Investment Strategy	
<ul style="list-style-type: none"> • The Fund invests primarily in USD-denominated corporate Investment Grade Bonds. These Bonds will be Investment Grade at the time of purchase. These are usually listed or traded on other Regulated Markets. • The Fund aims to manage a carbon footprint (WACI) for its investments in corporate issuers that is lower than the Fund's selected index, as set out in Annex 4. Should the WACI of the Fund not be lower than the level of the aforementioned index, the Investment Adviser will consider what action is in the best interest of the Fund, its Shareholders and in line with the Fund's investment objective to bring the Fund back above the threshold in a reasonable period of time. The Investment Adviser relies on carbon footprint data from a third party provider to carry out ongoing monitoring of WACI intensity at the Fund level, and may reduce or eliminate exposures to certain companies as necessary. • The Investment Adviser evaluates and applies ESG and norms-based screening to implement exclusions at time of purchase on corporate issuers, with respect to certain sectors such as fossil fuel and weapons. The negative screening policy applied can be found on Capital Group's website. • The Fund commits to maintain at least 10% in sustainable investments (i) assessed based on alignment of business activities with any one or a combination of sustainable investment themes focused on tackling global social and environmental challenges, as outlined by the UN SDGs; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. Companies must have good governance practices. • The Fund will seek to invest at least 80% of its total net assets in corporate Bonds. Investment in Bonds will be limited to Investment Grade Bonds. Securities that fail to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser) must be sold within six months, taking into account the interests of Shareholders. In the case of split-rated Bonds, the highest credit rating of Standard & Poor's, Moody's or Fitch will apply. • The Fund may invest in ABS or MBS, credit-linked notes and similar instruments of a credit rating no lower than Investment Grade, such investments not to exceed 10% of the net assets of the Fund and provided that the issuer is either located in a member state of the OECD or an European Economic Area country and/or the assets are admitted to trading on or included in a Regulated Market. • The Fund may use financial derivative instruments for investment purposes, hedging and/or efficient portfolio management. Instruments permitted are interest rate swaps, CDXs, CDS, forward contracts, FX options, futures and options on futures. The Fund may also purchase unlisted securities and other fixed-income securities, including government securities, subject to relevant provisions of Annex 1. • For treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1. 	<p>Refer to paragraph (a) of Appendix 13 of the Singapore Prospectus for more information on the investment policy and strategy of the Fund.</p>
