Emerging Markets Corporate Debt Fund - AHX (EUR)

ISIN: LU0691070527, Base Currency: EUR

A fund of Morgan Stanley Investment Funds

The fund is managed by MSIM Fund Management (Ireland) Limited, part of the Morgan Stanley group.

OBJECTIVES AND INVESTMENT POLICY

Objective

- To seek to maximise total return.

Main Investments

- At least 70% of the Fund's investments will be in fixed income securities (e.g. bonds).

Investment Policy

- To invest in fixed income securities issued by companies based in or carrying out most of their business in emerging markets countries.
- As an essential and integrated part of the research process and through engagement with issuers, the Investment Adviser incorporates an assessment of sustainability related risks and opportunities into the assessment process.
- The Fund includes tobacco, climate- and weapons-related exclusions, the details of which may be found in the Fund's Restriction Screening policy on the Company's website (www.morganstanleyinvestmentfunds.com and www.morganstanley.com/im).
- The Fund will measure its performance against the JPM Corporate Emerging Markets Bond Index-Broad Diversified Index (the "Benchmark"). The Fund is actively managed and references the "Benchmark" for the purpose of setting a geographical allocation of the countries the Fund will invest

into. While the Fund will generally hold assets that are exposed to the Benchmark, it can invest in such components in different proportions, and it can hold assets which are not exposed to the Benchmark. Hence, there are no restrictions on the extent to which the Fund's performance may deviate from the ones of the Benchmark.

Other Information

- The Fund may invest up to 30% of its assets in other fixed income securities that do not meet the above criteria, for example fixed income securities which are not exposed to emerging markets.
- The Fund may invest in derivatives, financial instruments which take their value indirectly from other assets. They rely on other companies to fulfil contractual obligations and carry more risk. Refer to the prospectus ('Financial Derivative Instruments' section) for more details.
- The Fund may invest up to 20% of its assets in securities acquired on the China Interbank Bond Market.
- This is a currency hedged share class. It aims to reduce the impact on your investment of movements in the exchange rate between the fund currency and the share class currency.
- Income may be paid quarterly in cash or additional shares.

Buying and selling shares

- Investors may buy and sell shares on any Luxembourg business day.

RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in fixed income securities from emerging markets and the fund's simulated and/or realised return has experienced medium rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of bonds are likely to decrease if interest rates rise and vice versa.
- The value of financial derivative instruments are highly sensitive and may result in losses in excess of the amount invested by the Sub-Fund.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the fund invests in a bond with a lower credit rating.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- Sustainability factors can pose risks to investments, for example: impact asset values, increased operational costs.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- Investment in Fixed Income Securities via the China Interbank Bond Market may also entail additional risks, such as counterparty and liquidity risk.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.
- In order to achieve the currency hedging, this share class relies on other parties to fulfil certain contractual obligations, as these parties may fail to do so there is a higher risk to your investment.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.71%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

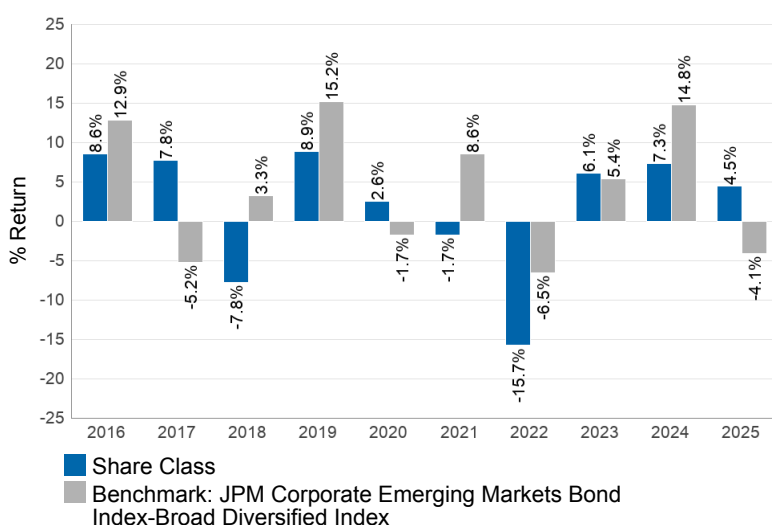

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges based on the current expense policy of the Fund. It excludes almost all costs of dealing in the Fund's underlying investments. The Company's annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year.

The fund may charge a fee on purchases, sales or switches if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the Charges and Expenses section of the prospectus.

PAST PERFORMANCE

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- The fund was launched in 2011.
- Past performance has been calculated in EUR.
- The Fund measures its performance against the JPM Corporate Emerging Markets Bond Index-Broad Diversified Index.
