PRODUCT HIGHLIGHTS SHEET

consumption & production, (v) education & information access, (vi) financial inclusion and (vii) clean water & sanitation. • Investments may also include companies which, in the opinion of the Investment Adviser, are actively transitioning their activities to have higher positive alignment to the UN SDGs, with material near or medium-term change expected. • The Fund commits to maintain at least 60% of its investments in sustainable investments (i) which are assessed based on alignment of business activities with any one or a combination of sustainable investment themes as mentioned above; and (ii) which do not cause any significant harm to any environmental or social sustainable investment objectives. • Companies must have satisfactory management of ESG risks and good governance practices. The Investment Adviser applies ESG and norms-based exclusions to implement a negative screening policy at the time of purchase relating to the Fund's investments in companies. To support this implementation, it relies on third party providers who identify a company's participation in or the revenue which they derive from activities that are inconsistent with these exclusions. If exclusions cannot be verified through these third-party providers, the Investment Adviser will aim to identify business involvement activities through its own assessment. The negative screening policy applied by the Investment Adviser can be found on Capital Group's website. • The Fund may invest up to 30% in Emerging Markets. The Fund may invest, either directly e.g. via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and/or indirectly such as by way of access warrants and/or other access products, up to 5% of the net assets of the Fund in China A Shares. The Fund may use, whether for hedging and/or efficient portfolio management purposes, forward contracts and index futures. • The Fund may enter into securities lending transactions by lending securities of its portfolio to brokers, dealers and other institutions that provide cash in USD, EUR or JPY currency or US Treasury securities as collateral in an amount at least equal to the value of the securities loaned. No more than 15% of the net assets of the Fund will be used for lending securities. The level of exposure to securities lending is generally expected to be less than 5% of the net assets of the Fund. • For treasury purposes and/or in case of unfavourable market conditions, the Fund may also invest in deposits with credit institutions, money market instruments and units of money market funds within the meaning of the investment restrictions set out in Annex 1.
