Securities that fail to maintain an Investment Grade rating from at least one rating agency (or which are no longer deemed Investment Grade by the Investment Adviser) must be sold within six months, taking into account the interests of Shareholders. In case of split-rated Bonds, the highest credit rating of S&P, Moody's or Fitch will apply. Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> The Fund is a sub-fund of a SICAV. The board of directors of Capital International Fund (“Company”) is ultimately responsible for the management and administration of the Fund, including the determination of its general investment policies. The Management Company is Capital International Management Company Sàrl who is responsible for the investment management, the administration and the implementation of the Fund's distribution and marketing functions as prescribed by the relevant Luxembourg law. The Singapore Representative for the Fund is Capital Group Investment Management Pte. Ltd. The Investment Adviser is Capital Research and Management Company. The Investment sub-Adviser is Capital International Sàrl. The Depository and Custodian is J.P. Morgan SE, Luxembourg Branch. 	<p>Refer to paragraphs 1 to 4 of the Singapore Prospectus for more information on the role and responsibilities of these entities and refer to paragraph 26 of the Singapore Prospectus for what happens if they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to paragraph 10 of the Singapore Prospectus for more information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risks as the Fund invests primarily in Bonds. The market values of Bonds generally vary inversely with the level of interest rates – when interest rates rise, their values will tend to decline and vice versa. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Fund is not listed and Shares can only be redeemed on each Valuation Date. There is no secondary market for the Fund. The redemption requests may be made to the Management Company through the transfer agent or the appointed distributors in Singapore. 	

Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to derivatives risks. Derivatives may expose the Fund to certain additional risks relative to traditional securities such as credit risks of the counterparty, imperfect correlation between derivatives prices of related assets, rates or indices, potential loss of more money than the actual cost of the investment, potential for leverage, increased volatility and reduced liquidity and risk of mispricing or improper valuation. • You are exposed to Emerging Markets risks. Investing in Emerging Markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, Emerging Markets may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities. • You are exposed to OTC Markets risks. The Fund may invest in securities that are actively traded in an OTC market. Trading on such markets may involve higher risks than trading on official stock exchanges due to, in particular, lower market liquidity as well as lower investor protection in applicable regulations and available information. • You are exposed to mortgage and asset-backed securities risks. Mortgage-related securities, such as mortgage-backed securities (“MBS”), and other asset-backed securities (“ABS”), include debt obligations that represent interests in pools of mortgages or other income-bearing assets, such as consumer loans or receivables. Such securities often involve risks that are different from or more acute than the risks associated with investing in other types of debt securities. MBS and ABS securities are subject to changes in the payment patterns of borrowers of the underlying debt which can result in prepayment and extension risks. • You are exposed to China Interbank Bond Market risk and Bond Connect risks. Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. The Fund investing in such market is therefore subject to liquidity and volatility risks.
