shares – one quarter.

Each such meeting must be convened so as to be held within 40 days after ascertaining that the net assets have fallen below either of the above minima.

Once the decision to liquidate one Fund or the Company is taken by the Board of Directors (or the general meeting of Shareholders, as appropriate), the relevant Fund(s) may begin liquidating their holdings in the period preceding the effective date of the liquidation in the best interest of the Shareholders. As a result, the Fund(s) may deviate from their investment objective and policy, as specified in the relevant Fund information Sheet, during this period.

Capital International Fund – General and Corporate Information

Principal and registered office:
6C, route de Trèves, L-2633 Senningerberg, Grand-Duchy of Luxembourg
Trade and Companies Register of Luxembourg: B 8833

The Company

The Company was incorporated as a "Société Anonyme d'Investissement" on 30 December 1969 and on 28 March 1989 it became a SICAV for an indefinite period under Part I of the Law. Its Articles of Incorporation, as amended, were published in the Mémorial Recueil des Sociétés et Associations of the Grand Duchy of Luxembourg on 31 March 1970, 16 May 1989, 16 February 2000, 16 August 2002, 20 December 2005, 2 July 2007 and 20 January 2012.

The Board of Directors of the Company

The Company's Board of Directors is ultimately responsible for the management and administration of the Company, including the determination of its general investment policies. The Directors of the Company are:

Maria Manotok (Chair) Capital Research and Management Company Los Angeles	Marie Elaine Teo Independent Director
François Beaudry (Vice Chair) Capital Research Company London	Lou Camille Kiesch Independent Director
Patrice Collette Capital International Management Company Sàrl Luxembourg	Elisabeth Scott Independent Director

Except for the Independent Directors, the Directors are all employees of the Capital Group (of which the Management Company and Investment Advisers are part). Details on the positions held by the Directors of the Company are available at the registered office of the Management Company.

Mailing address of the Company

Capital Group Investor Services
P.O. Box 167
6C, route de Trèves
L-2633 Senningerberg
Luxembourg

Accounting Year of the Company

The accounting year of the Company begins on 1 January and terminates on 31 December in each year.

Shareholders meetings of the Company

The Company's Annual General Meeting of Shareholders is held at the registered office of the Company in Luxembourg on the last Tuesday of April in each year at 11:00am or, if any such day is not a Business Day, on the next Business Day. Convening notices and all other legal notices are given in accordance with Luxembourg law and the Articles of Incorporation.

The Management Company

The Board of Directors of the Company has appointed Capital International Management Company Sàrl ("CIMC") pursuant to a Management Company Agreement dated 1 February 2013 to carry out the functions of management of the Company as prescribed in Annex II of the Law.

The Management Company shall be responsible for the investment management, the administration and the implementation of the Company's distribution and marketing functions as prescribed in Annex II of the Law.

The Management Company has been permitted by the Company to delegate, under the Management Company's supervision and control, certain administrative, distribution and management/services functions to Affiliates or service providers. The delegations shall not prevent the effectiveness of supervision by the Management Company.

The Management Company was incorporated under the Laws of Luxembourg on 28 September 1992 and has a share capital of EUR 7.5 million. CIMC is authorised as a management company under Part 4 chapter 15 of the Law. Its Articles of Incorporation have been amended for the last time on 3 December 2012 and were published in the Mémorial Recueil des Sociétés et Associations of the Grand Duchy of Luxembourg on 19 December 2012. The Company and the Management Company have appointed various providers to provide services, including those required by the Law, and may appoint providers of additional services by means of agreements that, unless otherwise required by law, will be governed by Luxembourg law.

The managers of the Management Company are:

Hamish Forsyth Capital Group Companies Global London	Alexandra Haggard Capital International Limited London	Gavin Lilburn Capital International Sàrl Geneva	Marta Zarraga Capital Group Companies Global London
Ai Chun Chua Capital Group Investment Management Pte Ltd Singapore	Fabrice Remy Capital International Sàrl Geneva	Jean-Marc Goy Capital International Management Company Sàrl Luxembourg	Michael Sabbatini Capital International Sàrl Geneva

Details on the positions held by the managers of the Management Company as well as the list of the Conducting Officers are available at the registered office of the Management Company.

Subject to the overall control of the Management Company and the ultimate responsibility of the Board of Directors of the Company, CRMC as well as CII and CISA (as specified in the relevant Fund Information Sheet in Annex 2) may serve as the Investment Advisers/Sub-Advisers of the Funds. The Investment Adviser may delegate all or part of its duties and obligations to Sub-Adviser(s), as specified in the relevant Fund Information Sheet in Annex 2. CISA was incorporated on 5 July 1963 in Geneva, Switzerland, and CII was incorporated on 16 December 1987 in the State of California, USA, both wholly owned subsidiaries of Capital Group International, Inc., which, in turn, is wholly owned by CRMC; CRMC was incorporated on 30 July 1940 and is also a wholly owned subsidiary of Capital Group. Together they are referred to as the Investment Advisers. The Management Company may at its discretion decide, from time to time, to retain the portfolio management for a certain portion of a Fund's assets for which it has internal capabilities.

The Affiliates manage substantial portfolios for a wide range of international clients. These portfolios are invested in worldwide equity and fixed-income securities. Each of the Investment Advisers has access to the research of certain Affiliates. The Capital Group is one of the largest and oldest investment management organisations in the United States. The Capital Group and its Affiliates maintain offices in the United States of America, Luxembourg, Switzerland, England, Hong Kong, Japan, Canada, Singapore, India, China and Australia. The Investment Advisers may delegate, under their own responsibility, all or part of their duties and obligations (excluding investment advice) to any Affiliates. In particular, the Management Company may, from time to time, authorise any Affiliates to execute the Investment Advisers' investment decisions relating to the assets of the Funds.

Such Affiliates will place trades with brokers who provide certain brokerage and/or investment research services to the Affiliates, but only when in the Affiliates judgement the broker is capable of providing best execution for that transaction. The Affiliates make decisions for procurement of research separately and distinctly from decisions on the choice of brokerage and execution services. These services permit the Affiliates to supplement their own research and analysis, which contributes to the efficient management of investment portfolios by Affiliates for the benefit of investors. Although Affiliates may enter into arrangements with brokers with the expectation that these services will be provided, Affiliates do not incur any obligation with any broker to pay for research by generating trading commissions. As of 1 January 2019, the Affiliates have undertaken to bear the cost of all third-party

investment research services for the Company. In addition, Affiliates' employees are governed by a global Code of Ethics, which includes rigorous personal investing and gifts and entertainment policies.

The Depositary and Custodian of the Company

J. P. Morgan SE, Luxembourg Branch
European Bank & Business Centre
6, route de Trèves
L-2633 Senningerberg
Luxembourg

The Company has appointed JP Morgan as Depositary and Custodian of the Company, by an agreement dated 23 August 2002, as amended, to provide depositary, custodial, settlement and certain other associated services to the Company. JP Morgan is a European Company (Societas Europaea) organised under the laws of Germany, having its registered office at Taunustor 1 (TaunusTurm), 60310 Frankfurt am Main, Germany and is registered with the commercial register of the local court of Frankfurt. It is a credit institution subject to direct prudential supervision by the European Central Bank, the German Federal Financial Supervisory Authority ("Bundesanstalt für Finanzdienstleistungsaufsicht"), and the German Central Bank ("Deutsche Bundesbank"); JP Morgan is authorized by the CSSF to act as depositary and fund administrator and is licensed to engage in all banking operations under the laws of Luxembourg.

The Depositary is responsible, in accordance with the Law, for ensuring that:

- the issue, redemption and cancellation of Shares is done according to the Law and the Articles of Incorporation;
- the value of the Shares is calculated in accordance with the Law and the Articles of Incorporation;
- the instructions of the Company or the Management Company are carried out unless they conflict with the Law and the Articles of Incorporation;
- the income produced by the Company is applied as specified in the Articles of Incorporation; and
- in transactions involving assets of the Company, the consideration is remitted to it within the usual time limits.

The Depositary is also responsible for the safekeeping and ownership verification of the assets of the Company, cash flow monitoring and oversight in accordance with the Law.

In order to provide depositary services according to the types of assets and the geographical regions the Company plans to invest in, the Depositary may entrust all or part of the assets held by the Company that it holds in custody to such sub-custodians as may be determined by the Depositary from time to time. Except as provided under applicable law, the Depositary's liability shall not be affected by the fact that it has entrusted all or part of the assets in its care to a third party.

As part of the normal course of global custody business, the Depositary may from time to time have entered into arrangements with other clients, funds or other third parties for the provision of safekeeping and related services. Within a multi-service banking group such as JPMorgan Chase Group, from time to time conflicts may arise between the Depositary and its safekeeping delegates, for example, where an appointed delegate is an affiliated group company and is providing a product or service to a fund and has a financial or business interest in such product or service or where an appointed delegate is an affiliated group company which receives remuneration for other related custodial products or services it provides to the funds, for instance foreign exchange, securities lending, pricing or valuation services. In the event of any potential conflict of interest which may arise during the normal course of business, the Depositary will at all times have regard to its obligations under applicable laws including Article 25 of the Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS V Directive).

When selecting and appointing sub-custodians or other delegate, the Depositary shall exercise all due skill, care and diligence as required under the Law to ensure that it entrusts the Company's assets only to a delegate who may provide an adequate standard of protection.

The current list of sub-custodians used by the Depositary is available at https://www.capitalgroup.com/content/dam/cgc/tenants/europe/documents/sub-custodians/Agent_and_Cash_Network_Custody.pdf or may be obtained by Shareholders free of charge and from the Company upon request.

The Depositary is liable to the Company or its Shareholders for the loss of a financial instrument held in custody by the Depositary or any of its sub-custodians or delegates. The Depositary shall, however, not be liable if it can prove that the loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. The Depositary is also liable to the Company or its Shareholders for all other losses suffered by them as a result of the Depositary's negligent or intentional failure to properly fulfil its duties in accordance with the applicable law.

Administrative Manager and Paying Agent of the Company

J. P. Morgan SE, Luxembourg Branch
European Bank & Business Centre
6, route de Trèves
L-2633 Senningerberg
Luxembourg

The Management Company has appointed JP Morgan as Administrative Manager, by an Administration Agreement dated 23 August 2002, as amended, and as Paying Agent, by a Paying Agency Agreement dated 23 August 2002 to provide the Company with services as required by the Law. JP Morgan SE, as UCI administrator under CSSF Circular 22/811, is responsible for the registrar function, the Net Asset Value calculation and accounting function, and client communication function.

JP Morgan is a European Company (Societas Europaea) organised under the laws of Germany, having its registered office at Taunustor 1 (TaunusTurm), 60310 Frankfurt am Main, Germany and is registered with the commercial register of the local court of Frankfurt. It is a credit institution subject to direct prudential supervision by the European Central Bank, the German Federal Financial Supervisory Authority ("Bundesanstalt für Finanzdienstleistungsaufsicht"), and the German Central Bank ("Deutsche Bundesbank"); JP Morgan is authorized by the CSSF to act as depositary and fund administrator and is licensed to engage in all banking operations under the laws of Luxembourg.

Authorised Agents and Country Paying Agents of the Company

Details of the Company's representatives and local paying agents in various countries can be obtained from the Company upon request. Investors are also invited to refer to any addendum to this Prospectus with additional information for investors in relevant jurisdictions.

Distributors

The Company will provide details of current Distributors upon request.

Auditors of the Company

Reports and other Documents available for Investors

Audited annual reports will be made available to the Shareholders at the registered office of the Company and will be available online at capitalgroup.com/international. The Company may also make available abridged annual reports (comprising a report on activities, the auditor's report and the statements of net assets, operations and changes in net assets) to the Shareholders at their registered address, provided that the full reports are available to the Shareholders free of charge on request at the registered office of the Company.

Copies of the following documents may be obtained, free of charge, at the registered office of the Company:

- the Articles of Incorporation;
- the current Prospectus and relevant KID/KIID; and
- the latest audited annual and unaudited semi-annual reports.

Copies of the following agreements, which are all governed by the laws of Luxembourg, are available for inspection during normal business hours at the registered office of the Company:

- the Investment Advisory Agreements;
- the Custody Agreement;
- the Paying Agency Agreement; and
- the Administration Agreement.

Relevant notifications or other communications to Shareholders concerning their investment in the Company may be posted on the website capitalgroup.com/international (under the sections "Financial Intermediaries" or "Individual Investors", "Resources & Support", "Shareholder information" and "Shareholder notices". Alternatively, under the section "Institutions & Consultants", "Capabilities & Strategies", "How to invest" and "Shareholder notices"). In addition, and where required by Luxembourg law or the CSSF, Shareholders will also be notified in writing (including by email if this has been agreed with the Shareholder) or in such other manner as prescribed under Luxembourg law.

Transmission of investor data

The Management Company may authorise the Administrative Manager to send investor contract notes, valuation statements, dividend vouchers and any other correspondence (together "Investor Correspondence") electronically in encrypted pdf format to Shareholders and/or Distributors and other Intermediaries at email addresses provided by such investors for the purpose of receiving such Investor Correspondence, as per expressed instruction from Shareholders and/or Distributors and other Intermediaries through Account Opening Forms and maintenance forms.

Please also note that although electronic messages will be password protected, email communication is not a secure medium or error free and can contain viruses or other defects and may be delayed. The Management Company and/or the Administrative Manager is not liable for any of these occurrences, and makes no warranties in relation to these matters. The sender reserves the right to monitor, record, transfer cross border and retain electronic messages. If you are not comfortable with the risks associated with electronic messages, you may decide not to select the email option in the Account Opening Forms and maintenance forms.

Investors should note that investor data may be transferred by JP Morgan (acting as Administrative Manager) or on JP Morgan's behalf to intra-group or other third-party service providers, such as processing agents and/or other service providers appointed by the Management Company. More details about the outsourced services, type of information transmitted and country of establishment of the service providers can be found on Capital Group's website at capitalgroup.com/international.

Remuneration policy

The details of the up-to-date Management Company remuneration policy, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee, are available on the website https://www.capitalgroup.com/content/dam/cgc/tenants/europe/documents/disclosures-policies/remuneration_policy.pdf. A paper copy of the remuneration policy will be made available free of charge upon request.

As per UCITS V Directive as regards depositary functions, remuneration policies and sanctions, it is confirmed that

- the remuneration policy is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS that the management company manages;
- the remuneration policy is in line with the business strategy, objectives, values and interests of the Management Company and the UCITS that it manages and of the Shareholders in such UCITS, and includes measures to avoid conflicts of interest;
- the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the Shareholders of the UCITS managed by the management company in order to ensure that the assessment process is based on the longer-term performance of the UCITS and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period;

- fixed and variable components of total remuneration are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component

Annex 1: General Investment Guidelines and Restrictions

This Annex summarizes the types of assets, techniques and instruments that are permitted as a matter of law and regulation, along with the applicable limits, restrictions and requirements. In the absence of provisions in the Annex, the Law (in the original French) will apply.

Subject to the Company's Articles of Incorporation, to this Prospectus and to the relevant Fund Information Sheet in Annex 2, the following provisions will apply:

I. Eligible Assets

1. The Portfolio of each Fund will exclusively be invested in:
 - (a) transferable securities and money market instruments that are issued by issuers domiciled and/or having their principal place of business, and/or whose securities are dealt in, in an Eligible Investment Country and that
 - (i) are admitted to an Official Listing,
 - (ii) are dealt in on another Regulated Market, or
 - (iii) having been issued recently, include in their terms of issue the undertaking that they will meet either of the above requirements within a year of the issue;
 - (b) other money market instruments that are liquid and can be accurately valued on each Valuation Date, if their issue or issuer is regulated for investors and savings protection, provided that they are
 - (i) issued or guaranteed by a central, regional or local authority or central bank of a Member State, the European Central Bank, the European Union or the European Investment Bank, a non-Member State, by one of the members making up the federation in a Federal state, or by a public international body to which one or more Member States belong; or
 - (ii) issued by an undertaking, any securities of which are admitted to an Official Listing or dealt in on another Regulated Market; or
 - (iii) issued or guaranteed by an establishment subject to prudential supervision in accordance with European Community law or to rules at least as stringent;
 - (c) other transferable securities and money market instruments, provided that their total value does not exceed 10% of the net assets of the relevant Fund.
 - (d) units of other UCITS or UCIs, provided that no more than 10% of the UCITS' or UCI's assets (or of the assets of the relevant sub-fund) can, according to its constitutional documents, be invested in aggregate in units of other UCITS or other UCIs;
 - (e) deposits with credit institutions that are repayable on demand or have the right to be withdrawn, and maturing in no more than twelve months, provided that the credit institution (i) has its registered seat in a Member State or (ii) is subject to prudential rules equivalent to those laid down in European Community law; and
 - (f) financial derivative instruments, including equivalent cash-settled instruments, admitted to an Official Listing or dealt in on a Regulated Market, and/or OTC Derivatives provided that:
 - (i) the underlying consists of instruments described in paragraphs (a) to (e), financial indices, interest rates, foreign exchange rates or currencies to which the relevant Fund may gain exposure to in accordance with its investment policy,
 - (ii) the counterparties to OTC Derivative transactions are institutions subject to prudential supervision and belong to the categories approved by the CSSF, and
 - (iii) the OTC Derivatives are subject to reliable and verifiable valuation on a daily basis, and sold, liquidated or closed by an offsetting transaction at the Company's initiative at any time.

For the avoidance of doubt, it is confirmed that investments in private placement securities, and the acquisition of equity securities or other instruments received as a result of corporate actions, are permitted within the limits laid down above.

2. Under the conditions laid down by law, regulations and administrative practice, the Company may use financial derivative instruments authorised by Luxembourg law or CSSF circulars for the purpose of efficient portfolio management, and/or, as described below
 - a) in order to achieve the most appropriate currency distribution, with the objective of reducing the risk of the depreciation in the value of specific currencies, techniques and instruments relating to currency hedging, including cross hedging and proxy hedging, in particular forward currency sales.

The Fund may hold short positions via derivative instruments for currency positioning purposes.

Positions expressing the Fund's currency hedging involve long exposures in one currency and short exposures in another currency, either explicitly or implicitly.

Currency exposure including cross-currency positions, which are not related to the Fund's bond and cash equivalent positions, may be assumed.

The Company will enter into such transactions with first-class financial institutions.

The Company generally does not intend to systematically hedge currency exposures in each Fund back to any currency. However, the Company has appointed JPMorgan Chase Bank, N.A. to provide a systematic passive currency-hedging overlay on a significant part of the assets of the relevant Fund attributable to Hedged Equivalent Classes and Dividend-distributing Hedged Equivalent Classes in order to reduce the exposure of such Classes to currencies other than the currency referred to in the relevant Class' designation as described under "The Classes".
 - b) in order to adjust the credit exposure and/or interest rate exposure, to buy and sell put options, warrants and future contracts;
 - c) in order to adjust the interest rate exposure, linked to interest rates such as interest rate swaps; and

- d) in order to adjust the credit exposure, subject to it being provided for in the relevant Fund's Information Sheet in Annex 2, financial derivative instruments related to credit risks, such as credit default swaps whereby one counterparty (the protection buyer) pays the other a fixed periodic fee for the specified life of the agreement, in return for a contingent payment by the protection seller upon occurrence of a credit event of a predetermined reference issuer. A credit event is commonly defined as a downgrading of the rating assigned by a rating agency, bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet payment obligations when due. The Company will enter into such transactions with first-class financial institutions.

In addition to the above, the Company may use financial derivative instruments authorised by Luxembourg law or CSSF circulars, for investment purposes.

3. Furthermore, and as specified in the relevant Fund Information Sheet in Annex 2, some Funds may use securities financing transactions and Total Return Swaps as defined under Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 by (i) entering into securities lending transactions and (ii) to invest in Total Return Swaps, to provide an additional source of potential investment return to Shareholders, which will help achieve the Fund's investment objective.

Investors should note that the investment policies of the Funds currently do not provide for the possibility to enter into other types of securities financing transactions (specifically repurchase transaction, commodities lending and securities or commodities borrowing, buy-sell back transaction or sell-buy back transaction and margin lending transaction). Should the Company decide to provide for such possibility, the Prospectus will be updated prior to the entry into force of such decision.

Securities lending will be used on a continuous basis. The total volume of securities on loan at any given time will be determined by market conditions and the best interests of the Shareholders. Where a Fund enters into securities financing transactions, equity and fixed-income securities will be subject to securities lending transactions. Such transactions are subject to, among others, operational risk as well as liquidity, counterparty, custody and legal risks. Please read the "Risk Warnings" section, heading "Securities Lending Transactions", for more details of the relevant risk factors involved.

Portfolio securities of the relevant Fund will be lent to counterparties such as brokers, dealers or other institutions approved by Capital Group. Counterparties to securities lending transactions are subject to prudential supervision rules that the CSSF deems equivalent to those required under EU Law. Typically, counterparties will be located in OECD member states. If the counterparty is an entity linked to the Management Company, care will be taken to avoid any resulting conflicts of interest in order to ensure that the agreements are entered into at arm's length. Counterparties are subject to a rigorous credit assessment and in-depth review at the outset of the relationship and on an ongoing basis. The Management Company is able at any time to recall any security that has been lent out or to terminate any securities lending agreement into which it has entered.

Should some assets of a given Fund be used in securities lending transactions, the underlying assets and investment strategies to which exposure will be gained are those allowed as per the relevant Fund Information Sheet in Annex 2. Entering into securities lending transactions will not result in a change of the declared investment objective of the relevant Fund. No more than 15% of the net assets of a Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of a Fund. Please also refer to Annex 1 for more details on the management of collateral, the eligible collateral, the reinvestment of collateral and the collateral policy.

In addition to be the Depositary and Custodian, JP Morgan serves as securities lending agent and hence administers the securities lending program pursuant to the terms of a securities lending agent agreement entered into between the Management Company and JP Morgan on 30 May 2022. Under the terms of the agreement, JP Morgan is responsible for making available to approved counterparties securities from the portfolio of the relevant Fund. JP Morgan is also responsible for the administration and management of the securities lending program of the Company, including the preparation and execution of an agreement with each counterparty governing the terms and conditions of any securities lending transaction, ensuring that they are properly coordinated and documented, ensuring that loaned securities are valued daily and that the corresponding required collateral is delivered by the borrowers, arranging for the investment of collateral received from borrowers, and arranging for the return of loaned securities to the relevant Fund in accordance with the relevant instructions or at termination of the securities lending transaction.

All revenues from securities lending transactions shall be payable to the relevant Fund following the deduction of compensation to the securities lending agent for its services. The expenses which may be deducted from the revenue delivered to the relevant Fund should generally not exceed 5% of the gross revenue arising from securities lending transactions. The difference, i.e. 95%, will be paid to the relevant Fund.

II. Investment Limits Applicable to Eligible Assets

4. No transferable securities or money market instruments will be purchased if, as a result of such purchase,
- (a) more than 10% of the net assets of the relevant Fund would be invested in transferable securities or money market instruments issued by the same issuer, and more than 40% of its net assets would be invested in issuers in each of which more than 5% of such assets are invested.
- (i) The 10% limit laid down in sub-paragraph (a) above is increased to 35% in respect of securities which are issued or guaranteed by a Member State, its local authorities or by any other State or by public international bodies of which one or more Member States are members, such securities not being included in the calculation of the limit of 40% referred to in sub-paragraph 4.(a) above.
- (ii) Notwithstanding sub-paragraphs 4.(a) and 4.(a)(i) above, the Company is authorised to invest up to 100% of the net assets of the relevant Fund, in accordance with the principle of risk spreading, in transferable securities and money market instruments issued or guaranteed by a Member State, by its local authorities, or by any other State or by public international bodies of which one or more Member States are members, provided that the relevant Fund must hold securities from at least six different issues and securities from one issue do not account for more than 30% of the total net assets of the relevant Fund.**
- (iii) The 10% limit laid down in sub-paragraph 4.(a) above is increased to 25% in respect of certain debt securities which are issued by credit institutions having their registered office in a Member State and which are subject, by law, to special public supervision designed to protect the holders of debt securities (in particular against the risk of counterparty default). In particular, sums deriving from the issue of such debt securities must be invested pursuant to the law in assets which, during the whole period of validity of such debt securities, are capable of covering claims attaching to the debt securities and which, in the event of bankruptcy of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest. Such debt securities need not be included in the calculation of the limit of 40% referred to in sub-paragraph (a) above, but no more than 80% of any Fund's net assets may be invested in such debt securities of issuers in each of which more than 5% of the Fund's assets are invested.

- (b) more than 10% of the net assets of the relevant Fund would be invested in securities exclusively listed and/or traded on a Russian Regulated Market (except the Moscow Exchange MICEX-RTS - formerly known as Russian Trading Stock Exchange and the Moscow Interbank Currency Exchange). Such securities will be included for the purpose of calculating the 10% limit referred to in Section I, 1, (c) above¹;
- (c) more than 10% of the net assets of the relevant Fund would be invested, in aggregate, in UCITS and/or other UCIs, unless a different specific investment restriction is mentioned in the relevant Fund Information Sheet in Annex 2. The terms and conditions of investments in undertakings for which the Investment Adviser or Affiliates act directly or indirectly as investment adviser must be in the best interest of the Company and its Shareholders, in particular with respect to the avoidance of double-charging of investment advisory fees (as described under "Expenses").
- (d) If a specific Fund is allowed, in the relevant Fund Information Sheet in Annex 2, to invest more than 10% of its assets in units of UCITS or other UCIs the following restrictions will apply:
 - No more than 20% of a Fund's assets may be invested in the units of a single UCITS or other UCI. For the purpose of the application of this investment limit, each compartment of a UCITS or other UCI with multiple compartments is to be considered as a separate issuer provided that the principle of segregation of the obligations of the various compartments vis-à-vis third parties is ensured.
 - Investments made in units of UCIs other than UCITS may not in aggregate exceed 30% of the assets of a Fund.
- (e) Subject to the above limits, a Fund may subscribe, acquire and/or hold securities to be issued or issued by one or more Funds without the Company being subject to the requirements of the Law of 10 August 1915 on commercial companies, as amended, with respect to the subscription, acquisition and/or the holding by a company of its own shares, under the condition however that:
 - the target Fund does not, in turn, invest in the Fund invested in this target Fund; and
 - no more than 10% of the assets that the target Funds whose acquisition is contemplated may be in units of UCITS and / or other UCIs; and
 - voting rights, if any, attaching to the shares of the target Fund are suspended for as long as they are held by the Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
 - in any event, for as long as these securities are held by the Fund, their value will not be taken into consideration for the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the 2010 Law.
- (f) notwithstanding the limits referred to under (c) and (d) above, the Company can decide, under the conditions provided for in Chapter 9 of the 2010 Law, as may be amended, that a Fund ("Feeder") may invest 85% or more of its assets in units or shares of another UCITS ("Master") authorised according to Directive 2009/65/EC (or a portfolio of such UCITS). Under the conditions and within the limits laid down by Chapter 9 of the 2010 Law, a Fund may qualify as a Master UCITS.
- (g) The underlying investments held by the UCITS or other UCIs in which the Fund invests do not have to be considered for the purpose of the investment restrictions set forth under 4) a) above.
- (h) More than 20% of the net assets of any Fund would be invested in deposits made with the same body.
- (i) Any Fund's uncollateralised risk exposure to a counterparty in an OTC Derivative transaction would exceed 10% of its net assets when the counterparty is a credit institution referred to in sub-paragraph 1.(e) above, or 5% of its net assets in other cases.
- (j) The Company or any one Fund would hold more than 10% of any class of securities of any issuer (other than a UCI or UCITS), or the Company would hold shares carrying voting rights that would enable it to take legal or management control or to exercise significant influence over the management of the issuing body.
- (k) The Company or any one Fund would hold more than 25% of the units of a single UCI or UCITS.

The above ceilings do not apply in respect of transferable securities or money market instruments issued or guaranteed by a Member State, its local authorities, any other Eligible Investment Country or a public international body of which one or more Member States are members.

- (l) subject to the following paragraph, the combination of the following instruments would exceed 20% of the net assets of any Fund:
 - (i) transferable securities or money market instruments issued by a single body; and/or
 - (ii) deposits made with the same body; and/or
 - (iii) exposures arising from OTC Derivative transactions undertaken with the same body.
- (m) the combination of the following instruments would exceed 35% of the net assets of any Fund:
 - (i) transferable securities or money market instruments issued by a single body in accordance with sub-paragraph 4.(a)(i) above; and/or
 - (ii) certain debt securities issued by the same body in accordance with sub-paragraph 4.(a)(iii) above; and/or
 - (iii) deposits made with the same body in accordance with sub-paragraph 4.(h) above; and/or
 - (iv) exposures arising from OTC Derivative transactions undertaken with the same body in accordance with sub-paragraph 4.(i) above.

A company that is included in a group for the purposes of consolidated accounts, as defined in Directive 83/349/EEC or in accordance with recognised international accounting rules, is regarded as a single body for the purpose of calculating the investment limits referred to above in this paragraph 4.

The Company may invest up to 20% of the net assets of any Fund in transferable securities and/or money market instruments within the same group.

¹ While sanctions against Russia applied by the Company will remain in force, this provision in its entirety will not apply as no investment in Russian Regulated Markets will be permitted.

5. Risk management and monitoring of financial derivatives instruments

The Company will ensure that each Fund's global exposure relating to derivative instruments does not exceed its total net assets. The global exposure to the underlying assets must not exceed the investment limits referred to in this Section II. When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with this paragraph 5. Exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the position.

There are two main risk measurement approaches in relation to a Fund's global exposure from financial derivatives: Commitment and Value at Risk ("VaR") which are specified for each Fund in the relevant Fund Information Sheet in Annex 2.

(a) Commitment Approach

Under the commitment approach, the Funds calculate their global exposure by taking into account either the market value of an equivalent position in the underlying asset or the derivative's notional value, as appropriate. This approach allows the Funds to reduce their global exposure by taking into account the effects of any hedging or offsetting positions. Note that with the commitment approach, certain types of risk-free transactions, leverage-free transactions and non-leveraged swaps can be excluded from the calculation. Pursuant to the 2010 Law, the global exposure for a Fund under the Commitment Approach must not exceed 100% of that Fund's Net Asset Value.

(b) VaR Methodology

The VaR approach seeks to estimate the maximum potential loss a Fund could experience in a month (20 trading days) assuming 99% confidence level. VaR is calculated in accordance with these parameters using an absolute or relative approach, as defined below.

There are two types of VaR measure which can be used to monitor and manage the global exposure of a fund: "Relative VaR" and "Absolute VaR". Relative VaR is where the global exposure of a Fund to be compared to, and limited by reference to, the global exposure of the appropriate index or reference portfolio. Absolute VaR is commonly used as the relevant VaR measure for absolute and total return style Funds, where an index or reference portfolio is not appropriate for risk measurement purposes.

The relative VaR of a Fund cannot exceed twice the VaR of the relevant index or reference portfolio. The reference portfolio may be different from the index as stated in the Fund Information Sheets.

The absolute VaR of a Fund cannot exceed 20% of its Net Asset Value.

When a Fund measures its global exposure through the VaR approach, it will also have to disclose its expected level of leverage.

The type of VaR measure used for a specific Fund (and the expected level of leverage if applicable) will be disclosed in the relevant Fund Information Sheet in Annex 2.

If the above limitations are exceeded for reasons beyond the control of the Company or as a result of the exercise of subscription rights, the Company's priority objective for its sales transactions must be to remedy that situation, taking account of the interests of Shareholders.

For defensive reasons, the assets of any Fund may be held temporarily in securities of one, or a few, States and denominated in one, or a few, currencies.

III. Liquid Assets

Each Fund may hold ancillary liquid assets (bank deposits at sight, such as cash held in current accounts with a bank accessible at any time) up to 20% of its net assets for treasury purposes. On a temporary basis and if justified by exceptionally unfavourable market conditions (such as the September 11 attacks or the bankruptcy of Lehman Brothers in 2008), the Funds may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of the Shareholders, hold ancillary liquid assets up to 100% of its net assets. In order to achieve its investment goals and for treasury purposes, the Funds may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out under sections "Eligible Assets" and "Investments Limits Applicable to Eligible Assets" above. For defensive purposes, the Funds may hold also up to 100% of its net assets in these instruments on a temporary basis.

Liquid assets held in margin accounts in relation to financial derivative instruments do not qualify as ancillary liquid assets.

IV. Unauthorised Investments

6. The Company will not make investments in:

- (a) precious metals or certificates representing them, or commodities;
- (b) real estate or any option, right or interest in real estate, provided that the Company may invest in securities secured upon, or issued by companies which invest in, real estate or interests in real estate; and
- (c) securities purchased on margin (except such short-term credit obtained as necessary for the clearance of purchases and sales of securities) or in uncovered sales of securities, money market instruments or other financial instruments.

7. In addition the Company will not:

- (a) make loans out of or secured upon its assets or assume liability for any obligation or indebtedness of any third person;
- (b) borrow, except from a bank, as a temporary and extraordinary measure, and then not in excess of 10% of the net assets of the relevant Fund, provided that the acquisition of securities in partly paid form will not be deemed to constitute a borrowing; and
- (c) make investments in any assets involving the assumption of unlimited liability.

8. The Company may purchase securities on a when-issued basis, and it may purchase or sell securities for delayed delivery. These transactions occur when securities are purchased or sold with payment and delivery taking place in the future to secure what is considered an advantageous yield and price to the relevant Fund at the time of entering into the transaction. Sufficient cash (in the case of purchases) or securities (in the case of sales) will be blocked within the relevant Portfolio in order to enable the Company to meet its obligation on payment and delivery date and satisfy redemption orders.

9. The Investment Advisers have implemented procedures to restrict investments in producers of anti-personnel landmines in recognition of the United Nations Convention on Anti-Personnel Landmines, also known informally as the Ottawa Treaty. This Convention was signed in December 1997 and came into force on 1 March 1999.
10. The United Nations Convention on Cluster Munitions was signed in December 2008 and came into force on 1 August 2010. It was ratified by the Luxembourg government through the law of 4 June 2009 that prohibits all use, stockpiling, production and transfer of cluster munitions. The law of 4 June 2009 also prohibits all persons, businesses and corporate entities from knowingly financing cluster munitions. The Investment Advisers have implemented procedures to comply with the above obligations.

V. Management of Collateral

General

Where a Fund enters into an OTC financial derivative transaction (including TRS) the counterparty risk of a Fund vis-a-vis a counterparty will be equal to the positive mark-to-market value of all OTC derivative transactions with that counterparty, provided that:

- (i) If there are legally enforceable netting arrangements in place, the risk exposure arising from OTC derivative transactions with the same counterparty may be netted; and
- (ii) If collateral is posted in favour of the Fund and such collateral complies at all times with the criteria set out in "Eligible Collateral" below, the counterparty risk of a Fund towards a counterparty under OTC derivative transactions is reduced by the amount of such collateral.

Eligible Collateral

Collateral obtained in respect of OTC financial derivative transactions ("Collateral") will only be taken into account to reduce a counterparty's risk exposure if it complies at all times with criteria laid down in the ESMA Guidelines 2014/937 and CSSF Circular 14/592 and provided that the following rules are complied with:

- (i) Collateral received other than cash shall be highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation;
- (ii) Collateral received shall be valued on at least a daily basis. Assets that exhibit high price volatility shall not be accepted as Collateral unless suitably conservative haircuts are in place;
- (iii) Collateral received should be of high quality;
- (iv) Collateral should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;
- (v) Collateral should be sufficiently diversified in terms of country, markets and issuers; and
- (vi) Collateral should be capable of being fully enforced by the Fund at any time without reference to or approval from the counterparty.

For each securities lending transaction and subject to a commitment that the equivalent securities will be returned on a future date or when requested to do so, the counterparty must provide cash in USD, EUR or JPY currency or cash equivalents, such as US Treasury securities as Collateral in an amount at least equivalent, at all times during the lifetime of the transactions, to the full current value of the securities lent. US Treasury securities generally have a maturity between one day and one year.

Reinvestment of Collateral

Non-cash collateral cannot be sold, re-invested or pledged.

Cash received as Collateral may only be:

- (i) Placed on deposit with entities prescribed in article 50(f) of the UCITS Directive;
- (ii) Invested in high quality government bonds;
- (iii) Used for reverse repo transactions under which the cash is callable at any time; and
- (iv) Invested in short term money market funds.

Re-invested cash collateral must be diversified in accordance with the diversification requirements applicable to non-cash collateral. A Fund may be subject to a risk of loss in the case of a default of the relevant issuer or the relevant counterparty to transactions in which cash collateral has been reinvested.

Cash received as Collateral in the context of securities lending transactions will only be placed in deposits, or invested in high quality, liquid, and short term money market funds (as described above) preapproved by Capital Group.

Collateral Policy

The collateral policy that will be followed by each Fund to cover its exposure to an OTC financial derivative transaction is set out below.

The Management Company has established a list of authorised counterparties, eligible collateral, and haircut policies; and these may be revised or amended by the Management Company at any time.

The counterparties to any OTC financial derivative transaction, entered into by a Fund, are selected from a list of authorised counterparties established by the Management Company. The authorised counterparties are subject to prudential supervision and belong to categories approved by the CSSF. The list of authorised counterparties may be amended with the consent of the Management Company.

Collateral is posted and received in order to mitigate the counterparty risk in OTC financial derivative transactions. Collateral is monitored and marked-to-market daily. Regular reporting is provided to the Management Company, Administrative Manager, and Investment Advisor.

Collateral posted in favour of a Fund under a title transfer arrangement should be held by the Custodian or one of its correspondents or sub-custodians. Collateral posted in favour of a Fund under a security interest arrangement (e.g. a pledge) can be held by a third party custodian which is subject to prudential supervision, and which is unrelated to the provider of collateral.

Cash Collateral received by the Management Company is only used as described under Reinvestment of Collateral above.

As part of its OTC financial derivatives transaction risk mitigation and in accordance with its internal policy relating to the management of collateral, the Management Company will determine:

- (i) the required level of collateral; and
- (ii) the level of valuation haircut applicable to non-cash assets received as collateral, taking into account the assets' characteristics (such as the credit standing of the issuers, the maturity, the currency and the price volatility of the assets).

A haircut is a discount applied to the value of a Collateral asset to account for the fact that its valuation, or liquidity profile, may deteriorate over time. Subject to the framework agreements in place with the relevant counterparty, which may or may not include minimum transfer amounts and/or threshold amounts of unsecured credit exposure that the parties are prepared to accept before asking for collateral, it is the intention of the Management Company that any collateral received shall have a value, adjusted in light of the haircut policy, which equals or exceeds the relevant counterparty exposure where appropriate.

Certain framework agreements or OTC financial derivatives transactions may require the posting of initial margin which is agreed between the parties at the time of each trade. Where initial margin is required, the value of collateral posted will be in excess of the value of the relevant OTC financial derivative transaction.

As of the date of this Prospectus, the Management Company typically accepts collateral types and applies the following haircuts in relation thereto:

Collateral Type	Typical Haircut
Cash	0%
Government Bonds	0.5% to 10%*
Non-Government Bonds	10% to 20%*

* These may vary depending upon the maturity of the security

The Management Company reserves the right to depart from the above haircut levels where it would be appropriate to do so taking into account the assets' characteristics (such as the credit standing of the issuers, the maturity, the currency and the price volatility of the assets). Furthermore, the Management Company reserves the right to accept collateral types other than those disclosed above.

Cash is denominated in major currencies and typically USD, GBP or EUR. Government Bonds consist of bonds issued or guaranteed by a member state of the OECD or by their local authorities or supranational institutions and bodies of a community, regional or worldwide nature. Non-Government Bonds are bonds issued by or guaranteed by high quality issuers offering adequate liquidity.

Specific Provisions Regarding The Collateral Applicable To Securities Lending

Where a Fund enters into securities lending transactions, the market value of the lent securities and of the collateral will be calculated each Business Day. The collateral received will have a target coverage amounting to 102% for US securities and 105% for non-US securities of the total mark-to-market value of the lent securities. The ownership of the Collateral is transferred to the relevant Fund and will be held by the Depositary (or a sub-custodian acting on behalf of the Depositary) on behalf of the relevant Fund in accordance with the safekeeping duties of the Depositary under the agreement entered into between the Company and the Depositary. The Collateral is capable of being fully enforced by the Fund at any time without reference to or approval from the counterparty.

Annex 2: Fund Information Sheets

Each Fund Information Sheet forms an integral part of the Prospectus and should be read in conjunction with the full information contained in it.

Capital Group New Perspective Fund (LUX)

Launch Date	30 October 2015
Investment Objective	The Fund's investment objective is to provide long-term growth of capital. The Fund seeks to take advantage of investment opportunities generated by changes in global trade patterns and economic and political relationships by investing in common stocks of companies located around the world, which may include Emerging Markets. In pursuing its investment objective, the Fund invests primarily in common stocks that the Investment Adviser believes have the potential for growth.
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • long-term capital growth through investments in global Equities; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country
Specific Investment Guidelines and Restrictions	1. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is generally at least 30% lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI) at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 2. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions for corporate issuers, with respect to certain sectors such as weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 3. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 4. Companies must have good governance practices. 5. The Fund may invest up to 5% of its assets in nonconvertible debt securities rated Baa1 or below and BBB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality. If rating agencies differ, securities will be considered to have received the highest of these ratings. 6. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 7. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund in China A-Shares. 8. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 9. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Emerging Markets, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.

Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	The methodology used in order to calculate the global exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.
Hedged Equivalent Classes	The Fund will aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the Fund back into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Future Generations Global Opportunities Fund (LUX)

Launch Date	27 February 2024
Investment Objective	The Fund seeks to provide long-term growth of capital by investing mainly in Equities issued by companies worldwide, which in the Investment Adviser's opinion contribute positively to environmental and social objectives through their current or future products and/or services.
ESG criteria	- Proprietary eligibility assessment of companies to determine their suitability for the Fund, which includes consideration of the quality of corporate governance practices and any adverse environmental and social impacts. The Investment Adviser also assess how companies are managing material ESG risks. - Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. - Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking - long-term capital growth through investments in global Equities; and - environmental and/or social characteristics as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country
Specific Investment Guidelines and Restrictions	- The Fund may invest in companies whose activities are aligned with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Investments are made in companies contributing positively to these areas such as, but not limited to: (i) health & well-being, (ii) energy transition, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) education & information access, (vi) financial inclusion and (vii) clean water & sanitation. - Investments may also include companies which, in the opinion of the Investment Adviser, are actively transitioning their activities to have higher positive alignment to the UN SDGs, with material near or medium-term change expected. - The Fund commits to maintain at least 60% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes as mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. - Companies must have satisfactory management of ESG risks and good governance practices. - The Investment Adviser applies ESG and norms-based exclusions to implement a negative screening policy at the time of purchase relating to the Fund's investments in companies. To support this implementation, it relies on third party providers who identify a company's participation in or the revenue which they derive from activities that are inconsistent with these exclusions. If exclusions cannot be verified through these third-party providers, the Investment Adviser will aim to identify business involvement activities through its own assessment. The Negative Screening Policy applied by the Investment Adviser can be found at https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf - The Fund may invest up to 30% in Emerging Markets. - The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund in China A Shares. - The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts and index futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - The Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Emerging Markets, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, Sustainability Risks, derivative instruments, securities lending. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group World Growth and Income (LUX)

Launch Date	27 September 2019
Investment Objective	The Fund's investment objective is to provide long-term growth of capital while providing current income. The Fund invests primarily in common stocks of companies located around the world, many of which have the potential to pay dividends.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital growth and income through investments in global Equities.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will invest primarily in Equity securities. 2. The Fund may invest up to 10% of its assets in straight debt securities (i.e., not convertible into equity) rated Baa1 or below and BBB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality. If rating agencies differ, securities will be considered to have received the highest of these ratings. 3. The Fund may invest up to 5% of its assets in straight debt securities (i.e., not convertible into equity) rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality. 4. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 5. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund into China A-Shares. 6. The Fund may invest on the China Interbank Bond Market up to 3% of the net assets of the Fund, either directly or via Bond Connect. 7. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 8. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 9. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Emerging Markets, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, China Interbank Bond Market, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.
Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	The methodology used in order to calculate the global exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.
Hedged Equivalent Classes	The Fund will aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the Fund back into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group World Dividend Growers (LUX)

Launch Date	6 August 2013
Investment Objective	The Fund aims to provide long-term total returns. The Fund will seek to meet this objective by investing primarily in listed Equity securities of companies worldwide that the Investment Adviser believes have the potential to provide combinations of dividend growth and current yield over the long term.
Profile of the typical investor	The Fund is actively managed and designed for investors seeking long-term total returns through investment primarily in Equity securities of companies worldwide.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions". 2. The Fund may invest either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products into China A-Shares on an ancillary basis. 3. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 4. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 5. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group New Economy Fund (LUX)

Launch Date	7 November 2019
Investment Objective	The investment objective of the Fund is long-term growth of capital. The Fund seeks to achieve its objective by investing in securities of companies that can benefit from innovation, exploit new technologies or provide products and services that meet the demands of an evolving global economy. In pursuing its investment objective, the Fund invests primarily in common stocks that the Investment Adviser believes have the potential for growth. The Fund also invests in common stocks with the potential to pay dividends. The Fund may invest a significant portion of its assets in issuers based outside the United States, including those based in developing countries. On an ancillary basis, as described below in the "Specific Investment Guidelines and Restrictions", the Fund may invest into non-convertible debt securities.
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking • long-term capital growth through investments in global Equities; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is generally at least 30% lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 2. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 3. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 4. Companies must have good governance practices. 5. The Fund may invest up to 10% of its assets in nonconvertible debt securities rated Baa1 or below and BBB+ or below by NRSROs designated by the Fund's Investment Adviser or unrated but determined to be of equivalent quality by the Fund's Investment Adviser. If rating agencies differ, securities will be considered to have received the highest of these ratings. 6. The Fund may invest up to 50% of its assets in securities of issuers domiciled outside the United States. In determining the domicile of an issuer, the Fund's Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. 7. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund into China A-Shares. 8. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 9. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Emerging Markets, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.

Capital Group New World Fund (LUX)

Launch Date	28 October 2016
Investment Objective	The Fund's investment objective is long-term capital appreciation. The Fund invests primarily in common stocks of companies with significant exposure to countries with developing economies and/or markets. Many of these countries may be referred to as emerging countries or emerging markets. The Fund may also invest in debt securities of issuers, including issuers of lower rated bonds (rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality), with exposure to these countries.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital appreciation through investments in global Equities.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will generally invest at least 35% of its assets in equity and debt securities of issuers based primarily in qualified countries that have developing economies and/or markets. In determining whether a country is qualified, the Investment Adviser will consider such factors as the country's per capita gross domestic product, the percentage of the country's economy that is industrialized, market capital as a percentage of gross domestic product, the overall regulatory environment, the presence of government regulation limiting or banning foreign ownership, and restrictions on repatriation of initial capital, dividends, interest and/or capital gains. The Investment Adviser will maintain a list of qualified countries and securities in which the Fund may invest. Qualified developing countries in which the Fund may invest currently is available on capitalgroup.com/international. The Fund may also, to a limited extent, invest in securities of issuers based in non-qualified developing countries. 2. The Fund may invest its assets in equity securities of any company, regardless of where it is based (including developed countries), if the Investment Adviser determines that a significant portion of its assets or revenues is attributable to developing countries. 3. The Fund may invest its assets in nonconvertible debt securities, including government bonds and securities rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined to be of equivalent quality, of issuers primarily based in qualified countries with developing economies and/or markets, or of issuers that the Investment Adviser determines have a significant portion of their assets or revenues attributable to developing countries. If rating agencies differ, securities will be considered to have received the highest of these ratings. 4. The Fund may use, whether for hedging and/or efficient portfolio management purposes, interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 5. The Fund may invest up to 3% in distressed securities. 6. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 7. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products into China A-shares on an ancillary basis. 8. The Fund may invest on the China Interbank Bond Market up to 3% of the net assets of the Fund, either directly or via Bond Connect. 9. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Bonds, Emerging Markets, OTC Markets, High Yield Bonds, contingent convertible bonds, derivative instruments, distressed securities, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, China Interbank Bond Market, Bond Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.

Capital Group Emerging Markets Equity Fund (LUX)

Launch Date	31 May 1990 ¹
Investment Objective	The Fund seeks risk diversification, both geographically and by industry sector and long-term capital growth, through investment primarily in common stocks and other equity securities of issuers domiciled in or conducting a predominant part of their economic activities in Emerging Markets. These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors: • seeking long-term capital growth through investment in Emerging Markets securities; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Emerging Markets, including countries that have been designated for investment by the Fund's Investment Advisers as qualified developing countries. Qualified developing countries in which the Fund may invest currently is available on capitalgroup.com/international .
Specific Investment Guidelines and Restrictions	1. Under normal market conditions, the Fund invests at least 90% of its assets in Emerging Markets Equity securities. 2. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is generally at least 30% lower than the Fund's selected index with net dividends reinvested, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI) at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 3. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 4. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 5. Companies must have good governance practices. 6. The Fund may invest up to 10% in securities of issuers that are not in Emerging Markets, but that have at least 75% of their assets in Emerging Markets, or derive or expect to derive at least 75% of their total revenue or profit from goods or services produced in or sales made in Emerging Markets. 7. The Fund may invest up to 10% in securities of issuers in Emerging Markets that are not designated as qualified developing countries. 8. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 10% of the net assets of the Fund into China A-shares. 9. The Fund may invest up to 30% in any one industry. 10. The Fund may, at times, have a more significant exposure to one or several Emerging Markets to better achieve the Fund's investment objective. 11. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 12. The Fund may engage in currency hedging, not exceeding, for each currency, 95% of the value of the Fund's assets denominated in, and/or directly exposed to the risk of, such currency. 13. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 14. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.

¹ Launch date of Capital International Emerging Markets Fund (LUX) as Capital Group standalone Luxembourg SICAV.

Specific Risks	Equities, Emerging Markets, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, OTC Markets, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.	
Investment Advisers	CISA and CII. CISA has responsibility for investing the Fund's assets globally outside of the People's Republic of China and CII has primary responsibility for investing the Fund's assets in the People's Republic of China.	
Base Currency	USD	
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's Portfolio is closed. Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital growth through investment primarily in Equities of issuers domiciled in Asian countries other than Japan.
Eligible Investment Countries	Any country
Specific Investment Guidelines and Restrictions	1. The Fund will invest at least 80% of assets in Equities. 2. The Fund will generally invest at least two-thirds of its assets in Equities of issuers domiciled in Asian countries, including but not limited to the PRC, but other than Japan. In determining the domicile of an issuer, the Fund's Investment Adviser will consider whether an issuer or security is located in or is economically tied to a particular country and the determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account additional factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. 3. The Fund may also invest up to 15% of its assets in Equities of issuers domiciled in Japan or outside of other Asian countries, provided that the Investment Adviser determines that a significant portion of those issuers' assets or revenues are attributable to Asian countries other than Japan or provided that the Investment Adviser believes that current or future exposure to Asian countries other than Japan represents a significant part of those issuers' growth opportunities. 4. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 35% of the net assets of the Fund in China A-Shares. 5. The Fund may invest up to 5% of assets in contingent convertible bonds. 6. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 7. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 8. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Emerging Markets, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, contingent convertible bonds, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group European Opportunities (LUX)

Launch Date	22 February 2021	
Investment Objective	The Fund's investment objective is to provide long-term growth of capital. The Fund invests primarily in Equities of issuers domiciled in Europe.	
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital growth through investment primarily in Equities of issuers domiciled in Europe	
Eligible Investment Countries	Any country in Europe	
Specific Investment Guidelines and Restrictions	- At least 75% of the Fund's assets should be invested in Equities of issuers domiciled in a Member State of the European Union, in a European Economic Area country, in the United Kingdom or Switzerland. In determining the domicile of an issuer, the Fund's Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account such factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. - Up to 10% of the Fund's assets may be invested in securities of issuers domiciled in non-Eligible Investment Countries. - The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. - The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.	
Specific Risks	Equities, European Emerging Markets, contingent convertible bonds, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group European Core Equity Fund (LUX)

Launch Date	30 October 2002
Investment Objective	The Fund aims to achieve long-term capital growth by mainly investing in listed Equities of companies based in developed European countries. In pursuing this objective, the Fund seeks to generate total return through both capital appreciation and income from dividends.
ESG Criteria	- Management of a carbon footprint lower than the Fund's selected index level. - Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. - Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • long-term capital growth and income through investment mainly in Equities of issuers domiciled and/or having their principal place of business in European countries; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any developed country in Europe.
Specific Investment Guidelines and Restrictions	1. Up to 10% of the Fund's assets may be invested in securities of issuers domiciled or having their principal place of business in non-Eligible Investment Countries. 2. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not be lower than the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 3. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 4. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 5. Companies must have good governance practices. 6. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 7. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 8. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group AMCAP Fund (LUX)

Launch Date	16 June 2017
Investment Objective	To provide long-term growth of capital. The Fund invests primarily in Equity of U.S. domiciled companies that have solid long-term growth records and the potential for good future growth. The Fund may invest up to 10% of its assets in Equity and other securities of issuers domiciled outside the United States.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital growth through investments primarily in U.S. domiciled Equities
Eligible Investment Countries	The USA and any other country.
Specific Investment Guidelines and Restrictions	1. The Fund may invest up to 10% of its assets in securities of issuers domiciled outside the United States. In determining the domicile of an issuer, the Investment Adviser will consider whether an issuer or security is located in or is economically tied to a particular country and the determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account additional factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. 2. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 3. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 4. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 5. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, contingent convertible bonds, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.

Capital Group Investment Company of America (LUX)

Launch Date	17 June 2016
Investment Objective	The Fund's investment objectives are to achieve long-term growth of capital and income. The Fund invests primarily in common stocks, most of which have a history of paying dividends. The Fund's equity investments are generally limited to securities of companies that are included on its eligible list. In addition, the Fund may invest up to 5% of its assets, at the time of purchase, in securities of companies that are not included on its eligible list. Securities are added to, or deleted from, the eligible list based upon a number of factors, such as the Fund's investment objectives and policies, whether a company is deemed to be an established company of sufficient quality and a company's dividend payment prospects. Although the Fund focuses on investments in medium to larger capitalization companies, the Fund's investments are not limited to a particular capitalization size. In the selection of common stocks and other securities for investment, potential for capital appreciation and future dividends are given more weight than current yield. The Fund may invest up to 15% of its assets, at the time of purchase, in securities of issuers domiciled outside the United States. On an ancillary basis, as described below in the "Specific Investment Guidelines and Restrictions", the Fund may invest into straight debt securities.
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: - long-term capital growth and income through investments in Equities; and - to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	The USA and other any country
Specific Investment Guidelines and Restrictions	1. The Fund's investments in straight debt securities (i.e., not convertible into equity) will generally consist of investment grade securities. The Fund may, however, invest up to 5% of its total net assets in straight debt securities rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined to be of equivalent quality by the Investment Adviser. If rating agencies differ, securities will be considered to have received the highest of these ratings. 2. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not be lower than the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 3. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 4. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 5. Companies must have good governance practices. 6. The Fund may invest up to 15% of its total net assets in issuers domiciled outside the United States. In determining the domicile of an issuer, the Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. 7. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 8. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 9. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, contingent convertible bonds, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.

Capital Group Capital Income Builder (LUX)

Launch Date	21 September 2018
Investment Objective	To provide a level of current income that exceeds the average yield on U.S. stocks generally and to provide a growing stream of income over the years, expressed in USD, as the Fund's primary objectives. The Fund's secondary objective is to provide growth of capital. The Fund invests primarily in a broad range of income-producing securities, including common stocks and bonds. The Fund may also invest significantly in common stocks, bonds and other securities of issuers domiciled outside the United States.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital growth and income through investments in Equities and Bonds.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will generally invest at least 90% of its assets in income-producing securities. 2. The Fund will invest primarily in Equity securities. 3. In addition, the Fund may invest in Bonds and other debt securities of any maturity or duration, including securities issued and guaranteed by the U.S. government, securities issued by federal agencies and instrumentalities and securities backed by mortgages or other assets. 4. The Fund may invest up to 5% of its assets in straight debt securities (i.e., debt securities that do not have equity conversion or purchase rights) rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser, or unrated but determined by the Investment Adviser to be of equivalent quality. If rating agencies differ, securities will be considered to have received the highest of these ratings. 5. The Fund may invest up to 50% of its assets in securities of issuers domiciled outside the United States. In determining the domicile of an issuer, the Investment adviser will consider whether an issuer or security is located in or is economically tied to a particular country and the determination of a leading provider of global indexes, such as Morgan Stanley Capital International, and may also take into account additional factors such as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. 6. The Fund may invest in ABS/MBS which will not exceed 20% of the net assets of the Fund. 7. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 8. Up to 5% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 9. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 10. The Fund may invest up to 5% in distressed securities. 11. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund into China A-Shares. 12. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 13. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equity, Bonds, Emerging Markets, derivatives instruments, OTC Markets, ABS/MBS, contingent convertible bonds, distressed securities, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.
Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	The methodology used in order to calculate the global exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.
Hedged Equivalent Classes	The Fund will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant Class's designation. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international .

Capital Group Global Allocation Fund (LUX)

Launch Date	31 January 2014
Investment Objective	The Fund seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income. The Fund will seek to meet these objectives by investing worldwide primarily in listed Equities and Bonds of companies and governments and other fixed-income securities including mortgage and asset backed securities, denominated in various currencies. These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the General Investment Guidelines and Restrictions.
ESG criteria	- For the Equity portion of the Fund only: management of a carbon footprint lower than the Fund's selected index level - Implementation of a Negative Screening Policy relating to the Fund's investments in corporate and sovereign issuers. - Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: - long-term total returns from diversified worldwide investments in Equities and Bonds; and - to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	- In general, the Fund will seek to invest at least 45% of its total net assets in Equity. - In general, the Fund will seek to invest at least 25% of its total net assets in Investment Grade Bonds (including money market instruments). - For its Equity portion, the Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Equity portion of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. - The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. - Companies must have good governance practices. - The Fund may invest in ABS/MBS which will not exceed 15% of the net assets of the Fund. - The Fund may invest up to 2% in distressed securities. - The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 5% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. - The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. - The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, into China A-Shares on an ancillary basis. - The Fund may invest on the China Interbank Bond Market up to 5% of the net assets of the Fund, either directly or via Bond Connect. - In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Bonds, Emerging Markets, OTC Markets, derivative instruments, ABS/MBS, distressed securities, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect,

	China Interbank Bond Market, Bond Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group Future Generations Global Balanced Fund (LUX)

Launch Date	27 February 2024
Investment Objective	The Fund seeks long-term growth of capital and conservation of principal through investment in Equities and Bonds issued by companies worldwide, which in the Investment Adviser's opinion contribute positively to environmental and social objectives through their current or future products and/or services. The Fund also invests in other fixed-income securities, including government bonds, which meet the Investment Adviser's proprietary eligibility criteria.
ESG criteria	- Proprietary eligibility assessment of companies to determine their suitability for the Fund, which includes consideration of the quality of corporate governance practices and any adverse environmental and social impacts. The Investment Adviser also assess how companies are managing material ESG risks. - Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. - Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking - long-term growth of capital from diversified worldwide investments in Equities and Bonds; and - environmental and/or social characteristics as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	- The Fund may invest in companies whose activities are aligned with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Investments are made in companies contributing positively to these areas such as, but not limited to: (i) health & well-being, (ii) energy transition, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) education & information access, (vi) financial inclusion and (vii) clean water & sanitation. - Investments may also include companies which, in the opinion of the Investment Adviser, are actively transitioning their activities to have higher positive alignment to the UN SDGs, with material near or medium-term change expected. - The Fund commits to maintain at least 40% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes as mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. - Companies must have satisfactory management of ESG risks and good governance practices. - The Investment Adviser's proprietary process for assessing investment in sovereigns covers a range of ESG indicators to evaluate how well a country manages its ESG risk. - The Investment Adviser applies ESG and norms-based exclusions to implement a negative screening policy at the time of purchase relating to the Fund's investments in companies. To support this implementation, it relies on third party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these exclusions. If exclusions cannot be verified through these third-party providers, the Investment Adviser will aim to identify business involvement activities through its own assessment. For sovereign issuers, exclusions are based on the Investment Adviser's proprietary framework. The Negative Screening Policy applied by the Investment Adviser can be found at https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf - In general, the Fund will seek to invest at least 45% of its total net assets in Equity. - In general, the Fund will seek to invest at least 25% of its total net assets in Investment Grade Bonds (including money market instruments). - The Fund may invest up to 30% in Emerging Markets. - The Fund may invest in ABS/MBS which will not exceed 15% of the net assets of the Fund. - The Fund may invest up to 2% in distressed securities. - The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 5% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details on the features and relevant risk factors involved. - The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. - The Fund may invest either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, into China A Shares on an ancillary basis. - The Fund may invest on the China Interbank Bond Market up to 5% of the net assets of the Fund, either directly or via Bond Connect.

	17. The Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 18. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.	
Specific Risks	Equities, Bonds, Emerging Markets, OTC Markets, derivative instruments, ABS/MBS, distressed securities, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, China Interbank Bond Market, Bond Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex I.

Capital Group American Balanced Fund (LUX)

Launch Date	27 July 2021
Investment Objective	The Fund seeks the balanced accomplishment of three objectives: conservation of capital, current income and long-term growth of capital and income. The Fund uses a balanced approach to invest in a broad range of securities primarily domiciled in the United States, including common stocks and Investment Grade Bonds.
ESG Criteria	- For the Equity portion of the Fund only: management of a carbon footprint lower than the Fund's selected index level; - Implementation of a Negative Screening Policy relating to the Fund's investments in corporate and sovereign issuers; - Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: - long-term total returns from diversified investments in Equities and Bonds, including in particular securities of issuers domiciled in the United States; and - to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	The USA and any other country
Specific Investment Guidelines and Restrictions	- In general, the Fund will seek to invest at least 50% of its total net assets in Equities. - For its Equity portion, the Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index (net dividends reinvested), as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Equity portion of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. - In general, the Fund will seek to invest at least 25% of its total net assets in debt securities (including money market instruments) generally rated Baa3 or better or BBB- or better by NRSROs designated by the Fund's Investment Adviser, or in unrated securities determined by the Investment Adviser to be of equivalent quality. The Fund currently intends to look to the ratings from Moody's Investors Service, Standard & Poor's Ratings Services and Fitch Ratings. If rating agencies differ, securities will be considered to have received the highest of these ratings, consistent with the Fund's investment policies. - The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. - The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. - Companies must have good governance practices. - The Fund may invest in ABS/MBS which will not exceed 20% of the net assets of the Fund. - The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 5% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. - The Fund may invest up to 20% of its assets in securities of issuers domiciled outside the United States which may include up to 5% in Emerging Markets. In determining the domicile of an issuer, the Fund's Investment Adviser will generally look to the domicile determination of a leading provider of global indexes, such as Morgan Stanley Capital International. However, the Investment Adviser in its discretion also may take into account such factors as where the issuer's securities are listed and where the issuer is legally organized, maintains principal corporate offices, conducts its principal operations, generates revenues and/or has credit risk exposure. - The Fund may invest, either directly via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund into China A-Shares. - The Fund may invest on the China Interbank Bond Market up to 5% of the net assets of the Fund, either directly or via Bond Connect.

	13. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 14. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.	
Specific Risks	Equities, Bonds, OTC Markets, derivative instruments, ABS/MBS, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, China Interbank Bond Market, Bond Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.	
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.

Class U1 Shares and Shares of Equivalent Classes Specific Provisions

Initial Offer Period: Class U1 Shares and Shares of Equivalent Classes are only offered and available during a limited period specified in the Singapore Offering Documents available at capitalgroup.com/international (the "Initial Offer Period"), allowing investors to subscribe prior to launch of the Class U1 Shares and Shares of Equivalent Classes. Please refer to the section "Initial Offer Period" for further details on subscription procedures applicable to Shares offered during an Initial Offer Period. For further details on subscription procedures, please refer to the section titled "Issue of Shares".

The Management Company may, at its sole discretion, shorten or extend the Initial Offer Period. Class U1 Shares and Shares of Equivalent Classes will be issued for the first time on the Valuation Date following the close of the Initial Offer Period.

At the end of the Initial Offer Period, the Management Company may decide, in the best interests of the Shareholders and at its sole discretion, not to proceed with the launch of the Class U1 Shares and Shares of Equivalent Classes. Under those circumstances, any subscription amounts received will be returned to applicants without interest, in the relevant currency and as soon as reasonably practicable, at the applicant's expense and risk. Applicants will be duly informed of any such decision.

Compulsory Switches: After the third anniversary following the end of the Initial Offer Period (as specified in the Singapore Offering Documents), Class U1 Shares and Shares of Equivalent Classes are automatically switched free of charge, fee and minimum investment amount into Shares of Class BL and Shares of Equivalent Classes. This automatic switch will be executed at the Net Asset Value of the relevant Class on the applicable Valuation Date at the switch date, or on the next Valuation Date if the third anniversary following the end of the Initial Offer Period is not a Valuation Date. No sales charge, fee or minimum investment amount will apply to the switch into Class BL and Equivalent Classes. Such a switch is deemed a sale for this purpose and may trigger tax consequences. Investors are advised to consult their tax adviser to assess the implications based on their individual circumstances. Class U1 Shares and Shares of Equivalent Classes may not be suitable for investors intending to redeem their investment partially or fully, within three years from the end of the Initial Offer Period.

Switches from other Funds into Shares of Class U1 and Shares of Equivalent Classes of Capital Group American Balanced Fund (LUX) are not allowed, unless otherwise agreed with the Management Company.

Redemption Charge: Shareholders switching to another Class or Fund or redeeming their Class U1 Shares and Shares of Equivalent Classes within three years from the end of the Initial Offer Period (specified in the Singapore Offering Documents) are subject to a Redemption Charge calculated in accordance with the methodology set out in section "Redemption Charge". The applicable rates are as follows:

Redemption or switch at any time within:

- First anniversary from the end of the Initial Offer Period (inclusive): 3.00%
- After the first anniversary, and within the second anniversary from the end of the Initial Offer Period (inclusive): 2.00%
- After the second anniversary, and within the third anniversary from the end of the Initial Offer Period (inclusive): 1.00%
- After the third anniversary of the end of the Initial Offer Period: 0.00%

Please refer to the Singapore Offering Documents, available at capitalgroup.com/international, for the exact dates.

For the avoidance of doubt, no Redemption Charge will be applied in the context of the compulsory switch as further detailed above.

Capital Group Emerging Markets Total Opportunities (LUX)

Launch Date	1 February 2008 ¹
Investment Objective	Long-term growth and preservation of capital with lower volatility of returns than Emerging Markets Equities by investing primarily in Investment Grade and High Yield Bonds (both corporates and sovereigns), Equity, hybrid securities and short-term instruments normally listed or traded on other Regulated Markets of issuers in Eligible Investment Countries. Securities of Emerging Markets issuers are defined as those: (1) from issuers in Emerging Markets; (2) primarily traded in Emerging Markets; (3) that are denominated in Emerging Markets currencies; or (4) that are from issuers deemed to be suitable for the Fund because they have or are expected to have significant economic exposure to Emerging Markets (through assets, revenues, or profits). Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors who are seeking equity-like returns, with a volatility lower than that of a traditional emerging market equity fund.
Eligible Investment Countries	Emerging Markets; countries rated Ba or lower or BB or lower by a nationally recognized statistical rating organization; and countries that are on an International Monetary Fund ("IMF") program, have outstanding liabilities to the IMF, or have exited an IMF program no more than 5 years earlier.
Specific Investment Guidelines and Restrictions	1. The Fund may invest up to 10% of its assets in securities of issuers which are not Emerging Markets Issuers. Notwithstanding the above 10% limit, the Fund may invest in debt instruments from issuers such as the US Treasury or other sovereign issuers that, in the opinion of the Investment Adviser, are of equivalent or higher quality, without being considered as securities of issuers from countries other than Eligible Investment Countries. 2. The Fund may invest in ABS/MBS which will not exceed 10% of the net assets of the Fund. 3. The Fund may invest up to 10% in distressed securities 4. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 5. Up to 5% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 6. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 7. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, into China A-Shares on an ancillary basis. 8. The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. 9. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Equities, Emerging Markets, derivative instruments, OTC Markets, distressed securities, High Yield Bonds, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, China Interbank Bond Market, Bond Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC
Investment Sub-Adviser	CISA
Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	The methodology used in order to calculate the global exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.
Hedged Equivalent Classes	For SGD and JPY Hedged Classes: The Class will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant Class's designation.

¹ Launch date of Capital Group Emerging Markets Total Opportunities (LUX) in Capital International Portfolios, a former Luxembourg UCITS of the Capital Group.

For the other Hedged Classes:

The Class will aim at hedging 50% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD) into the currency referred to in the relevant Class's designation. At times, and for exceptional periods, a different ratio may be applied in order for the Class to achieve the objectives of the Fund, but it will be no less than 25% and no more than 75%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Global Bond Fund (LUX)

Launch Date	3 April 1998 ¹
Investment Objective	To provide, over the long term, a high level of total return consistent with prudent investment management. The Fund invests worldwide primarily in Investment Grade Bonds of governmental, supranational and corporate issuers and in other fixed income securities including mortgage and asset backed securities, denominated in various currencies. The types of mortgage backed securities in which the Fund may invest are CMBS, CMO, RMBS and TBA contracts. These are usually listed or traded on other Regulated Markets. Unlisted Investment Grade Bonds may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • current income and the potential for higher returns than cash through investment primarily in global Investment Grade Bonds; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 2. Companies must have good governance practices. 3. High Yield Bonds will not be considered Eligible Assets. If an Investment Grade Bond is downgraded to a High Yield Bond, such bond must be realised within six months from its downgrading, taking account of the interests of Shareholders. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. 4. The Fund may invest in MBS/ABS which will not exceed 40% of the net assets of the Fund. The types of MBS in which the Fund may invest are CMBS, CMO, RMBS and TBA contracts. 5. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 6. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 7. The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. 8. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Emerging Markets, ABS/MBS, derivative instruments, OTC Markets, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC
Investment Sub-Adviser	CISA
Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	Relative VaR approach using Bloomberg Global Aggregate Bond Total Return index as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser

¹ Launch date of Capital International Global Bond Fund, which merged into CIF Global Bond Fund on 6 September 2002.

	is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1 under "Risk management and monitoring of financial derivatives instruments", and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	200% The Fund's level of leverage is expected to be 200% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	In order to preserve the active currency decisions in the Fund's Portfolio, the Fund will aim at hedging with a reasonable margin of tolerance the main currency exposures of the Fund's investment universe (represented by a relevant representative index) back into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Global Intermediate Bond Fund (LUX)

Launch Date	13 October 2016
Investment Objective	To preserve capital and provide income consistent with prudent investment management. The Fund aims to hold high-quality global bonds in a portfolio with an average maturity of between three and seven years. The Fund invests worldwide primarily in Bonds of governmental, supranational and corporate issuers and in other fixed income securities including mortgage and asset backed securities, denominated in various currencies. These Bonds will be Investment Grade at the time of purchase. The types of mortgage backed securities in which the Fund may invest are CMBS, CMO, RMBS and TBA contracts. These are usually listed or traded on other Regulated Markets. Unlisted Investment Grade Bonds may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking current income with the potential for higher returns than cash, through investment primarily in global Investment Grade Bonds of moderate duration.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	- Investment in Bonds will be limited to Investment Grade Bonds. Securities that fail to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser) must be sold within six months, taking into account the interests of Shareholders. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. - The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. - The Fund may invest in ABS/MBS which will not exceed 40% of the net assets of the Fund. The types of MBS in which the Fund may invest are CMBS, CMO, RMBS and TBA contracts. - The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Emerging Markets, derivative instruments, OTC Markets, ABS/MBS, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group Global Total Return Bond Fund (LUX)

Launch Date	17 September 2020
Investment Objective	The Fund's investment objective is to maximise total return over the long term. The Fund invests worldwide primarily in Investment Grade Bonds. The Fund also invests in High Yield Bonds and in other fixed income securities including mortgage- and asset-backed securities. These Bonds will be Bonds of governmental, supranational and corporate issuers denominated in various currencies. The types of mortgage backed securities in which the Fund may invest are Commercial Mortgage-Backed Securities ("CMBS"), Collateralised Mortgage Obligations ("CMO"), Residential Mortgage-Backed Securities ("RMBS") and To Be Announced Securities ("TBA") contracts. The types of asset backed securities in which the Fund may invest include securities backed by loans, leases or receivables, Collateralised Debt Obligations ("CDO") and Collateralised Loan Obligations ("CLO"). The proportion of securities held by the Fund within each of the credit sectors will vary with market conditions and the Investment Adviser's assessment of their relative attractiveness as investment opportunities. These are usually listed or traded on other Regulated Markets. Unlisted Bonds may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions". The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management.
ESG criteria	Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: - to maximize total return through investment primarily in global Investment Grade Bonds and comfortable with volatility commensurate with a broad global Investment Grade Bond exposure. The Fund also invests in High Yield Bonds and in other fixed income securities including mortgage- and asset-backed securities; and - to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country
Specific Investment Guidelines and Restrictions	- The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. - Companies must have good governance practices. - The Fund will seek to invest at least 50% of its total net assets in Investment Grade Bonds directly or through the use of financial derivative instruments. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. - The Fund may hold distressed securities (which the Investment Adviser(s) define(s) as having a credit rating lower than CCC- by Standard & Poor's or equivalent), as a result of a rating downgrade. Distressed securities shall not exceed 10% in total of the net assets of the Fund. If a security satisfies the Fund's credit rating criteria at the time of purchase and subsequently is downgraded to a rating which would result in the security being classified as a "distressed security", the Investment Adviser(s) will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective and the Fund will not be required to dispose of such security. - The Fund may invest in ABS/MBS which will not exceed 40% of the net assets of the Fund. Such securities often involve risks that are different from or more acute than the risks associated with investing in other types of debt securities such as government issued bonds. MBS and ABS are typically composed of multiple tranches, usually spanning from the equity tranche, which represents the highest risk, to the senior tranche, which represents the lowest risk. The performance of each tranche is determined by the performance of the underlying assets which may include loans, leases or receivables. The Fund will only invest in the senior and mezzanine tranches. The types of MBS in which the Fund may invest are CMBS, CMO, RMBS and TBA contracts. The Fund will generally invest in Investment Grade MBS, such as commercial and residential mortgage securities issued typically by US government agencies and government sponsored entities, as well as by private entities. The types of ABS in which the Fund may invest include securities backed by loans, leases or receivables, CDO and CLO. CDO and CLO together will not exceed 10% of the net assets of the Fund. The Fund will generally invest in Investment Grade ABS, with underlying assets such as credit card receivables and consumer loans, typically issued by financial institutions. - The percentages of ABS/MBS and distressed securities may in total account for up to 50% of the net assets of the Fund. The proportion of securities may vary depending on market conditions which fluctuate, sometimes rapidly or unpredictably, due to various factors, including events or conditions

	affecting the general economy or particular industries; overall market changes; local, regional or global political, social or economic instability; governmental, governmental agency or central bank responses to economic conditions; and currency exchange rate, interest rate and commodity price fluctuations as well as the Investment Adviser's assessment of their relative attractiveness as investment opportunities. 7. The Fund may use, whether for investment purposes, hedging and/or efficient portfolio management, certain type of derivatives including interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 8. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 9. The Fund may invest up to 10% in Equity and contingent convertible bonds. 10. The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. 11. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.	
Specific Risks	Bonds, High Yield Bonds, ABS/MBS, contingent convertible bonds, derivative instruments, Emerging Markets, OTC Markets, distressed securities, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.	
Investment Adviser	CRMC	
Investment Sub-Adviser	CISA	
Base Currency	USD	
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)	
Calculation method of the risk exposure	The methodology used in order to calculate the global exposure resulting from the use of financial derivative instruments is the absolute Value-at-Risk methodology ("VaR"). The VaR methodology seeks to estimate the potential loss that the Fund could experience under normal market conditions, by using historical data, it calculates based on/ using the one-tailed 99% confidence interval and one month measurement period (20 Business Days) for the purposes of carrying out this calculation. Further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	400% The Fund's level of leverage, which may vary over time, is expected to be less than 400% of the net assets of the Fund. Under certain market circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage. The leverage figure is calculated using the sum of the notionals of the derivatives used by the Fund as is required by UCITS regulations and as such does not take into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. The Company's annual report will provide the actual level of leverage over the past period.	
Hedged Equivalent Classes	In order to preserve the active currency decisions in the Fund's portfolio, the Fund will aim at hedging with a reasonable margin of tolerance the main currency exposures of the Fund's investment universe (represented by a relevant representative index) back into the currency referred to in the Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international .

Capital Group Euro Bond Fund (LUX)

Launch Date	31 October 2003
Investment Objective	To maximize total return through a combination of income and capital gains, with a view towards preservation of capital. The Fund invests primarily in EUR-denominated Investment Grade Bonds of governmental, supranational and corporate issuers and in other fixed income securities. These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	- Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. - Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: - to maximize total return through investment primarily in EUR-denominated Bonds (of a credit rating no lower than B- by S&P and/or Fitch, and/or B3 by Moody's); and - to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	- The Fund will seek to invest at least 80% of its total net assets in Bonds rated Investment Grade at the time of purchase. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. - The Fund will not invest in Bonds of a rating lower than B- by S&P and/or Fitch, and/or B3 by Moody's or unrated bonds deemed to be of equivalent standing by the Investment Adviser. - The Fund will seek to invest at least two thirds of its total net assets in securities of issuers located in countries of the European Monetary Union. - The overall Portfolio exposure to the Euro currency will be at least equal to 90% of the value of the net assets of the Fund. - The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The negative screening policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf - Companies must have good governance practices. - The Fund commits to maintain at least 5% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. - The Fund may invest in ABS/MBS, credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 20% of the net assets of the Fund and provided that the issuer is either located in a member state of the OECD or an European Economic Area country and/or the assets are admitted to trading on or included in a Regulated Market. - The Fund may use derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDS, CDXs, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, ABS/MBS, derivative instruments, High Yield Bonds, OTC Markets, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC
Investment Sub-Adviser	CISA
Base Currency	EUR
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	Relative VaR approach using Bloomberg Euro Aggregate Bond Total Return index as the appropriate reference portfolio.

	The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1 under "Risk management and monitoring of financial derivatives instruments", and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	100% The Fund's level of leverage is expected to be 100% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	The Fund will aim at hedging, with a reasonable margin of tolerance, the main currency exposures of the Fund back into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Global Corporate Bond Fund (LUX)

Launch Date	13 February 2018
Investment Objective	To provide, over the long term, a high level of total return consistent with capital preservation and prudent risk management. The Fund invests worldwide primarily in corporate Investment Grade Bonds. These Bonds will be Investment Grade at the time of purchase. These are usually listed or traded on other Regulated Markets. Unlisted securities and other fixed-income securities, including government securities, may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • high level of current income and the potential for higher returns than cash through investment primarily in corporate Investment Grade Bonds; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will seek to invest at least 80% of its total net assets in corporate Bonds. Investment in Bonds will be limited to Investment Grade Bonds. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. Securities that fail to maintain an Investment Grade Bonds rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser) must be sold within three months, taking into account the interests of Shareholders. 2. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index hedged to USD, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not be lower than the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 3. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 4. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 5. Companies must have good governance practices. 6. The Fund may invest in ABS/MBS, credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 10% of the net assets of the Fund and provided that the issuer is either located in a member state of the OECD or an European Economic Area country and/or the assets are admitted to trading on or included in a Regulated Market. 7. The Fund may use derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 8. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 9. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Emerging Markets, derivative instruments, OTC Markets, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC
Investment sub-Adviser	CISA

	CISA, when managing the Fund, considers environmental, social and governance (ESG) issues alongside financial and economic indicators in its fundamental research and analysis of companies. CISA performs an internal ESG norms-based screening using the United Nations Global Compact (https://www.unglobalcompact.org/what-is-gc/mission/principles) for identifying companies in breach of these internationally recognized norms, as an intrinsic part of its investment process. CISA bases its decisions to buy or to sell securities on financial and economic indicators and uses the above norms-based ESG screening as an additional non-binding input in our forward looking assessment.	
Base Currency	USD	
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)	
Calculation method of the risk exposure	Relative VaR approach using Bloomberg Global Aggregate Corporate Total Return Index hedged to USD as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Capital Group Future Generations Global Corporate Bond Fund (LUX)

Launch Date	27 February 2024
Investment Objective	The Fund seeks to provide, over the long term, a high level of total return (a combination of capital growth and income) by investing primarily in corporate Investment Grade Bonds issued by companies worldwide, which in the Investment Adviser's opinion contribute positively to environmental and social objectives through their current or future products and/or services.
ESG criteria	- Proprietary eligibility assessment of companies to determine their suitability for the Fund, which includes consideration of the quality of corporate governance practices and any adverse environmental and social impacts. The Investment Adviser also assess how companies are managing material ESG risks. - Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking - high level of total return through investment primarily in corporate Investment Grade Bonds; and - environmental and/or social characteristics as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	- The Fund may invest in companies whose activities are aligned with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Investments are made in companies, contributing positively to these areas such as, but not limited to: (i) health & well-being, (ii) energy transition, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) education & information access, (vi) financial inclusion and (vii) clean water & sanitation. - Investments may also include companies which, in the opinion of the Investment Adviser, are actively transitioning their activities to have higher positive alignment to the UN SDGs, with material near or medium-term change expected. - The Fund commits to maintain at least 60% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes as mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. - Companies must have satisfactory management of ESG risks and good governance practices. - The Investment Adviser applies ESG and norms-based exclusions to implement a negative screening policy at the time of purchase relating to the Fund's investments in companies. To support this implementation, it relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these exclusions. If exclusions cannot be verified through these third-party providers, the Investment Adviser will aim to identify business involvement activities through its own assessment. The Negative Screening Policy applied by the Investment Adviser can be found at https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. - The Fund will seek to invest at least 80% of its total net assets in corporate Bonds. Investment in Bonds will be limited to Investment Grade Bonds. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. Securities that fail to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser) must be sold within three months, taking into account the interests of Shareholders. - The Fund may invest up to 20% in Emerging Markets. - The Fund may invest in ABS/MBS, credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 10% of the net assets of the Fund and provided that the issuer is either located in a member state of the OECD or a European Economic Area country and/or the assets are admitted to trading on or included in a Regulated Market. - The Fund may use derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, derivative instruments, OTC Markets, Emerging Markets, ABS/MBS, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex I.

Capital Group US Corporate Bond Fund (LUX)

Launch Date	21 March 2017
Investment Objective	To provide, over the long term, a high level of total return consistent with capital preservation and prudent risk management. The Fund invests primarily in USD-denominated corporate Investment Grade Bonds. These Bonds will be Investment Grade at the time of purchase. These are usually listed or traded on other Regulated Markets. Unlisted securities and other fixed-income securities, including government securities, may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • high level of current income and the potential for higher returns than cash through investment primarily in USD-denominated corporate Investment Grade Bonds; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will seek to invest at least 80% of its total net assets in corporate Bonds. Investment in Bonds will be limited to Investment Grade Bonds. Securities that fail to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser) must be sold within six months, taking into account the interests of Shareholders. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. 2. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 3. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 4. The Fund commits to maintain at least 10% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 5. Companies must have good governance practices. 6. All securities held by the Fund will be denominated in USD. 7. The Fund may invest in ABS/MBS, credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 10% of the net assets of the Fund and provided that the issuer is either located in a member state of the OECD or an European Economic Area country and/or the assets are admitted to trading on or included in a Regulated Market. 8. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 9. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, ABS/MBS, derivative instruments, OTC Markets, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC
Investment Sub-Adviser	CISA

	CISA, when managing the Fund, considers environmental, social and governance (ESG) issues alongside financial and economic indicators in its fundamental research and analysis of companies. CISA performs an internal ESG norms-based screening using the United Nations Global Compact (https://www.unglobalcompact.org/what-is-gc/mission/principles) for flagging companies in breach of these internationally recognized norms, as an intrinsic part of its investment process. CISA bases its decisions to buy or to sell securities on financial and economic indicators and uses the above norms-based ESG screening as an additional non-binding input in our forward looking assessment.	
Base Currency	USD	
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)	
Calculation method of the risk exposure	Relative VaR approach using Bloomberg U.S. Corporate Investment Grade index as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1 under "Risk management and monitoring of financial derivatives instruments", and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	75% The Fund's level of leverage is expected to be 75% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	The Fund will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD into the currency referred to in the relevant Class's designation. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Global High Income Opportunities (LUX)

Launch Date	7 May 1999 ¹
Investment Objective	To provide, over the long term, a high level of total return, of which a large component is current income. The Fund invests primarily in Emerging Market Bonds and corporate High Yield Bonds from around the world, denominated in USD and various national currencies (including Emerging Markets currencies). These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level. • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • the potential for higher returns than traditional fixed income with less volatility than equities through investment primarily in corporate High Yield Bonds and government Bonds of Emerging Markets; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will invest primarily in Bonds. 2. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4, and which will only apply to Equities and corporate Bonds. It will not apply to sovereign issuers. Should the WACI of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 3. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf 4. Companies must have good governance practices. 5. In general, the Fund will seek to have not more than 10% of its total net assets invested in hybrid securities (i.e. fixed-income securities convertible into equity or preferred shares), or equity securities. 6. The Fund may invest up to 10% in distressed securities. 7. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 8. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 9. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 10. The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. 11. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, High Yield Bonds, contingent convertible bonds, derivative instruments, Emerging Markets, OTC Markets, distressed securities, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1. The Fund is intended only for long-term investors. Withdrawals from the Fund during periods of volatility in the markets in which the Fund invests will adversely affect all Shareholders.
Investment Adviser	CRMC
Investment Sub-Adviser	CISA
Base Currency	USD

¹ Launch date of Capital International Global High Yield Fund, which merged into Capital International Global High Income Opportunities on 6 September 2002.

Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)	
Calculation method of the risk exposure	Relative VaR approach using 50% Bloomberg US Corporate High Yield 2% Issuer Capped Total Return, 20% JPMorgan EMBI Global Total Return, 20% JPM GBI-EM Global Diversified Total Return and 10% JPM CEMBI Broad Diversified Total Return index as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1 under "Risk management and monitoring of financial derivatives instruments", and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	75% The Fund's level of leverage is expected to be 75% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	The Fund will aim at hedging, with a reasonable margin of tolerance, its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Multi-Sector Income Fund (LUX)

Launch Date	29 November 2022
Investment Objective	The Fund's investment objective is to provide a high level of current income. Its secondary investment objective is capital appreciation. In pursuing its investment objective, the Fund invests generally in corporate High Yield Bonds, corporate Investment Grade Bonds, Emerging Market Bonds and mortgage and asset backed securities. The proportion of securities held by the Fund within each of these sectors will vary with market conditions and the Investment Adviser's assessment of their relative attractiveness as investment opportunities. The Fund may opportunistically invest in other sectors, including, but not limited to, U.S. government debt, municipal debt and non-corporate credit, in response to market conditions. In addition to the integration of Sustainability Risks as part of the Investment Adviser's investment decision-making process, the Fund also promotes environmental and/or social characteristics through the application of the following binding processes.
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level. • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. • Commitment to make sustainable investments contributing to environmental or social objectives. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking • a higher level of current income with the potential for higher returns through investment primarily in corporate High Yield Bonds, corporate investment grade bonds, securitised bonds and Emerging Markets Bonds; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will invest at least 80% of its assets in Bonds and other debt instruments, securities with equity and fixed income characteristics (such as bonds with warrants attached, convertible bonds, hybrids and certain preferred securities), cash equivalents (as defined in item 14 below), mortgage and asset backed securities, and other fixed income obligations of banks, corporations and governmental authorities. 2. The Fund may invest up to 80% of its assets in High Yield Bonds rated Ba1 or below and BB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality. If rating agencies differ, securities will be considered to have received the highest of these ratings. 3. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4. Should the WACI of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 4. The Investment Adviser evaluates and applies ESG and norms-based screening to implement negative screens at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, for sovereign issuers, the Investment Adviser relies on the use of proprietary ESG framework. For corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied by the Investment Adviser can be found on https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 5. The Fund commits to maintain at least 5% in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. 6. Companies must have good governance practices. 7. The Fund may invest up to 30% in Emerging Markets Bonds. 8. The Fund may invest up to 10% in distressed securities. 9. The Fund may invest in ABS/MBS which will not exceed 20% of the net assets of the Fund. 10. The Fund may invest in Equity, perpetual bonds and contingent convertible bonds which will not exceed in total 10% of the net assets of the Fund. 11. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX Options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 12. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 13. The Fund may invest on the China Interbank Bond Market up to 10% of the net assets of the Fund, either directly or via Bond Connect.

	14. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in cash equivalent, meaning deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.	
Specific Risks	Bonds, High Yield Bonds, Emerging Markets, ABS/MBS, distressed securities, contingent convertible bonds, derivative instruments, OTC Markets, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.	
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors related to the Fund specificities. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.	
Base Currency	USD	
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)	
Calculation method of the risk exposure	Relative VaR approach using 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg Non-Agency CMBS Ex AAA Index, 2% Bloomberg ABS Ex AAA Index as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objective. The use of the above indexes is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1, and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	300% The Fund's level of leverage is expected to be 300% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	The Fund will aim at hedging, with a reasonable margin of tolerance, its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. Capital Group US High Yield Fund (LUX)

Launch Date	30 October 2017
Investment Objective	To provide, over the long term, a high level of total return largely comprised of current income. The secondary investment objective of the Fund is capital appreciation. The Fund invests primarily in USD-denominated corporate High Yield Bonds. These are usually listed or traded on other Regulated Markets. Unlisted securities and other fixed-income securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	• Management of a carbon footprint lower than the Fund's selected index level. • Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking: • high level of current income through investment primarily in USD-denominated corporate High Yield Bonds; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. The Fund will seek to invest at least 75% of its total net assets in USD-denominated corporate High Yield Bonds. 2. The overall Portfolio exposure to the USD currency will generally be at least equal to 90% of the value of the net assets of the Fund. 3. The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in the Fund's pre-contractual information found in Annex 4, and which will only apply to Equities and corporate Bonds. It will not apply to sovereign issuers. Should the WACI of the Fund not be lower than the level of the Fund's selected index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. 4. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on the https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 5. Companies must have good governance practices. 6. The Fund may invest up to maximum 10% in Emerging Markets corporate Bonds. 7. The Fund may invest in ABS/MBS which will not exceed 10% of the net assets of the Fund. 8. The Fund may invest up to 10% in distressed securities. 9. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 10. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 11. The Fund may invest up to 10% in Equity and contingent convertible bonds. 12. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Emerging Markets, derivative instruments, distressed securities, OTC Markets, High Yield Bonds, contingent convertible bonds, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

Capital Group Emerging Markets Debt Fund (LUX)

Launch Date	24 July 2007 ¹
Investment Objective	To provide, over the long term, a high level of total return, of which a large component is current income. The Fund invests primarily in government and corporate Bonds, denominated in various currencies, of issuers in Eligible Investment Countries. Securities of Emerging Markets issuers are defined as those: (1) from issuers in Emerging Markets; (2) that are denominated in Emerging Markets currencies; or (3) that are from issuers deemed to be suitable for the Fund because they have or are expected to have significant economic exposure to Emerging Markets (through assets, revenues, or profits). These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors who are seeking: - current income and the potential for long-term high total returns through investment primarily in Emerging Markets government and corporate Bonds and understand and accept the high level of risks associated with such an investment, and - to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Emerging Markets; countries rated Ba or lower or BB or lower by a nationally recognized statistical rating organization; and countries that are on an International Monetary Fund ("IMF") program, have outstanding liabilities to the IMF, or have exited an IMF program no more than 5 years earlier.
Specific Investment Guidelines and Restrictions	- The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. - The Fund may invest up to 10% in distressed securities. - The Fund may invest up to 10% of its assets in securities of issuers which are not Emerging Markets issuers. Notwithstanding the above 10% limit, the Fund may invest in debt instruments from issuers such as the US Treasury or other sovereign issuers that, in the opinion of the Investment Adviser, are of equivalent or higher quality, without being considered as securities of issuers from countries other than Eligible Investment Countries. - The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. - Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. - The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. - The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. - The Fund may invest in ABS/MBS which will not exceed 10% of the net assets of the Fund. - In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Emerging Markets, derivative instruments, OTC Markets, High Yield Bonds, ABS/MBS, distressed securities, contingent convertible bonds, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.

¹ Launch date of Capital Group Emerging Markets Debt Fund (LUX) in Capital International Portfolios, a former Luxembourg UCITS of the Capital Group.

Calculation method of the risk exposure	Relative VaR approach using 50% JPM EMBI Global Diversified / 50% JPM GBI-EM Global Diversified Total Return index as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1 under "Risk management and monitoring of financial derivatives instruments", and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	100% The Fund's level of leverage is expected to be 100% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g., very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	The Fund will aim at hedging 50% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD), into the currency referred to in the relevant Class's designation. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international For Class A7 EUR Hedged Class: This Class will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD), into the currency referred to in the relevant Class's designation. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Emerging Markets Local Currency Debt Fund (LUX)

Launch Date	10 August 2010 ¹
Investment Objective	To provide, over the long term, a high level of total return, of which a large component is current income. The Fund invests primarily in Investment Grade and High Yield Bonds (both sovereigns and corporates), denominated in the local currencies of issuers in Eligible Investment Countries. Securities of Emerging Markets issuers are defined as those: (1) from issuers in Emerging Markets; (2) that are denominated in Emerging Markets currencies; or (3) that are from issuers deemed to be suitable for the Fund because they have or are expected to have significant economic exposure to Emerging Markets (through assets, revenues, or profits). These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the "General Investment Guidelines and Restrictions".
ESG criteria	Implementation of a Negative Screening Policy relating to the Fund's investments in corporate issuers and sovereign issuers. For more information on the Fund's ESG criteria, please refer to the Fund's pre-contractual information pursuant to Article 8 of SFDR in Annex 4.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors who are seeking: • current income and the potential for long-term high total returns through investment primarily in Emerging Markets government and corporate Bonds, and understand and accept the high level of risks associated with such an investment, including being exposed to the local currencies of Emerging Markets issuers; and • to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Emerging Markets; countries rated Ba or lower or BB or lower by a nationally recognized statistical rating organization; and countries that are on an International Monetary Fund ("IMF") program, have outstanding liabilities to the IMF, or have exited an IMF program no more than 5 years earlier.
Specific Investment Guidelines and Restrictions	1. The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at the time of purchase on corporate and sovereign issuers, with respect to certain sectors such as weapons. To support this screening, for sovereign issuers, it relies on the use of proprietary ESG framework, and, for corporate issuers, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. The Negative Screening Policy applied can be found on: https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf. 2. Companies must follow good governance practices. 3. In general, the Fund will seek to have not more than 20% of its assets invested in Bonds and hybrid securities denominated in USD and other non-Emerging Markets local currencies. 4. The Fund may invest up to 10% of its assets in securities of issuers which are not Emerging Markets issuers. Notwithstanding the above 10% limit, the Fund may invest in debt instruments from issuers such as the US Treasury or other sovereign issuers that, in the opinion of the Investment Adviser, are of equivalent or higher quality, without being considered as securities of issuers from countries other than Eligible Investment Countries. 5. The Fund may invest up to 10% in distressed securities. 6. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 7. Up to 10% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 8. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 9. The Fund may invest on the China Interbank Bond Market up to 20% of the net assets of the Fund, either directly or via Bond Connect. 10. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Bonds, Emerging Markets, derivative instruments, OTC Markets, High Yield Bonds, contingent convertible bonds, distressed securities, China Interbank Bond Market, Bond Connect, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC
Investment Sub-Adviser	CISA
Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the

¹ Launch date of Capital Group Emerging Markets Local Currency Debt Fund (LUX) in Capital International Portfolios, a former Luxembourg UCITS of the Capital Group.

	purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)	
Calculation method of the risk exposure	Relative VaR approach using JPM GBI-EM Global Diversified Total Return index as the appropriate reference portfolio. The Fund is actively managed. The Company has full discretion over the composition of the Fund's portfolio, subject to the relevant investment objective, guidelines and restrictions, which do not provide for index-tracking objectives. The use of the above index is in relation to the calculation of the Relative VaR. Though the majority of the holdings of the Fund (excluding derivatives) are likely to be components of the index, the Investment Adviser is not bound by the components or weighting of the index when selecting investments and may invest in securities not included in the index. The degree to which the Fund may resemble the composition and risk characteristics of the index will vary over time and its performance may be meaningfully different. Further information on Relative VaR can be found in Annex 1 under "Risk management and monitoring of financial derivatives instruments", and further details on the application of the VaR methodology and information about the Fund's risk management process are available upon request from the Management Company.	
Expected level of leverage	75% The Fund's level of leverage is expected to be 75% of the net assets of the Fund, as calculated using the sum of the notionals, not taking into account any netting of the derivatives and hedging arrangements that the Fund has in place at any time. Under certain circumstances (e.g. very low market volatility), the actual Fund's level of leverage may increase from time to time to higher levels. The Fund's expected level of leverage is not a regulatory limit on the Fund and there may be no action whether the actual leverage is higher or lower than the disclosed expected level of leverage.	
Hedged Equivalent Classes	The Class will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant Class's designation.

3A.Capital Group Global New Perspective Fund (LUX)	138
3B.Capital Group Global Screened Allocation Fund (LUX)	140

Capital Group Global New Perspective Fund (LUX)¹

Launch Date	24 November 2023 ²
Investment Objective	The Fund's investment objective is to provide long-term growth of capital. The Fund seeks to take advantage of investment opportunities generated by changes in global trade patterns and economic and political relationships by investing in common stocks of companies located around the world, which may include Emerging Markets. In pursuing its investment objective, the Fund invests primarily in common stocks that the Investment Adviser believes have the potential for growth.
Profile of the typical investor	The Fund is actively managed and particularly suitable for investors seeking long-term capital growth through investments in global Equities.
Eligible Investment Countries	Any country
Specific Investment Guidelines and Restrictions	1. The Fund may invest up to 5% of its assets in nonconvertible debt securities rated Baa1 or below and BBB+ or below by NRSROs designated by the Investment Adviser or unrated but determined by the Investment Adviser to be of equivalent quality. If rating agencies differ, securities will be considered to have received the highest of these ratings. 2. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 3. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund in China A-shares. 4. In order to achieve its investment objective, the Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. Please read the "Risk Warnings" section for more details of the relevant risk factors involved as well as Annex 1. 5. In order to achieve its investment goals and for treasury purposes, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Emerging Markets, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, securities lending, Sustainability Risks. Further details of general and specific risks can be found under "Risk Warnings" section and in Annex 1.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). The investment results of such portfolios may vary depending on a number of factors, including, but not limited to, fees and expenses, portfolio size, transaction costs, cash flows, currencies, securities pricing time, taxes, and portfolio holdings and any applicable investment limitations. Policies and procedures have been designed to ensure that portfolios with similar names, objectives and strategies are each treated fairly, including the allocation of securities transactions.
Base Currency	USD
Valuation Date	Each Business Day, other than days (as determined by the Board or the Management Company at their discretion) on which any market(s) representing a meaningful portion of the Fund's portfolio is closed. For the purpose of this paragraph, the market to be considered is the market where the relevant instrument is traded. (A list of such dates is available on capitalgroup.com/international)
Calculation method of the risk exposure	The methodology used in order to calculate the global exposure resulting from the use of financial derivative instruments is the commitment approach in accordance with the CSSF Circular 11/512.
Hedged Equivalent Classes	The Fund will aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the Fund back into the currency referred to in the relevant Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%. The list of available Hedged Equivalent Classes can be found online on the Management Company's webpage at capitalgroup.com/international

Capital Group Global Screened Allocation Fund (LUX)

Launch Date	1 December 2021
Investment Objective	The Fund seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income. The Fund will seek to meet these objectives by investing worldwide primarily in listed Equities and Bonds of companies and governments and other fixed-income securities including mortgage and asset backed securities, denominated in various currencies. These are usually listed or traded on other Regulated Markets. Unlisted securities may also be purchased, subject to the relevant provisions of the General Investment Guidelines and Restrictions. In addition to the integration of Sustainability Risks as part of the Investment Adviser's investment decision-making process, the Investment Adviser will implement specific investment restrictions defined in the Transition Acceleration Policy by Belfius Group (the "TAP"), the entities of which are the sole Distributors of the Fund, in order to meet Belfius' clients' needs.
Profile of the typical investor	The Fund is particularly suitable for investors seeking long-term total returns from diversified worldwide investments in Equities and Bonds of companies and governments and other fixed-income securities that are in compliance with the TAP. The Fund is actively managed and particularly suitable for investors seeking to consider environmental, social and/or governance criteria as part of their investments within the meaning of Article 8 of the SFDR, as set out in the Fund's pre-contractual information found in Annex 4.
Eligible Investment Countries	Any country.
Specific Investment Guidelines and Restrictions	1. In general, the Fund will seek to invest at least 45% of its total net assets in Equity. 2. In general, the Fund will seek to invest at least 25% of its total net assets in Investment Grade Bonds (including money market instruments). 3. The Fund may invest in ABS/MBS which will not exceed 15% of the net assets of the Fund. 4. The Fund may invest up to 2% in distressed securities. 5. The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures as described in more detail in the main part of the Prospectus under the "Risk Warnings" section and in Annex 1. 6. Up to 5% of the total net assets of the Fund may be subject to Total Return Swaps. Please read the "Risk Warnings" section for more details of the relevant risk factors involved. 7. The Fund may invest in contingent convertible bonds which will not exceed 5% of the net assets of the Fund. 8. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, into A-shares on an ancillary basis. 9. The Fund may invest on the China Interbank Bond Market up to 5% of the net assets of the Fund, either directly or via Bond Connect. 10. In accordance with the TAP, the Fund will not invest in companies with significant exposure to sectors deemed to be controversial or sensitive, including but not limited to, weapons, tobacco and gambling. The TAP, established by Belfius Group, the entities of which are the sole Distributors of the Fund, seeks to encourage and support businesses in their shift towards more sustainable activities and thereby promote positive environmental and social effects on people, society and the economy. The TAP is based on the 10 Principles of the UN Global Compact and includes restrictions on certain sectors and businesses. Through the TAP, Belfius also intends to reduce negative effects of its investments by discontinuing or limiting its support of activities Belfius views as non-sustainable. The TAP will be developed further over time, according to regulatory developments, technological breakthroughs, sectoral reorientation, evolving stakeholder expectations, etc. New sectors may regularly be added or rules may tighten. For more information on the TAP please visit https://www.belfius.be/about-us/dam/corporate/corporate-social-responsibility/documents/policies-and-charters/en/TAP-Policy-EN.pdf 11. Companies must follow good governance practices. 12. In order to achieve its investment goals, for treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
Specific Risks	Equities, Bonds, Emerging Markets, OTC Markets, derivative instruments, ABS/MBS, distressed securities, contingent convertible bonds, Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect, China Interbank Bond Market, Bond Connect, Sustainability Risks.
Investment Adviser	CRMC. CRMC may manage other funds and accounts with similar names, investment objectives and strategies (collectively, "portfolios"). Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

- | | |
|--|--|
| <p>☐ It will make a minimum of sustainable investments with an environmental objective: ____%</p> <p>☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p>☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p>☐ It will make a minimum of sustainable investments with a social objective: ____%</p> | <p>☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments</p> <p>☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p>☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p>☒ with a social objective</p> <p>☐ It promotes E/S characteristics, but will not make any sustainable investments</p> |
|--|--|

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI ACWI index (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issue. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund’s management of its carbon footprint (WACI) for its investments in corporate issuers, which is generally at least 30% lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer’s participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund’s sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company’s annual report.

☐ No

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint (WACI) lower than the Index level. Therefore, it will aim to manage a WACI for its investments in corporate issuers that is generally at least 30% lower than the Index level. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assess the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint (WACI) for its investment in corporate issuers that is generally at least 30% lower than the Index. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable

What is the policy to assess good governance practices of the investee companies?

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

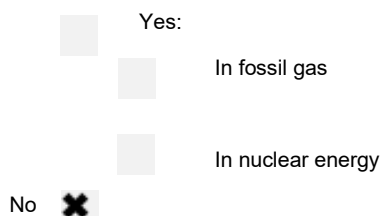

The Fund will not use derivatives to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

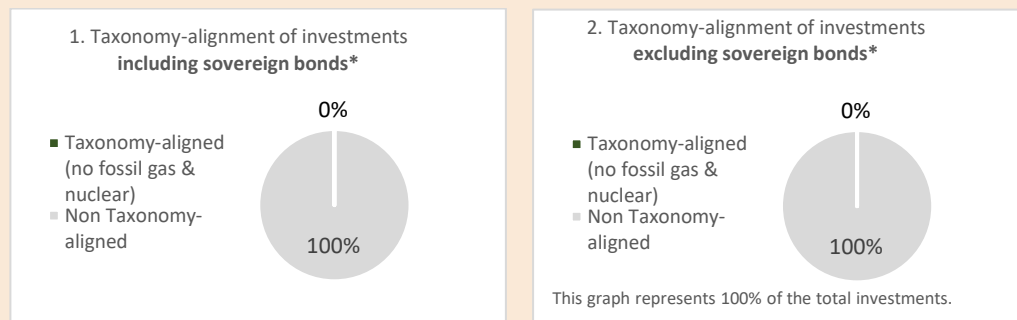

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

Product name: Capital Group Future Generations Global Opportunities Fund (LUX)
Legal entity identifier: 549300SMK5QCHX6N2738

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 60% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and/or social characteristics through the Investment Adviser's investment process, which applies an eligibility assessment and a Negative Screening Policy as follows:

Investments in companies that have alignment with the UN Sustainable Development Goals (SDGs): The Investment Adviser seeks to invest in companies whose products and/or services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes are mapped to the UN SDGs. The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework.

Investments subject to the Investment Adviser's Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by the Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

- Percentage of corporate issuers failing a screen under the Negative Screening Policy,
- Percentage of investments having at least 50% of their revenue aligned with the SDGs, and
- Percentage of investments in companies considered as "Transitioning".

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 60% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of the sustainable investment themes as mentioned above, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material as outlined in the sector-level Standards described below, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows:

The Investment Adviser reviews companies involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

The Fund’s sustainable investments are assessed against each of the mandatory PAIs as described above. Further information on how the financial product did consider PAIs on sustainability factors will be available in the Company’s annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the investment strategy to attain the environmental and/or social characteristics promoted and the sustainable investment objective as follows:

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Investments in companies that have alignment with the UN Sustainable Development Goals (SDGs): The Fund invests in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals (“SDGs”). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework.

To identify such companies, the Investment Adviser performs an eligibility assessment that relies on bottom-up proprietary research conducted by the Investment Adviser’s investment and ESG teams. This eligibility assessment is underpinned by the Investment Adviser’s sector-level “Characteristics” and “Standards”:

- Characteristics: focus on whether products and services contribute to the SDGs; and
- Standards: focus on management of material ESG risks and good governance.

The Fund invests in ‘Aligned’ companies that currently have at least half of their business aligned, as well as ‘Transitioning’ companies that the Investment Adviser believes are actively transitioning their business to higher positive alignment with material near-to-medium term change expected. If a company is determined to be aligned or transitioning and purchased in the Fund, but fails to meet the aligned or transitioning requirements thereafter, such company would no longer be considered a sustainable investment anymore and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Investments subject to the Investment Adviser’s Negative Screening Policy: In addition to alignment, the Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund’s investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC. The Investment Adviser identifies certain issuers or groups of issuers that it excludes from the portfolio to promote the environmental or social characteristics supported by the Fund.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy used to attain its environmental and social characteristics are:

Sustainable investments. The Fund commits to making a minimum allocation to sustainable investments as set out above. The objectives of the sustainable investments are to make a positive contribution to environmental objectives and/or social objectives.

Negative Screening Policy. The Investment Adviser identifies certain companies or groups of companies that will be excluded from the portfolio to promote the environmental and/or social characteristics supported by the Fund as set out in the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, the Investment Adviser assesses the quality of corporate governance practices of companies as part of its eligibility assessment when examining ESG risks, and as part of its ESG integration process more broadly. The Investment Adviser's fundamental analysis covers a range of governance metrics including among others audit practices, board composition and executive compensation. The Investment Adviser engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, such company would no longer be considered a sustainable investment and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on the Investment Adviser's ESG integration approach and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on the Investment Adviser's corporate governance principles can be found in its Proxy Voting Procedures and Principles.

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund. Such investments are those that are designated as eligible as “aligned” or “transitioning” companies and that pass the Investment Adviser’s binding Negative Screening Policy.

A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 60% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser’s sustainable investment assessment (alignment and screening, good governance and do no significant harm).

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser’s assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund will not use derivatives to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make environmentally sustainable investments within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 60% in sustainable investment on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 60% in sustainable investment on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

Product name: Capital Group New Economy Fund (LUX)
Legal entity identifier: 5493005TAI2AYOJ2IZ71

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ Yes	☒ No
☐ It will make a minimum of sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It will make a minimum of sustainable investments with a social objective : ____%	☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are the following:

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI ACWI index (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by are meaningful signs of improvement and positive change.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is generally at least 30% lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint (WACI) lower than the Index level. Therefore, it will aim to manage a WACI for its investments in corporate issuers that is generally at least 30% lower than the Index level. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assess the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint (WACI) for its investment in corporate issuers that is generally at least 30% lower than the Index. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for hedging and/or efficient portfolio management purposes but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

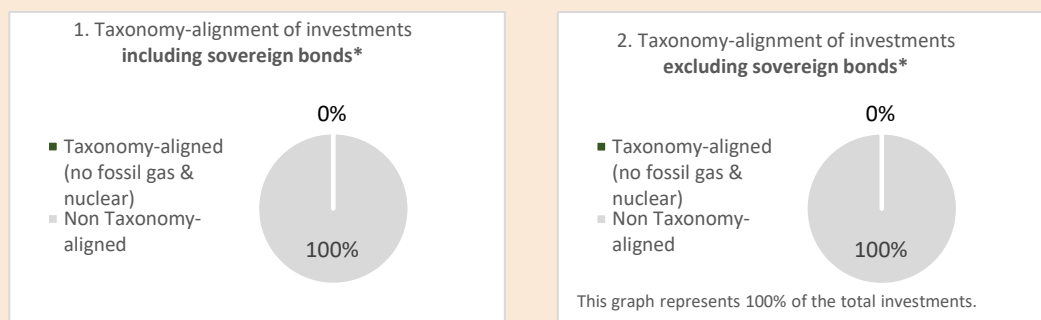

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.capitalgroup.com/individual-investors/lu/en/fund-centre.CGNELU.html>

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes		☒ ☐ ☒ No	
☐ It will make a minimum of sustainable investments with an environmental objective : ____%		☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments	
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy		☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
☐ It will make a minimum of sustainable investments with a social objective : ____%		☒ with a social objective	
☐ It promotes E/S characteristics, but will not make any sustainable investments		☐ It promotes E/S characteristics, but will not make any sustainable investments	

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are the following:

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI Emerging Markets index with net dividends reinvested (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issue. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is generally at least 30% lower than the Index with net dividends reinvested.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint (WACI) lower than the Index level. Therefore, it will aim to manage a WACI for its investments in corporate issuers that is generally at least 30% lower than the Index level (with net dividends reinvested). Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assess the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This

allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint (WACI) for its investment in corporate issuers that is generally at least 30% lower than the Index (with net dividends reinvested). Should the WACI of the Fund not achieve the 30% threshold, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

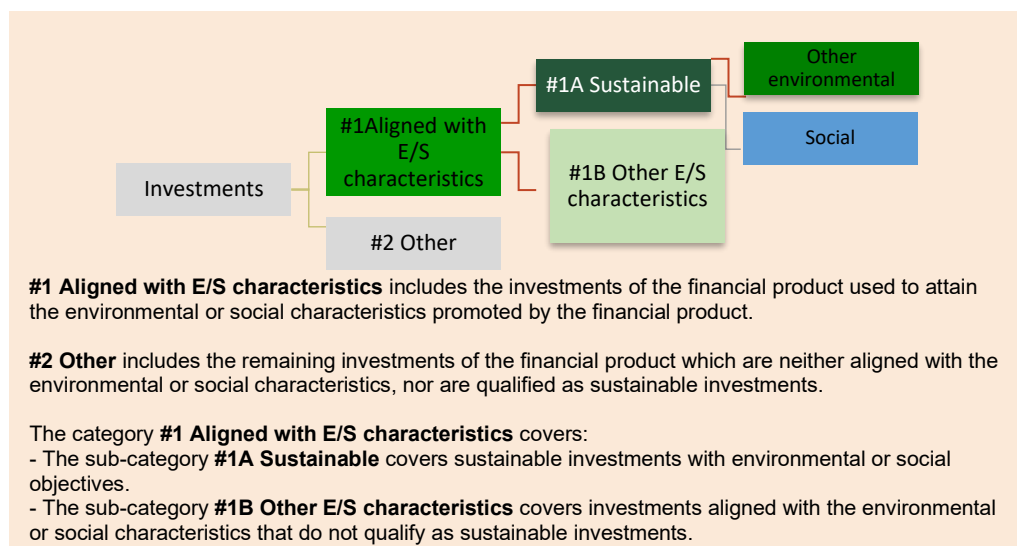

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund will not use derivatives to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

- ☐ Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
 - ☒ No

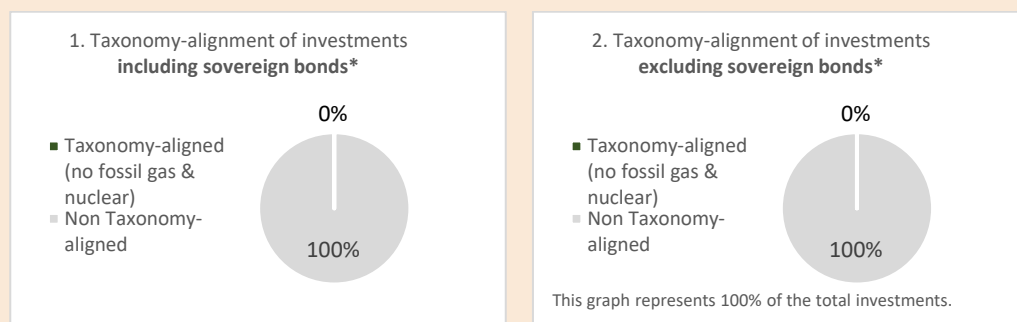

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The investments included under "#2 Other" are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

More product-specific information can be found on the website:

Product name: Capital Group European Core Equity Fund (LUX)
Legal entity identifier: 549300PLLS49Y17M871

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes** ☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than the MSCI Europe index. The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the aforementioned index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than MSCI Europe index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

No

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Fund's selected index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index level (MSCI Europe). Should the WACI of the Fund not be lower than the level of the aforementioned index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected index is representative of the investment universe of the Fund. The Investment Adviser assesses the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third-party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Fund's selected index level (MSCI Europe). Should the WACI of the Fund not be lower than the level of the aforementioned index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable

What is the policy to assess good governance practices of the investee companies?

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

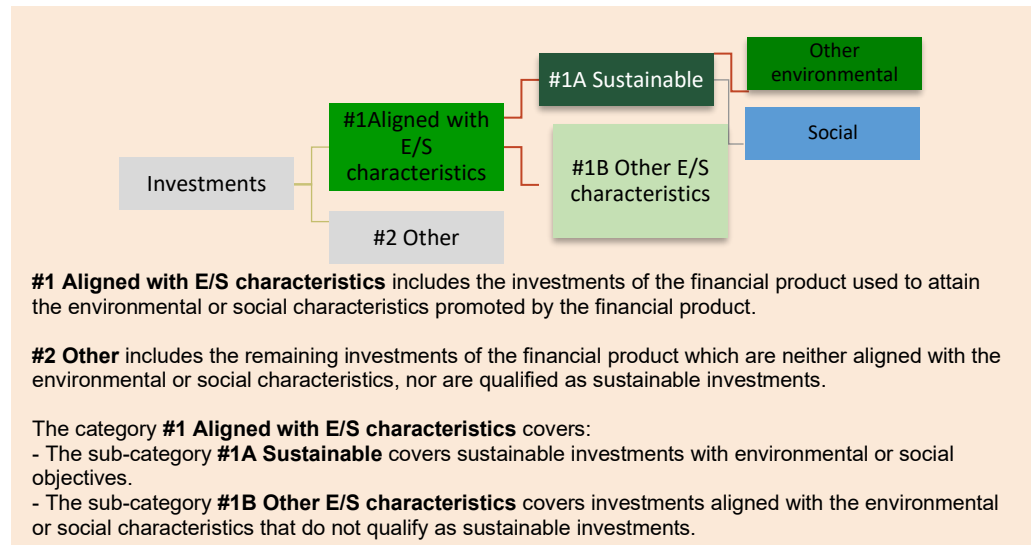

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for hedging and/or efficient portfolio management, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

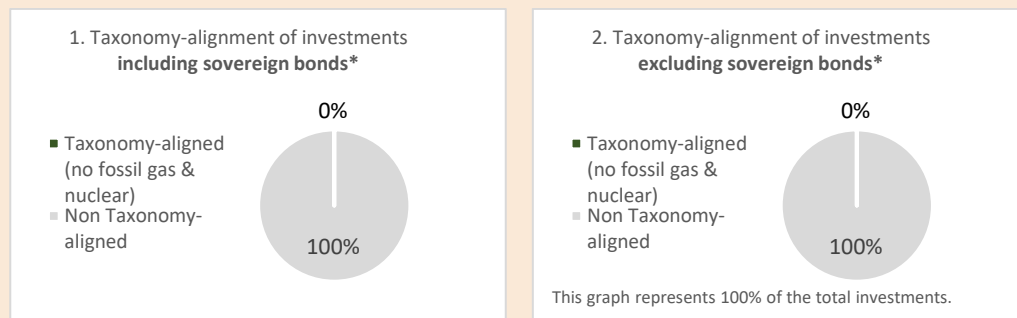

Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The investments included under "#2 Other" are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Capital Group Investment Company of America (LUX)
Legal entity identifier: 222100R3KUY4HJ4BLC87

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than S&P 500 NR USD (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

No

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Index level. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assesses the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third-party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Index level. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

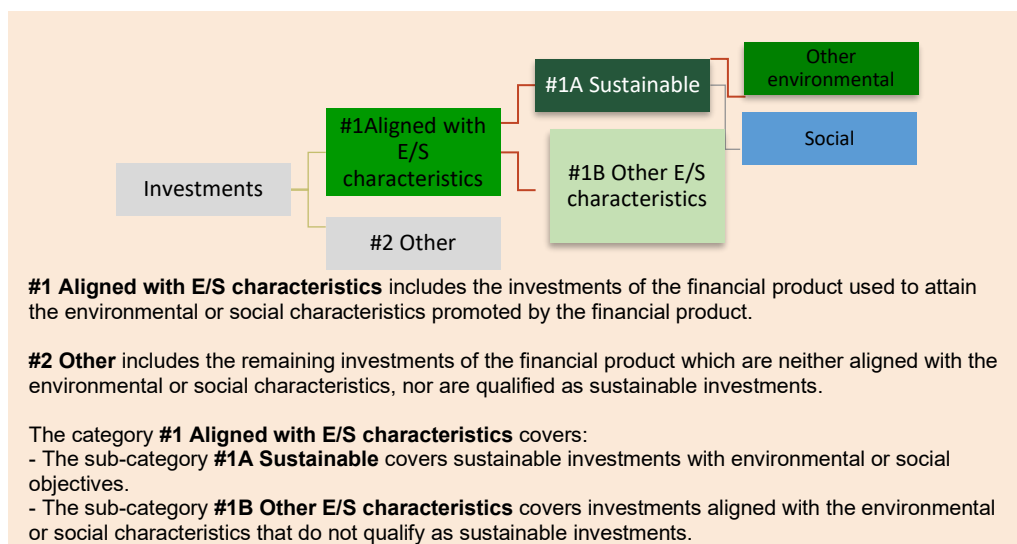

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for hedging and/or efficient portfolio management, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

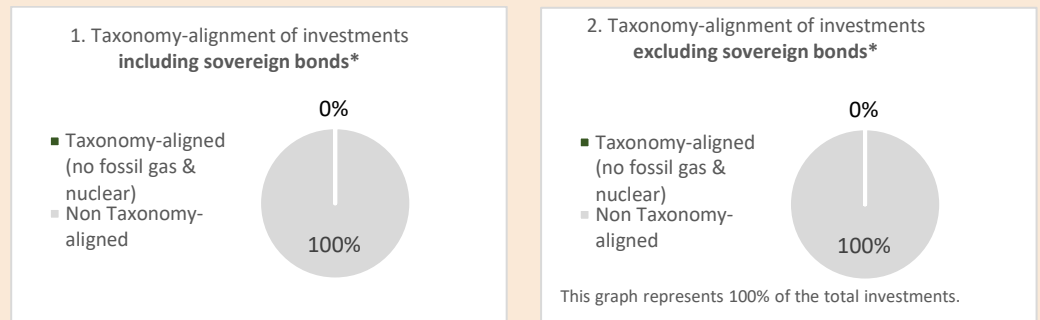

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- No ☒

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ____%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are the following:

Carbon constraint: For its Equity portion, the Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than MSCI AC World index (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate and sovereign issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of corporate issuers failing a screen under the Negative Screening Policy,
- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs. The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies.

The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. For the Fund's Equity portion, the Investment Adviser aims to manage a carbon footprint lower than the Index. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the Equity portion of the Fund. The Investment Adviser assess the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

particular issuer, the third-party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Index. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate and sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.
The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

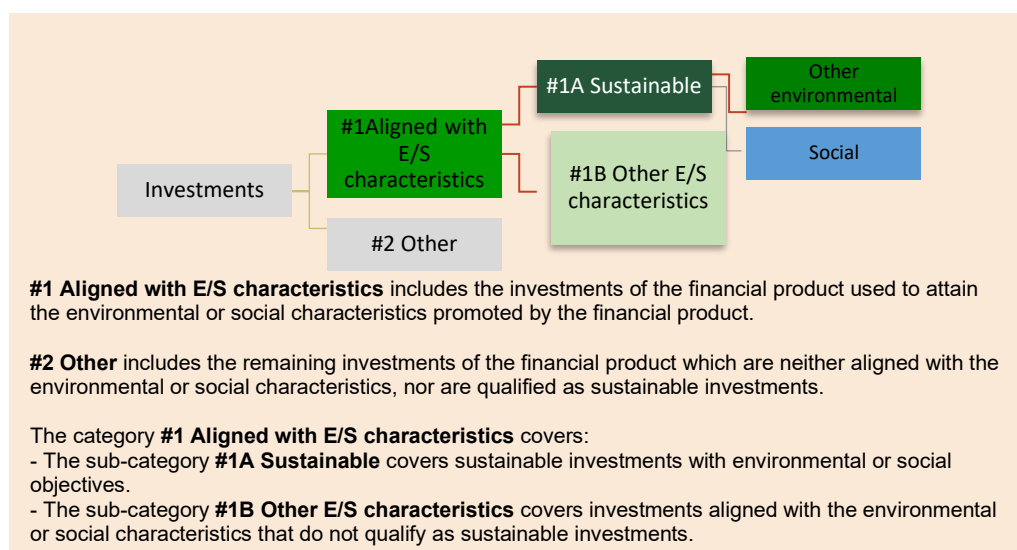

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

At least 55% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 45% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, securitised debt, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 55%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

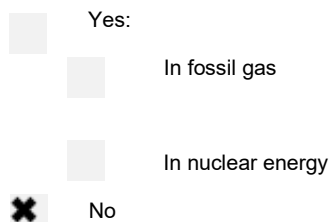

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

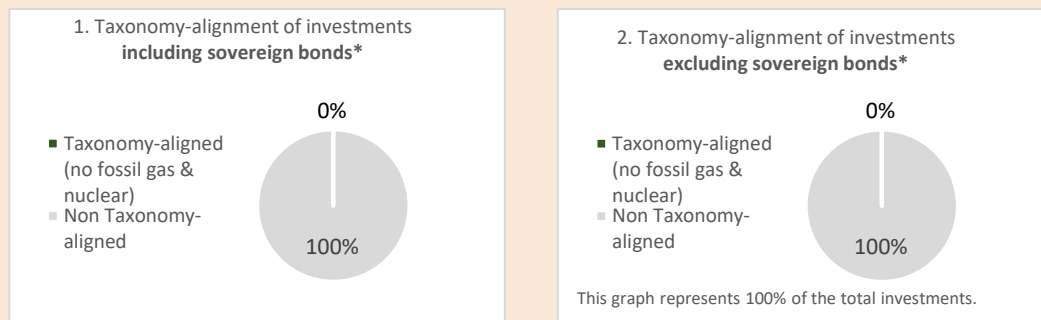

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The investments included under "#2 Other" are investments (including derivatives and/or cash and cash equivalents) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Product name: Capital Group Future Generations Global Balanced Fund (LUX)
Legal entity identifier: 549300QTCEF0GTIIHN03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ____%

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and/or social characteristics through the Investment Adviser's investment process, which applies an eligibility assessment and a Negative Screening Policy as follows:

Investments in companies that have alignment with the UN Sustainable Development Goals (SDGs): The Investment Adviser seeks to invest in companies whose products and/or services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes are mapped to the UN SDGs. The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework.

Investments subject to the Investment Adviser's Negative Screening Policy:

In addition, the Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG and Governance score of a sovereign issuer against predetermined thresholds. In addition, sovereigns that fail certain human rights criteria will be excluded from the eligible universe of the Fund.

There is no reference benchmark designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by the Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

- Percentage of corporate issuers failing a screen under the Negative Screening Policy,
- Percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns,
- Percentage of investments having at least 50% of their revenue aligned with the SDGs, and
- Percentage of investments in companies considered as "Transitioning".

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 40% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of the sustainable investment themes as mentioned above, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material as outlined in the sector-level Standards described below, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the issuer's activities is potentially significant based on the issuer's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Where third party data or the Investment Adviser's assessment indicates that an issuer is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the issuer is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude an issuer is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the issuer is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows:

The Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

The Fund's sustainable investments are assessed against each of the mandatory PAIs as described above. Further information on how the financial product did consider PAIs on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Investment Adviser applies the investment strategy to attain the environmental and/or social characteristics promoted and the sustainable investment objective as follows:

Investments in companies that have alignment with the UN Sustainable Development Goals (SDGs): The Fund invests in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework.

To identify such companies, the Investment Adviser performs an eligibility assessment that relies on bottom-up proprietary research conducted by the Investment Adviser's investment and ESG teams. This eligibility assessment is underpinned by the Investment Adviser's sector-level "Characteristics" and "Standards":

- Characteristics: focus on whether products and services contribute to the SDGs; and
- Standards: focus on management of material ESG risks and good governance.

The Fund invests in 'Aligned' companies that currently have at least half of their business aligned, as well as 'Transitioning' companies that the Investment Adviser believes are actively transitioning their business to higher positive alignment with material near-to-medium term change expected. If a company is determined to be aligned or transitioning and purchased in the Fund, but fails to meet the aligned or transitioning requirements thereafter, such company would no longer be considered a sustainable investment anymore and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Investments subject to the Investment Adviser's Negative Screening Policy: In addition, the Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase. The Investment Adviser identifies certain issuers or groups of issuers that it excludes from the portfolio to promote the environmental or social characteristics supported by the Fund.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must fulfil the following criteria: (i) score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis; and (ii) score above pre-determined thresholds on the governance indicator input of their proprietary ESG score on both an absolute and GNI-adjusted basis. In addition, sovereigns that fail certain human rights criteria will be excluded from the eligible universe of the Fund. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy used to attain its environmental and social characteristics are:

Sustainable investments. The Fund commits to making a minimum allocation to sustainable investments as set out above. The objectives of the sustainable investments are to make a positive contribution to environmental objectives and/or social objectives.

Negative Screening Policy. The Investment Adviser identifies certain issuers or groups of issuers that will be excluded from the portfolio to promote the environmental and/or social characteristics supported by the Fund as set out in the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of the investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance). As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, the Investment Adviser assess the quality of corporate governance practices of companies as part of its eligibility assessment when examining ESG risks, and as part of its ESG integration process more broadly. The Investment Adviser's fundamental analysis covers a range of governance metrics including among others audit practices, board composition and executive compensation. The Investment Adviser engages in regular dialogue with companies

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, such company would no longer be considered a sustainable investment and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on the Investment Adviser's ESG integration approach and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on the Investment Adviser's corporate governance principles can be found in its Proxy Voting Procedures and Principles.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund. Such investments are those that are designated as eligible as “aligned” or “transitioning” companies and that pass the Investment Adviser's binding Negative Screening Policy.

A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 40% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed the Investment Adviser's sustainable investment assessment (alignment and screening, good governance and do no significant harm).

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being issuers that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund will not use derivatives to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make environmentally sustainable investments within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 40% in sustainable investment on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 40% in sustainable investment on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.capitalgroup.com/individual-investors/lu/en/investments/fund-centre.CGFGBLU.html>

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are the following:

Carbon constraint: For its Equity portion, the Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than S&P 500 index (the "Index") (net dividends reinvested). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate and sovereign issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of corporate issuers failing a screen under the Negative Screening Policy,
- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs. The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies.

The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index (net dividends reinvested).

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. For the Fund's Equity portion, the Investment Adviser aims to manage a carbon footprint lower than the Index (net dividends reinvested). Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the Equity portion of the Fund. The Investment Adviser assess the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third-party provider may provide estimates using their own

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Index (net dividends reinvested). Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate and sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.
The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

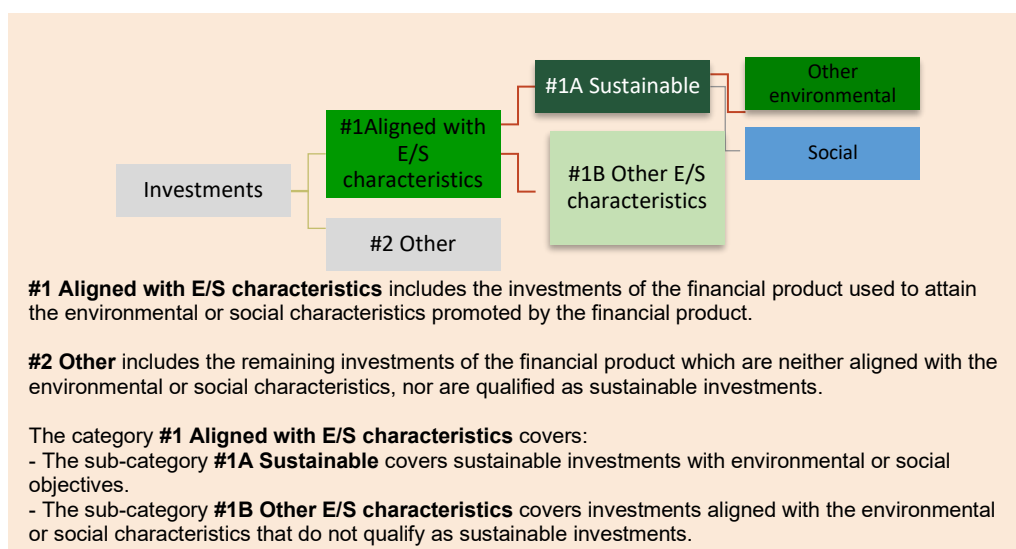

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

At least 50% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 50% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, securitised debt, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 50%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- ☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other

than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The investments included under "#2 Other" are investments (including derivatives and/or cash and cash equivalents) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Capital Group Global Bond Fund (LUX)
Legal entity identifier: 549300LPLX1R6Z33PK70

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes	☒ ☐ ☒ No
☐ It will make a minimum of sustainable investments with an environmental objective: ____%	☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It will make a minimum of sustainable investments with a social objective: ____%	☐ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG and Governance score of a sovereign issuer against predetermined thresholds.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens.

The Investment Adviser selects investments to the extent they are in line with the negative screening policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are as follows.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns; and
- percentage of corporate issuers failing a screen under the Negative Screening Policy.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable as this Fund does not commit to make sustainable investments.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to make sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

It should be noted that the Fund expects limited investments in corporate issuers.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted.

Negative Screening Policy: The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

For corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The Fund has the following binding elements:

Negative screening policy. The Fund applies investment restrictions rules at time of purchase on a pre-trade basis in portfolio management systems to prohibit investment in companies and sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they are in line with the Negative Screening Policy.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

At least 30% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy). A maximum of 70% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

The Fund does not commit to make any sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- ☐ In fossil gas
- ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

This Fund does not commit on a minimum share of investments in transitional and enabling activities.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable as this Fund does not commit on making sustainable investments.

What is the minimum share of socially sustainable investments?

Not applicable as this Fund does not commit on making sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Capital Group Global Total Return Bond Fund (LUX)
Legal entity identifier: 549300UFGSJ53I0Z7U32

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG and Governance score of a sovereign issuer against predetermined thresholds.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens.

The Investment Adviser selects investments to the extent they are in line with the negative screening policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are as follows.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of sovereign issuers failing the Investment Adviser's process for

- assessing sovereigns; and
- percentage of corporate issuers failing a screen under the Negative Screening Policy.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable as this Fund does not commit to make sustainable investments.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to make sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes.

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

It should be noted that the Fund expects limited investments in corporate issuers.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted.

Negative Screening Policy: The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

For corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

Negative screening policy. The Fund applies investment restrictions rules at time of purchase on a pre-trade basis in portfolio management systems to prohibit investment in companies and sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

At least 30% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy). A maximum of 70% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

The Fund does not commit to make any sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What is the minimum share of investments in transitional and enabling activities?

This Fund does not commit on a minimum share of investments in transitional and enabling activities.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable as this Fund does not commit on making sustainable investments.

What is the minimum share of socially sustainable investments?

Not applicable as this Fund does not commit on making sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes	☐ ☐ ☒ No
☐ It will make a minimum of sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It will make a minimum of sustainable investments with a social objective: ____%	☐ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG score of a sovereign issuer against predetermined thresholds.

The Investment Adviser selects investments to the extent they are in line with the negative screening policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are as follows.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of corporate issuers failing a screen under the Negative Screening Policy; and
- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 5% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes.

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted.

Negative Screening Policy: The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The Fund has the following binding elements:

Negative screening policy. The Fund applies investment restrictions rules at time of purchase on a pre-trade basis in portfolio management systems to prohibit investment in corporate or sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they are in line with the Negative Screening Policy.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

Not applicable.

● **What is the policy to assess good governance practices of the investee companies?**

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

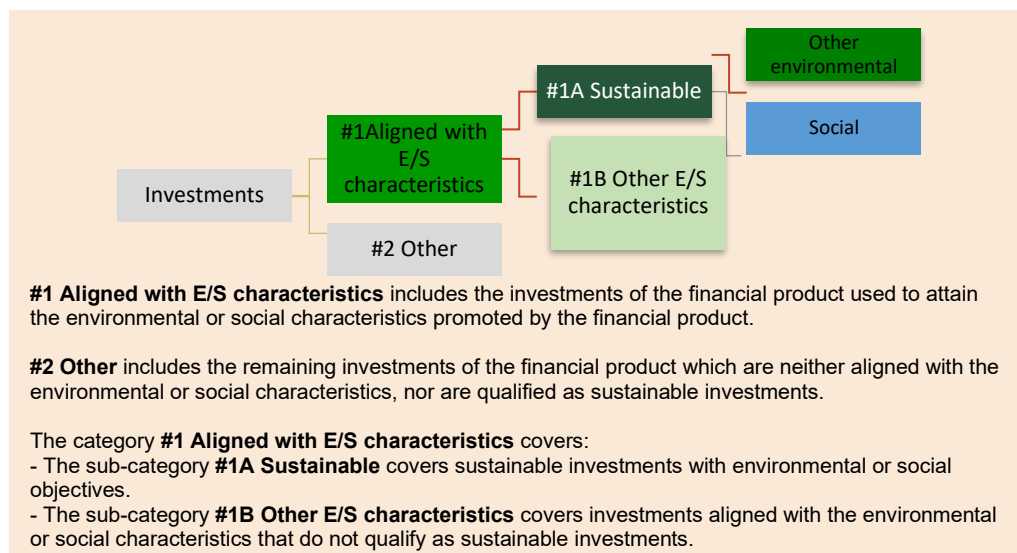

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 5% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

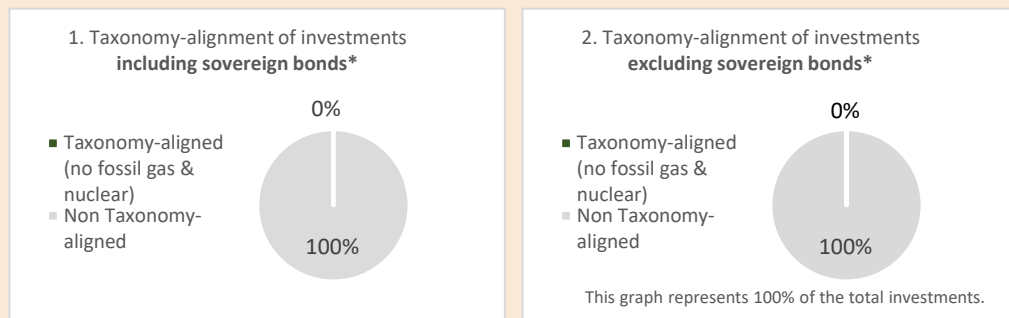

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- ☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 5% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

● What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 5% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

● What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

 **Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Product name: Capital Group Global Corporate Bond Fund (LUX)
Legal entity identifier: 549300RYX3TCTOW4M118

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ Yes

☒ No

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☒ It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are the following:

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than Bloomberg Global Aggregate Corporate Total Return Index hedged to USD (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes.

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index hedged to USD.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Fund's selected Index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Index level (hedged to USD). Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assesses the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third-party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Index level (hedged to USD). Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 70% of the Fund's investments are in category "1 Aligned with E/S characteristics" and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category "2 Other".

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category "1A Sustainable", being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category "1B Other E/S characteristics", being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make "environmentally sustainable investments" within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.capitalgroup.com/individual-investors/lu/en/fund-centre.CGGCBLU.html>

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?	
☒ ☒ ☐ Yes	☒ ☐ ☒ No
☐ It will make a minimum of sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 60% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It will make a minimum of sustainable investments with a social objective : ____%	☐ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and/or social characteristics through the Investment Adviser's investment process, which applies an eligibility assessment and a Negative Screening Policy as follows:

Investments in companies that have alignment with the UN Sustainable Development Goals (SDGs):

The Investment Adviser seeks to invest in companies whose products and/or services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes are mapped to the UN SDGs. The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework.

Investments subject to the Investment Adviser's Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by the Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

- Percentage of corporate issuers failing a screen under the Negative Screening Policy,
- Percentage of investments having at least 50% of their revenue aligned with the SDGs, and
- Percentage of investments in companies considered as "Transitioning".

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 60% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of the sustainable investment themes as mentioned above, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material as outlined in the sector-level Standards described below, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the issuer's activities is potentially significant based on the issuer's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that an issuer is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the issuer is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude an issuer is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the issuer is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

The Fund's sustainable investments are assessed against each of the mandatory PAIs as described above. Further information on how the financial product did consider PAIs on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the investment strategy to attain the environmental and/or social characteristics promoted and the sustainable investment objective as follows:

Investments in companies that have alignment with the UN Sustainable Development Goals (SDGs):

The Fund invests in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals (“SDGs”). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework.

To identify such companies, the Investment Adviser performs an eligibility assessment that relies on bottom-up proprietary research conducted by the Investment Adviser's investment and ESG teams. This eligibility assessment is underpinned by the Investment Adviser's sector-level “Characteristics” and “Standards”:

- Characteristics: focus on whether products and services contribute to the SDGs; and
- Standards: focus on management of material ESG risks and good governance.

The Fund invests in ‘Aligned’ companies that currently have at least half of their business aligned, as well as ‘Transitioning’ companies that the Investment Adviser believes are actively transitioning their business to higher positive alignment with material near-to-medium term change expected. If a company is determined to be aligned or transitioning and purchased in the Fund, but fails to meet the aligned or transitioning requirements thereafter, such company would no longer be considered a sustainable investment anymore and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Investments subject to the Investment Adviser's Negative Screening Policy: In addition to alignment, the Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC. The Investment Adviser identifies certain issuers or groups of issuers that it excludes from the portfolio to promote the environmental or social characteristics supported by the Fund.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The binding elements of the investment strategy used to attain its environmental and social characteristics are:

Sustainable investments. The Fund commits to making a minimum allocation to sustainable investments as set out above. The objectives of the sustainable investments are to make a positive contribution to environmental objectives and/or social objectives.

Negative Screening Policy. The Investment Adviser identifies certain issuers or groups of issuers that it should exclude from the portfolio to promote the environmental and/or social characteristics supported by the Fund as set out in the Negative Screening Policy.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable.

What is the policy to assess good governance practices of the investee companies?

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance). As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, the Investment Adviser assess the quality of corporate governance practices of companies as part of its assessment eligibility assessment when examining ESG risks, and as part of its ESG integration process more broadly. The Investment Adviser's fundamental analysis covers a range of governance metrics including among others audit practices, board composition and executive compensation. The Investment Adviser engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, such company would no longer be considered a sustainable investment and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on the Investment Adviser's ESG integration approach and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on the Investment Adviser's corporate governance principles can be found in its Proxy Voting Procedures and Principles.

What is the asset allocation planned for this financial product?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund. Such investments are those that are designated as eligible as “aligned” or “transitioning” companies and that pass the Investment Adviser’s binding Negative Screening Policy.

A maximum of 30% of the Fund's investments including investment non-aligned with E/S characteristics promoted, derivatives, and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 60% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser’s sustainable investment assessment (alignment and screening, good governance and do no significant harm).

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being issuers that do not pass the Investment Adviser’s assessment of sustainable investment.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund will not use derivatives to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make environmentally sustainable investments within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

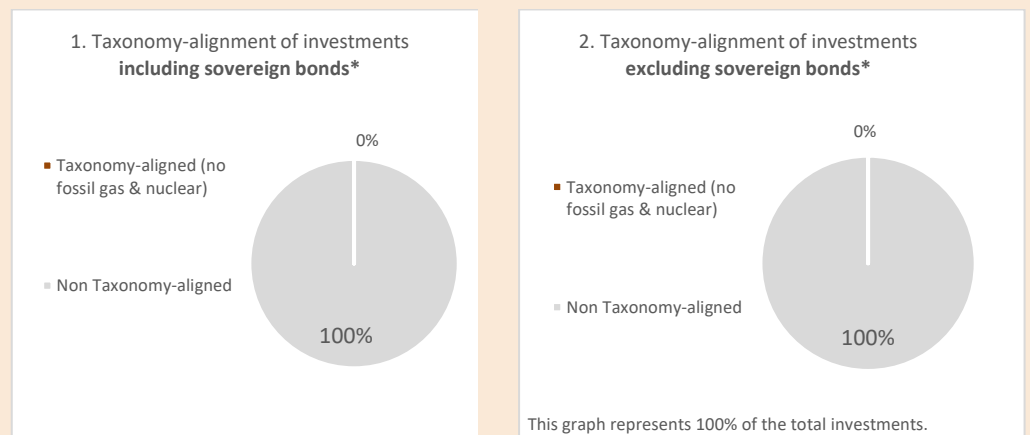

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 60% in sustainable investment on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 60% in sustainable investment on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

Product name: Capital Group US Corporate Bond Fund (LUX)
Legal entity identifier: 549300RYX3TCTOW4M118

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☒ It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are the following:

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than Bloomberg US Corporate Investment Grade Index (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative Screening Policy: Through its Negative Screening Policy, the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 10% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes.

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Index level. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assess the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

is not available for a particular issuer, the third-party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy relating to the Fund's investments in corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the UNGC.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

- 1) **Carbon constraint.** The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Index level. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.
- 2) **Negative Screening Policy.** The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of governance metrics that cover areas such as auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and

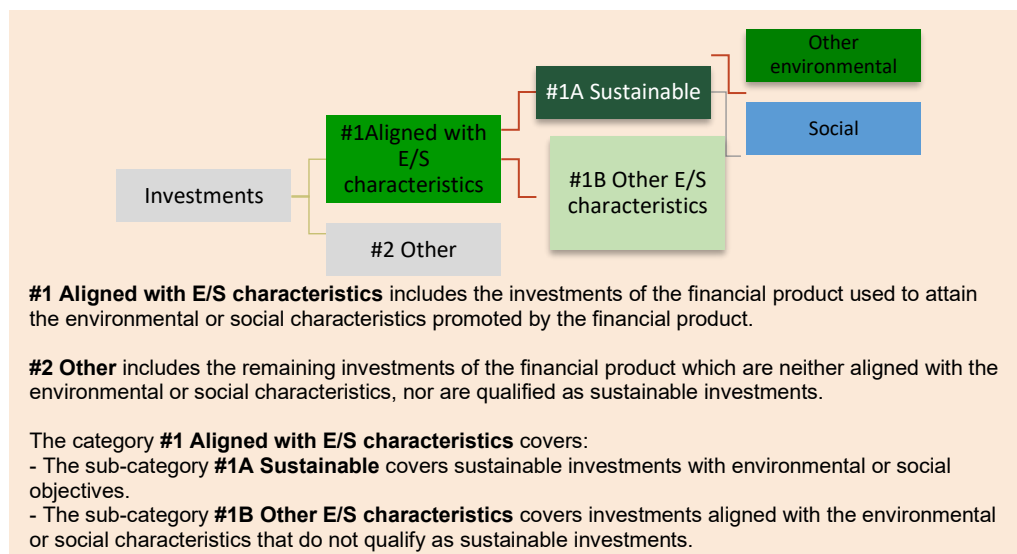

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

- Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 70%, the Fund will have a minimum proportion of 10% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

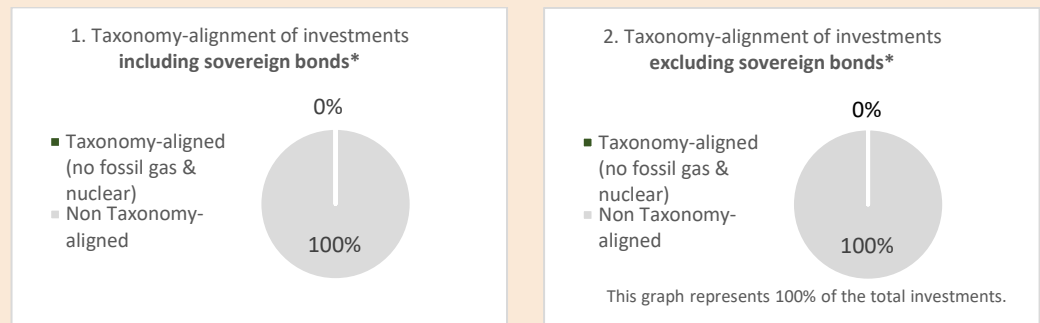

- ☐ Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- ☒ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 10% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

More product-specific information can be found on the website:

Product name: Capital Group Global High Income Opportunities (LUX)
Legal entity identifier: 5493003T9JGEHH5RHV09

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐	Yes	☒ ☐ ☒	No
☐	It will make a minimum of sustainable investments with an environmental objective : ____%	☐	It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments
☐	in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐	with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐	in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐	It will make a minimum of sustainable investments with a social objective : ____%	☒	It promotes E/S characteristics, but will not make any sustainable investments
		☐	with a social objective

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than 50% Bloomberg US Corp HY 2% Issuer Capped Total Return, 20% JPM EMBI Global Total Return, 20% JPM GBI-EM Global Diversified Total Return, 10% JPM CEMBI Broad Diversified Total Return indexes (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative screening policy. In addition, the Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG score of a sovereign issuer against predetermined thresholds.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of corporate issuers failing a screen under the Negative Screening Policy; and
- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable as this Fund does not commit to make sustainable investments.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to make sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Index level. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assesses the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. This will not apply to sovereign issuers. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative screening policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The Fund has the following binding elements:

1) Carbon constraint. The Fund aims to manage a carbon footprint (WACI) for its investment in corporate issuers that is lower than the Index level. This will not apply to sovereign issuers. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

2) Negative Screening Policy. The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate and sovereign issuers based on the negative screening criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable.

What is the policy to assess good governance practices of the investee companies?

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Investments

#1 Aligned with E/S characteristics

#2 Other

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

At least 70% of the Fund's investments are in category "#1 Aligned with E/S characteristics" and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, securitised debt, derivatives and/or cash and cash equivalents are in category "#2 Other".

The Fund does not commit to make any sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment, hedging and/or efficient portfolio management purposes but will not use them to attain the environmental or social characteristics it promotes.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas
- ☐ In nuclear energy
- ☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable as this Fund does not commit on making sustainable investments.

What is the minimum share of socially sustainable investments?

Not applicable as this Fund does not commit on making sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives, securitised debt and/or cash and cash equivalents) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.capitalgroup.com/individual-investors/lu/en/fund-centre.CGGHIOLU.html>

More information can also be found in Capital Group's ESG Policy Statement and Capital Group's proxy voting procedures and principles. These documents can be found on:

Product name: Capital Group Multi-Sector Income Fund (LUX)
Legal entity identifier: 549300I8XY2G5K7ODX81

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg Non-Agency CMBS Ex AAA Index, 2% Bloomberg ABS Ex AAA Index (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative screening policy. In addition, the Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG score of a sovereign issuer against predetermined thresholds.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of corporate issuers failing a screen under the Negative Screening Policy; and
- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Investment Adviser commits to maintain at least 5% of the Fund's investments in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services.

Such companies have products and services that are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. These themes map to the United Nations Sustainable Development Goals ("SDGs"). The Investment Adviser also takes into consideration topics, communities, and groups not specifically referenced in the SDG framework. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion.

The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are majority-aligned or transitioning towards higher positive alignment with any one or a combination of these sustainable investment themes, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the Negative Screening Policy.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause any significant harm to any environmental or social sustainable investment objectives. As such the Investment Adviser considers the mandatory Principle Adverse Impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments, as well as other ESG risks and controversies that the Investment Adviser considers potentially material, such as data privacy or censorship issues. Companies deemed by the Investment Adviser to be causing significant harm, based on the PAIs, are not considered sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As mentioned above, the Investment Adviser considers all mandatory PAIs.

The Investment Adviser considers several PAIs within its Negative Screening Policy. In particular, the Negative Screening Policy addresses the Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

Beyond the screening process, with respect to the remaining mandatory PAIs:

1. where the Investment Adviser considers sufficient and reliable quantitative data is available across the investment universe, the Investment Adviser uses third-party data and prescribed thresholds to determine whether the adverse impact associated with the company's activities is potentially significant based on the company's relative ranking (on the specific adverse impact) to the overall investment universe and/or peer group; or
2. where data availability or quality is not sufficient across the investment universe to enable a quantitative analysis, the Investment Adviser assess significant harm on a qualitative basis, for example using proxies. The Investment Adviser's assessment will also include an overall qualitative assessment of how ESG risks are being managed.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Where third party data or the Investment Adviser's assessment indicates that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser will do additional due diligence to better understand and assess negative impacts indicated by third party or proprietary data. If the Investment Adviser concludes that the company is not causing significant harm based on its analysis, it may proceed with the investment and the rationale for that decision will then be documented. For example, the Investment Adviser may conclude a company is not causing significant harm if (i) the Investment Adviser has reason to believe that third-party data is inaccurate and the Investment Adviser's own research demonstrates that the company is not causing significant harm; or (ii) the company is taking steps to mitigate or remediate that harm through appropriate actions which are accompanied by meaningful signs of improvement and positive change.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as follows: the Investment Adviser reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the United Nations Global Compact. In accordance with the Negative Screening Policy applied to the Fund, the Investment Adviser will exclude companies violating the UN Global Compact principles. Although other incidents will not automatically result in exclusion from the Fund, the Investment Adviser ensures that appropriate action to remediate the concerns are taken.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

In addition, the Fund's sustainable investments are assessed against each of the mandatory PAIs as described above.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Index level. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assesses the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. This will not apply to sovereign issuers. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative Screening Policy: In addition, the Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The Fund has the following binding elements:

1) Carbon constraint. The Fund aims to manage a carbon footprint for its investment in corporate issuers that is lower than the Index level. This will not apply to sovereign issuers. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

2) Negative screening policy. The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate or sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable.

What is the policy to assess good governance practices of the investee companies?

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests. Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

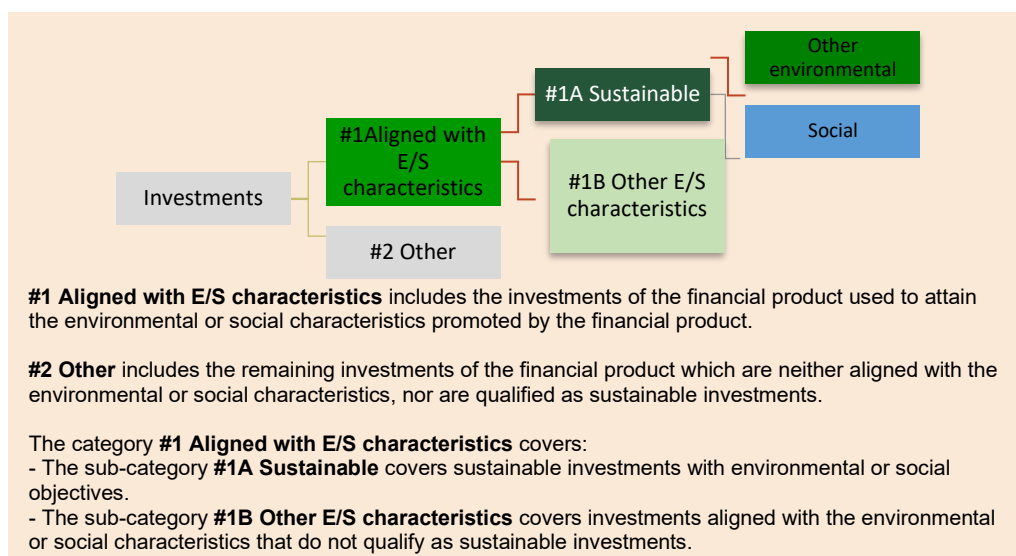

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

At least 50% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 50% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, securitised debt, derivatives and/or cash and cash equivalents are in category “#2 Other”.

Within the 50%, the Fund will have a minimum proportion of 5% of the portfolio in sub-category “#1A Sustainable”, being sustainable investments with an environmental or social objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy. These are investments that have passed through the Investment Adviser's sustainable investment assessment.

The remainder of the portfolio will be in category “#1B Other E/S characteristics”, being companies that do not pass the Investment Adviser's assessment of sustainable investment.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

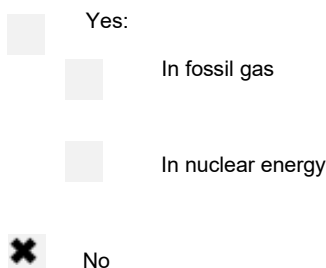

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

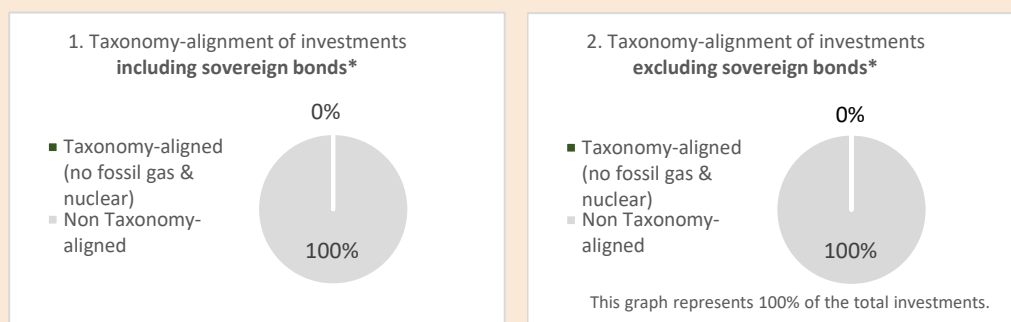

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Although the Fund commits to invest at least 5% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with an environmental objective.

What is the minimum share of socially sustainable investments?

Although the Fund commits to invest at least 5% in sustainable investments on an aggregate basis the Fund does not commit specifically to any minimum investment in sustainable investments with a social objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives, securitised debt and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.capitalgroup.com/individual-investors/lu/en/fund-centre.CGMSILU.html>

More information can also be found in Capital Group's ESG Policy Statement and Capital Group's proxy voting procedures and principles. These documents can be found on:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes	☒ ☐ ☒ No
☐ It will make a minimum of sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It will make a minimum of sustainable investments with a social objective : ____%	☒ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

Carbon constraint: The Fund aims to maintain a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than Bloomberg US Corporate High Yield 2% Issuer Capped Total Return index (the "Index"). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

Negative screening policy. In addition, the Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are the following:

The WACI is the metric used to report the Fund's carbon emissions. It helps show the carbon footprint of the portfolio compared to the Index, and is based on Scope 1 and 2 emissions:

- Scope 1: direct emissions from the investee company's facilities;
- Scope 2: indirect emissions linked to the investee company's energy consumption

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor percentage of corporate issuers failing a screen under the Negative Screening Policy.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable as this Fund does not commit to make sustainable investments.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to make sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 1 on greenhouse gas emissions.
- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

PAI 1 on greenhouse gas emissions is considered as part of the Fund's management of its carbon footprint (WACI) for its investments in corporate issuers, which is lower than the Index.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

The investment strategy

guides investment decisions based on factors such as investment objectives and risk tolerance.

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted:

Carbon constraint. The Investment Adviser aims to manage a carbon footprint lower than the Index level. Therefore, it will aim to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Index level. Should the WACI of the Fund not be lower than the level of the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser carries out ongoing monitoring of WACI at the Fund level, and may reduce or eliminate exposures to certain companies as necessary.

The selected Index is representative of the investment universe of the Fund. The Investment Adviser assesses the portfolio WACI data on an ongoing basis to help the Fund remain within the target level. This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio compared to the selected Index, and to understand the attribution of the emission results. From an investment perspective, carbon footprint analysis can serve as a tool to engage with the investee company and better understand the investee company's business. In the event that reported carbon emissions data is not available for a particular issuer, the third party provider may provide estimates using their own methodologies. Issuers that do not have any carbon emissions data available (reported or estimated) are excluded from the WACI calculation. This will not apply to sovereign issuers. It is not the intention of the Investment Adviser to automatically exclude higher carbon emitters on an individual basis as the carbon intensity is monitored at the total portfolio level rather than at the individual holding level.

Negative screening policy. The Investment Adviser also evaluates and applies ESG and norms-based screening to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The Fund has the following binding elements:

1) Carbon constraint. The Fund aims to manage a carbon footprint (WACI) for its investment in corporate issuers that is lower than the Index level. This will not apply to sovereign issuers. Should the WACI of the Fund not be lower than the Index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the relevant Fund investment objective to bring the Fund back above the threshold in a reasonable period of time.

2) Negative Screening Policy. The Fund applies investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in corporate issuers based on the negative screening criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they do not trigger a breach of the carbon target and are in line with the Negative Screening Policy.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

Not applicable.

What is the policy to assess good governance practices of the investee companies?

Good governance

practices include sound management structures, employee relations, remuneration of staff and tax compliance.

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available

third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

At least 60% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy and carbon constraint). A maximum of 40% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, securitised debt, derivatives and/or cash and cash equivalents are in category “#2 Other”.

The Fund does not commit to make any sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment, hedging and/or efficient portfolio management purposes but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- ☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

0%. This Fund does not commit on a minimum share of investments in transitional and enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable as this Fund does not commit on making sustainable investments.

What is the minimum share of socially sustainable investments?

Not applicable as this Fund does not commit on making sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The investments included under "#2 Other" are investments (including derivatives, securitised debt and/or cash and cash equivalents) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Where can I find more product specific information online?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective**: ____%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective**: ____%

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG and Governance score of a sovereign issuer against predetermined thresholds.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens.

The Investment Adviser selects investments to the extent they are in line with the negative screening policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are as follows.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns; and
- percentage of corporate issuers failing a screen under the Negative Screening Policy.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable as this Fund does not commit to make sustainable investments.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to make sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes.

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

It should be noted that the Fund expects limited investments in corporate issuers.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted.

Negative Screening Policy: The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

For corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

Negative screening policy. The Fund applies investment restrictions rules at time of purchase on a pre-trade basis in portfolio management systems to prohibit investment in companies and sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

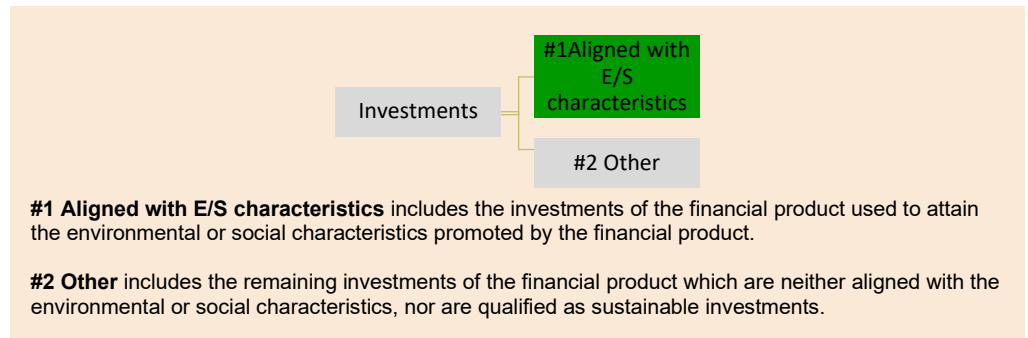

What is the asset allocation planned for this financial product?

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

The Fund does not commit to make any sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas
- ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

This Fund does not commit on a minimum share of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable as this Fund does not commit on making sustainable investments.

What is the minimum share of socially sustainable investments?

Not applicable as this Fund does not commit on making sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents), which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments, but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.

Product name: Capital Group Emerging Markets Local Currency Debt Fund (LUX)
Legal entity identifier: 5493009VJSAE25SFXL78

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?	
☒ ☐ Yes	☐ ☒ ☒ No
☐ It will make a minimum of sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It will make a minimum of sustainable investments with a social objective : ____%	☒ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

For sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. The Investment Adviser uses its proprietary sovereign ESG framework to assess the ESG and Governance score of a sovereign issuer against predetermined thresholds.

For corporate issuers, the Investment Adviser relies on third-party providers who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with these screens.

The Investment Adviser selects investments to the extent they are in line with the negative screening policy.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are as follows.

The Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments. The Fund will monitor:

- percentage of sovereign issuers failing the Investment Adviser's process for assessing sovereigns; and
- percentage of corporate issuers failing a screen under the Negative Screening Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Not applicable as this Fund does not commit to make sustainable investments.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable as this Fund does not commit to make sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes.

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows.

PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on UNGC violators and PAI 14 on controversial weapons are considered when the Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens.

It should be noted that the Fund expects limited investments in corporate issuers.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The Investment Adviser applies the following investment strategy to attain the environmental and/or social characteristics promoted.

Negative Screening Policy: The Investment Adviser evaluates and applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase.

To support this screening on sovereign issuers, the Investment Adviser conducts an eligibility assessment leveraging its proprietary sovereign ESG framework, which covers a range of ESG indicators to evaluate how well a country manages its ESG risk. To be eligible for investment, sovereigns must score above pre-determined thresholds for their proprietary ESG score on both an absolute and GNI-adjusted basis. If the Investment Adviser believes that the third-party data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify exclusions for sovereign issuers through its own assessment. The Investment Adviser also periodically reviews sovereign issuers and if a previously eligible sovereign issuer held in the Fund becomes ineligible, the sovereign issuer will not contribute towards the environmental and/or social characteristics of the Fund and the sovereign issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund (save that if the Investment Adviser believes that a score is below a pre-defined threshold for a temporary or a transitory reason, the Investment Adviser may, from time to time, exercise its discretion to keep holding or purchase securities issued by the sovereign issuer).

For corporate issuers, the Investment Adviser relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. In this way, third party provider data is used to support the application of ESG and norms-based screening by the Investment Adviser. In the event that exclusions cannot be verified through third-party providers or if the Investment Adviser believes that data and/or assessment is incomplete or inaccurate, the Investment Adviser reserves the right to identify business involvement activities through its own assessment (including by using other third-party data sources). If an eligible corporate issuer held in a Fund subsequently fails a screen, the issuer will not contribute towards the environmental and/or social characteristics of the Fund and will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The Fund has the following binding elements:

Negative screening policy. The Fund applies investment restrictions rules at time of purchase on a pre-trade basis in portfolio management systems to prohibit investment in companies and sovereign issuers based on the exclusion criteria. The portfolio also undergoes post-trade compliance checks.

The Investment Adviser selects investments to the extent they are in line with the Negative Screening Policy.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

Not applicable.

● ***What is the policy to assess good governance practices of the investee companies?***

When assessing good governance practices, the Investment Adviser will, as a minimum, have regard to matters it sees relevant to the four prescribed pillars of good governance (i.e., sound management structures, employee relations, remuneration of staff and tax compliance).

As described above, the Investment Adviser applies a Negative Screening Policy to the Fund. As part of this, the Investment Adviser excludes companies that, based on available third-party data, are viewed to be in violation of the principles of the UNGC, which include Principle 10 (anti-corruption) and Principle 3 (employee relations).

In addition, good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process based on available third-party indicators relating to corporate governance and corporate behavior. Third-party data may be inaccurate, incomplete or outdated. Where the corporate governance and corporate behavior indicators cannot be verified through the third-party provider, the Investment Adviser will aim to make such determination through its own assessment based on information that is reasonably available. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests.

If a previously eligible company held in a Fund subsequently fails the Investment Adviser's assessment of good governance practices, the company will generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's ESG philosophy, integration, governance, support and processes, including proxy voting procedures and principles, as well as views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation

describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What is the asset allocation planned for this financial product?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

At least 70% of the Fund's investments are in category “#1 Aligned with E/S characteristics” and so are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding Negative Screening Policy). A maximum of 30% of the Fund's investments including investments non-aligned with the E/S characteristics promoted, derivatives and/or cash and cash equivalents are in category “#2 Other”.

The Fund does not commit to make any sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Fund can use derivatives for investment purposes, hedging and/or efficient portfolio management but will not use them to attain the environmental or social characteristics it promotes.

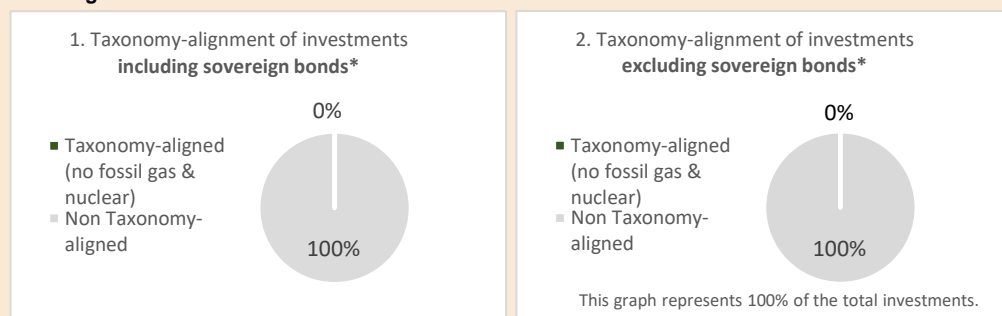

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- ☐ Yes:
- ☐ In fossil gas
 - ☐ In nuclear energy
- ☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?	
☒ Yes	☒ No
☐ It will make a minimum of sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 1% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It will make a minimum of sustainable investments with a social objective : ____%	☐ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices.

The binding environmental and/or social characteristics promoted by the Fund are as follows.

Exclusion Policy. In accordance with the Transition Acceleration Policy (TAP), the Fund will not invest in companies with significant exposure to sectors deemed to be controversial or sensitive, including but not limited to, weapons, tobacco, gambling, energy, electricity production, mining, palm oil and agricultural commodities.

The TAP, established by Belfius Group, the entities of which are the sole distributors of the Fund, seeks to encourage and support businesses in their shift towards more sustainable activities and thereby promote positive environmental and social effects on people, society and the economy.

The TAP is based on the 10 Principles of the UN Global Compact and includes restrictions on certain sectors and businesses such as tobacco, gambling, weapons, energy, electricity production, mining, palm oil and agricultural commodities. Through the TAP, Belfius also intends to reduce negative effects of its investments by discontinuing or limiting its support of activities Belfius views as non-sustainable. The TAP will be developed further over time, according to regulatory developments, technological breakthroughs, sectoral reorientation, evolving stakeholder expectations, etc. Based on yearly review, new sectors may be added, or rules may tighten.

The Capital Group's ESG Policy Statement provides additional detail on the views on specific ESG issues, including ethical conduct, disclosures, corporate governance and climate change. On the latter, Capital Group routinely requests that organisations provide further details on their climate strategy, introduce emission-reduction targets and establish new positions to oversee climate-related issues.

There is no reference benchmark designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The sustainability indicators used by this Fund to measure the attainment of each of the environmental or social characteristics it promotes are as follows.

The Investment Adviser will implement specific investment restrictions defined in the TAP by Belfius Group, the entities of which are the sole Distributors of the Fund, in order to meet Belfius' clients' needs. The TAP is based on the 10 Principles of the UN Global Compact and includes restrictions on sensitive sectors and business areas. While supporting transition, the TAP is meant to reduce the negative impact of certain activities by discontinuing or limiting support to such activities. The TAP will be developed further over time, according to regulatory developments, technological breakthroughs, sectoral reorientation, evolving stakeholder expectations, etc. New sectors may regularly be added or rules may tighten.

In applying these screens, the Fund is considering Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector, Principal Adverse Impact 10 on United Nations Global Compact (UNGC) violators and - Principal Adverse Impact 14 on controversial weapons.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

Through the minimum proportion of sustainable investments, the Investment Adviser shall invest at least 1% of the Fund's net assets in companies that, in the Investment Adviser's opinion, are addressing social and/or environmental challenges through their current or future products and/or services. Such companies will be assessed based on an alignment of business activities with any one or a combination of themes focused on tackling global social and environmental challenges, as outlined by the United Nations Sustainable Development Goals. Therefore, investments could be made in companies addressing needs such as but not limited to: (i) energy transition, (ii) health & well-being, (iii) sustainable cities & communities, (iv) responsible consumption & production, (v) clean water & sanitation, (vi) education & information access, and (vii) financial inclusion. The sustainable investments that the Fund intends to make are subject to the Investment Adviser's eligibility process for sustainable investments. Sustainable investments are those whose business activities are positively aligned with any one or a combination of themes focused on tackling global social and environmental challenges, as outlined by the UN SDGs, and that (i) do not significant harm any environmental or social objective, (ii) follow good governance practices and (iii) satisfy the TAP, which is binding on all investments in the Fund. The minimum allocation calculation referred to above excludes cash and cash equivalents. These assets may be held for liquidity purposes to support the Fund's overall investment objective.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Fund partially intends to make shall not cause significant harm to any environmental or social sustainable investment objective as by implementing the TAP, the Investment Adviser takes an exclusionary approach that applies to the entire portfolio, except for cash and/or cash equivalents, as well as derivatives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

The indicators for adverse impacts on sustainability factors have been taken into account by implementing the TAP, which aims to support transition towards more sustainable activities and limit adverse impacts. The TAP is based on the 10 Principles of the UN Global Compact and includes restrictions on certain sectors and businesses such as tobacco, gambling, weapons, energy, electricity production, mining, palm oil and agricultural commodities. By means of the TAP, it is intended to reduce the negative impact of certain activities by discontinuing or limiting support of non-sustainable activities, hence limiting adverse impacts.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

Capital Group reviews issuers involved in significant ESG controversies, with a focus on those that may conflict with existing global standards, including guidelines from the UNGC. It is also determined if an issuer has violated these standards and appropriate action to remediate the concerns are taken.

Capital Group leverages the UN Global Compact and OECD as an overarching framework for corporate and credit issuers and draws on asset class specific human rights flags in other fixed income asset classes, including sovereigns and structured products. Additionally, Capital Group recognizes that while such issues are critical for businesses, risks of violation are higher in some industries and geographies. Industry-specific considerations are therefore incorporated into Capital Group's proprietary sector-specific

investment frameworks, allowing analysts to focus additional diligence and engagement where there is greater risk.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No

This Fund considers the following principal adverse impacts (PAIs) on sustainability factors:

- Principal Adverse Impact 4 on exposure to companies active in the fossil fuel sector.
- Principal Adverse Impact 10 on UNGC violators.
- Principal Adverse Impact 14 on controversial weapons.

The above-listed principal adverse impacts on sustainability factors are considered as follows:

- The Fund will not invest in companies with significant exposure to sectors deemed to be controversial or sensitive, including but not limited to, weapons, tobacco and gambling, in accordance with the Transition Acceleration Policy established by Belfius Group, the entities of which are the sole Distributors of the financial product (TAP).
- The TAP seeks to encourage and support businesses in their shift towards more sustainable activities and thereby promote positive environmental and social effects on people, society and the economy. The TAP is based on the 10 Principles of the UN Global Compact and includes restrictions on certain sectors and businesses.
- Through the TAP, Belfius also intends to reduce negative effects of its investments by discontinuing or limiting its support of activities Belfius views as non-sustainable. The TAP will be developed further over time, according to regulatory developments, technological breakthroughs, sectoral reorientation, evolving stakeholder expectations, etc. New sectors may regularly be added, or rules may tighten.

Further information on how the financial product did consider principal adverse impacts (PAIs) on sustainability factors will be available in the Company's annual report.

What investment strategy does this financial product follow?

This Fund seeks the balanced accomplishment of three objectives: long-term growth of capital, conservation of principal and current income. In addition to the integration of Sustainability Risks as part of the Investment Adviser's investment decision-making process, the Investment Adviser applies the investment strategy to attain the environmental and/or social characteristics promoted as follows.

In addition to the integration of Sustainability Risks as part of the Investment Adviser's investment decision-making process, the Investment Adviser will implement specific investment restrictions defined in the Transition Acceleration Policy (TAP) by Belfius Group, the entities of which are the sole Distributors of the financial product, in order to meet Belfius' clients' needs.

The Investment Adviser ensures that the companies in which investments are made follow good governance practices.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The Fund has the following binding elements:

- 1) Exclusion policy.** In accordance with the Transition Acceleration Policy (TAP) by Belfius Group, the Fund will not invest in companies with significant exposure to sectors deemed to be controversial or sensitive, including but not limited to, weapons, tobacco gambling, energy, electricity production, mining, palm oil and agricultural commodities.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The TAP, established by Belfius Group, the entities of which are the sole Distributors of the Fund, seeks to encourage and support businesses in their shift towards more sustainable activities and thereby promote positive environmental and social effects on people, society and the economy.

The TAP is based on the 10 Principles of the UN Global Compact and includes restrictions on certain sectors and businesses. Through the TAP, Belfius also intends to reduce negative effects of its investments by discontinuing or limiting its support of activities Belfius views as non-sustainable.

The TAP will be developed further over time, according to regulatory developments, technological breakthroughs, sectoral reorientation, evolving stakeholder expectations, etc. New sectors may regularly be added, or rules may tighten.

- 2) **Good governance practices.** The Fund promotes, among other characteristics, environmental and social characteristics, provided that the companies in which investments are made follow good governance practices. Good governance practices are evaluated as part of the Investment Adviser's ESG integration process. Such practices are assessed through a monitoring process and fundamental analysis based on various metrics. The Investment Adviser regularly engages in dialogue with companies on corporate governance issues.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Fund does not commit to a minimum rate to reduce the scope of investments prior to the application of the investment strategy.

● **What is the policy to assess good governance practices of the investee companies?**

Good governance practices are evaluated as part of the Investment Adviser's eligibility process. Such practices are assessed through a monitoring process. Where relevant, fundamental analysis of a range of metrics that cover auditing practices, board composition, and executive compensation, among others, is also conducted. The Investment Adviser also engages in regular dialogue with companies on corporate governance issues and exercises its proxy voting rights for the entities in which the Fund invests. Capital Group expects companies to recognize the need for constructive relationships with those stakeholders that are most important to the company's specific business – whether it is the workforce, customers, regulators and policymakers, or others in the communities and the environment in which the company operates. Companies that understand how stakeholders relationships affect their reputation can be better equipped to create long-term value. Transparency and accountability are key. Capital Group expects companies to disclose data and insights on areas of stakeholder focus, including aspirational goals, quantitative targets and strategy setting. Capital Group also expects the board to set the tone at the top and provide effective independent oversight.

Capital Group's ESG Policy Statement provides additional detail on Capital Group's views on specific ESG issues, including ethical conduct, disclosures and corporate governance. Information on Capital Group's corporate governance principles can be found in its Proxy Voting Procedures and Principles as well as in the ESG Policy Statement.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Generally, at least 70% of the Fund's investments at the time of purchase are used to attain the environmental or social characteristics promoted by the Fund (being subject to the Investment Adviser's binding negative screening policy).

Generally, a maximum of 30% of the Fund's investments, including derivatives and/or cash and cash equivalents, are in category "#2 Other" and so are not used to attain the environmental or social characteristics promoted by the Fund.

The Fund will have a minimum proportion of 1% of sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy and/or with a social objective.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund can use derivatives for investment, hedging and/or efficient portfolio management purposes, but will not use them to attain the environmental or social characteristics it promotes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

While this Fund promotes environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make "environmentally sustainable investments" within the meaning of the Taxonomy Regulation is set at 0% (including in transitional and enabling activities).

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?**

Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

This Fund does not commit on a minimum share of investments in transitional and enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

While it does not have as its objective a sustainable investment, the Fund will have a minimum proportion of 1% of sustainable investments with an environmental objective in economic activities that are not aligned with the EU Taxonomy and/or with a social objective.

What is the minimum share of socially sustainable investments?

While it does not have as its objective a sustainable investment, the Fund will have a minimum proportion of 1% of sustainable investments with a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The investments included under “#2 Other” are investments (including derivatives and/or cash and cash equivalents) which are not aligned with the environmental or social characteristics but are used to attain the investment objective of the Fund. There are no minimum environmental or social safeguards applicable to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No, there is no specific index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes.
