Capital Group Global Total Return Bond Fund (LUX)

This fund is a sub-fund of Capital International Fund (CIF). This fund is managed by Capital International Management Company Sàrl, part of Capital Group.	Class ISIN	Z EUR LU2177478729

Objectives and investment policy

The Fund's investment objective is to maximise total return over the long term. The Fund invests worldwide primarily in Investment Grade Bonds. The Fund also invests in High Yield Bonds and in other fixed income securities including mortgage- and asset-backed securities. These Bonds will be Bonds of governmental, supranational and corporate issuers denominated in various currencies. The types of mortgage backed securities in which the Fund may invest are Commercial Mortgage-Backed Securities ("CMBS"), Collateralised Mortgage Obligations ("CMO"), Residential Mortgage-Backed Securities ("RMBS") and To Be Announced Securities ("TBA") contracts. The types of asset backed securities in which the Fund may invest include securities backed by loans, leases or receivables, Collateralised Debt Obligations ("CDO") and Collateralised Loan Obligations ("CLO"). The proportion of securities held by the Fund within each of the credit sectors will vary with market conditions and the Investment Adviser's assessment of their relative attractiveness as investment opportunities. These are usually listed or traded on other Regulated Markets. Unlisted Bonds may also be purchased. In addition to the integration of sustainability risks as part of the investment adviser's investment decision making process, the investment adviser also evaluates and applies ESG and norms- based screening to implement a negative screening policy relating to the fund's investments in corporate issuers and sovereign issuers.

Investors can buy and sell shares of the fund on a daily basis. This fund may only be appropriate for long-term investment.

This fund is an actively managed UCITS. It is not managed in reference to a benchmark. Any information in relation to an index is provided for the purposes of risk management, context and illustration, as applicable.

Historical data, such as is used in calculating this indicator, may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The fund is rated 4 due to the nature of its investments which include the risks listed below. These factors singularly or in combination may impact the value of the fund's investments or expose the fund to losses.

- **Bonds risk:** The market values of bonds generally vary inversely with the level of interest rates – when interest rates rise, their values will tend to decline and vice versa. Funds investing in bonds will be exposed to credit risk. Securities which have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities.
- **High yield bonds risk:** These bonds typically are subject to greater market fluctuations and to greater risk of loss of income and principal due to default by the issuer than are higher-rated bonds. Lower-rated bonds' values tend to reflect short-term corporate, economic and market developments and investor perceptions of the issuer's credit quality to a greater extent than lower yielding higher-rated bonds.
- **Liquidity risk:** Some securities, primarily unlisted securities and/or those traded in OTC markets, under certain circumstances may not be traded quickly enough in the market to prevent a loss.
- **Operational risk:** This fund may invest in markets where settlement systems are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the fund may be in jeopardy.
- **Counterparty risk:** Other financial institutions provide services to the fund such as safekeeping of assets or may serve as a counterparty to financial contracts such as derivatives. There is a risk the counterparty will not meet their obligations.
- **Sustainability risk:** Environmental, social or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment of the fund.
- **Derivative instruments risk:** While the fund intends to use derivative instruments in a prudent manner and primarily for hedging and/or efficient portfolio management purposes, derivative instruments may expose a fund to additional risks related to the credit risks of the counterparty and potential for increased volatility and reduced liquidity in comparison to the underlying security positions.
- **Distressed securities risk:** The fund may invest in distressed securities which have a credit rating lower than CCC- by Standard & Poor's or equivalent, at the time of purchase. Therefore, distressed and defaulted debt securities are subject to large uncertainties and are exposed to major risks related to adverse economic conditions as well as a significant risk of capital loss.
- **China Interbank Bond Market risk:** Investments in Chinese onshore bonds traded directly via the China Interbank Bond Market are subject to various risks associated with clearing and settlement, liquidity, regulatory and counterparty risks.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser or distributor about this.

The ongoing charge is an estimate based on actual costs. It excludes portfolio transaction costs which do affect returns.

For more information about charges, including potential capping of expenses, please see the 'Expenses' section in the prospectus and the latest annual or semi-annual reports, available at capitalgroup.com/ international.
