

Capital Group UK – Global High Income Opportunities Fund

A sub-fund of Capital Group Fund, an OEIC umbrella fund managed by Capital Group UK Management Company. LEI Code 549300YNQO2HJ1BFHZ18

This document provides sustainability-related information for consumers in relation to the fund. The fund does not have a UK sustainable investment label as it does not have a sustainability goal in line with the requirements of the Environmental, Social and Governance Sourcebook of the Financial Conduct Authority. Sustainable investment labels help investors find products that have a specific sustainability goal.

SUSTAINABILITY APPROACH

Being actively managed, the fund integrates sustainability risks and opportunities in its investment decisions as follows:

- **Carbon intensity constraint;** the fund seeks to maintain a carbon intensity (WACI) for its investments in corporate bonds (sovereign bonds are out of scope) that is lower than that of its benchmark, an index composed by 50% Bloomberg US Corporate High Yield 2% Issuer Capped, 20% JPMorgan EMBI Global, 20% JPM GBI-EM Global Diversified and 10% JPM CEMBI Broad Diversified.
- **ESG and norms-based screening;** the fund excludes companies based on their economic activities or the infringement of international norms as follows:

Norms-based	<ul style="list-style-type: none"> • Violation of UN Global Compact principles
Controversial weapons	<ul style="list-style-type: none"> • Any involvement in the production of controversial weapons (such as cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and non-detectable fragments) • Any intentional involvement in the production of nuclear missiles and warheads
Fossil fuels	<ul style="list-style-type: none"> • 10% or more of revenue from the production of Arctic oil • 10% or more of revenue from the extraction of oil sands • 10% or more of revenue from the production and/or distribution of thermal coal
Tobacco	<ul style="list-style-type: none"> • 5% or more of revenue from the manufacture of tobacco
Other	<ul style="list-style-type: none"> • Sovereigns that score below Capital Group’s ESG sovereign thresholds

The full list of exclusions is set out in the Capital Group Fund Negative Screening Policy (see link at the end of this document).

To support this screening on corporate and sovereign issuers, Capital Group relies on third-party provider(s) who identify an issuer’s participation in or the revenue which they derive from activities that are inconsistent with the ESG and norms-based screens. If exclusions cannot be verified through third-party providers or Capital Group believes that data and/or assessment is incomplete or inaccurate, it may identify business involvement activities through its own assessment (including by using other third-party data sources).

If an eligible issuer held in the fund subsequently fails a corporate or sovereign issuer screen, the issuer will generally be sold within six months from the date of such determination, subject to the best interests of investors in the fund.

SUSTAINABILITY METRICS

Carbon intensity comparison As at 31 May 2025, the fund's carbon footprint, measured by Weighted Average Carbon Intensity (WACI), is **39%** lower than its benchmark.

The WACI calculation includes Scope 1 emissions (direct emissions from the company's facilities) and Scope 2 emissions (indirect emissions linked to the company's energy consumption). Scope 3 emissions (the indirect emissions that occur through a company's value chain, including upstream and downstream activities such as emissions from a supply chain or customers using a product) are not currently included in the calculation of the WACI due to limited availability of company reported data. The exclusion of Scope 3 emissions from the WACI may at times have the effect of under-representing the emissions profile of the investee companies as well as the overall fund's portfolio.

The WACI is monitored at the total portfolio level rather than the individual holding level, and the fund's portfolio may include comparatively high carbon emitters as it is not the intention of the investment adviser to automatically exclude them on an individual basis.

Benchmark 50% Bloomberg US Corporate High Yield 2% Issuer Capped, 20% JPMorgan EMBI Global, 20% JPM GBI-EM Global Diversified and 10% JPM CEMBI Broad Diversified.

Data provider MSCI ([msci.com](https://www.msci.com)). Data may not be available for all portfolio holdings.

Data coverage 46% of the fund's investments for which MSCI data is available. Issuers for which data are not available are excluded from the WACI calculation.

Carbon intensity as at 31 May 2025 (in tons of CO₂e/USD1m revenue)

Terms to understand

Benchmark An index or combination of indices used by a fund to attain or compare its return performance and/or ESG characteristics.

Carbon intensity or Weighted Average Carbon Intensity (WACI) Measure of the fund's carbon intensity calculated as the sum of all greenhouse gas emissions per USD 1 million revenue of each investee company or bond issuer (in tons of carbon dioxide equivalent or CO₂e) multiplied by their weight in the fund.

Corporate issuer A company that sells securities to finance its operations, such as bonds or equity shares.

ESG Environmental, social and governance.

ESG characteristic At either the security or issuer level, a feature that has a positive effect on ESG considerations (such as climate change mitigation, environmental protection, natural resource preservation, waste management, education, working conditions improvement, business governance, gender equality, human rights or anti-corruption efforts).

ESG risk, sustainability risk An ESG event or trend that, if it occurs, may cause reputational or financial harm to a corporate or sovereign issuer and the value of an investment.

Norms-based analysis Determines whether a company complies with the universal principles in the United Nations Global Compact.

Sovereign issuer Any government, national authority or the European Investment Bank, the International Finance Corporation or the International Monetary Fund, that issues securities to finance its operations, such as bonds.

UN Global Compact A United Nations initiative to encourage businesses worldwide to adopt sustainable and socially responsible policies, and to report on their implementation.

Interpreting this document Terms used or defined in the prospectus and other documents that are clearly intended to be analogous to terms used in this document should be considered equivalent; for example, "Sub-Fund" elsewhere would correspond to "fund".
