Objectives and investment policy

The fund's investment objective is to provide long-term (i.e., a period of over 5 years) growth of capital. The fund invests in equities of companies located around the world that the Investment Adviser believes have the potential for long-term growth. The Investment Adviser seeks to take a new perspective to investing by taking advantage of investment opportunities generated by changing patterns of global trade and transformational changes in the global economy. In particular, the fund invests in a spectrum of established multinational companies to companies that are in their earlier stages of global expansion, and that are, in the view of the Investment Adviser, better placed to adapt to and take advantage of these changes over the long-term. The Investment Adviser applies a long-term and flexible philosophy on a company-by-company basis rather than being constrained by geography, sector or investment style.

The fund will seek to invest at least 80% of its assets in equities or equity-related securities of companies worldwide.

In addition to the integration of sustainability risks as part of the Investment Adviser's investment decision-making process, the fund aims to

manage a carbon footprint (weighted average carbon intensity) for its investments in corporate issuers that is lower than that of its selected index (the MSCI AC World Index). The weighted average carbon intensity of the portfolio will vary and so will the amount by which it is lower than the weighted average carbon intensity of the selected index.

The Investment Adviser uses third-party carbon footprint data to monitor the portfolio's weighted average carbon intensity, and may adjust exposures to certain companies as necessary. Note that the carbon footprint measurements only apply to holdings and constituents with available carbon emissions data and do not apply to issuers where relevant carbon data is not available.

The Investment Adviser also evaluates and applies ESG and norms-based screening to implement exclusions on corporate issuers at the time of purchase, with respect to certain sectors. For more sustainability related information, please refer to the fund's 'Consumer-Facing Disclosure' document, which can be found on <https://capitalgroup.com/eu/cgnpuk>.

The exposure limits referenced above will not

apply under extraordinary market conditions, in which circumstances, the fund may invest in order to mitigate its exposure to market risk. Extraordinary market conditions may arise as a result of economic or political unrest or instability and world events leading to market instability. For full investment objectives and policy details, please refer to the prospectus.

The fund may invest more than 35% in bonds issued or guaranteed by a member state of the European Economic Area or other countries listed in the fund's prospectus.

Investors can buy and sell shares of the fund on a daily basis. This fund may only be appropriate for long-term investment (i.e. more than 5 years).

This fund is an actively managed UK UCITS. It is not managed in reference to a benchmark, but an index is used as an appropriate comparator for the fund's performance. Any information in relation to an index is provided for the purposes of carbon emission, context and illustration, as applicable.

Risk and reward profile

Historical data, such as is used in calculating this indicator, may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The fund is rated 5 due to the nature of its investments which include the risks listed below. These factors singularly or in combination may impact the value of the fund's investments or expose the fund to losses.

Equities risk: The prices of equity securities may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund, overall market changes, local, regional or global political, social or economic instability and currency fluctuations.
Liquidity risk: Some securities, primarily unlisted

securities and/or those traded in OTC markets, under certain circumstances may not be traded quickly enough in the market to prevent a loss.

Operational risk: This fund may invest in markets where settlement systems are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the fund may be in jeopardy.

Counterparty risk: Other financial institutions provide services to the fund such as safekeeping of assets or may serve as a counterparty to financial contracts such as derivatives. There is a

risk the counterparty will not meet their obligations.

Sustainability risk: Environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment of the fund.

Emerging markets risk: Investments in emerging markets are generally more sensitive to risk events such as changes in the economic, political, fiscal and legal environment.

Charges

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment. Initial and redemption charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser or distributor about this.

The ongoing charge is an estimate based on actual costs. It excludes portfolio transaction costs which do affect returns.

For more information about charges, including potential capping of expenses, please see the 'Charges and Expenses' section in the prospectus and the latest annual or semi-annual reports, available at <http://www.capitalgroup.com/gb/en>
