Calvert Global Equity Fund - I

ISIN: LU2714840035, Base Currency: USD

A fund of Morgan Stanley Investment Funds

The fund is managed by MSIM Fund Management (Ireland) Limited, part of the Morgan Stanley group.

OBJECTIVES AND INVESTMENT POLICY

Objective

- To provide high returns, consistent with reasonable risk, by investing in companies that exhibit sound management of ESG characteristics.

Main Investments

- At least 70% of the Fund's investments will be in company shares.

Investment Policy

- To invest in high or improving quality companies with secular growth characteristics, high or improving returns on invested capital, sustainable competitive advantages, durable balance sheets, and a strong capital allocation record.
- The Investment Adviser receives non-discretionary investment advice from Calvert Research and Management. The Fund utilises a quantitative and qualitative ESG research process that applies the Calvert Principles for Responsible Investment (the "Calvert Principles"). Companies are assessed for their management of ESG risks and opportunities and are deemed either eligible or ineligible for investment.
- The Investment Adviser and Calvert may seek to engage company management on financially material ESG issues identified through fundamental and ESG research.
- The Fund will measure its performance against the MSCI All Country World Index (the "Benchmark"). The Fund is actively managed and is not designed to track the Benchmark. Therefore, the management of the Fund is not constrained by the composition of the Benchmark.

Other Information

- The Fund may invest up to 30% of its assets in equity securities that do not meet the above criteria provided such securities are deemed eligible for investment according to the Calvert Principles. The Fund may invest up to 10% of its assets in China A-Shares via Stock Connect.
- The Fund may invest in units/shares of other collective investment schemes including the Company's Funds and open-ended ETFs.
- The Fund may invest in derivatives, financial instruments which take their value indirectly from other assets, for both investment and efficient portfolio management purposes. They rely on other companies to fulfil contractual obligations and carry more risk. Refer to the prospectus ('Financial Derivative Instruments' section) for more details.
- Income will be included in the value of your shares.

Buying and selling shares

- Investors may buy and sell shares on any Luxembourg business day.

RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in company shares and the fund's simulated and/or realised return has experienced high rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The Fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the Fund to financial loss.
- Sustainability factors can pose risks to investments, for example: impact asset values, increased operational costs.
- There may be an insufficient number of buyers or sellers which may affect the Fund's ability to buy or sell securities.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	2.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.89%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges based on the current expense policy of the Fund. It excludes almost all costs of dealing in the Fund's underlying investments. The Company's annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year.

The fund may charge a fee on purchases, sales or switches if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the Charges and Expenses section of the prospectus.

PAST PERFORMANCE

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- The fund was launched in 2023.
- Past performance has been calculated in USD.
- The Fund measures its performance against the MSCI All Country World Index
