

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Parametric Commodity Fund - IX

ISIN: LU3359550723, Base Currency: USD

A fund of Morgan Stanley Investment Funds

The fund is managed by MSIM Fund Management (Ireland) Limited, part of the Morgan Stanley group.

OBJECTIVES AND INVESTMENT POLICY

Objective

- To provide a return equivalent to the performance of the Barclays Commodity Index Series (the "Index"), excluding fees.

Main Investments

- The Fund, which is passively managed, seeks to achieve its objective primarily through the use of one or more excess return swaps (the "Swap") providing the Fund with synthetic exposure to the Index.

Investment Policy

- The Fund will hold, physically, assets that are used to finance the Swaps. However, if this is deemed to be the most efficient way to track the Index, the Fund may also invest to a limited extent in units/shares of other collective investment schemes, including including the Company's Funds and open-ended exchange traded funds.
- The Index is designed to reflect the performance of a diversified portfolio of commodity futures contracts and consists of a diverse range of index commodity components across different commodity sectors, including Agriculture, Energy, Industrial Metals, Precious Metals, Livestock. The Index is then constructed based on a system of target weights and rebalancing thresholds.
- The weighted average duration of the Fund will normally be less than 1 year, although this may be higher under certain market conditions. Full details of the Index including the Index components can be found in the following weblink: (morganstanley.com/im/publication/msinvf/material/msinvf_parametriccommodity_en.pdf).

Other Information

- The Fund may invest in derivatives, financial instruments which take their value indirectly from other assets. They rely on other companies to fulfil contractual obligations and carry more risk. Refer to the prospectus ('Financial Derivative Instruments' section) for more details.
- Income may be paid in cash or additional shares.

Buying and selling shares

- Investors may buy and sell shares on any day that is a business day in both Luxembourg and the US

RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it is exposed to commodities and the fund's simulated and/or realised return has experienced high rises and falls historically.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of financial derivative instruments are highly sensitive and may result in losses in excess of the amount invested by the Sub-Fund.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- The prices of commodities can experience greater volatility than other asset classes (such as equities and fixed income) in certain market conditions. Investments in commodities can therefore be riskier than other types of investment.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

| | |
|---------------------|-------|
| Entry charge | 2.00% |
| Exit charge | 0.00% |

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

| | |
|------------------------|-------|
| Ongoing charges | 0.74% |
|------------------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|------------------------|----------------|
| Performance fee | Not applicable |
|------------------------|----------------|

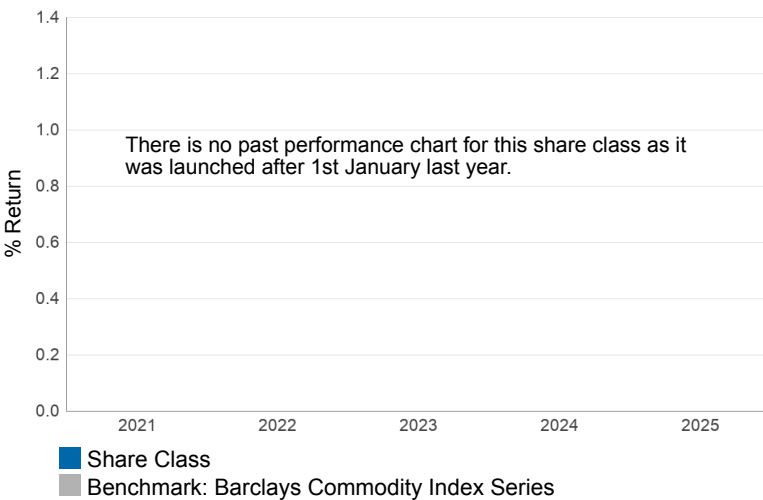

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges based on the current expense policy of the Fund. It excludes almost all costs of dealing in the Fund's underlying investments. The Company's annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year.

The fund may charge a fee on purchases, sales or switches if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the Charges and Expenses section of the prospectus.

PAST PERFORMANCE

- This share class was launched in 2026. The fund was launched in 2024.

PRACTICAL INFORMATION

- Shares can also be bought in EUR
- The depositary is J.P. Morgan SE, Luxembourg Branch.
- Current prices of shares and other information can be obtained at www.morganstanleyinvestmentfunds.com or www.fundinfo.com.
