KEY RISKS

These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to paragraph 10 of the Singapore Prospectus for more information on risks of the product.</p>

Market and Credit Risks					
<ul style="list-style-type: none"> You are exposed to market risks as the Fund invests in Equities and/or Bonds. The prices of Equity securities may decline in response to certain events, including but not limited to those directly affecting the companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency fluctuations. 					
Liquidity Risks					
<ul style="list-style-type: none"> The Fund is not listed and you can redeem the Shares only on each Valuation Date. There is no secondary market for the Fund. The redemption requests may be made to the Management Company through the transfer agent or the appointed distributors in Singapore. 					
Product-Specific Risks					
<ul style="list-style-type: none"> You are exposed to emerging markets risks. The Fund faces a number of investment risks greater than those normally associated with investments in international securities. In particular, it may encounter settlement systems that are less well organised than those of developed markets. There may be risks that settlement may be delayed and that cash or securities belonging to the Fund may be in jeopardy because of failures of or defects in the systems or because of defects in the administrative operations of the counter-parties. You are exposed to China Interbank Bond Market risk and Bond Connect risks. Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. The Fund investing in such market is therefore subject to liquidity and volatility risks.
