<sup>1</sup> Bank overdraft could be the result of fund accounting cash settlements that do not appear to be duly covered by an available cash balance. The fund is typically sufficiently covered with cash held in the JPMorgan Liquidity Funds and overdraft balances are the consequence of a delay of the accounting records to reflect a net positive cash and cash related holdings as at any given value date.

<sup>1</sup> Formerly known as Capital Group Emerging Markets Growth Fund (LUX) prior to 19 September 2025.

<sup>2</sup> Formerly known as Capital Group European Growth and Income Fund (LUX) prior to 12 December 2025.

<sup>3</sup> Fund was liquidated on 04 December 2025.

The accompanying notes form an integral part of these financial statements.

# Notes to the financial statements

As at 31 December 2025

## 1) Capital International Fund (CIF)

### a. Legal structure

CIF is an investment company (the “Company”) organised as a Société d’Investissement à Capital Variable (SICAV) in the Grand Duchy of Luxembourg and is established as an Undertaking for Collective Investment in Transferable Securities (UCITS) under Part 1 of the amended law of 17 December 2010. CIF is a SICAV managed by a management company, namely Capital International Management Company, Sàrl (the “Management Company”), on 1 February 2013. CIF commenced operations on 30 December 1969.

### b. Funds

CIF has adopted a multiple-compartment (or “umbrella”) structure. CIF currently comprises the following funds (the “funds”): Capital Group New Perspective Fund (LUX), Capital Group Future Generations Global Opportunities Fund (LUX), Capital Group Global Equity Fund (LUX), Capital Group World Growth and Income (LUX), Capital Group World Dividend Growers (LUX), Capital Group New Economy Fund (LUX), Capital Group New World Fund (LUX), Capital Group Emerging Markets Equity Fund (LUX) (Capital Group Emerging Markets Growth Fund (LUX) until 19 September 2025 when the name changed), Capital Group Asian Horizon Fund (LUX), Capital Group Japan Equity Fund (LUX), Capital Group European Opportunities (LUX), Capital Group European Core Equity Fund (LUX) (Capital Group European Growth and Income Fund (LUX) until 12 December 2025 when the name changed), Capital Group AMCAP Fund (LUX), Capital Group Investment Company of America (LUX), Capital Group Capital Income Builder (LUX), Capital Group Global Allocation Fund (LUX), Capital Group Future Generations Global Balanced Fund (LUX), Capital Group American Balanced Fund (LUX), Capital Group Emerging Markets Total Opportunities (LUX), Capital Group Global Bond Fund (LUX), Capital Group Global Intermediate Bond Fund (LUX), Capital Group Global Total Return Bond Fund (LUX), Capital Group Euro Bond Fund (LUX), Capital Group Global Corporate Bond Fund (LUX), Capital Group Future Generations Global Corporate Bond Fund (LUX), Capital Group US Corporate Bond Fund (LUX), Capital Group Global High Income Opportunities (LUX), Capital Group Multi-Sector Income Fund (LUX), Capital Group US High Yield Fund (LUX), Capital Group Emerging Markets Debt Fund (LUX), Capital Group Emerging Markets Local Currency Debt Fund (LUX), Capital Group EUR Moderate Global Growth Portfolio (LUX) (liquidated), Capital Group EUR Balanced Growth and Income Portfolio (LUX) (liquidated), Capital Group EUR Conservative Income and Growth Portfolio (LUX) (liquidated), Capital Group EUR Conservative Income Portfolio (LUX) (liquidated).

### c. Share classes and currencies

Shares of each fund may be divided into class A4, A7, A9, A11, A13, A15, B, BL, C, L, N, P, S, U1, Y, Z and ZL shares. In addition, some classes of some funds may be further broken down into equivalent classes.

The funds publish net asset values (NAVs) and offer dealing and reporting in various payment currencies, except hedged equivalent and dividend-distributing hedged equivalent classes for which the funds publish NAVs and offer dealing in the currency referred to in the relevant class’s designation only. A detailed list of all active share classes as at 31 December 2025 is disclosed on pages 19 to 38. Furthermore, the list of all active share classes, available payment currencies and other details can be found online on the Management Company’s webpage at [capitalgroup.com/international](https://capitalgroup.com/international).

The reporting currency in which the combined financial statements accounts are prepared is Euro. This currency may be different from the reporting currency of each CIF funds which are expressed in Euro, US dollars or Yen.

The combined statement of net assets and the combined statement of operations and changes in net assets are the sum of the statement of net assets, the statement of operations and changes in net assets of each fund converted into the Company’s reporting currency using an exchange rate as at 31 December 2025.

## 1) Capital International Fund (CIF) (continued)

### d. Dividend Policy

**Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class B, Class BL, Class C, Class L, Class N, Class P, Class S, Class Y, Class U1, Class Z, Class ZL and corresponding Hedged Equivalent Classes**

It is not at present intended that dividends be distributed to Shareholders of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class B, Class BL, Class C, Class L, Class N, Class P, Class S, Class Y, Class Z, Class ZL and corresponding Hedged Equivalent Classes in any fund.

#### **Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes**

■ **Principle and amount:** The Board of Directors of the Company intends to recommend that dividends be distributed to Shareholders of all Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes.

**Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a “d”:** The dividend will generally represent all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, net investment income.

**Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a “gd”:** The dividend will generally represent a substantial part of the gross investment income (i.e., investment income net of withholding taxes but gross of expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, gross investment income. The payment of dividends out of gross investment income implies that all or part of the fees and expenses are charged to capital (i.e. accumulated capital gains or initial investment).

**Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with an “ad”:** This share class is available only to Capital Group investors, subject to conditions established from time to time by Capital Group. The dividend will generally represent all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, net income.

**Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a “fdx”:** The dividend will generally be fixed based on a pre-determined annual percentage of Net Asset Value per Share and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of these Classes. The payment of a fixed dividend implies that any payment in excess of the net investment income may include capital gains, as well as partially be paid out of capital. These Classes will only be available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company.

**Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a “fd”:** The dividend will generally be fixed and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The payment of a fixed dividend implies that any payment in excess of the net investment income may include capital gains, as well as partially be paid out of capital.

**Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a “fyd”:** The dividend will be calculated based on a fixed percentage of the Net Asset Value per Share, resulting in a variable dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The payment of a dividend calculated in this manner implies that any payment in

## 1) Capital International Fund (CIF) (continued)

### d. Dividend Policy (continued)

excess of the net investment income may include capital gains and/or payments out of capital which may result in the reduction of invested capital over time. The fixed percentage applied to the Net Asset Value per Share is intended to achieve a predictable annual dividend yield. The fixed annual dividend yield may be changed at the discretion of the Management Company taking into consideration exceptional circumstances.

■ **Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes with an “m” designation:** It is intended that these Classes will distribute dividends monthly.

These are marked by a “m”, i.e. “dm”, “gdm”, “adm”, “fdm”, “fdxm” or “fydm” depending on the applicable dividend methodology (see “Dividend Policy” above for details) or “dmh”, “gdmh”, “admh”, “fdmh”, “fdxmh” or “fydmh” Dividend-distributing Hedged Equivalent Classes.

- **Payment:** Shareholders can elect in writing to have their dividends either reinvested in Shares or paid to them. In the absence of instruction from a Shareholder, the Administrative Manager will automatically reinvest any dividends in Shares promptly upon payment of the dividend. If the Shareholder elects to have dividends paid, the relevant amount will be paid at no charge by bank transfer in the relevant Payment Currency to the bank account designated for this purpose (with all necessary details as specified in the Account Opening Form) by the Shareholder. Upon dividends paid to a Shareholder having been returned to the Company for the second consecutive year, the Administrative Manager will reinvest in Shares the amounts so returned, as well as the amount of any subsequent dividend paid to the same Shareholder until otherwise instructed.

### e. Accounting year

The accounting year of CIF begins on 1 January and terminates on 31 December in each year.

## 2) Significant accounting policies

### a. General

These financial statements are prepared in accordance with Luxembourg laws, regulations and practices relating to investment funds. The last audited Net Asset Value, and the last day on which prices were calculated for all funds, was 31 December 2025, with the exception of Capital Group Japan Equity Fund (LUX) which was on 29 December 2025 and Capital Group Emerging Markets Local Currency Debt Fund (LUX) which was on 30 December 2025. Please note that Fund Non-trading dates calendar for the year ongoing is available on CG website at [capitalgroup.com/international](https://capitalgroup.com/international). The financial statements have been prepared on a going concern basis, except those of Capital Group EUR Moderate Global Growth Portfolio (LUX) (liquidated), Capital Group EUR Balanced Growth and Income Portfolio (LUX) (liquidated), Capital Group EUR Conservative Income and Growth Portfolio (LUX) (liquidated), Capital Group EUR Conservative Income Portfolio (LUX) (liquidated), which have been prepared on a non-going concern basis following their liquidation on 4 December 2025.

### b. Valuation of investments

- i. Except as otherwise provided in (v) below, securities which are listed on an official stock exchange or traded on any other regulated market are valued at the last traded or otherwise available price at the time the NAV is calculated on the principal market on which they are traded, as published by such market or furnished by a pricing service approved by the Board of Directors of the Company; and other securities are valued at prices furnished by, or yield equivalents obtained from, one or more dealers or such pricing service.
- ii. Securities issued by UCITS or UCIs will be valued at their last available NAV on the relevant valuation date; they may be valued in accordance with item (i) above where such securities are listed.

## 2) Significant accounting policies (continued)

### b. Valuation of investments (continued)

- iii. Money market instruments will be valued at nominal value plus any accrued interest or using an amortised cost method, provided that this method of valuation ensures that such assets will be valued at their fair value as determined in good faith pursuant to the procedure established by the Board of Directors of the Company.
- iv. Swaps will be valued at the net present value of their cash flows.
- v. The liquidating value of OTC derivatives shall be determined based on information provided by pricing services approved by the Board of Directors of the Company.
- vi. If a price representative of a security's fair value is not readily available from the pricing sources described under (i) through (iv) above, or if the accuracy of a portfolio's valuation, as established pursuant to (i) above, is materially affected by events that occur prior to the NAV being calculated, the relevant security or securities will be valued at the fair value, as determined by or under the direction of the Board of Directors of the Company. Use of such fair valuation procedures is intended to result in more representative NAVs and to eliminate or substantially reduce potential arbitrage opportunities at the expense of shareholders that might otherwise be available to short-term investors. In addition, the closing prices of equity securities that trade in markets outside US time zones may be adjusted to reflect significant events that occur after the close of local trading but before the Net Asset Value of each Share Class of the Fund is determined.

### c. Foreign currencies

- i. Assets and liabilities in currencies other than euros have been translated into euros at the prevailing exchange rates as at 31 December 2025. Transactions during the period in currencies other than euros have been translated at rates prevailing at the time of the transaction. The variation of the net unrealised exchange gains or losses on open forward currency exchange contracts and on other assets and liabilities between 31 December 2024 and 31 December 2025 is disclosed in "net change in unrealised appreciation/(depreciation) on foreign currency transactions". The net realised gains or losses on exchange, including on open forward currency exchange contracts expired during the period, are disclosed in "net realised gain/(loss) on foreign currency transactions".

The principal exchange rates applied as at 31 December 2025 are 1 EUR = 184.083327894410 YEN and 1 EUR = 1.175199999326 USD.

- ii. If a current quote representative of a foreign currency value is not readily available, or if the accuracy of a portfolio's valuation, as established pursuant to (i) above, is significantly affected by events that occur prior to the NAV being calculated, the relevant foreign currency or currencies will be valued at the fair value, as determined by or under the direction of the Board of Directors of the Company. Use of such fair valuation procedures is intended to result in more representative NAVs and to eliminate or substantially reduce potential arbitrage opportunities at the expense of shareholders that might otherwise be available to short-term investors.

### d. Income

Dividends are taken into income on the date upon which the relevant securities are first listed as ex-dividend. Interest income is accrued on a daily basis.

The securities lending income is accounted for on a cash basis on the 16th day of each month following the month that the revenue was generated, net of lending fees paid to the lending agent.

## 2) Significant accounting policies (continued)

### d. Income (continued)

Premiums and discounts on convertible bonds, sinkable bonds, sinkable-callable bonds, index-linked assets, inflation linked assets, dirty priced bonds and unitised bonds are amortised using an effective interest rate (EIR) methodology. Premiums and discounts on all other fixed income securities are amortised on a straight-line basis.

### e. Securities lending

Fund may use securities financing transactions as defined under Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 by entering into securities lending transactions to provide an additional source of potential investment return to Shareholders, which will help achieve the Fund's investment objective. Where a fund enters into securities financing transactions, only equity securities will be subject to securities lending transactions.

Each transaction involves three parties, the fund, a borrower, and the lending agent. Portfolio securities of the relevant fund will be lent to borrowers such as brokers, dealers or other institutions approved by Capital Group. Borrowers are subject to prudential supervision rules that the CSSF deems equivalent to those required under EU Law. The lending agent facilitates the exchange of securities between the fund and approved borrowers under a securities lending agreement.

All revenues from securities lending transactions shall be payable to the relevant fund following the deduction of compensation to the lending agent for its services. The expenses which may be deducted from the revenue delivered to the relevant fund should generally not exceed 5% of the gross revenue arising from securities lending transactions. The difference, i.e. 95%, will be paid to the relevant fund.

See "Appendix 1: Securities Financing Transactions Regulation (SFTR) disclosure" for further information on securities lending transactions.

The value of loaned securities, related collateral outstanding, identity of the counterparties, security lending income and associated operational costs and fees as at 31 December 2025 are as follows:

| Fund                                     | Fund currency | Counterparty  | Market value of securities on loan (in fund currency) | Cash collateral (in fund currency) | Non cash collateral (in fund currency) | Total collateral (in fund currency) |
|------------------------------------------|---------------|---------------|-------------------------------------------------------|------------------------------------|----------------------------------------|-------------------------------------|

<sup>1</sup> Formerly known as Capital Group Emerging Markets Growth Fund (LUX) prior to 19 September 2025.

<sup>2</sup> Formerly known as Capital Group European Growth and Income Fund (LUX) prior to 12 December 2025.

### f. Realised gain or loss on sale of investments

The realised gain or loss on sale of equities is determined on the average cost basis and the methodology of calculating gains or losses on disposal of fixed income securities is first-in-first-out (FIFO).

### g. Unfunded capital commitments

Unfunded capital commitments represent agreements which obligate the Capital Group Emerging Markets Equity Fund (LUX) to meet capital call in the future. Payment would be made when a capital call is requested. Capital calls can only be made if and when certain requirements have been fulfilled; thus, the timing and the amount of such capital calls cannot readily be determined. Unfunded capital commitments are recorded when capital calls are requested. As of 31 December 2025, unfunded capital commitments were US\$4,432,618.

## 2) Significant accounting policies (continued)

### h. Mortgage related securities - To Be Announced securities contracts (TBAs)

TBA contracts are forward contracts on agency mortgage pass-through securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. The particular securities (i.e., specified mortgage pools) to be delivered or received are not identified at the trade date, but are “to be announced” on the notification date which is two days before the settlement date. However, securities to be delivered must meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted “good delivery” standards. TBAs settle once each month based on a calendar published by the Securities Industry and Financial Markets Association.

TBA positions are disclosed in the schedule of investments. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under “Payable for To Be Announced contracts” in the statement of net assets.

Negative positions in the schedule of investments reflect the fund’s sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under “Receivable for To Be Announced contracts” in the statement of net assets.

The realised gain/(loss) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the statement of operations and changes in net assets respectively under the headings “Net realised gain/(loss) on sale of investments” and “Net change in unrealised appreciation/(depreciation) on investments”.

### i. Swing pricing adjustment

A fund may suffer dilution of the net asset value as a result of large subscriptions, redemptions or switches. Such dilution would arise from shareholders buying or selling shares at a net asset value which would not accurately reflect the dealing and other costs incurred when securities are traded to accommodate cash inflows or outflows. In order to counter such dilution impact, the Company adopts a swing pricing mechanism as part of its valuation policy. If on any valuation date, the net aggregate amount of subscriptions or redemptions in shares of a fund exceeds a pre-determined threshold expressed as a percentage of the net asset value of that fund, the net asset value may be adjusted upwards or downwards to reflect the costs attributable to the underlying trade in securities undertaken by the Investment Advisers to accommodate inflows or outflows as the case may be.

Any swing pricing adjustment to such net asset value will be applied systematically and consistently based on predefined factors. The price adjustment may vary from fund to fund and will normally not exceed 3% of the original net asset value. The Company may decide to suspend the application of any swing pricing adjustment to the net asset value of any particular fund or increase this price adjustment limit in exceptional circumstances to protect the interests of shareholders. Such price adjustment is available on the Management Company’s webpage at [capitalgroup.com/international](http://capitalgroup.com/international) concomitantly with the publication of the relevant net asset value. The Company, relying on the Management Company and its Conducting Officers’ ongoing review, will reassess on a periodic basis the price adjustment factors to reflect an approximation of current dealing and other costs.

As at year end, swing pricing adjustment has not been applied to Capital International Fund (CIF).

### 3) Fees and expenses

#### a. Management fee and Annual administration charge (AAC)

CIF pays the management fee at the annual rates specified below. This fee is used to compensate the Management Company which can in turn use it to compensate the Investment Advisers for their investment advisory services and the distributors and other intermediaries, as applicable, for services to investors or similar services in relation to investments made with their assistance.

The Company also pays an Annual Administration Charge to the Management Company. The Annual Administration Charge is used by the Management Company to pay certain charges and expenses incurred in relation to the operation and administration of the Company and the funds. The Annual Administration Charge is a fixed-rate charge accrued on a daily basis by reference to the Net Asset Value and is payable monthly in arrears to the Management Company. The Annual Administration Charge is charged first against income. In the event the actual costs incurred by the funds exceed the level of the Annual Administration Charge applicable to a Class, the Management Company will bear the excess.

The Annual Administration Charge includes costs related, but not limited, to depositary and custody fees, and other relevant charges that may occur from time to time. More details on the other charges can be found in the CIF prospectus, available on the Management Company's webpage at [capitalgroup.com/international](http://capitalgroup.com/international).

The Annual Administration Charge is applied to the share classes and their equivalent classes in accordance with the rates outlined in the table below.

Each share class is designed to support the needs of different investor types and has a different total expense ratio that affects the returns to shareholders. The CIF prospectus, available on the Management Company's webpage at [capitalgroup.com/international](http://capitalgroup.com/international), explains further the differences between share classes.

The Management Company established a reimbursement threshold so that each fund's total expense ratio (excluding management fee) did not exceed the maximum annual rates specified below:

|                                                 | Management fee | Annual administration charge (AAC) | Maximum expense ratio (excluding management fee) |

<sup>1</sup> Investments in shares of class C and equivalent classes may only be made by investors having entered into a separate agreement with respect to management fee.

<sup>2</sup> Investments in shares of class Y and equivalent classes may only be made by investors having entered into a separate agreement with respect to management fee.

<sup>3</sup> Formerly known as Capital Group Emerging Markets Growth Fund (LUX) prior to 19 September 2025.

<sup>4</sup> Formerly known as Capital Group European Growth and Income Fund (LUX) prior to 12 December 2025.

<sup>5</sup> Fund was liquidated on 4 December 2025.

#### b. Reimbursement of expenses

On a daily basis, for share classes where the expenses are capped, the level of expenses is calculated and compared to the cap and where the level of expenses is higher than the cap, this difference is booked as a decrease of expense (the "waiver fees"). The amount of waiver fees is disclosed as "Reimbursement of expenses" in the "Combined statement of Operations and Changes in Net Assets."

### 4) Dividend distribution

Details on the dividend policy can be found under note 1d to the financial statements.

The following quarterly and yearly dividends were distributed during the year ended 31 December 2025:

|                                                   | Dividend per share (in EUR)                              |                                                      |                                                    |                                                          |

<sup>1</sup> Formerly known as Capital Group European Growth and Income Fund (LUX) prior to 12 December 2025.

#### 5) Taxation

##### a. Taxe d'abonnement

In Luxembourg, CIF is subject only to a tax ("taxe d'abonnement") at the annual rate of 0.05% of the total net assets of each share class in each fund. However, as provided by the relevant Luxembourg laws in respect of share classes wholly held by institutional investors, a reduced rate of 0.01% per annum was applied in respect of class A4, A7, A9, A11, A13, A15, C and equivalent share classes, where available, for the year ended 31 December 2025. It should be noted that there can be no guarantee that the benefit of such reduced rate will not be denied or that, once obtained, it will continue to be available in the future. Such tax is accrued daily, payable quarterly and calculated on the total NAV of each share class at the end of the relevant quarter.

##### b. Foreign taxes

Capital gains and income on securities may be subject to respectively capital gain taxes and withholding taxes. CIF is not expected to recover such taxes in full, but may have the possibility to reclaim a portion of the withholding taxes in accordance with the tax relief provided for in the double tax treaties in place between Luxembourg and some foreign countries.

It is CIF's policy to accrue for withholding taxes and any other significant liability for foreign capital gain taxes.

The below funds had a provision for Indian Capital Gains Tax net of any refunds as at the period end, the amounts are included within the "Provision for foreign tax" on the Statement of Assets and Liabilities, and movement in the provision for Indian Capital Gains Tax since last year end is disclosed as "Unrealised capital gain tax on investments" on the Combined statement of operations and changes in net assets:

|                                                                 | Fund Currency | Provision at 31 December 2025 (in fund currency) | Provision at 31 December 2024 (in fund currency) | Movement (in fund currency) |
|-----------------------------------------------------------------|---------------|--------------------------------------------------|--------------------------------------------------|-----------------------------|
| <b>Capital Group New World Fund (LUX)</b>                       | USD           | 2,159,898                                        | 2,685,993                                        | (526,095)                   |
| <b>Capital Group Emerging Markets Equity Fund (LUX)</b>         | USD           | 754,006                                          | 977,092                                          | (223,086)                   |
| <b>Capital Group Asian Horizon Fund (LUX)</b>                   | USD           | 117,974                                          | 1,123,161                                        | (1,005,187)                 |
| <b>Capital Group Emerging Markets Total Opportunities (LUX)</b> | USD           | 651,389                                          | 1,291,765                                        | (640,376)                   |

Under certain circumstances, CIF may file claims with the tax authorities of some foreign countries, when the tax treatment it has been subject to could be considered as contestable or discriminatory. The nature of these claims is complex and subject to each jurisdiction's local procedural rules and case law. In such cases, in view of the uncertainty of success, and in accordance with the accounting principle of prudence applied in Luxembourg, CIF does not accrue for the potential tax refund. When a claim is successful, any significant withholding tax or capital gain tax reimbursement is recognised as "other income" or "net realised gain on sale of investments" respectively upon notification of the final judgment.

## 5) Taxation (continued)

### b. Foreign taxes (continued)

For the year ended 31 December 2025, the amounts earned by the funds as a result of these claims are disclosed as "Other income" in the "Combined statement of operations and changes in net assets", and were as follows:

Please refer to the Company's prospectus for further information on taxation.

|                                                      | <b>Fund<br/>Currency</b> | <b>Amount</b> |

## 6) Forward currency exchange contracts

In order to achieve the most appropriate currency distribution, the funds enter into forward currency exchange contracts aiming to reduce the risk of the depreciation in the value of specific currencies. The funds do not intend to systematically hedge currency exposures back to any currency, except in the case of hedged equivalent classes, as described in note 7 to the financial statements.

Forward currency exchange contracts are valued on the basis of forward currency exchange rates prevailing on the relevant reporting date and the resulting net change in unrealised gain or loss is included in the statement of operations and changes in net assets.

## 7) Hedged equivalent classes

The hedged equivalent classes (includes "dividend-distributing hedged equivalent classes") seek to limit the exposure of their shareholders to currencies other than the currency referred to in the relevant class's designation, through a systematic passive currency-hedging overlay performed by J.P. Morgan Chase Bank, N.A. on a significant part of the assets of the relevant fund attributable to these classes.

In the case of a net asset flow to or from such a class or fluctuation in the net asset value of the class, the passive currency-hedging overlay may not, or not immediately, be adjusted, unless the flow or fluctuation is significant. Passive currency-hedging overlay will not completely eliminate the exposure to currency movements, and proxy hedging may, for instance, be used when the underlying currency is not liquid or is closely linked to another currency. Shareholders of hedged equivalent classes should note that returns of hedged equivalent classes may be significantly different over time than those of unhedged classes and that passive currency-hedging overlay may limit their ability to benefit from the currency diversification undertaken within the portfolio (including partially offsetting the currency hedging undertaken at the level of the fund's portfolio).

The cost of passive currency-hedging overlay and gains/losses from hedging transactions are borne by the relevant hedged equivalent class(es).

## 7) Hedged equivalent classes (continued)

These classes are marked by a “h” and a reference to the currency being hedged into.

The actual passive currency-hedging overlay methodology varies from fund to fund, as described hereafter.

### **Capital Group New Perspective Fund (LUX)**

CGNPLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group Future Generations Global Opportunities Fund (LUX)**

CGFGOLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group Global Equity Fund (LUX)**

CGGELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group World Growth and Income (LUX)**

CGWGILU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group World Dividend Growers (LUX)**

CGWDGLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group New Economy Fund (LUX)**

CGNELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group New World Fund (LUX)**

CGNWLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### **Capital Group Emerging Markets Equity Fund (LUX) (Capital Group Emerging Markets Growth Fund (LUX) until 19 September 2025)**

CGEMELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

## 7) Hedged equivalent classes (continued)

### **Capital Group Japan Equity Fund (LUX)**

CGJPELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

### **Capital Group European Opportunities (LUX)**

CGEOLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

### **Capital Group European Core Equity Fund (LUX) (Capital Group European Growth and Income Fund (LUX) until 12 December 2025)**

CGECELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

### **Capital Group AMCAP Fund (LUX)**

CGAMCAPLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

### **Capital Group Investment Company of America (LUX)**

CGICALU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

### **Capital Group Capital Income Builder (LUX)**

CGCIBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### **Capital Group Global Allocation Fund (LUX)**

CGGALU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group Future Generations Global Balanced Fund (LUX)**

CGFGBLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### **Capital Group American Balanced Fund (LUX)**

CGAMBALLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

## 7) Hedged equivalent classes (continued)

### Capital Group Emerging Markets Total Opportunities (LUX)

CGETOPLU SGD and JPY hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. Other hedged share classes aim at hedging 50% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. At times, and for exceptional periods, a different ratio may be applied in order for the Class to achieve the objectives of the fund, but it will be no less than 25% and no more than 75%.

### Capital Group Global Bond Fund (LUX)

CGGBLU hedged share classes aim at hedging with a reasonable margin of tolerance the main currency exposures of the fund's investment universe (represented by a relevant representative index) back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### Capital Group Global Intermediate Bond Fund (LUX)

CGGIBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### Capital Group Global Total Return Bond Fund (LUX)

CGGTRLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### Capital Group Euro Bond Fund (LUX)

CGEBLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposures of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### Capital Group Global Corporate Bond Fund (LUX)

CGGCBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### Capital Group Future Generations Global Corporate Bond Fund (LUX)

CGFGCBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### Capital Group US Corporate Bond Fund (LUX)

CGUSCBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD into the currency referred to in the relevant class's designation.

## 7) Hedged equivalent classes (continued)

### Capital Group Global High Income Opportunities (LUX)

CGGHIOU hedged share classes aim at hedging, with a reasonable margin of tolerance, its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### Capital Group Multi-Sector Income Fund (LUX)

CGMSILU hedged share classes aim at hedging, with a reasonable margin of tolerance, its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

### Capital Group US High Yield Fund (LUX)

CGUSHYLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

### Capital Group Emerging Markets Debt Fund (LUX)

CGEMDLU hedged share classes aim at hedging 50% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD), into the currency referred to in the relevant class's designation. Class A7 EUR hedged class will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD), into the currency referred to in the relevant class's designation.

### Capital Group Emerging Markets Local Currency Debt Fund (LUX)

CGEMLCDLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

## 8) Credit Default Swaps contracts

In order to obtain exposure to a diversified portfolio of credits or to hedge against existing credit risks, the funds may use Credit default swaps ("CDS") or credit default swap indices contracts ("CDXs"). CDS allows the transfer of default risk. This allows investors to effectively buy insurance on a Bond they hold (hedging the investment) in the expectation that the credit will decline in quality. Conversely, where the investment view is that the payments due to decline in credit quality will be less than the coupon payments, protection will be sold by means of entering into a credit default swap. A CDX is based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds. In a typical CDS and/or CDX transaction, one party - the protection buyer - is obligated to pay the other party - the protection seller - a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligations, the protection seller must pay the protection buyer the loss on those credits. The fund may enter into a CDS and/or CDX transaction as either protection buyer or protection seller.

The unrealised gain/(loss) is disclosed in the statement of net assets under "Unrealised gain/(loss) on swap contracts". Realised gain/(loss) and changes in unrealised gain/(loss) as a result thereof are included in the statement of operations and changes in net assets respectively under "Net realised gain/(loss) on swap contracts" and "Net change in unrealised appreciation/(depreciation) on swap contracts".

## 9) Interest Rate Swaps

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis which is usually not exchanged.

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised gain/(loss) is disclosed in the statement of net assets under "Unrealised gain/(loss) on swap contracts." Realised gain/(loss) and changes in unrealised gain/(loss) as a result thereof are included in the statement of operations and changes in net assets respectively under "Net realised gain/(loss) on swap contracts" and "Net change in unrealised appreciation/ (depreciation) on swap contracts".

## 10) Futures contracts

Futures contracts provide for the delayed delivery of the underlying instrument at a fixed price or for a cash amount based on the change in the value of the underlying instruments at a specific date in the future.

Upon entering into futures contract, the fund is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account. Subsequent payments, referred to as variation margin, are made or received by the fund periodically and are based on changes in the market value of open futures contracts.

The unrealised gain/(loss) on future contracts is disclosed in the statement of net assets under "Unrealised gain/(loss) on financial futures contracts". Changes in the market value of open future contracts are recorded as unrealised gain/(loss) in the statement of operations and changes in net assets under "Net change in unrealised appreciation/(depreciation) on financial futures contracts". Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of operations and changes in net assets under "Net realised gain/(loss) on financial futures contracts".

## 11) Options

An option is a contract that gives the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the reference instrument underlying the option (or the cash value of the instrument underlying the option) at a specified exercise price. The writer of an option on a security has the obligation, upon exercise of the option, to cash settle or deliver the underlying currency or instrument upon payment of the exercise price (in the case of a call) or to cash settle or take delivery of the underlying currency or instrument and pay the exercise price (in the case of a put). Options prices can diverge from the prices of their underlying instruments for a number of reasons. Options prices are affected by such factors as current and anticipated short-term interest rates, changes in the volatility of the underlying instrument, and the time remaining until expiration of the contract, which may not affect security prices in the same way. Imperfect correlation may also result from differing levels of demand in the options markets and the markets for the underlying instruments, from structural differences in how options and underlying instruments are traded, or from imposition of daily price fluctuation limits or trading halts.

## 12) Collateral

As at 31 December 2025, the collateral received or paid which is composed of cash and non-cash collateral granted to or received from brokers and counterparties for the purpose of transactions in derivatives is as follows:

## 12) Collateral (continued)

| Fund                                                             | Fund Currency | Counterparty/<br>Broker               | Type of<br>Collateral | Collateral<br>Amount<br>received | Collateral<br>Amount<br>paid |

### 13) Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect

Some funds may invest via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively “Stock Connects”). The Shanghai-Hong Kong Stock Connect is a securities trading and clearing linked program developed by Stock Exchange of Hong Kong Limited (the “SEHK”), Shanghai Stock Exchange (“SSE”) and China Securities Depository and Clearing Corporation Limited (“ChinaClear”) and the Shenzhen-Hong Kong Stock Connect is a securities trading and clearing linked program developed by SEHK, Shenzhen Stock Exchange (“SZSE”) and ChinaClear, both aiming to achieve mutual stock market access between the People’s Republic of China (“PRC”) and Hong Kong. Hong Kong Securities Clearing Company Limited (HKSCC), a wholly-owned subsidiary of SEHK, and ChinaClear will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by their respective market participants and/or investors.

The Shanghai-Hong Kong Stock Connect comprises a Northbound Shanghai Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shanghai Trading Link, Hong Kong and overseas investors, through their Hong Kong brokers and a securities trading service company established by the SEHK, may be able to trade eligible securities, such as China A Shares listed on the SSE by routing orders to SSE. Under the Southbound Hong Kong Trading Link under Shanghai-Hong Kong Stock Connect, investors in the PRC will be able to trade certain securities listed on the SEHK.

The Shenzhen-Hong Kong Stock Connect comprises a Northbound Shenzhen Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shenzhen Trading Link, Hong Kong and overseas investors, through their Hong Kong brokers and a securities trading service company established by SEHK, may be able to trade eligible securities listed on the SZSE by routing orders to SZSE. Under the Southbound Hong Kong Trading Link under Shenzhen-Hong Kong Stock Connect investors in the PRC will be able to trade certain securities listed on the SEHK.

The trading is subject to rules and regulations issued from time to time. Trading under the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are both subject to a daily quota (“Daily Quota”). Northbound Shanghai Trading Link and Southbound Hong Kong Trading Link under the Shanghai-Hong Kong Stock Connect as well as Northbound Shenzhen Trading Link and Southbound Hong Kong Trading Link under the Shenzhen-Hong Kong Stock Connect will be subject to a separate set of Daily Quota. The Daily Quota limits the maximum net buy value of cross boundary trades under the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect each day.

### 14) China Interbank Bond Market

Some funds may invest on the China Interbank Bond Market. Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. The relevant fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the relevant fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

To the extent that a fund transacts in the China Interbank Bond Market, the fund may also be exposed to risks associated with settlement procedures and default of counterparties. The counterparty which has entered into a transaction with the fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value. Since the relevant filings and account opening for investment in the China Interbank Bond Market have to be carried out via an onshore settlement agent, the relevant fund is subject to the risks of default or errors on the part of the onshore settlement agent.

The China Interbank Bond Market is also subject to regulatory risks. The relevant rules and regulations on investment in the China Interbank Bond Market are subject to change which may have potential retrospective effect. In the event that the relevant Chinese authorities suspend account opening or trading on the China Interbank Bond Market, the funds’ ability to

#### 14) China Interbank Bond Market (continued)

invest in the China Interbank Bond Market will be limited and, after exhausting other trading alternatives, the relevant fund may suffer substantial losses as a result.

Reforms or changes in macro-economic policies, such as the monetary and tax policies might affect interest rates. Consequently, the price and the yield of the bonds held in a portfolio would/could also be affected.

#### 15) Bond Connect

Some funds may invest via the Bond Connect. Bond Connect is the historic opening up of China's Interbank Bond Market (CIBM) to global investors through the China-Hong Kong mutual access program. The program allows foreign and Mainland China investors the ability to trade in each other's bond market through a connection between the Mainland and Hong Kong based financial infrastructure institutions.

Bond Connect aims to enhance the efficiency and flexibility of investing in the China Interbank Bond Market. This is accomplished by easing the access requirements to enter the market, the use of the Hong Kong trading infrastructure to connect to China Foreign Exchange Trading System (CFETS) and Bond Settlement Agent, all which are required to invest in the CIBM directly.

Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the CIBM may result in prices of certain debt securities traded on such market fluctuating significantly. The relevant fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the relevant fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

## 16) Transaction costs

For the year ended 31 December 2025, the amounts are as follows:

|                                                                   |                    |
|-------------------------------------------------------------------|--------------------|
| Capital Group New Perspective Fund (LUX)                          | US\$8,512,027      |
| Capital Group Future Generations Global Opportunities Fund (LUX)  | US\$223,651        |

| Capital Group Emerging Markets Local Currency Debt Fund (LUX)     | US\$347,882        |
|                                                                   | <b>€18,728,797</b> |

There are no brokerage fees charged separately for transaction on fixed income instruments. The transaction costs are included in the transaction price, which is known as “marked up”.

<sup>1</sup> Formerly known as Capital Group Emerging Markets Growth Fund (LUX) prior to 19 September 2025.

<sup>2</sup> Formerly known as Capital Group European Growth and Income Fund (LUX) prior to 12 December 2025.

## 17) Calculation method of the Global Exposure and Leverage

In accordance with the CSSF Circular 11/512, the methodology used by most funds (with the exception of the funds listed below) to calculate the Global Exposure resulting from the use of financial derivative instruments is the Commitment Approach. The Commitment Approach calculation converts the financial derivative position into the market value of an equivalent position in the underlying asset of that financial derivative. When using the Commitment Approach, the fund may benefit from the effects of netting and hedging arrangements to reduce its Global Exposure. The Global Exposure for a fund under the Commitment Approach must not exceed 100% of the fund's Net Asset Value.

For funds listed below, the Global Exposure methodology used for the calculation of market risk is the absolute or relative Value at Risk ("VaR") approach. The VaR approach seeks to estimate and constrain the potential loss that the fund could experience on a 1-month (20 business days) horizon, with a 99% confidence interval. A third-party risk system is used to calculate analytical VaR utilising historical data observation period of no less than one year (250 days) to carry out the calculation on a daily basis.

For the below funds, the relative VaR is used for the purpose of calculating Global Exposure. The relative VaR method (fund VaR vs benchmark VaR) is subject to the regulatory limit of 200% benchmark VaR.

Capital Group Global Bond Fund (LUX)  
 Capital Group Global Intermediate Bond Fund (LUX)  
 Capital Group Global Total Return Bond Fund (LUX)  
 Capital Group Euro Bond Fund (LUX)  
 Capital Group Global Corporate Bond Fund (LUX)  
 Capital Group Future Generations Global Corporate Bond Fund (LUX)  
 Capital Group US Corporate Bond Fund (LUX)  
 Capital Group Global High Income Opportunities (LUX)  
 Capital Group Multi-Sector Income Fund (LUX)  
 Capital Group US High Yield Fund (LUX)  
 Capital Group Emerging Markets Debt Fund (LUX)  
 Capital Group Emerging Markets Local Currency Debt Fund (LUX)

For the Capital Group Global Total Return Bond Fund (LUX), the absolute VaR approach is used for the purposes of calculating Global Exposure. The absolute VaR method is subject to the regulatory limit of 20% of the fund's Net Asset Value.

## 17) Calculation method of the Global Exposure and Leverage (continued)

The table below details the fund's highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the absolute VaR regulatory limit of 20% or a percentage of the relative VaR regulatory limit of 200%. In addition, the Leverage figure is calculated using the Gross Sum of the Notionals of the financial derivatives used by the fund as is required by UCITS regulations and as such does not take into account any netting of the financial derivatives and hedging arrangements that the fund may have in place at any time.

| Fund                                                              | Global Exposure Approach | Regulatory VaR limit utilisation<br>(percentage of total VaR limit used)                                                                                                                                          |        |         |         | Average Gross Sum of Notionals |
|-------------------------------------------------------------------|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------|---------|--------------------------------|
|                                                                   |                          | Reference Index                                                                                                                                                                                                   | Lowest | Highest | Average |                                |

## 18) Significant events during the year

## a. Fee Model Change

On 30 September 2024, the Company informed investors about changes to the fee model, effective from 1 January 2025. The key change involves the introduction of a new single Annual Administration Charge (AAC), which consolidates various expenses previously charged individually to each class. This change aims to simplify the administrative process and smooth the Total Expenses Ratio (TER) of individual share classes. Please refer to Note 3a, "Management fee and Annual administration charge (AAC)," for further information.

## b. Fund liquidation

Capital Group EUR Moderate Global Growth Portfolio (LUX) was liquidated on 4 December 2025. The outstanding cash balance held in custody at year end amounted to EUR nil.

Capital Group EUR Balanced Growth and Income Portfolio (LUX) was liquidated on 4 December 2025. The outstanding cash balance held in custody at year end amounted to EUR nil.

Capital Group EUR Conservative Income and Growth Portfolio (LUX) was liquidated on 4 December 2025. The outstanding cash balance held in custody at year end amounted to EUR nil.

Capital Group EUR Conservative Income Portfolio (LUX) was liquidated on 4 December 2025. The outstanding cash balance held in custody at year end amounted to EUR nil.

## 18) Significant events during the year (continued)

### c. Name Change

On 19 September 2025, Capital Group Emerging Markets Growth Fund (LUX) changed its name to Capital Group Emerging Markets Equity Fund (LUX).

On 12 December 2025, Capital Group European Growth and Income Fund (LUX) changed its name to Capital Group European Core Equity Fund (LUX).

## 19) Additional information for investors in Hong Kong (continued)

### b. Compliance with the revised SFC Code

The revised Code on Unit Trusts and Mutual Funds issued by the Securities and Futures Commission (SFC Code) came into effect on 1 January 2019 with a 12-month transition period for compliance for funds previously authorised by the SFC (including the funds authorised in Hong Kong).

During the year ended 31 December 2025, disclosures on transactions with Connected Persons (as defined under the SFC Code) of each fund authorised in Hong Kong were further amended for compliance with the applicable requirements under the revised SFC Code. For the avoidance of doubt, as a result of the amendments of disclosures for compliance with the revised SFC Code, there will not be (i) any change of the investment objective and policies of the funds authorised in Hong Kong; (ii) any material changes to the funds authorised in Hong Kong; (iii) any material change or increase in the overall risk profile of the funds authorised in Hong Kong; and (iv) any material adverse impact on the rights or interests of the Hong Kong Shareholders.

### c. Transactions with Connected Persons for the funds authorised in Hong Kong

Connected Persons of the Management Company, the Investment Advisers and the Directors of the Company, the Custodian and the Depositary are those defined in the SFC Code. All transactions entered into during the year between the Authorised funds and the Management Company, the Investment Advisers and the Directors of the Company, the Custodian and the Depositary and their respective Connected Persons including JP Morgan as securities lending agent were carried out at arm's length in the ordinary course of business and on normal commercial terms.

To the best of the knowledge of the Management Company, the Investment Advisers, the Directors of the Company, the Custodian and the Depositary, the funds did not have any other transactions with connected persons except for those disclosed below.

The following is a summary of the seed money transactions in USD currency (transfers are excluded).

| Fund                                                             | Buy              |         | Sell             |           | Total net amount of transactions | Dividend received |

In addition to being the Depositary and Custodian, JP Morgan serves as the sole securities lending agent. For more details on securities lending and relevant fees received by JP Morgan as securities lending agent, please refer to 'Note 2) Significant accounting policies - e. Securities lending' of the Notes to the financial statements.

The Funds utilise brokerage services for their purchases and sales of investments. Details of transactions executed through a broker who is a connected person of the Management Company, the Investment Advisers and the Directors of the Company during the year ended 31 December 2025 were as follows.

| Fund                                                             | Currency | The total aggregate value of the transactions for the year | Percentage of such transactions in the value to the total transactions for the year | Commission paid for the year | Average rate of commission |
|------------------------------------------------------------------|----------|------------------------------------------------------------|-------------------------------------------------------------------------------------|------------------------------|----------------------------|
| Capital Group New Perspective Fund (LUX)                         | USD      | 1,303,291,020                                              | 2.68%                                                                               | 376,325                      | 0.03%                      |

<sup>1</sup> Formerly known as Capital Group European Growth and Income Fund (LUX) prior to 12 December 2025.

## 19) Additional information for investors in Hong Kong (continued)

### c. Transactions with Connected Persons for the funds authorised in Hong Kong (continued)

Brokerage fees are charged separately for fixed income instruments, therefore the fixed income CIF funds and values for fixed income transactions are excluded from this table (for more details, please refer to 'Note 16) Transaction Costs' of the Notes to the financial statements).

The Management Company is entitled to receive management fees from the funds as set out in 'Note 3) Fees and expenses' of the Notes to the financial statements.

### d. Soft Commissions

No soft commission arrangements were entered into by the Management Company or the Investment Advisers with brokers for the year ended 31 December 2025.

## 20) Sustainable Finance Disclosure regulation ("SFDR")

Information on environmental and/or social characteristics and/or sustainable investments are available in the unaudited Sustainable Finance Disclosure Regulation Section and its relevant annexes where applicable.

# General information

## Annual General Meeting

The Annual General Meeting of the shareholders of Capital International Fund (CIF) is held at the registered office of CIF in Luxembourg on the last Tuesday of April in each year at 11:00 am or, if such day is not a Luxembourg business day, on the next business day. Notices of all general meetings are sent to shareholders at their addresses in the register of shareholders by post at least eight days prior to the meeting.

## Information available to investors

The current Prospectus, Key Information Document (KID), Key Investor Information Document (KIID), Articles of Incorporation, audited Annual Report, unaudited Semi-annual Report and a Statement of changes in the investment portfolio for each fund for the year ended 31 December 2025 are made available free of charge at the registered office of CIF or at the authorised representatives of CIF in various jurisdictions in accordance with Luxembourg law and with the laws of all relevant jurisdictions – see Authorised Agents and Country Paying Agents on page 437. In addition, for investors in the Federal Republic of Germany, the above documents may be obtained free of charge in paper form from the German paying and information agent.

The net asset value per share can be obtained from the registered office of CIF. In addition, information about the funds is available on the Management Company's webpage at [capitalgroup.com/international](http://capitalgroup.com/international).

## Presentation of results information

### ■ Pre-merger funds

Some of the funds are a consequence of the merger of pre-existing SICAVs into Capital International Fund. For these funds, lifetime results relate to the pre-existing SICAVs.

## The Investment Adviser disclosure

The Investment Adviser and Affiliates (the "Affiliates") will place trades with brokers who provide certain brokerage and/or investment research services to the Affiliates, but only when in the Affiliates judgement the broker is capable of providing best execution for that transaction. For the year ended 31 December 2025, there were no transactions through connected brokers and hence no commissions were paid to connected brokers since none of the Affiliates operate any brokerage activity. These services permit the Affiliates to supplement their own research and analysis, which contributes to the efficient management of investment portfolios by Affiliates for the benefit of investors. Although Affiliates may enter into arrangements with brokers with the expectation that these services will be provided, Affiliates do not incur any obligation with any broker to pay for research by generating trading commissions. Affiliates also pay cash for certain third-party research they receive. In addition, Affiliates' employees are governed by a global Code of Ethics, which includes rigorous personal investing and gifts and entertainment policies. Affiliates may also provide the Company with other services to support its business development, including, but not limited to, product development, fund registration and any other similar support as may be required, for which they receive a reasonable compensation.

#### **Additional information for investors in the Federal Republic of Germany**

J.P. Morgan SE, Luxembourg Branch, 6, route de Trèves L-2633 Senningerberg, Luxembourg, has undertaken the function of Paying and Information Agent for the Company in the Federal Republic of Germany (the “Paying Agent”).

Applications for the redemptions and conversion of shares may be sent to the Paying Agent.

All payments to investors, including redemption proceeds and potential distributions, may, upon request, be paid through the Paying Agent.

The current Prospectus, Key Information Document (KID), the Articles of Incorporation and the Annual & Semi annual Report may be obtained, free of charge, in hardcopy form at the office of the Paying Agent during normal opening hours. The statement of changes in the composition of the investment portfolio is also available free of charge in hardcopy form, upon request at the office of the Paying Agent. The German translation of the Annual Report is also available on the Management Company's webpage at [capitalgroup.com/international](https://capitalgroup.com/international).

Issue, redemption, and conversion prices of shares, and any other information to the shareholders, are also available from the Paying Agent.

The issue, redemption and conversion prices will be published on the website <https://www.fundinfo.com/>.

The latest Preliminary Lump Sum tax figures and each Fund's classification as well as additional tax information may be found on the German Tax Center of the Management Company's webpage at [capitalgroup.com/ international](https://capitalgroup.com/international).

Any other information to the shareholders will be sent to the shareholders by mail.

# Appendix 1: Remuneration related information (unaudited)

The Management Company (“Capital International Management Company Sàrl”) has established a Remuneration Policy. This policy is designed to discourage excessive risk-taking.

The Management Company’s remuneration policy is regularly updated. It includes comprehensive details such as the calculation methodology for remuneration and benefits, the identities of those responsible for awarding remuneration and benefits, and the composition of the remuneration committee. These details are readily available on our website at <https://www.capitalgroup.com/international>. Additionally, a paper copy of the remuneration policy can be provided free of charge upon request.

The remuneration policy aligns with the UCITS V Directive concerning depositary functions, remuneration policies, and sanctions. We confirm that:

- The remuneration policy promotes sound and effective risk management. It does not encourage risk-taking that contradicts the risk profiles, rules, or instruments of incorporation of the UCITS funds managed by the Management Company.
- The remuneration policy aligns with the business strategy, objectives, values and interests of the Management Company, the UCITS it manages, and the Shareholders in these UCITS. It includes measures to avoid conflicts of interest.
- Performance assessment is set within a multi-year framework, which aligns with the holding period recommended to the Shareholders of the UCITS managed by the Management Company. This ensures that the assessment process is based on the UCITS’ longer-term performance and investment risks, and that the actual payment of performance-based components of remuneration is spread over the same period.
- The total remuneration is appropriately balanced between fixed and variable components. The fixed component constitutes a sufficiently high proportion of the total remuneration, allowing for a fully flexible policy on variable remuneration components, including the possibility of not paying any variable remuneration component.

The Management Company paid a total of EUR 5.8m to 35 beneficiaries\* during the year ending 31 December 2025. This figure is comprised of fixed remuneration of EUR 4.3m and variable remuneration of EUR 1.5m\*\*. The total amount paid to senior management was EUR 2.3m and to other members having a material impact on the risk profile of the funds was EUR 0.1m.

Fixed remuneration consists of salaries paid, pension contributions, and other benefits such as health insurance. Variable remuneration consists of annual bonuses paid in the period in accordance with remuneration policy. For staff that perform roles for other group companies, only the proportion of remuneration that is attributable to the Management Company or the UCITS funds it manages is included in these amounts.

The Management Company has contractual delegation arrangements in place with Capital Research and Management Company (CRMC), Capital International, Inc. (CII), and Capital International Sàrl (CISA) for the provision of portfolio management activities. CRMC, CII and CISA comply with their applicable remuneration regime and adhere to the same principles as the Management Company.

\* with fractional time spent on UCITS management responsibilities.

\*\* Figures may not add up to the total due to rounding.

# Appendix 2: Securities Financing Transactions Regulation (SFTR) disclosure (unaudited)

The funds may enter into securities lending transactions subject to the same rules regarding collateral as derivatives where relevant in accordance with the ESMA Guidelines 2014/937.

For each securities lending transaction and subject to a commitment that the equivalent securities will be returned on a future date or when requested to do so, the borrower must provide cash in USD, EUR or JPY currency or cash equivalents, such as US Treasury securities as Collateral in an amount at least equivalent, at all times during the lifetime of the transactions, to the full current value of the securities lent. US Treasury securities generally have a maturity between one day and one year.

## SECURITIES LENDING

### Global Data

*Amount of securities on loan and amount of assets engaged in securities lending transactions*

The following table represents the total value of assets engaged in securities lending as at the year end date. The total value of securities on loan as a proportion of the funds' total lendable assets as at the year end date is also detailed below. Total lendable assets represents the aggregate value of asset types forming part of the Funds' securities lending programme.

| Fund                                                          | Fund currency | Market Value of Securities on Loan (in fund currency) | % of Total Lendable Assets* | % Total Net Asset Value* |
|---------------------------------------------------------------|---------------|-------------------------------------------------------|-----------------------------|--------------------------|

<sup>1</sup> Formerly known as Capital Group Emerging Markets Growth Fund (LUX) prior to 19 September 2025.

*Maturity tenor of securities lending transactions*

All securities on loan can be recalled at any point and therefore have a maturity tenor of one day.

*Country in which counterparties are established*

J.P. Morgan S.E. was incorporated in Luxembourg.

*Settlement and clearing*

The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

**Reuse of collateral**

Non-cash collateral received by a fund may not be sold, re-invested or pledged. As the collateral in receipt for securities lending is entirely in the form of securities, there is no reuse of securities lending collateral.

**Safekeeping of collateral***Collateral received*

J.P. Morgan S.E., as securities lending agent of the Company, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan S.E. is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

**Collateral granted**

No collateral is granted by the Company as part of their securities lending activities.

### **Return and cost**

The total income earned from securities lending transactions is split between the relevant funds and the securities lending agent. Income earned during the year by the funds from securities lending transactions is disclosed in the Combined statement of operations and changes in net assets on pages 345 to 356.

# Appendix 3: Sustainable Finance Disclosure Regulation (SFDR) disclosure (unaudited)

The following sub-funds do not promote environmental or social characteristics and do not have sustainable investment objectives, in accordance with Article 6 of Regulation (EU) 2019/2088 (SFDR). These sub-funds are managed without specific consideration for environmental, social, or governance (ESG) factors. Further information regarding the integration of sustainability risks, or the rationale for their non-relevance, is provided in the pre-contractual documentation for each sub-fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group New Perspective Fund (LUX)

**Legal entity identifier:**  
22210012U5PFCXI5XS34

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.15% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI ACWI Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results         |
|--------------------------------------------------------------------------------------------------------------------|-----------------|
| WACI of the corporate issuers compared to Index                                                                    | 47% below index |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%              |
| Percentage of Sustainable Investments                                                                              | 59.15%          |

### ● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2023                                                                                             | 2024                                                                                             | 2025                                                                                             |
|--------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 36% below the Index as at 31 December 2023                     | WACI of the corporate issuers was 44% below the Index as at 31 December 2024                     | WACI of the corporate issuers was 47% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 36% below the Index during the reference period | On average the WACI of the corporate issuers was 38% below the Index during the reference period | On average the WACI of the corporate issuers was 45% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                               | 0%                                                                                               | 0%                                                                                               |
| Percentage of Sustainable Investments                                                                              | n/a                                                                                              | 58.69%                                                                                           | 59.15%                                                                                           |

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### *- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

#### *- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 96.66% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least 30% lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                      |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 Jan 2025 to 31 Dec 2025

| Largest investments                       | Sector                 | % Assets | Country        |
|-------------------------------------------|------------------------|----------|----------------|
| Meta Platforms Inc Cl A                   | Communication Services | 4.01%    | United States  |
| Microsoft Corp                            | Information Technology | 3.47%    | United States  |
| Taiwan Semiconductor Manufacturing Co Ltd | Information Technology | 3.21%    | Taiwan         |

| Nvidia Corp                               | Information Technology | 2.08%    | United States  |
| Netflix Inc                               | Communication Services | 1.58%    | United States  |
| Eli Lilly And Co                          | Health Care            | 1.44%    | United States  |
| Astrazeneca Plc (Gbp)                     | Health Care            | 1.33%    | United Kingdom |
| Amazon.Com Inc                            | Consumer Discretionary | 1.22%    | United States  |
| Vertex Pharmaceuticals Inc                | Health Care            | 1.18%    | United States  |
| Essilorluxottica Sa                       | Health Care            | 1.16%    | France         |
| Alphabet Inc Cl C                         | Communication Services | 1.10%    | United States  |
| Totalenergies Se                          | Energy                 | 1.07%    | France         |
| Jpmorgan Chase & Co                       | Financials             | 1.06%    | United States  |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 96.66% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 59.15% were invested in sustainable investments as defined by the Investment adviser.
- 6.09% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.59% with an environmental objective aligned with EU Taxonomy. 52.47% were invested into sustainable investment with a social objective (Social).

3.34% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 0.21%          |
|                        | Entertainment                                  | 2.95%          |
|                        | Interactive Media & Services                   | 6.51%          |
|                        | Media                                          | 0.31%          |
|                        | Wireless Telecommunication Services            | 0.81%          |
| Consumer Discretionary | Automobile Components                          | 0.07%          |
|                        | Automobiles                                    | 3.31%          |
|                        | Broadline Retail                               | 2.75%          |
|                        | Diversified Consumer Services                  | 0.08%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.45%        | 0.00%             |
| CapEx     | 0.50%        | 0.10%             |
| OpEx      | 0.72%        | 0.01%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Indicator | Type of activities                        | 2023  | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 0.34% | 0.54% | 0.59% |
| Turnover  | Enabling                                  | 0.29% | 0.45% | 0.45% |
| Turnover  | Transition                                | 0.00% | 0.00% | 0.00% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 1.18% | 1.29% | 1.26% |
| CapEx     | Enabling                                  | 0.52% | 0.64% | 0.50% |
| CapEx     | Transition                                | 0.05% | 0.06% | 0.10% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 0.86% | 0.91% | 0.98% |
| OpEx      | Enabling                                  | 0.62% | 0.73% | 0.72% |
| OpEx      | Transition                                | 0.01% | 0.01% | 0.01% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 6.09%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 52.47%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 "Other" included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being generally at least 30% below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Future Generations Global Opportunities Fund (LUX)

**Legal entity identifier:**  
549300SMK5QCHX6N2738

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 94.82% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Investment in companies that are majority-aligned or transitioning with the UN Sustainable Development Goals (SDGs), as determined by the Investment Adviser;
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://www.capitalgroup.com/international).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of Sustainable Investments                                                                              | 94.82%  |
| Percentage of investments having at least 50% of their revenue aligned with the SDGs                               | 89.89%  |
| Percentage of investments in companies considered as “Transitioning”                                               | 4.93%   |

● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2024   | 2025   |
|--------------------------------------------------------------------------------------------------------------------|--------|--------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%     | 0%     |
| Percentage of Sustainable Investments                                                                              | 100%   | 94.82% |
| Percentage of investments having at least 50% of their revenue aligned with the SDGs                               | 94.75% | 89.89% |
| Percentage of investments in companies considered as “Transitioning”                                               | 5.25%  | 4.93%  |

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 60%, being those investments that have undergone the Investment Adviser’s process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies’ products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the “SDGs”) are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### *- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Adviser took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

#### *- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As described above, the Fund considered all mandatory principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 94.82% of the portfolio.

In particular, via the Negative Screening Policy the Investment Adviser addressed PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on United Nations Global Compact violators and PAI 14 on controversial weapons.

The Investment Adviser's assessment also included an overall qualitative assessment of how ESG risks were being managed.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                       | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Micron Technology Inc           | Information Technology | 1.23%    | United States |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2025 the Fund invested 94.82% of its assets into issuers that attained the promoted E/S characteristics (#1). From this, 12.39% were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 1.19% with an environmental objective aligned with EU Taxonomy. 81.24% were invested into sustainable investment with a social objective (Social).

5.18% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 0.29%          |
|                        | Interactive Media & Services                   | 3.66%          |
|                        | Media                                          | 0.18%          |
|                        | Wireless Telecommunication Services            | 1.28%          |
| Consumer Discretionary | Automobile Components                          | 0.05%          |

| Utilities | Electric Utilities                                 | 2.10% |
|           | Independent Power & Renewable Electricity Producer | 0.18% |
|           | Multi-utilities                                    | 1.49% |
| Total     |                                                    | 100%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.82%        | 0.00%             |
| CapEx     | 0.90%        | 0.03%             |
| OpEx      | 1.31%        | 0.00%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Indicator | Type of activities                        | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 1.13% | 1.19% |
| Turnover  | Enabling                                  | 0.90% | 0.82% |
| Turnover  | Transition                                | 0.00% | 0.00% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 1.92% | 2.27% |
| CapEx     | Enabling                                  | 1.07% | 0.90% |
| CapEx     | Transition                                | 0.03% | 0.03% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 1.69% | 1.90% |
| OpEx      | Enabling                                  | 1.33% | 1.31% |
| OpEx      | Transition                                | 0.00% | 0.00% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 12.39%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 81.24%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 "Other" included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser applied the following investment strategy to attain the environmental and/or social characteristics promoted and the sustainable investments that the Fund partially intended to make:

- Positive screening (SDG-based framework)

The Fund invested in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals ("SDGs") were considered when determining the themes.

| Themes                           | Key Associated UN SDGs                                                                                                                                                                                                                                                                                                                               |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Health & Well-Being              | <ul style="list-style-type: none"> <li>• SDG 3: Good health and well-being</li> <li>• SDG 6: Clean water and sanitation</li> <li>• SDG 8: Decent work and economic growth</li> <li>• SDG 17: Partnerships for the goals</li> </ul>                                                                                                                   |

| Responsible Consumption          | <ul style="list-style-type: none"> <li>• SDG 2: Zero hunger</li> <li>• SDG 8: Decent work and economic growth</li> <li>• SDG 9: Industry, innovation and infrastructure</li> <li>• SDG 11: Sustainable cities and communities</li> <li>• SDG 12: Responsible consumption and production</li> </ul>                                                   |
| Education & Information Access   | <ul style="list-style-type: none"> <li>• SDG 3: Good health and well-being</li> <li>• SDG 4: Quality education</li> <li>• SDG 8: Decent work and economic growth</li> <li>• SDG 9: Industry, innovation and infrastructure</li> <li>• SDG 10: Reduced inequalities</li> <li>• SDG 16: Peace, justice and strong institutions</li> </ul>              |
| Financial Inclusion              | <ul style="list-style-type: none"> <li>• SDG 1: No poverty</li> <li>• SDG 8: Decent work and economic growth</li> <li>• SDG 9: Industry, innovation and infrastructure</li> <li>• SDG 11: Sustainable cities and communities</li> <li>• SDG 17: Partnership for the goals</li> </ul>                                                                 |
| Clean Water & Sanitation         | <ul style="list-style-type: none"> <li>• SDG 6: Clean water and sanitation</li> <li>• SDG 12: Responsible consumption and production</li> </ul>                                                                                                                                                                                                      |

To identify such companies, the Investment Adviser performed an eligibility assessment that relies on bottom-up proprietary research conducted by the Investment Adviser's investment and ESG teams. This eligibility assessment is underpinned by the Investment Adviser's sector-level "Characteristics" and "Standards":

- Characteristics: focus on whether products and services contribute to the SDGs; and
- Standards: focus on management of material ESG risks and good governance.

The Fund invested in 'Aligned' companies that currently have at least half of their business aligned to the themes, as well as 'Transitioning' companies that the Investment Adviser believes are actively transitioning their business to higher positive alignment with material near-to-medium term change expected. If a company is determined to be aligned or transitioning and purchased in the Fund but fails to meet the aligned or transitioning requirements thereafter, such company would no longer be considered a sustainable investment anymore and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund. During the reference period, no 'Aligned' or 'Transitioning' companies were subsequently deemed to have fail the aligned or transitioning requirements.

- Negative screening (ESG and norms-based exclusions)

In addition, the Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase (e.g., on companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties to controversial weapons).

Post-trade, when the monitoring function identified previously eligible issuers that subsequently failed an appropriate screen, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund. During the reference period, no investment subsequently failed the negative screens.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

- Engagement

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

### How did this financial product perform compared to the reference benchmark?

Not applicable.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

- **How did this financial product perform compared with the reference benchmark?**

Not applicable.

- **How did this financial product perform compared with the broad market index?**

Not applicable.

#### Reference

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group New Economy Fund (LUX)

**Legal entity identifier:**  
5493005TAI2AYOJ2I271

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.54% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI ACWI Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results         |
|--------------------------------------------------------------------------------------------------------------------|-----------------|
| WACI of the corporate issuers compared to Index                                                                    | 40% below index |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%              |
| Percentage of Sustainable Investments                                                                              | 66.54%          |

### ● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2022                                                                                             | 2023                                                                                             | 2024                                                                                             | 2025                                                                                             |

| Percentage of Sustainable Investments                                                                              | n/a                                                                                              | n/a                                                                                              | 65.03%                                                                                           | 66.54%                                                                                           |

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

*- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

*- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 96.81% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least 30% lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                      |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 Jan 2025 to 31 Dec 2025

| Largest investments                       | Sector                 | % Assets | Country       |
|-------------------------------------------|------------------------|----------|---------------|
| Broadcom Inc                              | Information Technology | 6.14%    | United States |
| Microsoft Corp                            | Information Technology | 5.18%    | United States |
| Amazon.Com Inc                            | Consumer Discretionary | 4.02%    | United States |

| Alphabet Inc Cl A                         | Communication Services | 1.35%    | United States |
| Alnylam Pharmaceuticals Inc               | Health Care            | 1.33%    | United States |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 96.81% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 66.54% were invested in sustainable investments as defined by the Investment adviser.
- 3.02% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.28% with an environmental objective aligned with EU Taxonomy. 63.24% were invested into sustainable investment with a social objective (Social).

3.19% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Entertainment                                  | 1.47%          |
|                        | Interactive Media & Services                   | 6.00%          |
|                        | Media                                          | 0.11%          |
|                        | Wireless Telecommunication Services            | 0.23%          |
| Consumer Discretionary | Automobile Components                          | 0.01%          |
|                        | Automobiles                                    | 0.43%          |
|                        | Broadline Retail                               | 6.24%          |
|                        | Hotels, Restaurants & Leisure                  | 3.86%          |
|                        | Household Durables                             | 0.03%          |
|                        | Specialty Retail                               | 0.73%          |
|                        | Textiles, Apparel & Luxury Goods               | 0.59%          |
| Consumer Staples       | Beverages                                      | 0.16%          |
|                        | Consumer Staples Distribution & Retail         | 0.56%          |
| Energy                 | Energy Equipment & Services                    | 0.50%          |
|                        | Oil, Gas & Consumable Fuels                    | 0.37%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 96.81% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.25%        | 0.00%             |
| CapEx     | 0.26%        | 0.03%             |
| OpEx      | 0.29%        | 0.01%             |

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

| Indicator | Type of activities                        | 2022  | 2023  | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 0.67% | 0.14% | 0.07% | 0.28% |
| Turnover  | Enabling                                  | 0.59% | 0.06% | 0.07% | 0.25% |
| Turnover  | Transition                                | 0.00% | 0.00% | 0.00% | 0.00% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 0.55% | 0.41% | 0.15% | 0.40% |
| CapEx     | Enabling                                  | 0.38% | 0.16% | 0.09% | 0.26% |
| CapEx     | Transition                                | 0.00% | 0.00% | 0.02% | 0.03% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 0.01% | 0.15% | 0.04% | 0.31% |
| OpEx      | Enabling                                  | 0.01% | 0.08% | 0.04% | 0.29% |
| OpEx      | Transition                                | 0.00% | 0.00% | 0.00% | 0.01% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 3.02%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments made by the Fund is 63.24%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being generally at least 30% below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Emerging Markets Equity Fund (LUX)

**Legal entity identifier:**  
549300E88CIVOTB2I413

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52.99% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least 30% lower than the MSCI Emerging Markets Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Throughout the reference period, at least 70% of the Fund's investments at the time of purchase met the E/S criteria described above.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | 2025                                                                                             |
|--------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 50% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 52% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                               |
| Percentage of Sustainable Investments                                                                              | 52.99%                                                                                           |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

*- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

*- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 96.76% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least 30% lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                      |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

| Al Rajhi Banking And Investment Corp               | Financials             | 1.35%    | Saudi Arabia  |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 96.76% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 52.99% were invested in sustainable investments as defined by the Investment adviser.
- 1.00% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.00% with an environmental objective aligned with EU Taxonomy. 51.99% were invested into sustainable investment with a social objective (Social).

3.24% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 1.26%          |
|                        | Entertainment                                  | 3.19%          |
|                        | Interactive Media & Services                   | 5.80%          |
|                        | Wireless Telecommunication Services            | 3.16%          |
| Consumer Discretionary | Automobile Components                          | 0.27%          |
|                        | Automobiles                                    | 1.70%          |
|                        | Broadline Retail                               | 6.56%          |
|                        | Hotels, Restaurants & Leisure                  | 3.06%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 96.76% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.00%        | 0.00%             |
| CapEx     | 0.00%        | 0.00%             |
| OpEx      | 0.00%        | 0.00%             |

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 1.00%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments made by the Fund is 51.99%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group’s independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being generally at least 30% below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group European Core Equity Fund (LUX)

**Legal entity identifier:**  
549300PLLS49YI7M871

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.66% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least lower than the MSCI Europe Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Throughout the reference period, at least 70% of the Fund's investments at the time of purchase met the E/S criteria described above.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | 2025                                                                                            |
|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 5% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 5% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                              |
| Percentage of Sustainable Investments                                                                              | 49.66%                                                                                          |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

*- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

*- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 98.21% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                          |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 12 Dec 2025 to 31 Dec 2025

What were the top investments of this financial product?

| Largest investments                | Sector                 | % Assets | Country        |
|------------------------------------|------------------------|----------|----------------|
| Asml Holding Nv                    | Information Technology | 3.75%    | Netherlands    |
| Banco Santander Sa                 | Financials             | 3.26%    | Spain          |

| Novo Nordisk As Cl B               | Health Care            | 2.09%    | Denmark        |
| Deutsche Telekom Ag                | Communication Services | 2.04%    | Germany        |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 98.21% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 49.66% were invested in sustainable investments as defined by the Investment adviser.
- 7.13% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 4.63% with an environmental objective aligned with EU Taxonomy. 37.90% were invested into sustainable investment with a social objective (Social).

1.79% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| <b>Sector</b>          | <b>Sub-Sector</b>                                  | <b>Average Weight</b> |
|------------------------|----------------------------------------------------|-----------------------|
| Communication Services | Diversified Telecommunication Services             | 2.04%                 |
|                        | Entertainment                                      | 0.58%                 |
|                        | Media                                              | 1.92%                 |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 98.21% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 3.46%        | 0.36%             |
| CapEx     | 4.14%        | 0.44%             |
| OpEx      | 4.72%        | 0.35%             |

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 7.13%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments made by the Fund is 37.90%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group’s independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Investment Company of America (LUX)

**Legal entity identifier:**  
222100R3KUY4HJ4BLC87

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.89% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least lower than the S&P 500 Net Total Return Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | 2025                                                                                            |
|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 6% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 6% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                              |
| Percentage of Sustainable Investments                                                                              | 60.89%                                                                                          |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

*- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

*- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 97.00% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                          |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 4 Jun 2025 to 31 Dec 2025

| Largest investments                  | Sector                 | % Assets | Country        |
|--------------------------------------|------------------------|----------|----------------|
| Microsoft Corp                       | Information Technology | 7.38%    | United States  |
| Broadcom Inc                         | Information Technology | 6.49%    | United States  |
| Nvidia Corp                          | Information Technology | 4.93%    | United States  |
| Amazon.Com Inc                       | Consumer Discretionary | 3.96%    | United States  |
| Meta Platforms Inc Cl A              | Communication Services | 3.58%    | United States  |
| Eli Lilly And Co                     | Health Care            | 3.29%    | United States  |
| Alphabet Inc Cl C                    | Communication Services | 2.25%    | United States  |
| Alphabet Inc Cl A                    | Communication Services | 2.23%    | United States  |
| Royal Caribbean Cruises Ltd          | Consumer Discretionary | 2.22%    | United States  |
| Uber Technologies Inc                | Industrials            | 1.97%    | United States  |
| General Electric Co Aka Ge Aerospace | Industrials            | 1.87%    | United States  |
| Apple Inc                            | Information Technology | 1.81%    | United States  |
| Rolls-Royce Holdings Plc             | Industrials            | 1.41%    | United Kingdom |
| Abbott Laboratories                  | Health Care            | 1.29%    | United States  |
| Jpmorgan Chase & Co                  | Financials             | 1.27%    | United States  |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 97.00% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 60.89% were invested in sustainable investments as defined by the Investment adviser.
- 4.82% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.03% with an environmental objective aligned with EU Taxonomy. 56.04% were invested into sustainable investment with a social objective (Social).

3.00% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 0.29%          |
|                        | Entertainment                                  | 1.24%          |
|                        | Interactive Media & Services                   | 8.06%          |
|                        | Media                                          | 0.43%          |
|                        | Wireless Telecommunication Services            | 0.54%          |
| Consumer Discretionary | Automobiles                                    | 0.30%          |
|                        | Broadline Retail                               | 4.12%          |
|                        | Hotels, Restaurants & Leisure                  | 4.60%          |
|                        | Household Durables                             | 0.06%          |
|                        | Specialty Retail                               | 1.53%          |
|                        | Textiles, Apparel & Luxury Goods               | 0.08%          |
| Consumer Staples       | Beverages                                      | 0.82%          |
|                        | Consumer Staples Distribution & Retail         | 0.08%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents 97.00% of the total Investments.

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.01%        | 0.00%             |
| CapEx     | 0.06%        | 0.00%             |
| OpEx      | 0.02%        | 0.00%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 4.82%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 56.04%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 “Other” included investments (including cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Global Allocation Fund (LUX)

**Legal entity identifier:**  
549300SLOS5KBC6BAF90

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.73% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than 60% MSCI AC World index, 40% Bloomberg Global Aggregate Bond Total Return ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).
- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 75% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 55%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | 2025                                                                                             |
|--------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 18% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 44% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                               |
| Percentage of sovereign issuers that failed the Investment Adviser's process [at the time of purchase]             | 0%                                                                                               |
| Percentage of Sustainable Investments                                                                              | 36.73%                                                                                           |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Adviser took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);
2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

*- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 65.62% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| United States Treasury Note 4.125% 02-28-27 | Government             | 0.98%    | United States  |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2025 the Fund invested 87.06% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 36.73% were invested in sustainable investments as defined by the Investment adviser.
- 1.46% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 1.19% with an environmental objective aligned with EU Taxonomy. 34.08% were invested into sustainable investment with a social objective (Social).

12.94% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                             | Average Weight |
|------------------------|----------------------------------------|----------------|
| Asset Backed           | Asset Backed Securities                | 0.00%          |
|                        | Auto Loan                              | 0.05%          |
|                        | Student Loan                           | 0.01%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 65.62% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.92%        | 0.05%             |
| CapEx     | 1.17%        | 0.14%             |
| OpEx      | 1.15%        | 0.07%             |

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 1.46%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments made by the Fund is 34.08%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies’ involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group’s independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Future Generations Global Balanced Fund (LUX)

**Legal entity identifier:**  
549300QTCEFOGTIIHN03

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 70.31% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Investment in companies that are majority-aligned or transitioning with the UN Sustainable Development Goals (SDGs), as determined by the Investment Adviser;
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).
- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund’s E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of Sustainable Investments                                                                              | 70.31%  |
| Percentage of investments having at least 50% of their revenue aligned with the SDGs                               | 66.42%  |
| Percentage of investments in companies considered as "Transitioning"                                               | 3.89%   |

### ● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2024   | 2025   |
|--------------------------------------------------------------------------------------------------------------------|--------|--------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%     | 0%     |
| Percentage of Sustainable Investments                                                                              | 70.36% | 70.31% |
| Percentage of investments having at least 50% of their revenue aligned with the SDGs                               | 66.99% | 66.42% |
| Percentage of investments in companies considered as "Transitioning"                                               | 3.37%  | 3.89%  |

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 40%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### *- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

#### *- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As described above, the Fund considered all mandatory principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 70.08% of the portfolio.

In particular, via the Negative Screening Policy the Investment Adviser addressed PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on United Nations Global Compact violators and PAI 14 on controversial weapons.

The Investment Adviser's assessment also included an overall qualitative assessment of how ESG risks were being managed.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                       | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 95.71% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 70.31% were invested in sustainable investments as defined by the Investment adviser.
- 9.24% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 1.15% with an environmental objective aligned with EU Taxonomy. 59.92% were invested into sustainable investment with a social objective (Social).

4.29% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 0.57%          |
|                        | Interactive Media & Services                   | 2.23%          |
|                        | Media                                          | 0.23%          |

|                 | Multi-utilities                                    | 0.90%       |
| <b>Total</b>    |                                                    | <b>100%</b> |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

Yes: ☐ In fossil gas ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.74%        | 0.08%             |
| CapEx     | 0.96%        | 0.10%             |
| OpEx      | 1.15%        | 0.09%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Indicator | Type of activities                        | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 0.73% | 1.15% |
| Turnover  | Enabling                                  | 0.58% | 0.74% |
| Turnover  | Transition                                | 0.00% | 0.08% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 1.22% | 2.11% |
| CapEx     | Enabling                                  | 0.68% | 0.96% |
| CapEx     | Transition                                | 0.02% | 0.10% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 1.06% | 1.81% |
| OpEx      | Enabling                                  | 0.84% | 1.15% |
| OpEx      | Transition                                | 0.00% | 0.09% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 9.24%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 59.92%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 "Other" included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments and that were held to attain the investment objective of the Fund.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser applied the following investment strategy to attain the environmental and/or social characteristics promoted and the sustainable investments that the Fund partially intended to make:

- Positive screening (SDG-based framework)

The Fund invested in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals ("SDGs") were considered when determine the themes.

| Themes                           | Key Associated UN SDGs                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Health & Well-Being              | <ul style="list-style-type: none"> <li>• SDG 3: Good health and well-being</li> <li>• SDG 6: Clean water and sanitation</li> <li>• SDG 8: Decent work and economic growth</li> <li>• SDG 17: Partnerships for the goals</li> </ul>                                                                                                                                                                                                                      |

| Financial Inclusion              | <ul style="list-style-type: none"> <li>• SDG 1: No poverty</li> <li>• SDG 8: Decent work and economic growth</li> <li>• SDG 9: Industry, innovation and infrastructure</li> <li>• SDG 11: Sustainable cities and communities               <ul style="list-style-type: none"> <li>• SDG 17: Partnership for the goals</li> </ul> </li> </ul>                                                                                                            |
| Clean Water & Sanitation         | <ul style="list-style-type: none"> <li>• SDG 6: Clean water and sanitation</li> <li>• SDG 12: Responsible consumption and production</li> </ul>                                                                                                                                                                                                                                                                                                         |

To identify such companies, the Investment Adviser performed an eligibility assessment that relies on bottom-up proprietary research conducted by the Investment Adviser's investment and ESG teams. This eligibility assessment is underpinned by the Investment Adviser's sector-level "Characteristics" and "Standards":

- Characteristics: focus on whether products and services contribute to the SDGs; and
- Standards: focus on management of material ESG risks and good governance.

The Fund invested in 'Aligned' companies that currently have at least half of their business aligned to the themes, as well as 'Transitioning' companies that the Investment Adviser believes are actively transitioning their business to higher positive alignment with material near-to-medium term change expected. If a company is determined to be aligned or transitioning and purchased in the Fund but fails to meet the aligned or transitioning requirements thereafter, such company would no longer be considered a sustainable investment anymore and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund. During the reference period, no 'Aligned' or 'Transitioning' companies were subsequently deemed to have fail the aligned or transitioning requirements.

- Negative screening (ESG and norms-based exclusions)

In addition, the Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase (e.g., on companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties to controversial weapons).

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

Post-trade, when the monitoring function identified previously eligible issuers that subsequently failed an appropriate screen, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund. During the reference period, no investment subsequently failed the negative screens.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

- Engagement

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***  
Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group American Balanced Fund (LUX)

**Legal entity identifier:**  
549300M6F10FZ8U1IV37

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: \_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: \_\_%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46.88% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than S&P 500 ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).
- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Throughout the reference period, at least 50% of the Fund's investments at the time of purchase met the E/S criteria described above.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

534 | Capital International Fund | Annual Report 2025

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | 2025                                                                                            |
|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 5% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 5% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                              |
| Percentage of sovereign issuers that failed the Investment Adviser's process [at the time of purchase]             | 0%                                                                                              |
| Percentage of Sustainable Investments                                                                              | 46.88%                                                                                          |

### ● **...and compared to previous periods?**

Not applicable.

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### **- How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Where third party data or the Investment Adviser’s assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser’s own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:  
the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund’s investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 69.11% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                          |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 22 Sep 2025 to 31 Dec 2025

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 87.32% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 46.88% were invested in sustainable investments as defined by the Investment adviser.
- 4.64% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.07% with an environmental objective aligned with EU Taxonomy. 42.17% were invested into sustainable investment with a social objective (Social).

12.68% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                             | Average Weight |
|------------------------|----------------------------------------|----------------|
| Asset Backed           | Asset Backed Securities                | 0.08%          |
|                        | Auto Loan                              | 0.51%          |
|                        | Collateralized Loan Obligations        | 0.17%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas      ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.04%        | 0.00%             |
| CapEx     | 0.10%        | 0.00%             |
| OpEx      | 0.09%        | 0.00%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 4.64%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 42.17%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Global Bond Fund (LUX)

**Legal entity identifier:**  
549300LPLX1R6Z33PK70

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Throughout the reference period, at least 30% of the Fund's investments at the time of purchase met the E/S criteria described above.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of sovereign issuers that failed the Investment Adviser’s process [at the time of purchase]             | 0%      |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 21.90% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens. | Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.                                                                                                                                                                                                                                                      |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                    | Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.                                                                                                                                                                                                                                                                                                                                                                                            |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                    | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### ● *What was the asset allocation?*

As at the 31 December 2025 the Fund invested 77.42% of its assets into issuers that attained the promoted E/S characteristics (#1) and 22.58% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). The latter investments were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in '2 Other' and were not used to attain the E/S characteristics promoted by the Fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                             | Average Weight |
|------------------------|----------------------------------------|----------------|
| Asset Backed           | Asset Backed Securities                | 0.01%          |
|                        | Auto Loan                              | 0.62%          |
|                        | Collateralized Loan Obligations        | 0.46%          |
|                        | Student Loan                           | 0.02%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). The Fund did not hold investments that were aligned with the EU Taxonomy during the reference period.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas      ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group’s independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Global Total Return Bond Fund (LUX)

549300UFGSJ531027U32

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Throughout the reference period, at least 30% of the Fund's investments at the time of purchase met the E/S criteria described above.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of sovereign issuers that failed the Investment Adviser’s process [at the time of purchase]             | 0%      |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 38.25% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens. | Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.                                                                                                                                                                                                                                                      |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                    | Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.                                                                                                                                                                                                                                                                                                                                                                                            |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                    | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 22 Sep 2025 to 31 Dec 2025

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### ● *What was the asset allocation?*

As at the 31 December 2025 the Fund invested 79.58% of its assets into issuers that attained the promoted E/S characteristics (#1) and 20.42% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). The latter investments were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in '2 Other' and were not used to attain the E/S characteristics promoted by the Fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                             | Average Weight |
|------------------------|----------------------------------------|----------------|
| Asset Backed           | Asset Backed Securities                | 0.07%          |
|                        | Auto Loan                              | 0.61%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). The Fund did not hold investments that were aligned with the EU Taxonomy during the reference period.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas      ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group’s independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Euro Bond Fund (LUX)

**Legal entity identifier:**  
549300MSGNIE4SEG2P53

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.26% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of sovereign issuers that failed the Investment Adviser’s process [at the time of purchase]             | 0%      |
| Percentage of Sustainable Investments                                                                              | 19.26%  |

● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2023 | 2024   | 2025   |
|--------------------------------------------------------------------------------------------------------------------|------|--------|--------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%   | 0%     | 0%     |
| Percentage of sovereign issuers that failed the Investment Adviser’s process [at the time of purchase]             | 0%   | 0%     | 0%     |
| Percentage of Sustainable Investments                                                                              | n/a  | 21.17% | 19.26% |

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 5%, being those investments that have undergone the Investment Adviser’s process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser’s process of identifying sustainable investments assessed whether companies’ products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the “SDGs”) are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### *- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

#### *- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 30.96% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                       | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p> | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                                                              |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                           | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                           | <ul style="list-style-type: none"> <li>- Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</li> <li>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</li> </ul> |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 Jan 2025 to 31 Dec 2025

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2025 the Fund invested 94.54% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 19.26% were invested in sustainable investments as defined by the Investment adviser.
- 2.34% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 1.20% with an environmental objective aligned with EU Taxonomy. 15.72% were invested into sustainable investment with a social objective (Social).

5.46% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                 | Average Weight |
|------------------------|--------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services     | 1.10%          |
|                        | Media                                      | 0.33%          |
|                        | Wireless Telecommunication Services        | 0.29%          |
| Consumer Discretionary | Automobile Components                      | 0.00%          |
|                        | Automobiles                                | 1.55%          |
|                        | Hotels, Restaurants & Leisure              | 0.56%          |
| Consumer Staples       | Beverages                                  | 0.48%          |

| Total     |                    | 100%  |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.64%        | 0.24%             |
| CapEx     | 0.95%        | 0.33%             |
| OpEx      | 0.53%        | 0.27%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Indicator | Type of activities                        | 2023  | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 0.78% | 1.14% | 1.20% |
| Turnover  | Enabling                                  | 0.37% | 0.59% | 0.64% |
| Turnover  | Transition                                | 0.16% | 0.25% | 0.24% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 1.56% | 1.87% | 1.66% |
| CapEx     | Enabling                                  | 0.84% | 1.06% | 0.95% |
| CapEx     | Transition                                | 0.17% | 0.24% | 0.33% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 1.37% | 1.53% | 1.13% |
| OpEx      | Enabling                                  | 0.76% | 0.81% | 0.53% |
| OpEx      | Transition                                | 0.23% | 0.27% | 0.27% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology to aid comparability with the current years figures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 2.34%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 15.72%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***  
Not applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***  
Not applicable.
- ***How did this financial product perform compared with the reference benchmark?***  
Not applicable.
- ***How did this financial product perform compared with the broad market index?***  
Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Global Corporate Bond Fund (LUX)

**Legal entity identifier:**  
549300RYX3TCTOW4M118

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.68% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than the Bloomberg Global Aggregate Corporate Total Return Index hedged to USD ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

In addition to corporate issuers, the Fund may also invest in sovereign securities. Sovereign issuers are excluded if their ESG scores, based on third-party and proprietary research, fall below pre-defined thresholds set by the Investment Adviser.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results         |
|--------------------------------------------------------------------------------------------------------------------|-----------------|
| WACI of the corporate issuers compared to Index                                                                    | 15% below index |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%              |
| Percentage of Sustainable Investments                                                                              | 55.68%          |

● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2023                                                                                               | 2024                                                                                             | 2025                                                                                             |

| Percentage of Sustainable Investments                                                                              | n/a                                                                                                | 58.90%                                                                                           | 55.68%                                                                                           |

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser’s process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser’s process of identifying sustainable investments assessed whether companies’ products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the “SDGs”) are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### *- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

#### *- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 89.51% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                          |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2025 the Fund invested 92.97% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 55.68% were invested in sustainable investments as defined by the Investment adviser.
- 8.94% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.77% with an environmental objective aligned with EU Taxonomy. 45.97% were invested into sustainable investment with a social objective (Social).

7.03% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                             | Average Weight |
|------------------------|----------------------------------------|----------------|
| Asset Backed           | Auto Loan                              | 0.03%          |
| Communication Services | Diversified Telecommunication Services | 3.20%          |
|                        | Entertainment                          | 0.05%          |
|                        | Interactive Media & Services           | 0.22%          |
|                        | Media                                  | 1.44%          |
|                        | Wireless Telecommunication Services    | 0.50%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 89.51% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.29%        | 0.28%             |
| CapEx     | 0.77%        | 0.31%             |
| OpEx      | 0.42%        | 0.34%             |

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

| Indicator | Type of activities                         | 2023  | 2024  | 2025  |
|-----------|--------------------------------------------|-------|-------|-------|
| Turnover  | Taxonomy-alignme nt (including sov. bonds) | 0.89% | 1.22% | 0.77% |
| Turnover  | Enabling                                   | 0.64% | 0.61% | 0.29% |
| Turnover  | Transition                                 | 0.09% | 0.35% | 0.28% |
| CapEx     | Taxonomy-alignme nt (including sov. bonds) | 2.42% | 2.23% | 1.61% |
| CapEx     | Enabling                                   | 1.56% | 1.19% | 0.77% |
| CapEx     | Transition                                 | 0.15% | 0.34% | 0.31% |
| OpEx      | Taxonomy-alignme nt (including sov. bonds) | 2.00% | 1.82% | 1.03% |
| OpEx      | Enabling                                   | 1.34% | 0.94% | 0.42% |
| OpEx      | Transition                                 | 0.13% | 0.39% | 0.34% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 8.94%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments made by the Fund is 45.97%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Future Generations Global Corporate Bond Fund (LUX)

**Legal entity identifier:**  
5493008PZIMIITOL0K15

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 92.01% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Investment in companies that are majority-aligned or transitioning with the UN Sustainable Development Goals (SDGs), as determined by the Investment Adviser;

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

In addition to corporate issuers, the Fund may also invest in sovereign securities. Sovereign issuers are excluded if their ESG scores, based on third-party and proprietary research, fall below pre-defined thresholds set by the Investment Adviser.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://www.capitalgroup.com/international).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of Sustainable Investments                                                                              | 92.01%  |
| Percentage of investments having at least 50% of their revenue aligned with the SDGs                               | 85.91%  |
| Percentage of investments in companies considered as “Transitioning”                                               | 6.10%   |

● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2024   | 2025   |
|--------------------------------------------------------------------------------------------------------------------|--------|--------|

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 60%, being those investments that have undergone the Investment Adviser’s process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies’ products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the “SDGs”) are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

#### *- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

#### *- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As described above, the Fund considered all mandatory principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 92.01% of the portfolio.

In particular, via the Negative Screening Policy the Investment Adviser addressed PAI 4 on exposure to companies active in the fossil fuel sector, PAI 10 on United Nations Global Compact violators and PAI 14 on controversial weapons.

The Investment Adviser's assessment also included an overall qualitative assessment of how ESG risks were being managed.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                       | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2025 the Fund invested 93.19% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 92.01% were invested in sustainable investments as defined by the Investment adviser.
- 14.29% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 2.72% with an environmental objective aligned with EU Taxonomy. 75.00% were invested into sustainable investment with a social objective (Social).

6.81% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| <b>Sector</b>          | <b>Sub-Sector</b>                              | <b>Average Weight</b> |
|------------------------|------------------------------------------------|-----------------------|

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas      ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 1.78%        | 0.30%             |
| CapEx     | 2.60%        | 0.33%             |
| OpEx      | 2.71%        | 0.34%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Indicator | Type of activities                        | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 2.01% | 2.72% |
| Turnover  | Enabling                                  | 1.15% | 1.78% |
| Turnover  | Transition                                | 0.34% | 0.30% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 3.37% | 4.41% |
| CapEx     | Enabling                                  | 1.53% | 2.60% |
| CapEx     | Transition                                | 0.32% | 0.33% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 2.91% | 4.31% |
| OpEx      | Enabling                                  | 1.53% | 2.71% |
| OpEx      | Transition                                | 0.37% | 0.34% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 14.29%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 75.00%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments and that were held to attain the investment objective of the Fund.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser applied the following investment strategy to attain the environmental and/or social characteristics promoted and the sustainable investments that the Fund partially intended to make:

- Positive screening (SDG-based framework)

The Fund invested in companies whose products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals ("SDGs") were considered when determining the themes.

| Themes                           | Key Associated UN SDGs                                                                                                                                                                                                                                                                                                                                                                                                                                  |

To identify such companies, the Investment Adviser performed an eligibility assessment that relies on bottom-up proprietary research conducted by the Investment Adviser's investment and ESG teams. This eligibility assessment is underpinned by the Investment Adviser's sector-level "Characteristics" and "Standards":

- Characteristics: focus on whether products and services contribute to the SDGs; and
- Standards: focus on management of material ESG risks and good governance.

The Fund invested in 'Aligned' companies that currently have at least half of their business aligned to the themes, as well as 'Transitioning' companies that the Investment Adviser believes are actively transitioning their business to higher positive alignment with material near-to-medium term change expected. If a company is determined to be aligned or transitioning and purchased in the Fund but fails to meet the aligned or transitioning requirements thereafter, such company would no longer be considered a sustainable investment anymore and would generally be sold within six months from the date of such determination, subject to the best interests of investors in the Fund. During the reference period, no 'Aligned' or 'Transitioning' companies were subsequently deemed to have fail the aligned or transitioning requirements.

- Negative screening (ESG and norms-based exclusions)

In addition, the Investment Adviser applies ESG and norms-based exclusions to implement a Negative Screening Policy to the Fund's investments at the time of purchase (e.g., on companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties to controversial weapons).

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

Post-trade, when the monitoring function identified previously eligible issuers that subsequently failed an appropriate screen, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund. During the reference period, no investment subsequently failed the negative screens.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

- Engagement

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**  
Not applicable.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**  
Not applicable.
- **How did this financial product perform compared with the reference benchmark?**  
Not applicable.
- **How did this financial product perform compared with the broad market index?**  
Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group US Corporate Bond Fund (LUX)

**Legal entity identifier:**  
549300EJBPG24TBIW065

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.63% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than the Bloomberg U.S. Corporate Investment Grade Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

In addition to corporate issuers, the Fund may also invest in sovereign securities. Sovereign issuers are excluded if their ESG scores, based on third-party and proprietary research, fall below pre-defined thresholds set by the Investment Adviser.

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results         |
|--------------------------------------------------------------------------------------------------------------------|-----------------|
| WACI of the corporate issuers compared to Index                                                                    | 47% below index |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%              |
| Percentage of Sustainable Investments                                                                              | 53.63%          |

### ● **...and compared to previous periods?**

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 10%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

*- How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);

2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

*- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:

the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 88.39% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                          |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 95.89% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 53.63% were invested in sustainable investments as defined by the Investment adviser.
- 9.90% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.38% with an environmental objective aligned with EU Taxonomy. 43.35% were invested into sustainable investment with a social objective (Social).

4.11% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 1.78%          |
|                        | Entertainment                                  | 0.05%          |
|                        | Interactive Media & Services                   | 0.52%          |
|                        | Media                                          | 1.80%          |
|                        | Wireless Telecommunication Services            | 0.74%          |
| Consumer Discretionary | Automobiles                                    | 3.55%          |
|                        | Broadline Retail                               | 0.13%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 88.39% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.30%        | 0.05%             |
| CapEx     | 0.17%        | 0.07%             |
| OpEx      | 0.38%        | 0.06%             |

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

| Indicator | Type of activities                         | 2023  | 2024  | 2025  |
|-----------|--------------------------------------------|-------|-------|-------|
| Turnover  | Taxonomy-alignme nt (including sov. bonds) | 0.22% | 0.13% | 0.38% |
| Turnover  | Enabling                                   | 0.08% | 0.06% | 0.30% |
| Turnover  | Transition                                 | 0.10% | 0.05% | 0.05% |
| CapEx     | Taxonomy-alignme nt (including sov. bonds) | 0.38% | 0.36% | 0.38% |
| CapEx     | Enabling                                   | 0.17% | 0.16% | 0.17% |
| CapEx     | Transition                                 | 0.10% | 0.05% | 0.07% |
| OpEx      | Taxonomy-alignme nt (including sov. bonds) | 0.41% | 0.33% | 0.52% |
| OpEx      | Enabling                                   | 0.19% | 0.17% | 0.38% |
| OpEx      | Transition                                 | 0.14% | 0.06% | 0.06% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 9.90%.

**What was the share of socially sustainable investments?**

The share of socially sustainable investments made by the Fund is 43.35%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Global High Income Opportunities (LUX)

**Legal entity identifier:**  
5493003T9JGEHH5RHHV09

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than 50% Bloomberg US Corp HY 2% Issuer Capped Total Return, 20% JPM EMBI Global Total Return, 20% JPM GBI-EM Global Diversified Total Return, 10% JPM CEMBI Broad Diversified Total Return indexes ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).
- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 80% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 60%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results         |
|--------------------------------------------------------------------------------------------------------------------|-----------------|
| WACI of the corporate issuers compared to Index                                                                    | 24% below index |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%              |
| Percentage of sovereign issuers that failed the Investment Adviser's process [at the time of purchase]             | 0%              |

### ● **...and compared to previous periods?**

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 52.83% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2024 the Fund invested 95.20% of its assets into issuers that attained the promoted E/S characteristics (#1) and 4.80% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). The latter investments were held to attain the investment objective of the Fund.

Derivatives, securitised assets, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Communication Services | Diversified Telecommunication Services         | 0.79%          |
|                        | Entertainment                                  | 0.32%          |
|                        | Interactive Media & Services                   | 0.14%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). The Fund did not hold investments that were aligned with the EU Taxonomy during the reference period.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

Yes: ☐ In fossil gas ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 52.83% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, securitised assets, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.61% of sustainable investments

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is lower than 45% Bloomberg US Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg US Corporate Index, 15% JPMorgan EMBI Global Diversified Index, 8% Bloomberg NonAgency CMBS Ex AAA Index, 2% Bloomberg ABS Ex AAA Index ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).
- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 70% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 50%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://www.capitalgroup.com/international).

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results         |
|--------------------------------------------------------------------------------------------------------------------|-----------------|
| WACI of the corporate issuers compared to Index                                                                    | 31% below index |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%              |
| Percentage of sovereign issuers that failed the Investment Adviser's process [at the time of purchase]             | 0%              |
| Percentage of Sustainable Investments                                                                              | 19.61%          |

### ● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2022                                                                                             | 2023                                                                                             | 2024                                                                                             | 2025                                                                                             |
|--------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 46% below the Index as at 31 December 2022                     | WACI of the corporate issuers was 38% below the Index as at 31 December 2023                     | WACI of the corporate issuers was 33% below the Index as at 31 December 2024                     | WACI of the corporate issuers was 31% below the Index as at 31 December 2024                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 45% below the Index during the reference period | On average the WACI of the corporate issuers was 41% below the Index during the reference period | On average the WACI of the corporate issuers was 36% below the Index during the reference period | On average the WACI of the corporate issuers was 24% below the Index during the reference period |

| Percentage of Sustainable Investments                                                                              | n/a                                                                                              | n/a                                                                                              | 20.83%                                                                                           | 19.61%                                                                                           |

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund committed to making a minimum allocation to sustainable investments of 5%, being those investments that have undergone the Investment Adviser's process of identifying sustainable investments, which includes confirming that they also did no significant harm to any environmental or social objective and followed good governance practices. In addition, these investments satisfied the Negative Screening Policy.

The Investment Adviser's process of identifying sustainable investments assessed whether companies' products and services are majority-aligned, or transitioning towards higher positive alignment, with any single or combination of sustainable investment themes focused on global social and environmental challenges as identified by the Investment Adviser. Specific United Nations Sustainable Development Goals (the "SDGs") are considered as the themes are defined. These themes address needs such as but not limited to: (i) energy transition; (ii) health & wellbeing; (iii) sustainable cities & communities; (iv) responsible consumption & production; (v) clean water & sanitation; (vi) education & information access, and (vii) financial inclusion.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The sustainable investments made by the Fund did not cause significant harm to any environmental or social sustainable investment objective. The Fund considered the mandatory principal adverse impacts (PAIs) as set out in Table 1 of Annex I of Commission Delegated Regulation (EU) 2022/1288 for corporate investments and companies deemed by the Investment Adviser to be causing significant harm, based on these PAIs, were not considered sustainable investments.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The Investment Adviser took all the mandatory PAIs into account.

Through its Negative Screening Policy, the Investment Advisor took into account PAI 4 on exposure to companies active in the fossil fuel sector as well as PAI 10 on United Nations Global Compact violators and Principal Adverse Impact 14 on controversial weapons.

For the remaining mandatory PAIs:

1. Where sufficient and reliable quantitative data was available across the investment universe, the Investment Adviser used third-party data and defined thresholds to determine whether the adverse impacts associated with the company's activities were potentially significant (the interpretation of the prescribed threshold was made in comparison with the overall investment universe and/or with the peer group);
2. Where data availability and quality were deemed not sufficient, the Investment Adviser assessed the potential significant harm of a company based on a qualitative analysis.

Where third party data or the Investment Adviser's assessment indicated that a company is potentially doing significant harm based on a PAI threshold, the Investment Adviser performed additional due diligence to better understand and assess the negative impacts indicated by the third party or the proprietary data. If the Investment Adviser concluded that the company is not causing significant harm based on its additional due diligence, it proceeded with the investment and the rationale for such decision has been documented. For example, the Investment Adviser could have concluded that a company is not causing significant harm if (i) the Investment Adviser had reason to believe that third-party data was inaccurate and the Investment Adviser's own research demonstrated that the company is not causing significant harm; or (ii) the company was taking steps to mitigate or remediate that harm through appropriate actions which were accompanied by meaningful signs of improvement and positive change.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The sustainable investments are aligned with the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as follows:  
the Investment Adviser has reviewed issuers involved in significant ESG controversies, with a focus on those that conflict with existing global standards, including guidelines from the UNGC and the OECD. In accordance with the Negative Screening Policy, the Investment Adviser has excluded companies that were found to be in breach of the UNGC Principles. While other incidents did not automatically result in the exclusion of companies from the Fund's investment universe, the Investment Adviser ensured that appropriate action to remediate the concerns were taken.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 72.53% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 1 – GHG emissions                                                                                                                                         | <p>PAI 1 was considered as part of the Fund's managements of its WACI for its investments in corporate issuers. PAI 1 covers Scopes 1, 2, and 3 financed emission while the calculation of the WACI is based on Scope 1, and Scope 2 emissions expressed as revenue intensity of the issuer:</p> <ul style="list-style-type: none"> <li>• Scope 1: direct emissions from the investee company's facilities;</li> <li>• Scope 2: indirect emissions linked to the investee company's energy consumption.</li> </ul> <p>The WACI of the portfolio is assessed on an ongoing basis to help the Fund remain within the target level.</p> <p>This allows the Investment Adviser to measure the carbon footprint and carbon intensity of the portfolio.</p> | <p>Management of the carbon footprint (WACI) of its investment in corporate issuers that is generally at least lower than the Index.</p>                                                                                                                                                                                                                                                                                                                                                                                          |
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | <p>These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens.</p>                                                                                                                                                                                                                                                                                                                                                             | <p>Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.</p>                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.</p>                                                                                                                                                                                                                                                                                                                                                                                       |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 Jan 2025 to 31 Dec 2025

| Largest investments                                    | Sector          | % Assets | Country       |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### What was the asset allocation?

As at the 31 December 2025 the Fund invested 80.08% of its assets into issuers that attained the promoted E/S characteristics (#1). From this:

- 19.61% were invested in sustainable investments as defined by the Investment adviser.
- 3.37% of the Fund were invested into sustainable investments with an environmental objective aligned with SFDR (Other environmental) and 0.13% with an environmental objective aligned with EU Taxonomy. 16.11% were invested into sustainable investment with a social objective (Social).

19.92% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). Any investments that did not align with the E/S characteristics promoted by the Fund were held to attain the investment objective of the Fund.

Derivatives, securitised assets, cash and cash equivalents were included in 'Other' and were not used to attain the E/S characteristics promoted by the Fund.

● ***In which economic sectors were the investments made?***

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|
| Asset Backed           | Asset Backed Securities                        | 0.56%          |
|                        | Auto Loan                                      | 2.78%          |
|                        | Collateralized Loan Obligations                | 0.95%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). However, during the reference period, the Fund held investments that were aligned with the EU Taxonomy and the percentages of those investments by Turnover, CapEx and OpEx are detailed below.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### What was the share of investments made in transitional and enabling activities?

The Fund did not commit to a minimum share of investments in transitional and enabling activities, however the share of investment in such activities within the meaning of the EU Taxonomy are shown below. Investments that are aligned with the EU Taxonomy are incidental and are not an objective pursued by this Fund.

| Indicator | Enabling (%) | Transitioning (%) |
|-----------|--------------|-------------------|
| Turnover  | 0.11%        | 0.01%             |
| CapEx     | 0.14%        | 0.01%             |
| OpEx      | 0.15%        | 0.01%             |

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Indicator | Type of activities                        | 2022  | 2023  | 2024  | 2025  |
|-----------|-------------------------------------------|-------|-------|-------|-------|
| Turnover  | Taxonomy-alignment (including sov. bonds) | 0.11% | 0.08% | 0.03% | 0.13% |
| Turnover  | Enabling                                  | 0.02% | 0.02% | 0.01% | 0.11% |
| Turnover  | Transition                                | 0.00% | 0.04% | 0.01% | 0.01% |
| CapEx     | Taxonomy-alignment (including sov. bonds) | 0.00% | 0.10% | 0.12% | 0.23% |
| CapEx     | Enabling                                  | 0.00% | 0.04% | 0.03% | 0.14% |
| CapEx     | Transition                                | 0.00% | 0.04% | 0.01% | 0.01% |
| OpEx      | Taxonomy-alignment (including sov. bonds) | 0.00% | 0.11% | 0.10% | 0.20% |
| OpEx      | Enabling                                  | 0.00% | 0.03% | 0.03% | 0.15% |
| OpEx      | Transition                                | 0.00% | 0.06% | 0.02% | 0.01% |

Metrics for previous years shown in this report may differ from those published at the time, due to updates in methodology, which have been applied to figures from prior years to aid comparability. Note: 2022 figures were calculated using a different data provider to those calculated from onwards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The total share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 3.37%.

### What was the share of socially sustainable investments?

The share of socially sustainable investments made by the Fund is 16.11%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under the category #2 "Other" included investments (including derivatives, securitised assets, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

#### Reference

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group US High Yield Fund (LUX)

**Legal entity identifier:**  
549300UUXOXHO7V0TV27

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☐ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- Management of a Weighted Average Carbon Intensity (WACI) for its investments in corporate issuers that is generally at least lower than the Bloomberg US Corporate High Yield 2% Issuer Capped ('Index'). The WACI is based on GHG emissions (Scope 1 and 2) divided by the revenue of the investee companies.
- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacc/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 80% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 60%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | 2025                                                                                             |
|--------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| WACI of the corporate issuers compared to Index                                                                    | WACI of the corporate issuers was 25% below the Index as at 31 December 2025                     |
|                                                                                                                    | On average the WACI of the corporate issuers was 16% below the Index during the reference period |
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%                                                                                               |

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 95.11% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### ● *What was the asset allocation?*

As at the 31 December 2024 the Fund invested 95.11% of its assets into issuers that attained the promoted E/S characteristics (#1) and 4.89% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). The latter investments were held to attain the investment objective of the Fund.

Derivatives, securitised assets, cash and cash equivalents were included in ' #2 Other' and were not used to attain the E/S characteristics promoted by the Fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                                     | Average Weight |
|------------------------|------------------------------------------------|----------------|

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). The Fund did not hold investments that were aligned with the EU Taxonomy during the reference period.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?**

☐ Yes:

☐ In fossil gas      ☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents 95.11% of the total Investments.

*\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, securitised assets, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

The Investment Adviser also monitored the WACI of the Fund, compared to that of its selected index, on an ongoing basis to ensure the Fund met its target of being below the index.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**How did this financial product perform compared to the reference benchmark?**

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Emerging Markets Debt Fund (LUX)

5493001EM74UIS5B1D14

## Environmental and/or social characteristics<sup>1</sup>

### Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).

- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:

<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://www.capitalgroup.com/international).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of sovereign issuers that failed the Investment Adviser’s process [at the time of purchase]             | 0%      |

● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2024 | 2025 |
|--------------------------------------------------------------------------------------------------------------------|------|------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%   | 0%   |
| Percentage of sovereign issuers that failed the Investment Adviser’s process [at the time of purchase]             | 0%   | 0%   |

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 15.45% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens. | Exclusion of companies that generate over 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.                                                                                                                                                                                                                                                 |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                    | Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.                                                                                                                                                                                                                                                                                                                                                                                            |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                    | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

### ● *What was the asset allocation?*

As at the 31 December 2025 the Fund invested 93.90% of its assets into issuers that attained the promoted E/S characteristics (#1) and 6.10% of the Fund's investments did not align with the E/S characteristics promoted by the Fund (#2). The latter investments were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in '2 Other' and were not used to attain the E/S characteristics promoted by the Fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                               | Average Weight |
|------------------------|------------------------------------------|----------------|
| Communication Services | Interactive Media & Services             | 0.18%          |
|                        | Wireless Telecommunication Services      | 1.17%          |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). The Fund did not hold investments that were aligned with the EU Taxonomy during the reference period.

#### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 15.45% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies' involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group's independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

Not applicable.

### ● *How does the reference benchmark differ from a broad market index?*

Not applicable.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

### ● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

### ● *How did this financial product perform compared with the broad market index?*

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Product name:**  
Capital Group Emerging Markets Local Currency Debt Fund (LUX)

**Legal entity identifier:**  
5493009VJSAE25SFXL78

Environmental and/or social characteristics<sup>1</sup>

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☐ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: \_\_%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective**: \_\_%

☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social (E/S) characteristics through:

- At time of purchase exclusions on corporate issuers, with respect to certain sectors such as tobacco, fossil fuel and weapons, as well as companies violating the principles of the United Nations Global Compact (UNGC).
- Leveraging the Investment Adviser proprietary sovereign ESG framework for sovereign issuer exclusions, to assess ESG scores against predetermined thresholds.

The Negative Screening Policy applied can be found on:  
<https://www.capitalgroup.com/content/dam/cgc/tenants/eacg/negative-screening-policy.pdf>

- Investment in companies that followed good governance practices.

Prior to 31 March 2025, at least 90% of the portfolio was aligned with the Fund's E/S characteristics in line with the pre-contractual disclosures applicable at that time. From 1 April 2025, following updates to those disclosures — including the inclusion of cash and cash equivalents in the asset allocation calculation — the applicable alignment threshold was 70%, which was met throughout the remainder of the reference period. For detailed information on these changes, please refer to the notices sent to shareholders, which are also available at [capitalgroup.com/international](https://capitalgroup.com/international).

<sup>1</sup>Unless otherwise stated, the information provided is as of 31 December 2025.

### ● **How did the sustainability indicators perform?**

The following sustainability indicators have been used to measure the attainment of the E/S characteristics promoted by the Fund:

| Sustainability indicator                                                                                           | Results |
|--------------------------------------------------------------------------------------------------------------------|---------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%      |
| Percentage of sovereign issuers that failed the Investment Adviser's process [at the time of purchase]             | 0%      |

### ● **...and compared to previous periods?**

| Sustainability indicator                                                                                           | 2023 | 2024 | 2025 |
|--------------------------------------------------------------------------------------------------------------------|------|------|------|
| Percentage of corporate issuers that failed a screen under the Negative Screening Policy [at the time of purchase] | 0%   | 0%   | 0%   |
| Percentage of sovereign issuers that failed the Investment Adviser's process [at the time of purchase]             | 0%   | 0%   | 0%   |

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impact (PAI) indicators during the investment-decision process of investments in corporate issuers as described in the table below. During the reference period, on average corporate issuers represented 4.08% of the portfolio.

| PAI Indicator                                                                                                                                                 | Integration Process                                                                                                                                                                                                                                                                                                                                                                | Threshold (when applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PAI 4 – Exposure to companies active in the fossil fuel sector                                                                                                | These PAIs were considered when the investment adviser evaluated and applied ESG and norms-based screening to implement exclusions on corporate issuers. To support this screening, it relied on third party provider(s) who identified an issuer's participation in or the revenue which they derived from activities that are inconsistent with the ESG and norms-based screens. | Exclusion of companies that generate 10% or more of their revenue from oil sands extraction and/or Arctic oil production and/or from the production and/or distribution of thermal coal as identified through the relevant MSCI Maximum Percentage of Revenue factor name.                                                                                                                                                                                                                                                      |
| PAI 10 – Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises |                                                                                                                                                                                                                                                                                                                                                                                    | Exclusion of companies that, in the investment adviser's opinion, are violating the United Nations Global Compact (UNGC) principles.                                                                                                                                                                                                                                                                                                                                                                                            |
| PAI 14 – Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)                                 |                                                                                                                                                                                                                                                                                                                                                                                    | <p>Exclusion of companies that have any ties to controversial weapons: cluster munitions, landmines, biological/chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments. Companies are identified through the MSCI's Controversial Weapons– Any Tie factor name.</p> <p>- Exclusion of companies involved in intentional production of weapons with exclusive use as nuclear weapons. Companies are identified through the relevant MSCI's Weapons factors.</p> |

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1 Jan 2025 to 31 Dec 2025

The top investments are calculated as an average of the relevant quarter end positions held by the Fund during the reference period.

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

Please find information regarding the proportion of sustainability-related investments in the following sub-sections.

**What was the asset allocation?**

As at the 31 December 2025 the Fund invested 94.51% of its assets into issuers that attained the promoted E/S characteristics (#1) and 5.49% of the Fund’s investments did not align with the E/S characteristics promoted by the Fund (#2). The latter investments were held to attain the investment objective of the Fund.

Derivatives, cash and cash equivalents were included in ‘#2 Other’ and were not used to attain the E/S characteristics promoted by the Fund.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

**In which economic sectors were the investments made?**

The Fund invested in the following economic sectors:

| Sector                 | Sub-Sector                          | Average Weight |
|------------------------|-------------------------------------|----------------|
| Communication Services | Wireless Telecommunication Services | 2.34%          |
| Financials             | Banks                               | 1.05%          |
| Government             | Africa & Middle East Government     | 13.31%         |
|                        | Asia-pacific Ex Japan Government    | 34.04%         |
|                        | Development Authorities             | 2.56%          |
|                        | European Agency                     | 0.07%          |

| Utilities              | Electric Utilities                  | 0.46%          |
| Total                  |                                     | 100%           |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promoted environmental characteristics within the meaning of Article 8 of the SFDR, its commitment to make “environmentally sustainable investments” within the meaning of the Taxonomy Regulation was set at 0% (including in transitional and enabling activities). The Fund did not hold investments that were aligned with the EU Taxonomy during the reference period.

### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

Yes:

In fossil gas      In nuclear energy

**X** No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds\*, the first graph shows the taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

#### 1. Taxonomy-alignment of investments including sovereign bonds\*

#### 2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents 4.08% of the total Investments.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Percentages in the above table are calculated including cash and/or cash equivalents.

<sup>2</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not commit to a minimum share of investments in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable.

**What was the share of socially sustainable investments?**

Not applicable.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The investments under the category #2 “Other” included investments (including derivatives, cash and cash equivalents) which were neither aligned with the E/S characteristics nor qualified as sustainable investments. These investments were held to attain the investment objective of the fund. Cash and cash equivalents were also held for liquidity purposes.

These investments did not follow any minimum environmental or social safeguards.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The E/S characteristics of the Fund were based on the Negative Screening Policy. The Investment Adviser identified certain issuers or groups of issuers that it excluded (such as companies generating more than 5% of their revenue from the manufacture of tobacco products or companies that have any ties with controversial weapons) from the portfolio in order to attain the E/S characteristics promoted by the Fund.

For the sovereign issuers, the Investment Adviser leveraged on its proprietary sovereign ESG framework. All the sovereign-issued investments that qualified as aligned with the E/S characteristics fulfilled the following criteria: score above pre-determined thresholds for their proprietary ESG score on both an absolute and gross national income-adjusted basis.

On 28 July 2025, MSCI ESG revised its methodology for assessing companies’ involvement in nuclear weapons production. Following this change, data sources used for controversial weapons were clarified to cover companies involved in the intentional production of nuclear missiles and warheads. Further details on exclusions, methodologies and data sources are available in the Negative Screening Policy.

The Fund applied investment restrictions rules on a pre-trade basis in portfolio management systems to prohibit investment in companies or issuers based on the exclusion criteria. The Fund also underwent regular/systematic post-trade compliance checks performed by Capital Group’s independent guideline monitoring function.

When the monitoring function identifies previously eligible issuers that subsequently failed an appropriate screen and the investment no longer attained the E/S characteristics of the Fund, the Investment Adviser looked to sell the issuer within six months from the date of such determination, subject to the best interests of investors in the Fund.

During the reference period, no investments breaching the exclusion criteria were purchased and there were no passive breaches of the Fund.

As part of its good governance practices assessment, the Investment Adviser also engaged in regular dialogue with companies on corporate governance issues and exercised its proxy voting rights for the entities in which the Fund invested.

### How did this financial product perform compared to the reference benchmark?

Not applicable.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.
